## PREFACE

---

It has been generally recognized by classical scholars of the present day that a knowledge of epigraphy forms an essential part of the equipment of a teacher of the classics, and that the subject itself has become so important as to justify its introduction, in elementary form at least, into the curriculum of undergraduate studies. Notwithstanding this general recognition, however, no work in the English language which would serve as an introduction to the study of Latin inscriptions has up to the present time been published. It is to supply this want that the following pages have been written.

The purpose determining the plan of the work has been to combine abundant introductory and explanatory matter with numerous examples for illustration and for practice in reading. The inscriptions, with the single exception of those from movable articles, have been printed in the type ordinarily used for Latin texts, since this form has been considered more satisfactory than any attempt at a typographical imitation of the original letters. Numerous photographic reproductions have been made from the fac-similes of Ritschl's *Priscae Latinitatis Monumenta Epigraphica* and from the *exempla* in Hübner's *Exempla Scripturae Epigraphicae*, in order to impress in some degree upon the student the original form and appearance of the inscription.

The debt of the author to the works of other writers is of necessity very great. Whenever another's writings have been directly used,

acknowledgment has been made in the footnotes; but for assistance obtained from many other sources not noted, the author wishes here to express himself as deeply grateful.

The *Cours d'Épigraphie Latine* of Professor René Cagnat has been of the utmost service and has, in fact, formed the basis of this work in many particulars. The author has also relied for much of his information upon the Prolegomena of Professor Emil Hübner's *Exempla Scripturae Epigraphicae* and upon the same scholar's article, *Römische Epigraphik* in Iwan Müller's *Handbuch der Klassischen Altertumswissenschaft*, vol. i., 1892. To Professor Hermann Dessau the author is indebted for material obtained from his *Inscriptiones Latinae Selectae*, vol. i., and also for his kind words in regard to the preparation of this volume.

In passing this book through the press the author has been greatly aided by his friends and associates.

Professor Harry Thurston Peck has read much of the proof and has made possible the author's task by his encouragement and by his advice, so valuable because of wide experience.

Dr. Nelson Glenn McCrea has read the entire proof and has in many instances, in connection with this kindly service, given renewed proof of his scholarship. Mr. George Olcott, a Fellow of this College, has been of most valuable service, inasmuch as he has prepared and verified the Chronological List of the Roman Emperors. The index is also the work of Mr. Olcott.

The author earnestly hopes that this volume will prove to many the open door to a subject so remarkable in its influence upon classical and archaeological study and at the same time so interesting and attractive in its pursuit.

## INTRODUCTION

---

To a beginner in the study of Epigraphy, the most important matters for consideration are the works which provide material for research, and the method which should be followed in approaching this material.

The great storehouse of Latin inscriptions is the *Corpus Inscriptionum Latinarum*,<sup>1</sup> which is indispensable for advanced study in this subject; but notwithstanding the importance of this great work, certain minor collections of inscriptions are more useful to the elementary student and for class-room use.

The first of these is the valuable *Collectio* of Orelli and Henzen :

*Inscriptionum Latinarum Amplissima Collectio.* Io. C. Orellius.  
2 vols. Zurich, 1828. Vol. III. is by W. Henzen :

*Volumen Tertium Collectionis Orellianae supplementa emendationesque exhibens.* Ed. Guil. Henzen. Zurich, 1856.

The last volume contains indices to the entire work.

The most serviceable collection of inscriptions for general use is :

*Exempla Inscriptionum Latinarum in usum praecipue academicum.* Gustavus Wilmanns. 2 vols. Berlin, 1873.

This work contains inscriptions conveniently classified, with Latin notes; also excellent indices.

<sup>1</sup> C. I. L. *Corpus Inscriptionum Latinarum Consilio et Auctoritate Academiae Litterarum Regiae Borussicae Editum.* See page 6.

For those who are unable to consult the *Corpus Inscriptionum*, a more recent work will provide well-selected inscriptions in greater number than the collection just mentioned. This collection is based upon material gathered by William Henzen.

*Inscriptiones Latinae Selectae.* Ed. Hermannus Dessau. Vol. I. Berlin, 1892.

For the study of early Latin, the following will be found to be serviceable:

*Dialectorum Italicarum Aevi Vetustioris Exempla Selecta in usum scholarum.* Vol. I. Dialecti Latinae Priscae et Faliscae Exempla Selecta. Pars 1. Engelbertus Schneider. Leipzig, 1886.

*Fragments and Specimens of Early Latin.* J. Wordsworth. Oxford, Clarendon Press, 1874.

*Remnants of Early Latin.* F. D. Allen. Boston, 1880.

For a presentation of the inscriptions themselves the student is referred to two great works, one of which gives inscriptions in facsimile, the other by "exempla."

The first of these is the large folio of F. Ritschl, containing inscriptions from the earliest period down to the beginning of the Empire. It is regularly denoted by the letters *P. L. M. E.*

*Priscae Latinitatis Monumenta Epigraphica ad archetyporum fidem exemplis lithographis repraesentata.* Ed. Fr. Ritschilius. Berlin, 1862.

There are five supplements, which were originally published at Bonn in 1862. They are also found in Ritschl's *Opuscula Philologica*, vol. IV. 1878.

The second of these is:

*Exempla Scripturae Epigraphicae Latinae a Caesaris dictatoris morte ad aetatem Justiniani.* Ed. Aem. Hübner. Berlin, 1885.

In this book there is a complete introduction in Latin, and over twelve hundred inscriptions with commentary. As the title indicates, this *Exempla* is a complement to the work of Ritschl, just mentioned.

As introductory to the study of Inscriptions, the student is referred to two short works of Emil Hübnér: (1) The article entitled "Roman Inscriptions" in the *Encyclopaedia Britannica*, vol. XIII. 9th ed. This will form excellent preliminary reading. A résumé of the subject is presented in a form easily understood. (2) The article "Römische Epigraphik" in the *Handbuch der Klassischen Altertumswissenschaft*, Iwan Müller, vol. I. 1886, 2d ed. 1892. This provides a bibliography of the collection of inscriptions and an introduction to the subject more complete than the article in the *Britannica*.

This last work is also published separately.

The only complete introduction to Latin Epigraphy is:

*Cours d'Épigraphie Latine.* René Cagnat. 1st ed., Paris, 1886.  
2d ed., Paris, 1890.

This is an exceedingly useful book.

A little book abounding in excellent suggestions, containing inscriptions in illustration, is:

*Anleitung zum Lesen, Ergänzen und Datiren Römischer Inschriften.* Karl Bone. Trèves, 1881.

This work refers in the main to Rhenish inscriptions.

For the study of Christian Inscriptions:

*Manuel d'Épigraphie Chrétienne d'après les Marbres de la Gaule.*  
Edmond Le Blant. Paris, 1869.

Also, by the same author:

*L'Épigraphie Chrétienne en Gaule et dans l'Afrique.* Paris, 1890.

For historical inscriptions, illustrating the history of the early empire:

*Latin Historical Inscriptions.* G. McN. Rushforth. Oxford, 1893.

## PERIODICAL LITERATURE

To study inscriptions properly, one must keep pace with the growth of the subject, as new material is constantly being added. To accomplish this purpose, familiarity with periodical literature must be maintained. The following are the principal periodicals bearing upon this subject:

- 1) A running supplement to the *Corpus Inscriptionum Latinarum* is published at intervals.  
*Ephemeris Epigraphica* (Ephem. Ep.). Vols. I.–IX. Berlin, 1892.
- 2) *Mitteilungen des Kaiserlichen Deutschen Archaeologischen Instituts, Römische Abteilung*. Loescher & Co. Rome, 1886.  
This is known also as:  
*Bullettino dell' Imperiale Istituto Archeologico Germanico*.
- 3) *Hermes, Zeitschrift für Klassische Philologie*. Kaibel and Robert. Berlin, 1866.
- 4) *Rheinisches Museum für Philologie*. Ribbeck and Bücheler. Frankfurt, 1833. Neue Folge, 1842.
- 5) *Jahrbücher des Vereins von Altertumsfreunden im Rheinlande*. Bonn, 1842.
- 6) *Die Westdeutsche Zeitschrift für Geschichte und Kunst*. Trèves, 1882.
- 7) *Archäologisch-epigraphische Mitteilungen aus Oesterreich-Ungarn*. Vienna, 1877.
- 8) *Revue Épigraphique du Midi de la France*. A. Allmer. 7 vols. Vienna, 1878–92.
- 9) *Revue Archéologique*.<sup>1</sup> Paris, 1884.
- 10) *Mélanges d'Archéologie et d'Histoire Publiés par l'École Française de Rome*. Paris, 1881.

<sup>1</sup> For recent discoveries see *Revue des publications épigraphiques relatives à l'antiquité romaine*. R. Cagnat. This forms an appendix to the *Revue Archéologique*; also appears annually as *L'Année Épigraphique*, dating from the year 1888.

- 11) *Bulletin de Correspondance Hellénique*. 1877.  
This is the organ of the French School at Athens.
- 12) *Notizie degli Scavi di Antichità Comunicate alla Reale Accademia dei Lincei*.<sup>1</sup> Rome, 1890.
- 13) *Museo Italiano d' Antichità Classica*. By Domenico Comparetti. Rome, 1885-90. Vols. I.-III.  
This publication was discontinued with vol. III., and was succeeded by the *Monumenti Antichi*.
- 14) *American Journal of Archaeology, and of the History of the Fine Arts*. Baltimore, 1885.
- 15) For Christian Inscriptions:  
*Bullettino d' Archeologia Cristiana*. G. B. de Rossi. Rome, 1863.
- 16) *Dizionario Epigrafico di Antichità Romane*. Hector De Ruggiero. Rome, 1886. Thirty-two fasciculi have appeared.

#### BIBLIOGRAPHY OF THE COLLECTIONS OF LATIN INSCRIPTIONS

To obtain a knowledge of the history of Latin Epigraphy, the student is referred to the following:

J. C. ORELLI: *Index Praecipuorum Librorum Epigraphicorum aliorumque inscriptiones Latinas continentium*.

This is found in the first volume of the *Inscriptiones Latinae* of Orelli, page 21, and in the third volume by Henzen, page xv.

R. DE LA BLANCHÈRE: *Histoire de l'Épigraphie Romaine, redigée sur les notes de Léon Renier* in the *Revue Archéologique*, nouv. ser. VIII. 1886, page 46. Also in a separate volume, Paris, 1887.

*Corpus Inscriptionum Latinarum*. Prefaces to vols. II.-XIV.

G. B. DE ROSSI: *Inscriptiones Christianae Urbis Romae Septimo Saeculo Antiquiores*. Prefaces to vols. I.-II.

<sup>1</sup> Inscriptions of the city of Rome also appear in the *Bullettino della Commissione Archeologica Comunale di Roma* from 1872. (Bull. Com.)

EMIL HÜBNER: 1. *Bibliographie der Klassischen Altertumswissenschaft*. Berlin, 1889. Part II., page 354.

2. Article "Römische Epigraphik" in the *Handbuch der Klassischen Altertumswissenschaft*. Iwan Müller. Vol. I. 1886. 2d ed. 1892.

J. P. WALTZING: *Recueil Général des Inscriptions Latines, et l'Épigraphie Latine depuis 50 ans*. Louvain, 1892.

This work gives an account of the *Corpus Inscriptionum*, and a bibliography of Latin inscriptions.

### CORPUS INSCRIPTIONUM LATINARUM

This great collection of Latin inscriptions, published under the supervision of the Royal Prussian Academy at Berlin, is arranged on a geographical basis in fifteen volumes. Each of these volumes with the exception of the first, in which are published the inscriptions dating before the death of Caesar, is assigned to the inscriptions derived from a certain portion of the Roman world. The general plan may be seen from the following:

VOLUMEN I. Inscriptions dating before the death of Caesar. Editio prima, 1863 (out of print). Editio altera, Pars prior, 1893. Tabulae Lithographae. Priscae Latinitatis Monumenta Epigraphica, 1862.

VOLUMEN II. Inscriptions of Spain, 1869.  
SUPPLEMENTUM, 1892.

VOLUMEN III. Inscriptions of Asia (Egypt), of the Greek Provinces of Europe, of Illyricum.

*Pars Prior*: Inscriptions of Egypt and Asia, of the Greek Provinces of Europe, of Illyricum. Parts I.-V. 1873.

*Pars Posterior*: Inscriptions of Illyricum, also Monumentum Ancyranum, Edict of Diocletian de Pretiis Rerum, Diplomata Militaria, Wax Tablets of Dacia. Parts VI.-VII. 1873.

SUPPLEMENTI *Fasciculus Primus*: Inscriptions of the Greek Provinces of Europe. 1892.

SUPPLEMENTI *Fasciculus Secundus*: Inscriptions of Illyricum. Parts I.—III. 1892.

SUPPLEMENTI *Fasciculus Tertius*: Inscriptions of Illyricum. Edict of Diocletian. Constitutions of the Emperors (*Diplomata militaria*). Parts IV.—VII. 1893.

VOLUMEN IV. *Inscriptiones Parietariae* of Pompeii, Herculaneum, and Stabiae. 1871.

SUPPLEMENTUM.

VOLUMEN V. Inscriptions of Cisalpine Gaul.

*Pars Prior*: The tenth regio of Italy, Venetia and Iustria. 1872.

*Pars Posterior*: The eleventh (Liguria) and ninth (Gallia Transpadana, Alpes Cottiae et Maritimae) regiones of Italy. 1887.

VOLUMEN VI. Inscriptions of the City of Rome.

*Pars Prima* 1876, *Pars Secunda* 1882, *Pars Tertia* 1886, *Pars Quarta* (1895), *Pars Quinta*, containing *inscriptiones falsae*, 1885, *Pars Sexta*, Indices (in preparation).

VOLUMEN VII. Inscriptions of Britain. 1873.

VOLUMEN VIII. Inscriptions of Africa.

*Pars Prior*: Proconsular Africa, Numidia. 1881.

*Pars Posterior*: Mauretania. 1881.

SUPPLEMENTI *Fasciculus Prior*. 1891.

SUPPLEMENTI *Fasciculus Alter*. 1894.

VOLUMEN IX. Inscriptions of Calabria, Apulia, Samnium, Sabini, Picenum. 1883.

VOLUMEN X. Inscriptions of Bruttium, Lucania, Campania, Sicilia, Sardinia.

*Pars Prior*: Bruttium, Lucania, Campania. 1883.

*Pars Posterior*: Sicilia, Sardinia. 1883.

VOLUMEN XI. Inscriptions of Aemilia, Etruria, Umbria.

*Pars Prior*: Aemilia, Etruria. 1888.

*Pars Posterior*: Umbria (in press).

The Accademia dei Lincei publishes supplemental volumes of inscriptions of Italy under the title *Corporis I. L. Supplementa Italica, consilio et auctoritate Academiae regiae Lynceorum edita*:

Fasc. I., Additamenta ad vol. V. Galliae Cisalpinae. Ed. Hector Pais, Rome. 1888.

VOLUMEN XII. Inscriptions of Gallia Narbonensis. 1888.

VOLUMEN XIII. Inscriptions of the Three Gauls and Two Germanies.

VOLUMEN XIV. Inscriptions of Ancient Latium. 1887.

VOLUMEN XV. Inscriptions of the City of Rome, Instrumentum Domesticum.

*Pars Prior*: Lateres. 1891.

*Pars Posterior* (in press).

The contents of the several volumes may be considered under three divisions.

I., Introductory Matter; II., Inscriptions; III., Indices and Tabulae.

#### I. INTRODUCTORY MATTER

At the beginning of each volume there is an *Index Auctorum*, which is an alphabetical list of the authors referred to throughout that volume, with more or less extensive biographical and bibliographical comment.

#### II. INSCRIPTIONS

A. *False Inscriptions* (indicated by an asterisk) are placed at the beginning of this division, and are arranged topographically, according to cities and towns, with a paging and numbering of their own. The *falsae* of vol. VI. are collected in *Pars Quinta*, and are arranged according to the names of the authors.

B. *Valid Inscriptions* are classified in three divisions.

1. Inscriptions in general.
2. Those connected with *Viae Publicae*.
3. *Instrumentum Domesticum*.

The main body of inscriptions is arranged on geographical and topographical principles, by provinces as in vol. II., or by *regiones* as in vols. V., IX., X., with subdivisions according to the cities and towns. The several more important sections *capita*, e.g. those assigned to provinces, are introduced by historical notes, and by a chronological list of manuscripts and other works containing the inscriptions of the district, together with biographical comment and estimates of the epigraphic authority of the various editors. The character of the inscriptions under the title *Instrumentum Domesticum*, can be seen from the following subdivisions from vol. XII.:

*Tegulae, Lucernae, Amphorae, Dolia, Pelves, Vascula, Aequipondia, Statu-  
colorum formae cretaceae, Signacula ex aere, Sigilla medicorum oculariorum,  
Anuli, Gemmae, Pondera, Tesserae, Vasa vitrea, Supellex aurea argentea, etc.,  
Massae plumbeae, Fistulae plumbeae.*

### III. INDICES AND TABULAE

The Indices contain a classification of the contents of the texts of the inscriptions, the scope of which may be appreciated by the following specimen index from vol. XII.:

<i>Nomina virorum et mulierum.</i>	<i>Provinciae, civitates, pagi, vici, fluvii,</i>
<i>Cognomina virorum et mulierum.</i>	<i>montes, praedia, rivi, similia.</i>
<i>Imperatores.</i>	<i>Res municipalis.</i>
<i>Reges.</i>	<i>Collegia.</i>
<i>Consules aliaeque anni determina- tiones.</i>	<i>Artes et officia privata.</i>
<i>Honores alii publici populi Romani.</i>	<i>Carmina.</i>
<i>Res militaris.</i>	<i>Litterae singulares notabiliores.</i>
<i>Dei Deaeque et res sacra.</i>	<i>Grammatica quaedam.</i>
<i>Populus Romanus, Tribus Romanae.</i>	<i>Notabilia varia.</i>
	<i>Recensus locorum recentiorum, by Kiepert.</i>

Indices are at this time provided with vols. I., II., III., IV., V., VII., VIII., IX., X., XII., XIV.

*Tabulae.*

Maps prepared by H. Kiepert, giving the localities from which the inscriptions are derived, with names both ancient and modern, are placed at the end of vols. II., III., IV., V., VII., VIII., IX., X., XII., XIV.

## GENERAL ECONOMY

*Inscriptions Admitted.*

All Latin inscriptions engraved upon durable materials, such as stone and bronze, and also those cut or impressed upon small movable articles *instrumentum*, no matter of what character or purpose, are included in this work. Coins, however, are given a place in the first volume, but are elsewhere excluded.

The work, as indicated by its title, is limited in its scope to *Latin* inscriptions, those of other languages, however closely related to Latin antiquities, being as a rule excluded.

Bilingual inscriptions in Greek and Latin, however, are given in their complete form, and certain Greek inscriptions appear among those of Pompeii (vol. IV.), and of England (vol. VII.). The limit of time as set by Mommsen in his letter to Borghesi (vol. X., p. vii), is the end of the sixth century, inasmuch as the *Fasti Consulares* reach almost to that period (541). In all cases of uncertainty as to date the inscriptions are accepted.

Christian inscriptions<sup>1</sup> are admitted, and are marked in the indices with a cross.

*Criticism of Inscriptions.*

The great object in the criticism of inscriptions has been to determine their authenticity, for it early became known that false inscriptions had been composed, so closely resembling those of antiquity that even the most skillful critics were deceived.

<sup>1</sup> *Christianos titulos appello inscriptiones eas quae a Christianis religionis causa positae sunt.* De Rossi, *Inscriptiones Christianae Urbis Romae.* Vol. I. p. xxxvii. See bibliography for special works on Christian Inscriptions.

The first consideration in determining the validity of an inscription which exists only in a copy is the standing of the copyist, or of the author publishing it. The names of Ligorius and Pratilli are in themselves sufficient to condemn the inscriptions published by them alone.

The standing of the various authors can be learned from the *Index Auctorum* attached to each volume.<sup>1</sup> In the *C. I. L.*, when the unreliableness of an author has been the reason for the rejection of an inscription, the fact is indicated by some statement; as *quamquam fortasse genuina, suspecta tamen utpote a tali auctore solo relata* II. 432\*, or *inter titulos suspectos releganda erant necessario propter auctorem fide omnino indignum* II. 454\*; also by simply attaching to an inscription the name of a well-known falsifier, e.g. Ligorius or Pratilli, X. 406\*.

The science of palaeography is useful in the criticism of inscriptions as defining certain rules and usages, a violation of which leads to a suspicion as to the validity of the inscription. This method of criticism has to do with the external presentation, and is concerned with the types of letters, the marks of punctuation, the forms of numerals, etc.; also, if the inscription can be seen, with the nature of the engraving.

Such a criterion of criticism is indicated in the *C. I. L.*, thus: *puncta rotunda pessime facta ad imas litteras apposita sunt*, XII. 145\*; also *titulum recentem esse cum litterarum forma tum spatia inter vocabula relicta punctis deficientibus demonstrant*, XII. 305\*, or *vidi ego et medio aevo incisam intellexi* X. 143\*, or *descripsi et damnavi* V. 75\*.

The last method of criticism has to do with the text itself. Violations of epigraphic laws, of established principles of the Latin language, or of well authenticated theories as regards Roman antiquities, should arouse suspicion as to the authenticity of the inscription or any portion of the same.

In X. 52\*, for instance, the *tribus* does not hold its proper place; in X. 565\* there is irregularity in the use of the *nomina* and *prae-*

<sup>1</sup> *Non tam inscriptiones singulas in iudicium vocavi quam singulos auctores.* Mommsen, *C. I. L.* IX. and X. p. xi.

*nomina*; in V. 40\* a *munus senatorium* is inserted among the equestrian *munera*, thus violating rules of the *cursus honorum*; in X. 629\* Sylvanus is termed *divus*, and not *deus*, and in X. 506\* appears the irregular expression *sacra aedes*.

Inscriptions have been invented to prove certain statements of classical authors, to account for the name of a town, or determine some disputed point in Roman antiquities or mythology, e.g. XII. 188\*, where the comment reads *facta ni fallor ad Annecy nomen explicandum*. Antonini held that Paestum had been a municipality, and based his theory on two inscriptions, X. 109\*, 110\*. Pratilli declared that amphitheatres were consecrated to Hercules Victor, and used for this theory an inscription of the amphitheatre of Teanum X. 607\*.

The unreliability of the source determines at once the authenticity of the inscription, when such striking support to a chosen theory is so readily supplied.

Other inscriptions, containing historical names and allusions to events of history, were undoubtedly composed for various purposes. Cyriacus shows an inscription from a statue in honor of Cicero, dedicated by the people of Arpinum, X. 711\*. Antonini publishes an epitaph of a tomb raised to a son by M. Lamponius, general of the Lucanians in the Social War, X. 91\*; the comment here is *ut M. Lamponii in bello sociali Lucanorum ducis gens in lapidibus quoque reperiretur*.

#### *Methods of Presentation.*

Preliminary to the text of the inscription, information is given as to where it was found, its location in antiquity, and at the present time. In some cases the nature of the monument is described, as *basis statuae, tabula marmorea*. The text itself is printed in Roman capitals, even if the original was in cursive letters. Imperfect letters are represented by type broken in such way as to indicate what remains. Ligatures are shown, also accents and punctuation marks of various forms. The lines of the inscription are reproduced in the text, but the words are always separated, even if they are united in the original. With the text is also given a brief

description, printed in small script, of any design appearing on the monument. Thus with the inscription on a sarcophagus,

C. I. L. XII. 1537.	<i>mulieris imago cum volumine in manibus in clipeo quem duo genii sustinent,</i>	<i>pueri imago cum tunica laticlavia et volumine</i>
	<i>pastor cum grege.</i>

Any confusion which might arise through the use of similar characters for different purposes is obviated by suitable information in the commentary.

After the text of the inscription there follows the *testimonium* of the eyewitness and the editor, e.g. *descripsi et recognovi, vidit* I. B. de Rossi, Holstenius *descripsit*; next the principal authors and reviews providing the inscription; and finally the *lectiones variae*, with authorities for the same.

If the abbreviations are difficult to understand, or if the inscription is much mutilated, a transcript is often given in cursive letters. In this transcript square brackets indicate where substitutions are made for letters erased or corrected, while parentheses show the filling out of abbreviations. Where nothing can be supplied, the lacuna is indicated by points . . . . equal in number to the missing letters. Vertical lines show the limits of the lines of the text.

## CHAPTER I

### THE LATIN ALPHABET (HISTORICAL)

FOR its civilization Rome was greatly indebted to the Greeks. Its philosophy was transplanted from Greece; its literature was an imitation of the literature of the same people. The resemblance between the alphabets of the people of Italy and those of the Greeks proves that for the source of the Italic alphabets we must look in a similar direction. A careful study shows that it is to the Chalcidian colonies, such as settled Cumae on the west coast of Italy and Naxos in Sicily, that the Italic alphabets are to be traced.

The origin of the Greek alphabet is the Phoenician. Tradition, of however little authority, supports this theory. Herodotus, V. 58-59, states that letters were introduced into Greece by Cadmus, a Phoenician who came to Boeotia. Pliny, *N. H.* VII. 56 (57), 191, repeats a similar tradition, adding that Cadmus introduced sixteen letters,  $\alpha$ ,  $\beta$ ,  $\gamma$ ,  $\delta$ ,  $\epsilon$ ,  $\iota$ ,  $\kappa$ ,  $\lambda$ ,  $\mu$ ,  $\nu$ ,  $\omicron$ ,  $\pi$ ,  $\rho$ ,  $\sigma$ ,  $\tau$ ,  $\upsilon$ , and that Palamedes and Simonides each supplied four more. Tacitus, *Annales*, XI. 14, offers an interesting theory, tracing Greek letters through the Phoenician back to the Egyptians, assigning their introduction to Cadmus or Cecrops or Palamedes, but the addition of new letters to Simonides.

The early Greek and Phoenician characters show a marked resemblance in form, and stand in similar alphabetical order. Knowledge of the order of the Phoenician letters is obtained by a reference to the order of derived alphabets, such as Hebrew. The order of the Greek alphabet is known from an *abecedarium* scratched on a

vase found at Formello near Veii in 1882.<sup>1</sup> The civilization of the Greeks is younger than that of the Phoenicians, and the names of the letters are Semitic, not Greek; hence the inference that the Greek alphabet is Semitic in its origin, derived from the Phoenician.

The Phoenician alphabet was not in all respects adapted to the phonetic requirements of the Greek language. First of all, there were no letters to represent vowel sounds. This want was supplied by the use of *aleph*, *he*, *yod*, *ayin* to represent *a*, *e*, *i*, *o*. *Vau* *F* may have supplied the *u*, the semivowel, but a new sign was invented to provide the vowel *u*, *V* or *Y*. There appears to be a resemblance between the *Vau* of the Mesha (Moabite) stone and the Greek *Y* *upsilon*, but Kirchhoff believes this likeness merely accidental.

The sibilants abounded in the Phoenician alphabet, and were beyond the needs of the Greeks. In consequence of this, much confusion has arisen as to the history of the Phoenician sibilants in the blending of the two alphabets. These Phoenician letters were *zayin* = *dz*, *samekh* = *s*, *tsāde* = *ts* or *ss* (lingual), and *shin* = *sch* (palatal). Of these, *tsāde* appears to suggest the name *zēta*, while *zayin* resembles it in form and holds a similar place. Some declare that *zēta* obtains its name through analogy owing to its proximity to *zēta* and *θēta*. *Samekh* seems to have supplied the sound of *s* and perhaps

COLUMN II. Early Phoenician letters traced from the "Baal Lebanon" inscription as shown by fac-simile in *Corpus Inscriptionum Semiticarum*. This inscription is dated by some as early as the tenth century B.C.

COLUMN III. Early Phoenician letters traced from the fac-simile of the Mesha Stone as found in *Die Inschrift des Königs Mesa von Moab*. R. Smend und A. Socin. Freiburg, 1886. This inscription is placed by scholars in the ninth century B.C.

COLUMN IV. Greek alphabetic characters from representation of the Abu Simbel Inscription as found in *Inscriptiones Graecae Antiquissimae*, Roehl, No. 482. This inscription represents the Ionian and so the Eastern Greek alphabets and may be placed in the early part of the sixth century B.C.

COLUMN V. Letters taken from Euboean inscriptions of Styra and Chalcis, as shown in *Inscriptiones Graecae Antiquissimae*, Roehl, pp. 87-103; and from Kretschmer's *Griechischen Vaseninschriften*, pp. 62-72. This Euboean alphabet represents the West Greek alphabets.

its name, while *shin* has given the form  $\varsigma$  or  $\Sigma$  of the Greek *sigma*. In some Ionic inscriptions *samekh* is found equivalent to  $\xi$ . Again, there are inscriptions in which the sign for *sigma* is M, the Phoenician *tsade*, and it has been suggested that the Greeks had in some alphabets a fourth sibilant *san* of this form M equal to *s*, while others had *sigma*  $\varsigma$ ,  $\Sigma$ .

Another difference between the Greek and Phoenician alphabets consists in the use, in the former, of additional characters to represent *ps* or *phs*, *kh* and *ph*. In the early inscriptions, such as those of Thera, Melos, and Creta, these phonetic values are expressed by the actual combination of the already existing letters.<sup>1</sup> The appearance of the new characters X (+),  $\Phi$ ,  $\Downarrow$  ( $\Psi$ ) in the alphabets of Chalcis and the Chalcidian colonies leads to the belief that they were introduced before the eighth century B.C.<sup>1</sup> Various theories have been proposed as to the origin of these letters, but none has been found worthy of acceptance. W. Deecke<sup>2</sup> considers them Cypriote, arguing from the phonetic values of Cypriote syllabic characters,  $\Upsilon = u$ ,  $\Psi = pu$  and *phu*,  $\ast = ku$  and *khu*,  $\rho\omega$ ,  $\Psi$ ,  $\Psi = se$ .

Kirchhoff has classified the Greek alphabets prior to 403 B.C. (the archonship of Euclides) in two divisions, —

1) The eastern alphabets, which are those of the Aegean Islands, Asiatic coast towns, and certain places in the mainland of Greece, as Corinth, Argos, Attica.

2) The western alphabets, which belong to the Euboean cities Chalcis and Eretria, to Sicily and the Greek colonies in Italy; also, on the mainland of Greece, to Boeotia, Locri, Thessaly, Western Peloponnesus.

The order and value of the purely Greek letters, those newly added, determine the difference between these two classes. The eastern alphabet shows the order  $\Phi$ , X,  $\Downarrow$ , with X = *ch* and  $\Downarrow = ps$ . The sound *ks* ( $\xi$ ) is expressed by  $\Xi$  or  $\text{H}$  *samekh* seen between N and O.

The eastern alphabet became the recognized Ionic alphabet after certain changes had taken place. The *chēth* H used at first as *spiritus asper* became long  $\bar{\epsilon}$ . The O was differentiated to produce  $\Omega = \bar{o}$ ,

<sup>1</sup> Kirchhoff, *Studien*<sup>4</sup>, p. 172.

<sup>2</sup> Baumeister, *Denkmäler*, p. 51.

and placed in the last position. The use of the *F digamma* and the  $\varphi$  *koppa* as letters had ceased, and the  $F = 6$ , and the  $\varphi = 90$ .

The western division retained the  $\Xi$  (or  $\boxplus$  in the Formello alphabet) as a numeral in the same way that  $F$  and  $\varphi$  were used as numerals in the Ionian alphabet. The order of the letters was  $X, \Phi, \downarrow$ , with  $X = ks$ ,  $\Phi = ph$ ,  $\downarrow = ch$ . For  $\Psi = ps$ ,  $\pi\sigma$  or  $\phi\sigma$  was used. Besides these peculiarities,  $C, D, \vee$  are found for  $\Gamma, \Delta, \Lambda$ , also  $H$  with the value of *spiritus asper*, also the older form of *mu*,  $\mu$ .

The different Greek colonies entering Italy brought with them their own alphabetic forms, but the Chalcidian colonies provided the alphabets for the people of Italy probably previous to 600 B.C. The proof of this derivation rests on the similarity in the forms  $\vee$  and  $C$  (*gamma*) in the Italic and Chalcidian alphabets, for the appearance of these characters in the same alphabet marks it as Chalcidian.

The Italic alphabets arrange themselves in two classes. The one class contains the Etruscan, the Umbrian, and the Oscan; the other the Latin and the Faliscan. The distinguishing character is the form  $\text{8}$  found in the first class with sound of  $F$ .<sup>1</sup> The Latin and Faliscan not possessing this letter used  $F$  (*vau*) in place of  $\Phi$  disregarded.

The Etruscan alphabet was found north of the Tiber, the Oscan in Campania, the Umbrian east of the Apennines, the Latin and the Faliscan between the Etruscan and the Oscan.

*Etruscan.* — This is evidently a Chalcidian alphabet, since it shows the use of  $\downarrow$  and  $\text{3}$ . The  $X$ , which in the Chalcidian alphabet =  $ks$ , is in the Etruscan a numeral. The *tenues* were originally all in use.  $K$  is at first found, then disappears, while  $\text{3}$  supplies its place, giving up the value of *g, media*. The other *mediae*,  $B$  and  $D$ , are not found in the oldest inscriptions. The  $\varphi$  is found only in the earliest remains, and soon falls out of use. There are two forms of the sibilant,  $M$  and  $\text{>}$  or  $\text{2}$ , used side by side. The prevailing form in the inscriptions is  $\text{2}$ ;  $\text{>}$  seldom occurs. Two forms  $\text{D}$  and  $\text{9}$  with

<sup>1</sup> For the *f* sound, the bilabial spirant, the Italic nations seem at first to have used  $FH$ , the aspirated digamma. Cf. *fhefhaked* on the Praenestine *fibula* and the Etruscan *vhulχenas* = Fulcinius, Fabretti *C. I. I. Suppl.* III. 306. The  $\text{8}$  is a modified  $\boxplus$ .

value *r* are found. The vowels are *a, e, i, u*, with *o* wanting. The Etruscan is always found written from right to left.

*Umbrian*. — All the aspirates are wanting save one,  $\Theta$ , which is itself rare, and does not differ in value from the T. Of the *mediae* C and D have disappeared, and in consequence the K is still in use. The  $\varphi$  is not in use, perhaps was never adopted. The Umbrian, like the Etruscan, has no *o*, but possesses the other vowels, *a, e, i, u*. The peculiarities of the alphabet are  $\Theta$  appearing as  $\Theta$ , and the new letters  $\var�$  and  $\mathfrak{d}$ , which, with  $\mathfrak{s}$  found in Etruscan, have been added to the Greek alphabet. The first,  $\var�$ , is a by-form of the Etruscan  $\mathfrak{D}$ , but it does not have the same value, being equal to *rs*.<sup>1</sup> Hence it takes a different place in the alphabet. The  $\mathfrak{d}$  serves for the sound, peculiar to this dialect, of *k* before the vowels *e* and *i*. The Umbrian is, as a rule, written from right to left.

*Oscan*. — In this alphabet there are wanting the vowel *o*,  $\chi = ks$ ,  $M = s$ , and  $\var�$ . The *d* was at first disregarded, and the form  $\mathfrak{D}$  was assumed by the *r* sound; so that when the need of a *media* was felt, a modified  $\var�$ , i.e.  $\mathfrak{R}$ , was used, which may have taken the place of *d* in the alphabet. Need of  $\mathfrak{O}$  was felt at a later date, hence the modified *u*, i.e.  $\mathfrak{V}$ , changed to  $\mathfrak{V}$ . The letter next to the last is a modified form of *l*, i.e.  $\mathfrak{t}$ , which, with  $\mathfrak{v}$ , naturally assumes a place after  $\mathfrak{s}$ , as neither appears on the older Oscan coins. The order of writing is from right to left.

## PLATE II.

COLUMN I. The Greek Alphabet as found on the Formello Vase. This is the Greek Alphabet as it was written in Italy, and is the link between the Western Greek Alphabets of Euboea, particularly of Chalcis, and the Italic Alphabets. These letters have been traced from Plate 6 of *Mélanges de l'École Française de Rome*, vol. II., Bréal.

COLUMN II. Etruscan alphabetic characters traced from representations given in *Die Etrusker*. C. O. Müller and Müller-Deecke.

COLUMN III. Umbrian letters traced from *Les Tables Eugubines*. Michel Bréal.

COLUMN IV. Oscan letters from fac-simile inscriptions, in *Inscriptiones Oscanæ (Tabulae)*. J. Zvetaleff.

COLUMN V. Latin archaic letters.

COLUMN VI. Faliscan letters from *Inscriptiones Italiae Mediae Dialecticae (Tabulae)*. J. Zvetaleff.

*Faliscan.*—This alphabet possesses peculiarities that lead to a classification with the Latin. It differs from the Latin in the disappearance of the B and Q. The K also is wanting. The *vau F* is represented by the form †. The old form ‡ and the position of the Z show the early adoption of the alphabet. The order of writing is from right to left.

All these alphabets, together with the Latin, are evidently derived, directly or indirectly, from the same Greek alphabet. The test characters are ↓ = *ch*, X = *ks*, C *gamma* and V *lambda*. The Oscan and Umbrian people obtained their alphabets through the Etruscans, while the Latins took their letters from the Chalcidian colonists.<sup>1</sup>

*Latin.*—The following peculiarities mark the Latin alphabet as distinct from those mentioned above. It has a complete vowel system, so that O is found as well as A, E, I, V. It employs *vau F* for the sign 8, which does not appear at all. The V serves the purpose of both vowel and consonant. The K has really disappeared from use, except in a few words and abbreviations, and C has taken its place. To provide the guttural *media*, C is made into G by a mark of differentiation, and the new letter assumes the position of I (Z), which early goes out of use. In the time of Cicero, I, the old *zeta*, and Y, *upsilon*, were taken from the Greek alphabet and placed after X (*ix*), and the former appeared in the shape Z. The Greek aspirates did not become letters in the Latin alphabet, but were used as numerals,<sup>2</sup> Ψ or ↓, the Chalcidian *ch*, = 50, ⊙ = 100 (probably), ⊕ = 1000. The Q remained in use, but gradually lost ground in later days. The mark of differentiation was added to the P to form R when the letter P began to have a form nearly closed.

The original right to left direction of the writing is found generally in the dialect alphabets of Italy, save those of the Romans and Volsci, a fact which assigns the adoption of these alphabets to a period prior to the change in direction in the Greek parent alphabet. The medium of change from the original order to the left-to-right is the "boustrophēdon" method, which combines the two

<sup>1</sup> Von Planta, *Osk. Umbr. Dialekte*, I. 44.

systems. With a very few exceptions, the writing of the earliest Latin inscriptions is from left to right. The "boustrophēdon" order is found in the inscriptions on the bronzes from Lake Fucinus,<sup>1</sup> but the language of these inscriptions cannot be said to be pure Latin. The Duenos Inscription<sup>2</sup> (Vascula Dresseliana) is written from right to left, but, being on a vase, the order of some lines may be due to economy of space. The inscription on a *fibula* from Praeneste,<sup>3</sup> which is regarded as perhaps the oldest Latin inscription, is written from right to left, an order which may be due to an attempt at concealing the meaning, as in charms. It is reasonable, however, to believe that this last inscription is a trace of the early retrograde direction of Latin writing.

*Modifications in the Latin Alphabet.*

C. This letter is the curved form of the gamma of the Greek alphabet. Its value at first was that of the Greek letter, but afterwards it had the sound of *k* (surd guttural), a value it assumed in the period preceding the decemviral legislation (451 B.C.).

G. This letter finds its origin through the process of differentiation in the letter C. The modification was due to the confusion arising from the use of C as the sharp guttural *k* and as the flat *g*. In the Duenos Inscription *virgo* is spelled *virco* (some read *vir cosied*), while in the word *feced* an attempt has evidently been made to change a K into a C, but the K still remains in *pakari*. Plutarch, *Quaestiones Romanae*, 54 and 59, declares that Spurius Carvilius Ruga, who opened a school in Rome about 523/231, invented this letter. Mommsen (*Unterital. Dial.*, p. 33) shows that Spurius Carvilius did not invent the letter, for it appears in inscriptions before his time. He may, however, have been the first to teach its use at his school, or he may have given it the position it still holds in the alphabet.

The letter G is first seen on the *as libralis* of Luceria, dating

<sup>1</sup> H. Jordan, *Hermes*, vol. XV., 1880, p. 5; F. Bücheler, *Rhein. Mus.* XXXIII., 1878, p. 989.

before 485/269, then in inscriptions in the epitaph of Scipio Barbatus, who was consul in 298 B.C. The epitaph appears to be less archaic than that of his son, who was consul 259 B.C. Ritschl has set the date as not later than 234 B.C. The words in the Scipio epitaph in which G appears are *Gnaivod, prognatus, subigit*. It is found also on *paterae* from Tarquinii in the name *Gabinio*, the date of which is supposed to be about the same as that of the Epitaph.<sup>1</sup> Again it is found in the decree of the Senate "de Bacchanalibus" of 186 B.C., in the words *magister, magistratud, magistratum, gnoscier, figier, agro*.<sup>2</sup> The letter G does not appear, however, in the inscription of the Columna Rostrata, which, though dating originally in the time of the Epitaph, was renewed, with a combination of modern and archaic forms in the Empire, perhaps under Augustus.<sup>3</sup> This character probably did not come into general use until a period much later than the time of its introduction, for the archaic form C is found long after the invention of the G. A trace of the early use of C is found in the abbreviations C for *Gaius* and Cn for *Gnaeus*.

l. This letter served as both vowel and consonant (semi-vowel). In the time of Cicero a double l is found indicating the semi-vowel; thus *Aiiax, Maia, aiiio, Troiiam*, are mentioned by the grammarians Quintilian, I. 4, 11, Velius Longus VII. 54, *l*, and others, and in the inscriptions are found *cuiius, eiius, plebeiius*.<sup>4</sup> This doubling of the vowel for such a purpose did not come into general use. In inscriptions of the imperial period the tall letter l stood between vowels as the semi-vowel, though ATElO and ElVS are already found in inscriptions of the late days of the Republic.<sup>5</sup>

It should be remembered that J was not specialized as a letter until the fifteenth century A.D. At first the letter l, initial, was

<sup>1</sup> Corssen, *Aussprache*, I. p. 10.

<sup>2</sup> See page 359.

<sup>3</sup> It may, however, be an inscription of the days of Augustus, with imitation of archaic forms.

changed to J by being curved to the left, the original shape still serving as the medial letter. As the initial I was usually the semi-vowel, the initial shape became identified with the letter J.

K. This letter, in the earliest period, served as the sharp guttural (*k*), but was afterwards replaced almost absolutely by the letter C, which, at first equal to the sonant *g*, was relieved of this double service by the use of the differentiated C, i.e. G. K is found in "fhefhaked" on the *Fibula Praenestina*, which probably belongs to the sixth century B.C., and is apparently altered to C in the Duenos Inscription, dating about the beginning of the fourth century B.C., so that its disappearance from general use must have taken place at a comparatively early period. Its appearance in Latin orthography is confined to a few words for which it was the common abbreviation, as *Kalendae*, *Kaeso*.<sup>1</sup>

V. This letter, originating in the Greek *upsilon* of the form V, served the purpose of both vowel and consonant (semi-vowel). The differentiation of the vowel and the consonant did not occur until about the tenth century A.D.

X. This letter, which Quintilian calls *nostrarum ultima*, was the last letter in the early alphabet of the Romans. In inscriptions of all periods after the *Senatus Consultum de Bacchanalibus* 568/186, which has, e.g., the form EXSTRAD for *extra*, *xs* are found for *x*, perhaps because the X is regarded as equal to Greek X (*ch*), and then naturally *s* is needed. The attempt to express the sound of *c* followed by *s* led to such irregular orthography as *ucxor*, *vicxit C. I. L. V. 5735*, *iuuxta C. I. L. VI. 14614*, and *visxit C. I. L. VIII. 67*.

Y. This letter, in reality the Greek *upsilon*, was employed in the days of the Republic to represent the Greek *v*, for the Latin V corresponded more nearly to Greek *ou*. Before the use of Y, the Greek *v* was represented by Latin V or at times I. (Cf. Cic. *Orator*, 48. 160,

where Ennius is said to have written Burrus for Pyrrhus and Bruges for Phryges.) Ritschl, *P. L. M. E.* 124, states that, with one exception, there is no instance of the use of this letter until the seventh century of the City.

Z. This letter belonged to the earliest Latin alphabet, in which it probably had the place which the letter G afterwards assumed, since this is the position of the ζ in the Greek alphabet.

In the Duenos Inscription it is believed by some to occur in the word *dze* for *die*, although the letter may be l, or a V forming part of the word *Duenoi*. It is found in a fragment of an old priestly prayer, *Carmen Saliorum*, given by Varro, *L. L.* VII. 26 (M).<sup>1</sup> It appears on a coin of Cosa dating after 273 B.C.<sup>2</sup> taking the place of S in the word *Coza(no)*, and is also seen in the transcription of an Oscan Law of the time of the Gracchi.<sup>3</sup> After this we have no trace of the letter until the time of Sulla, when it reappears as representing the Greek ζ, for which, when initial, S had been used, or, when medial, SS.<sup>4</sup> Cicero (*Orator*, 48. 160),—*Nec enim Graecam litteram adhibebant, nunc autem etiam duas*,—probably referred to Y and Z. It should be remembered that Z, when reintroduced, was a Greek letter, and was so recognized in the first century A.D. Z took the last place in the alphabet.

Various attempts were made to add to the Latin alphabet. Verrius Flaccus, of the Augustan age, suggested a mutilated M, i.e. N, to take the place of M when final.<sup>5</sup> No trace of this has been found, so that it evidently did not come into use.

The Emperor Claudius invented three letters: the Greek *digamma* inverted, to provide the consonant V, the *antisigma* Ϸ for the sound

<sup>1</sup> The word is *cozeulodoizeso* (some read *cozeulodorteso*). Velius Longus, p. 2217 (Keil, *G. L.*, p. 52) wrote: *mihī videtur nec aliena sermōni fuisse (z littera), cum inveniatur in Carmine Saliari.*

of *bs* and *ps*, and the Greek *spiritus* † for the sound intermediate between *i* and *u*. Claudius wrote a book discussing the need of these letters, and, when emperor, ordered that they should be introduced. This was done in state documents, as senate decrees, such as Tacitus saw (*Annales*, XI. 14), also in the mandates of magistrates and of priests. The most common of these letters is the inverted *digamma* to indicate the consonant *V*. There is no certain example of the use of the *antisigma* ϳ. The letter † for the middle sound between *i* and *u* is found in inscriptions of the time of Claudius to express a Greek *upsilon* in the words *Aeg†pti*, *Bath†llus*, *C†cmus*, *Gl†conis*, *M†ro*, *N†mphius*, *P†lades*, *Zop†rus*. It also occurs in *B†bliotheca* and once in *G†bernator*. It answers to the *i* or *u* before labials, which occurs in the superlative terminations, as *opt†mus* and *max†mus*. This letter may have had the value of the French *u* or the German *ü*.<sup>1</sup>

In the early period, to represent the Greek  $\phi$ ,  $\chi$ , and  $\theta$ , the Latin employed P, C, and T just as S and SS had been used for  $\zeta$ , and V or more rarely I for Y. About the close of the second century B.C. the aspiration begins to appear, and for the following fifty years the usage varied between the aspirated and unaspirated letters, until finally the aspirated form prevailed.<sup>2</sup> In inscriptions of the imperial period, however, there are found P, C, and T, instead of the aspirates, and in the later imperial period F for PH.

#### *Double Consonants.*

The introduction of double consonants is commonly assigned to Ennius (239–169 B.C.). This usage, beginning about the end of the sixth century of the City (150 B.C.), did not become common until the middle of the seventh century of the City (100 B.C.). The double consonant is seen first in the decree of Aemilius Paulus, dating 189 B.C. (See page 359.)

Marius Victorinus (p. 2456) and Isidorus (*Orig.* I. 26) refer to the

<sup>2</sup> PH, CH and TH are seen in the dedicatory inscriptions of L. Mummius, dating 146 B.C. *C. I. L.* I. 546.

*sicilicus* ɔ, which was placed over letters to indicate double consonants, thus SE<sup>2</sup>LA, A<sup>2</sup>SERES. The occurrence of this sign is uncommon, the period of its most frequent appearance being the early days of the Augustan age.

#### *Double Vowels.*

The tragic poet, Attius, 170–94, introduced the double letter to represent the long vowel.<sup>1</sup> Ritschl shows that this usage appears in Latin inscriptions from the time of the Gracchi up to the Mithridatic war (75 B.C.). The first instance is in the word *paastores* on the *miliarium* of Popillius, dating 132 B.C. This doubling was employed in the vowels A, E, U, but not O.<sup>2</sup> Thus we find *facto, haace, Iuulius*. Reference has already been made to the doubling of the l, not for the purpose, however, of lengthening the vowel, but to indicate the consonantal l.

## CHAPTER II

### THE LATIN ALPHABET (MORPHOLOGICAL)

THE early writing of the Phoenicians, Greeks, and Romans, shows a uniform style employed for both public and private use. Similar forms are found on the various materials used, such as clay or wax, and metal or stone, since there is only one form of writing. This uniformity is at first interfered with by reason of the difference in materials. Letters made in soft substances naturally display curved and easy lines, while stiff set forms are found on the hard surface, as the cutting of letters on metal or stone demands greater and more laborious toil. This difference in style is still more marked after the introduction of outlining in crayon or chalk, and of drawing letters in colors with a brush on such surfaces as walls and board tablets, finally in the use of ink and pen on papyrus or parchment. The Greeks appear to have used, for the most part, similar styles of writing for both public and private documents, and for inscriptions on monuments, down to the time of the Macedonian supremacy. In like manner the most ancient remains of Roman writing show a style uniform even in its rudeness. This style was not changed until the sixth century of the City, when there was introduced from the Greeks the custom of adorning buildings and monuments with inscriptions, the letters of which were made with regard for beauty and elegance.

### ARCHAIC ALPHABET

This early uniform writing of the Romans may be designated as the *Archaic Alphabet*. We know from Dionysius of Halicarnassus (*Antiq.* IV. 26 and 58) that the Romans used writing very early in their history. The treaty of peace made by Tarquinius (Superbus?)

with the Gabii was written on an ox-hide *γράμμασιν ἀρχαϊκοῖς* and stored in the temple of Sancus.<sup>1</sup> A treaty made by Servius Tullius with the Latins is said to have been cut in bronze (*στήλην χαλκῆν*).<sup>2</sup> Cicero (*pro Balbo* 23. 53) refers to a treaty of alliance between Rome and the Latins engraved on a bronze column, and Polybius III. 22 mentions a commercial treaty made between Carthage and Rome in the earliest days of the Republic, likewise engraved on bronze in the temple of Jupiter Capitolinus.

The oldest Latin inscription extant, that on the golden fibula of Praeneste,<sup>3</sup> dating possibly in the sixth century B.C., shows letters which are really Greek in form, and which bear witness to the Greek parentage of the Latin letters, and to a period when the Latin alphabet was in a transition state, not fully naturalized. Very old forms, showing Greek influence, are also found in the Duenos Inscription,<sup>4</sup> which dates perhaps in the early part of the fourth century B.C. Besides these, there remain to us inscriptions on coins, mirrors, boxes, and vases. This archaic alphabet is found in the inscriptions given by Ritschl. *P. L. M. E.* plates I.–XVII. The marked characteristics of this alphabet are, first and mainly, the near approach to the parent alphabets, the Greek and the Phoenician; the lack of uniformity in the various forms of the same letter (see A), also the oblique lines (as in N); together with general irregularity and unevenness. Such archaic forms as  $\Lambda$   $\wedge$   $\wedge$ ,  $\mathfrak{B}$ ,  $\mathfrak{D}$ ,  $\mathfrak{H}$ ,  $\mathfrak{I}$ ,  $\mathfrak{L}$ ,  $\mathfrak{M}$ ,  $\Gamma$ ,  $\mathfrak{Q}$   $\Omega$ ,  $\mathfrak{R}$ ,  $\mathfrak{S}$ , indicate a period prior to the Second Punic War.

#### MONUMENTAL ALPHABET OF THE REPUBLIC

The employment of inscriptions on great monuments led to an improvement in the style of the letters. This can be seen by examining the monuments of the last three centuries of the Republic.

The earliest of these are the dedicatory inscriptions from the grove of Pisaurum, and the most archaic of the *tituli sepulcrales* from Praeneste.

In the epitaphs of the Scipios (see pages 232, 236) and in that of M. Furius, *tribunus militaris* at Tusculum, we find great advance made in the evenness and elegance of the letters.

Monumental inscriptions of the seventh century of the City show marked improvement in the forms and details of the letters, the exactness and beauty of which increase with the growth of the custom of erecting, and likewise inscribing, large architectural monuments, whether sepulchral, dedicatory or honorary. The fully developed *scriptura monumentalis* belongs to the days of Augustus and to the early Empire.

## MONUMENTAL ALPHABET PERFECTED

The letters cut in stone and appearing on large and impressive monuments represent the standard of this fully developed alphabet. It is the *scriptura quadrata* or *lapidaria* of Petronius (29. 58).<sup>1</sup>

This standard *scriptura monumentalis* was mainly the work of the professional stonecutter, who made the letters with exactness after a pattern previously outlined in color or crayon. There is no adornment, such as extended or added lines, *apices*, *cornua*. The letters are square and exact. Whatever variation is found in this alphabet is due to the skill and care of the stonecutter, and is shown in the depth of the cut, gracefulness of form and exactness in detail. It must be remembered that these forms were not confined to stone, but were used on other material, such as bronze.

Although it is not known when she died, the inscription may with probability be assigned to the earlier part of the reign of Augustus.

While this *scriptura quadrata* is strictly the alphabet of great monuments during the early Empire, yet other forms more or less ornamented, showing the influence of the lettering of the *acta* and of the more ordinary alphabets, are found in monumental inscriptions

## DOCUMENTARY FORMS OF THE LETTERS

Reference has already been made to the influence upon the forms of letters due to the materials used. This is seen most clearly in the formative period before the alphabet has reached its full development, but subsequently another principle supersedes the former. The character of the subject-matter determines the style of writing, and letters are made with a certain design and according to what finally becomes a fixed custom. The effect of this influence may be seen to some extent in the days of the Republic, as in the writing on the bronze law plates, but in the time of the Empire the alphabets as employed for various purposes can be plainly distinguished.

In contrast, then, to the letter system of the great architectural monuments, the letters of which were carefully outlined and deeply cut, a more simple style was employed for the more ordinary inscriptions. This style, differing at first merely in size from that of the monumental, gradually assumed its individuality, and finally developed along two general lines, namely, the forms of writing employed in public documents, *scriptura actuaria*; and again, but more widely, the cursive writing used in ordinary life, as on wax tablets.

In the early days of Rome public announcements were made by painting letters with ink on the walls or on white board tablets. Such were the declarations of the priests as to the *feriae* and *prodigia*, also the publication of the names of the magistrates, and the historical notices known as *Annales Maximi*. By the same method advertisements of various kinds and information as to contracts and sales were later on placed upon the walls of buildings. This use of the brush had its influence upon the forms of the letters, and a style which was an approach to the alphabet of the pen, and which after became the book-hand, was used for public documents, *acta*, cut in bronze. The curving of the oblique lines of the letters A, M, N, and of the transverse strokes as in A, E, F, H, I, T, the extending of the tails of L, Q, R, and the diminution in the size of the upper part of the B and R, mark this writing of the *acta*.

No exact or set lines can be drawn defining the use of this alphabet, but its letters are found in stone inscriptions also, and this form

of writing, *scriptura actuaria*, became the system used in inscriptions in general after the fourth century A.D.

The following inscriptions will illustrate the alphabet of the *acta* as engraved first of all on metal and then on stone.

## CURSIVE LETTERS IN THE INSCRIPTIONS

Naturally letters made without any regard for elegance or even moderate adornment or clearness of outline present the same variations which are found in the rapid and inartistic writing of common life. Early Roman capitals made rapidly and carelessly are the predecessors of the cursive letters of the first three centuries of the Christian era. In the early *vulgaris*<sup>1</sup> lettering we find such forms as A, H, I, G, K, which, in modified form, are prominent in the cursive alphabets shown on pages 44 and 46.

Cursive writing<sup>2</sup> is that found on wax or on clay before it is baked. It appears on the wax tablets of Pompeii and Dacia, on the wall inscriptions of Pompeii and other cities, on tiles marked by children, and on vessels for domestic use made of gold, silver, and clay. As with the writing of the *acta*, this cursive style cannot be set within well-defined limits, for it is found in the laws and invades the dignified inscriptions of the monuments. Even as early as the first century of the Christian era, cursive letters are found in the monumental inscriptions, and in the course of time some of its forms supplant the more regular types.

## UNCIAL LETTERS IN THE INSCRIPTIONS

A form of script used upon papyrus and parchment, consisting of rounded forms with vertical strokes somewhat curved is known as uncial. From the close of the fourth century these letters appear in inscriptions cut in stone, mainly in the *acta* and in *carmina* of a dedicatory character.

A few inscriptions, however, have been found in Africa, which may be assigned to the close of the third century, of which all the

letters are uncial in character. The following is a portion of one of these.

## METHODS OF MAKING INSCRIPTIONS<sup>1</sup>

To study properly the forms of letters, and appreciate the changes which they undergo, it is very essential to consider the methods by which these forms were imparted to the various materials used.

Statements of ancient writers, also terms used in literature and in the inscriptions, as well as a careful examination of existing remains, provide us with information as to the art of engraving letters.

The exactness with which letters were inscribed on stone and bronze bears witness to the existence of a custom of outlining in crayon or chalk, or of painting in black, red, or white color, as preliminary to the work of the stonecutter or engraver.

There is every reason to believe that the practice of giving exactness to lettering in stone by means of patterns prevailed generally at

<sup>1</sup> Prolegomena, *Exempla Scripturae Epigraphicae Latinae*. Aem. Hübner.

all periods. The effect of cutting after a pattern made with the brush is seen in the later tendency to imitate painted letters in the inscriptions.

The custom just referred to originated in the earlier usage existing among the Romans of painting inscriptions, a practice derived, in all probability, from the Phoenicians and Greeks, and found also among other people of Italy, such as the Etruscans and Samnites, who made sepulchral inscriptions in this manner.

Some of the earliest of the Roman *tituli sepulcrales* on the Scipio sarcophagi show letters painted in minium. Reference is made in the *Lex Acilia Repetundarum* 631/123 to the custom of painting on board tablets.<sup>1</sup> *Fasti* have been found at Rome painted in red or black colors on the walls of buildings. In like manner registers of officers of the year 707-708 A.U.C. were painted in black upon buildings of Pompeii built of light colored tufa. *Amphorae* of various kinds show many instances of this custom. How widely the practice extended can be appreciated by considering that a number of painted inscriptions exist to-day, though such a preservation is remarkable.<sup>2</sup>

### *Letters Cut in Stone.*

The next operation in the preparation of inscriptions, after outlining or painting of patterns, was the work of the stonecutter (*marmorarius, lapidarius*), which consisted in the cutting (*sculpo, scalpo, insculpo*) letters out of stone with the use of tools, principally the chisel (*scalprum*), and the hammer (*malleus*). Other tools of which we have knowledge from representations in the inscriptions<sup>3</sup> were the *regula*, compasses (*circinus*), used also in the pattern-making, square (*norma*), level and plumb-line (*libella et perpendicularum*), the *scalpellum, dolabra, and ascia*. The form of the cut is that of an inverted isosceles triangle , hence angular and not oblong nor curved. This shape has been useful in determining the genuine-

ness of inscriptions, for it is an evidence of antiquity;<sup>1</sup> and the additions of modern hands can thus be recognized. The smoothness and evenness which it displays testify to the perfection attained in this art.

As we infer from the perfect and exact form of the letters that they were outlined before being cut, so the evenness and regular order of words lead us to believe that lines of direction were marked upon the stone, probably by means of a cord covered with minium. Naturally these have disappeared. In one of the Scipio inscriptions lines are plainly seen which were marked in the stone (see page 240). After the letters were cut in the stone they were frequently colored with minium, *litterae rubricatae*, — a practice which belongs to the more recent inscriptions, as well as to those of the most ancient period.<sup>2</sup>

In addition to these methods, it became common in the days of great architectural designs and ornamentation to form letters out of some material such as bronze or lead, and insert them in the stone by means of rivets set into holes previously prepared, or to fasten them upon the surface. The architraves of temples, gates, porticoes, and public buildings, particularly in the Province of Africa, were adorned by these letters in relief (*litterae incrustatae* or *caelatae*). Pavements were inlaid with bronze and lead, and bronze plates were inscribed with letters of silver; on vases of silver letters of gold appear, while bronze weights were thus marked with silver.

#### *Letters Engraved on Metal.*

As stone was the material used for monumental inscriptions (*tituli*), so bronze was employed for documents (*acta*), such as *leges*, *senatus consulta*, *edicta*, etc.

The cutting of letters in bronze was the work of the *aerarius* or *caelator*. This operation is referred to by ancient writers under the word *incidere*.<sup>3</sup> The difference in material required different

methods of treatment, lighter and smaller tools, and work more minute in detail. Hence we find a style of writing related to that employed on board and wax tablets.

As can be seen from the bronze plates given in facsimile by Ritschl (*P. L. M. E.*), in the laws of the Republic the style of the letters is that of the early cursive writing with space between lines, giving evidence of a rapidly moving *scalprum*. Later documents (*acta*), show that great skill and facility were attained by those who prepared bronze tablets in the time of the Empire (see page 42).

In addition to the documents which were engraved on bronze, inscriptions appearing on various objects of various materials show the use of a similar tool (*scalprum*), and a similar style of lettering. Such are the thin bronze plates (*laminæ*), placed on the bases of statues and altars and attached in different ways to votive offerings.

*Neptuno | ex voto | Cn. Domitius | Gelasus. C. I. L. VI. 534.*

Bronze vases and figures, likewise ivory and bone *tesserae*, and, in a more recent period, consular diptychs, were engraved with a tool similar to that used in making the *acta*, and show, in consequence, letters of the same or similar character.

In addition to the ordinary methods of engraving or scratching letters upon metal or other materials, at times the lines were made by a succession of points cut in the surface. Letters of this char-

acter are found to some extent on gold and silver, but frequently on bronze *paterae*, *tabellae*, and shields.

This is regarded as a *tessera gladiatoria* and is explained by Hübner thus: *Celer, Erbuti filius, natione Limicus, munerarius Boreae gladiator, natione Cantibedoniensi, muneris gladiatorii tesseram dedit anno M. Licinio consule*.

#### Written Inscriptions.

The two forms of inscriptions described above, namely, those on stone and those on metal, show letters deeply cut with a graving tool by professional workmen.

Although not the technical term, the word *scribo* was used in reference to this engraving on stone and metal, but applied more exactly and consistently to inscriptions which may be said to have been "written," inasmuch as they were made without the formal, artistic work of the *lapidarius* or *aerarius*, but as the writing of ordinary daily life.

These inscriptions show a style of writing of the character of that looked for on wax tablets or on papyrus. Of such a nature are the inscriptions cut with a large *stilus* (*graphium*), in such material as the lime or clay of house walls, or on earthen vessels used for various purposes.

The *inscriptiones parietariae* of Pompeii were scratched with a *graphium* before the cement had become hardened.<sup>1</sup> Inscriptions

<sup>1</sup> C. I. L. IV. See page 386.

in cursive style cut or scratched with a *graphium* are found also at Rome, as, for example, on the walls of the guard-house of the seventh cohort of the Vigiles.<sup>1</sup>

On clay vessels lettering was made either before or after baking. In the former case, as the material was soft, the lines are curved, while in the latter they are angular, as cut in hard material with a sharper *stilus*. Tiles were also thus marked with cursive lettering before or after the material had been hardened, and were used for educational purposes, often containing alphabets and verses, also for memoranda of various kinds, such as directions to workmen in the brickfields.<sup>2</sup> Very early examples of these scratched tiles have been found in Etruria, containing sepulchral inscriptions with Etruscan words written with Latin letters.<sup>3</sup>

It is not upon such surfaces alone that these scratched (*scaripto*), or written letters, are found, but metal which was soft enough for the purpose was also used as material for what may be termed "written inscriptions." There exist to-day vessels of silver, such as drinking goblets, and *patellae*, inscribed thus in cursive style with the names of the maker and the weight. Bronze tablets were thus inscribed with maledictory inscriptions (*devotiones*), written in a cursive or semi-cursive style. Lead, as being a softer metal, was freely used for these *devotiones* and for sepulchral inscriptions, but specimens are rare, as the material was easily destroyed. A very early example of the use of lead for inscriptions is the dedicatory *lamina* given *C. I. L. I. 196*.

*Unscientific Cutting in Stone.*

The different methods of making inscriptions described above do not include the unscientific cutting (*sculpo*) of large letters with a *scalprum* by those ignorant of the art of engraving or careless in their work.

A peculiar style of lettering, which approaches the cursive, resulted from this amateur inscribing. It has been termed the *scriptura vulgaris*.<sup>1</sup> Ritschl<sup>2</sup> has shown that traces of this style are found in the most ancient inscriptions. The imperial period, however, provides much more numerous illustrations of this *vulgaris* writing, which may be regarded as the epigraphic cursive style. Inscriptions with this lettering were cut without the assistance of outlines, in a careless and hasty manner.

Hence we should place under this classification inscriptions found in quarries and on blocks of stone which were inscribed before their removal to the place for which they were designed.

Inscriptions are also found cut in the natural rock which show an irregularity due in some measure to the hardness of material and inconvenience of location. A very early illustration is the sepulchral inscription from Pescina, dating in the later days of the republic, which is given below. The letters are monumental, but show in some particulars a cursive tendency.

In like manner *miliaria*, upon which names or other inscriptions were cut without the stone being taken to the domain of a professional engraver, particularly when names of later emperors have been added to the original inscription while the stone was in position, show letters carelessly and hurriedly made, often of small size, and with shallow cut.

Another method of making inscriptions which is different from any mentioned above, and which was employed in the main upon the smaller articles classed in *C. I. L.* under *Instrumentum*, given at the close of each volume, is that of impressing inscriptions upon a soft substance by means of stamps of hard material.

The greater number of these inscriptions stand forth from the surface in relief, and were produced by stamps upon which letters were deeply cut. There have also been found inscriptions pressed into the softer substance, which are distinguished from cut inscriptions by the shape of the impression, which is curved or square rather than triangular.

These letters in relief appear on various remains. Such are the lamps made of clay or terra-cotta upon which the names of the potters are pressed, also vessels of every kind, such as large Roman *amphorae*, upon the handles of which these stamped letters are found.

Household utensils of metal are also marked in relief with the names of the maker. So arms, metal ornaments and equipment show the name of the *aerarius* imprinted upon them when in the mold.

In addition to these, pigs of silver, bronze, and lead, found in the mines of England, also the lead water pipes (*fistulae plumbeae*) and lead missiles (*glandes plumbeae*), lead *tabellae* or *tesserae* which have been cast, show these letters in relief (*litterae prominentes*).

The most interesting of these *inscriptiones impressae* are those made upon tiles from the numerous tile and brick kilns (*figlinae*). See page 269.

These inscriptions in relief which have been imprinted by means of stamps are seen also on glass vessels.

Gems cut with a graving tool show inscriptions of a similar character.

## INDIVIDUAL LETTERS

*carefully*

### A

The various forms of the letter A may be classified with reference to the three following types:

1. A, with transverse. 2. A, without transverse. 3. A A, with pendant. A. This is found in the earliest remains with the position of the transverse varying in its relation to the height of the letter.

It is also the monumental form, but with the position of the transverse fixed midway between the top and bottom of the letter. Little ornamentation is attached to this standard letter.

À Á Â Ã Ä Å. In the imperial period ornamented forms showing additions (*cornua*) and extensions of certain lines become prevalent. It is noticeable that the extensions are regularly to the left.

Λ. This form is due at first to the negligence of the graver. It appears in the smaller letters of the *instrumenta* of the Republic and Empire, but belongs to the cursive writing of inscriptions of all periods. Λ Λ Λ, more rarely Λ, are of Latin origin, and belong in the earliest period to the *vulgaris*, and later to the cursive writing, both of the Republic and Empire.

## B

The rounded form of this letter is the one in ordinary use in all periods. B, the angular shape, is rarely found in early inscriptions, but occurs in letters cut in lead in time of the Empire, the form being due to the material. The variation in the forms of this letter depends upon the relative sizes of the lobes. Inscriptions in *vulgaris* lettering on pages 53 and 56 show a form in which the upper lobe has entirely disappeared. Compare with this the cursive letters, in which further modifications are seen.

## C

< ( ( are the archaic forms. In early inscriptions the only point of difference is the breadth, but the full rounded form belongs to the best period.

## D

▷ ▷ ▷ are the archaic forms, the first recalling the letter of the old Chalcidian alphabet. Like C, this letter varies merely in its breadth, and the form of the best period is full and round. ▷ ▷ ▷ occur on the metal plates containing *leges* of the republican period.

## E

Ǝ Ǝ Ǝ E || are the archaic forms of this letter. The monumental form of the best period has three equal parallel horizontals. A similar shape belongs to the days of the Republic, though it is

very narrow in the *leges* on the bronze plates, but the letter of the Augustan age is well proportioned. A diminution in the length of the central horizontal gives evidence of a period later than the Augustan age.

II. This form is very general in its occurrence, appearing in the archaic alphabet and among the cursive forms of the Republic and Empire. It is not a form belonging to the City either in origin or use, although in the imperial period it is familiar in all regions and is found in stone inscriptions. Zangemeister suggests that  $\text{I}\Xi$ ,  $\text{I}:$  are transition forms from E to II. Hübner supposes that  $\text{II} = \text{E}$  is analogous to  $\text{I}' = \text{F}$ , and that the latter  $\text{I}'$  is developed from F through the medium of  $\text{V}$  or some one of the numerous cursive forms in which one transverse is wanting.

€ . This curved form, due to Greek influence, appears on a coin and on a jar of Praeneste of the republican period, and about the beginning of the second century A.D. is found in inscriptions which have cursive letters.

## F

$\wedge$  F F I' are the archaic forms of this letter. The monumental form of the best period has two horizontals equal and parallel. Narrow shapes are seen in the law plates.

F. This form with the second horizontal shorter than the upper is rare in monumental inscriptions until the fourth or fifth centuries.  $\text{I}'$   $\text{I}'$   $\text{I}'$   $\text{I}'$   $\text{I}'$  are the *vulgaris* and cursive forms which appear in inscriptions of the later Empire, particularly those of Gaul and Germany.  $\text{I}'$  has been referred to in the account of II under E, with which its history is connected.

Like T and P, F often overtops other letters, particularly when it is initial in the line. This custom dates from the second century A.D., being found mainly in inscriptions of Italy and the provinces, and becomes prevalent in Rome after the third century.

## G

The earliest form of this letter is G, in which the line of differentiation rises perpendicularly from the right-hand corner of the letter

and terminates in a head scarcely perceptible. This is the general form up to the second century, although  $\zeta$  is occasionally found.

6. This curved form is found at times in the first century, but becomes more common in the second and third centuries, particularly where smaller letters are used or where patterns have been drawn before the cutting of the inscription. It is very general in its use in City inscriptions of the third, fourth, and fifth centuries.

$\zeta$   $\zeta$   $\zeta$   $\zeta$  are the cursive forms which consort with  $\Lambda$   $\Pi$   $\Gamma$   $\Gamma$  and later appear with uncials. In the latter part of the second century they appear on the smaller monuments with monumental letters, and become common in the fourth and fifth centuries.

## H

H. The earliest form of this letter, coinciding in fact with the early letter in the Phoenician and Greek alphabet, is seen on the Fibula Praenestina. A similar form is seen in the other Italic alphabets.

The main points of variation in the different forms of this letter are the breadth and the position of the transverse.

The standard monumental form of the early part of the first century is broad, and the transverse occupies a position at half the length of the shaft, but in almost the same period the letter is found narrow and with transverse higher up.

## I

I. This, the most ancient form of the letter, in which there is neither head nor foot, was the prevailing shape even in the early part of the imperial period; but during the first century the ornamentation of head and foot was added, particularly where painted patterns were followed. From the time of Sulla a tall I is found taking the place to some extent of the more ancient EI which had been used to denote the long vowel. Thus in *P. L. M. E.* we find CHILO, MAGISTRI, PRIMVS. It occurs very commonly in the word DIVVS, also in the genitive case DIVI, again in the dative case, third declension, CAESARI, in dative and ablative plural of the second declension although more rarely, GRATIS, also in

MEIS, HIS, and in the accusative plural of the third declension, SAECVLARIS.

The tall letter is also used in certain positions as an additional form, and as representing merely a custom in writing. Thus it appears as an initial letter at the beginning of words and lines, from the Augustan period. The words ITEM and IN have a tall initial letter of which there appears to be no explanation save that it is a mere custom, originating in the tendency to ornament an inscription by the simple modification of certain letters. The form IMP (= *imperator*) is common in inscriptions from 10 B.C.<sup>1</sup> At the close of the second century the tall letter denoting the long vowel disappeared from use, but the graphic tall I seems to have been very common during the second and third centuries.<sup>2</sup>

The form J found at the end of words in the latter part of the second century is due merely to the caprice of the graver and has no additional value.

The point over the I is not of ancient origin, but appears about the fifth or sixth century A.D.

## K

k. The ancient form of this letter belongs to the time of the Republic and Empire as well. In the earlier period the transverse lines are very short; after the first century, however, letters are found with one or both lengthened. In case of one being lengthened, the preference is in favor of the upper.

Occasionally K overtops its fellows.

## L

l | L ⊥. These are the archaic forms of this letter. The most ancient form l, the same as the Chalcidian prototype, gave way, by degrees, to the rectangular shape, and disappeared from use about 200 B.C.

<sup>1</sup> Ritschl. *Opusc.* IV., p. 570, *reverentiae sensu imperatoris personae atque maiestati debitae*. Hübner declares, however, that in the majority of instances in his *Exempla* the word *imperator* with tall initial stands as the first word of the inscription or line. See Christiansen, *De Apicibus et I Longis*, p. 37.

<sup>2</sup> For the tall letter used as the semivowel, see page 26.

L. The standard letter of the best period is rectilinear and rectangular, with transverse measuring a little over one half of the length of the shaft. The transverse varies in length in later periods, being very short in painted letters, even approaching the simple shaft as in I. The letter L is at times taller than other letters.

### M

The oldest form of this letter consists of five parts,  $\mathfrak{M}$ . This is found on the Fibula Praenestina, also in the Duenos Inscription. It gives rise to  $\mathfrak{M}$ ,  $\mathfrak{M}$ , which in the days of the Republic stands as the abbreviation for Manius, as distinguished from Marcus with abbreviation M. The prevailing form under the Republic, and the standard letter of the best period is that made with oblique lines reaching to the base of the letter.

$\mathfrak{M}$  and M are very rare in the republican period, the former occurring only on coins and small articles, and the latter on coins only because of lack of space. The former appears in the *instrumenta* of the Empire, but as an exception, while it is not seen in the monumental inscriptions until after the second century, and then very rarely until the close of the fourth century.

M. No instance of the rectilinear form with angle reaching to the base occurs in inscriptions until the middle of the first century A.D. It does not become a familiar letter until the close of the second century, when it is found in Germany, but in the third and fourth centuries it becomes so common as to equal in frequency of occurrence the oblique forms, especially in Gaul and Germany.

The oblique form M, however, continued in use as the more elegant letter, particularly in the fourth and fifth centuries, when the monumental alphabet approached the style of lettering found in the *instrumenta*, for the rectilinear form never prevailed in the *instrumenta*, being merely a chance occurrence.

The standard type of the best period suffers modification only as regards its breadth and ornamentation. The earliest shape of this normal letter is very broad and unornamented, its top being the simple angles without *cornua*. It is not obsolete even in the second

and third centuries. The ornamented letter  $\mathcal{M}$  appears in inscriptions of the time of Trajan, and becomes common in the period of Diocletian.

||| belongs to the old cursive writing, and may be classed with ||, !, G. It does not occur in the imperial period, save in the scratched inscriptions of Pompeii.

λλ. This is a cursive form in the best period, but appears later on monuments of the lower class, and in inscriptions of Germany, Spain and Africa.

λλ. This five-part letter, denoting Manius, belongs rather to the time of the Republic. It exists in a few examples during the Empire, and is retained in marking the *praenomina* of the Consuls.

## N

$\mathcal{N}$ . The earliest form of this letter is that in which all parts are oblique. This was maintained during the Republic, but disappeared entirely under the Empire.

N. The rectilinear form is the normal type of the best period, being at first unornamented, afterwards having partial ornamentation,  $\mathcal{N}$ , and finally, from the second century, becoming fully ornamented,  $\mathcal{N}$ . The N varies in breadth just as the M, the quadrate form appearing in the early part of the best period, while the slender letter is found in painted inscriptions.

$\mathcal{N}$  is a cursive letter having a history coördinate with the similar form of the *m*,  $\mathcal{M}$ .

## O

○ ○ ( ) ◁. These are the archaic forms of this letter. In the early part of the best period the form of the O like that of other round letters of the same time is quadrate, that is with height and breadth equal. In the earliest period it is noticeable that the O is very often smaller than the other letters. This peculiarity lasted through the imperial period, especially after the letter C, which could envelope the O in its curve. This is very common in the abbreviation © S from the Augustan age down to the end of the third century.

## P

⌒ ⌒ P P. These are the archaic forms, the first being due to the retrograde direction found in earliest inscriptions and, like the second, recalling the Greek prototype.

The standard letter of the monumental alphabet is the curved and open form. The closed letter is a chance occurrence in republican days, appearing on *glandes plumbeae* and *tesserae*. It is rare in the imperial period until the second century; but from the third century it is found in inscriptions of the City and provinces. In Germany, however, it appears as early as the close of the first century and afterwards with greater frequency than elsewhere.

Sometimes P rises above other letters, particularly at the beginning of the line.

## Q

This letter originates in the Greek *koppa*, hence its earliest form is Ϟ. Q Q Ϟ Q are other archaic forms.

The types of the Republic and Empire vary merely as to the tail, which is either short and straight or long and curved. The short and nearly straight projection belongs to the latter part of the Republic, while in the first century A.D. the tail is lengthened and curved, the abridged form becoming rare.

## R

Ϟ. The oldest form of this letter as found in the Duenos Inscription is like the Greek original.

Ⓡ R Ⓡ R are other archaic forms. After the R attained its normal curved shape, its form depended upon the relative sizes of the upper and lower parts, as in B, also upon the length and shape of the tail and the manner of its union with the upper part.

The early letters have a full circular form with the end of the circle at times withdrawn from the shaft, while the tail originates at the shaft or close to it. The standard letter of the monumental alphabet of the Republic and Empire was marked by the fully rounded circular portion whose circumference terminated at the

middle of the shaft. A diminished circle with circumference ending above the middle of the shaft and with a tail somewhat curved are later modifications. In this standard letter the tail either originates at the shaft, or in the circular portion at some distance from the shaft. The former is the earlier shape.

R. Often the tail begins at the end of an incomplete circle to the right of the shaft. This is found in the provinces both in the early period and in some monumental inscriptions of the second and third centuries.

### S

< S > are the archaic forms of this letter of which the angular shape is found in the days of the Republic, but not of the Empire. S, the standard letter of the best period, shows the upper and lower portion equal and fully rounded. Inequality in the sizes of these two portions gives evidence of an inferior alphabet.

f. Very slender letters approaching the straight line are found in inscriptions of the lower class, particularly of the provinces.

C. This is found in inscriptions showing Greek influence, as those of Naples and Sicily. It is a form of the Greek Σ. The original four-stroke Greek Σ appears in Latin as an indication of value to denote the *semuncia*.

In rare instances S is taller than other letters when standing at the beginning of the line, and more rarely still when medial.

### T

↑ T † T are the archaic forms of this letter.

In the early period of the Empire the standard letter was plain, with transverse at right angles to the shaft, not very short, but unornamented.

A form with transverse slightly curved T appears in inscriptions of the first century, and is very common in the second, third and fourth centuries. It belongs originally to the documentary writing and the cursive letters.

Very often this letter rises above others, for reasons of space. Examples of this are found from the beginning of the seventh century of the City, and in the imperial period the usage is very common.

## V

V. This is the early, and at the same time the regular form of this letter in the Republic and Empire.

At times the apex of the angle is placed a little to the right, and as a consequence the right side becomes perpendicular and the left side is lengthened.

The curved form U belonging to the uncial writing is found in City inscriptions of the last part of the second and the first part of the third centuries. It afterwards appears frequently in inscriptions with uncial letters.

## X

The early form of this letter is unornamented and exact, with lines equally divided. In the imperial period the quadrate form is the more elegant, but the ordinary shape is narrow and graceful.

Many instances occur of a form marked by the broadening of the transverse X. This is seen not only in the plain letter, but also in the more recent and more elegant forms.

## Y

This letter, as well as the Z which follows, was introduced in the later days of the Republic, to aid in transliterating Greek words. Alphabetic forms were then attaining the perfection which marked the Augustan letters, hence both Y and Z are well proportioned in their early history.

The regular letter is a plain rectilinear figure, with the two sides of the angle equal. Even in the best period, however, letters with curved lines are common.

## Z

The letters of the best period show equal angles and equal horizontals.

## J †

These are the two letters of Claudius that appear in inscriptions. The former, denoting the consonant V, is the more common.

## LIGATURES

The necessity for economizing space in engraving letters led to the expedient of joining them in monograms. This custom first appears in the lettering of coins about 200 B.C., and in inscriptions about 150 B.C., particularly at the end of the line, where other devices, such as the use of small letters and their insertion in curved letters, mainly C, e.g.  $\mathbb{C}$ ,  $\mathbb{C}$ , and superposition, as  $\overset{f}{M}$ , were also employed.

The use of ligatures did not become very general in Rome or Italy, but they are common in Gallic inscriptions from the first century A.D., and in those of Germany after the second century, while they abound in African inscriptions of the third century.

The ligatures of the cursive alphabet of the Dacian wax tablets are given in Plate VII. These present peculiar difficulties, while those of the capital letters, a few of the most common of which are given below, are more readily interpreted.<sup>1</sup>

## LIGATURES OF TWO LETTERS

$\mathbb{A}$  = am,  $\mathbb{M}$  = ma,  $\mathbb{N}$  = an,  $\mathbb{R}$  = ar,  $\mathbb{A}$  = au,  $\mathbb{X}$  = au,  $\mathbb{A}$  = ar,  
 $\mathbb{C}$  = ch,  $\mathbb{D}$  = de,  $\mathbb{N}$  = nd,  $\mathbb{E}$  = ne,  $\mathbb{M}$  = me,  $\mathbb{P}$  = mp,  $\mathbb{V}$  = ve,  
 $\mathbb{H}$  = th,  $\mathbb{B}$  = ib,  $\mathbb{L}$  = li,  $\mathbb{M}$  = mi,  $\mathbb{N}$ ,  $\mathbb{N}$  = ni,  $\mathbb{R}$  = ir,  $\mathbb{T}$  = ti,  
 $\mathbb{A}$  = al,  $\mathbb{U}$  = ul,  $\mathbb{N}$  = nn,  $\mathbb{N}$  = nt,  $\mathbb{R}$  = er,  $\mathbb{O}$  = or,  $\mathbb{P}$  = pr,  
 $\mathbb{T}$  = tr,  $\mathbb{T}$  = ta,  $\mathbb{T}$  = te,  $\mathbb{U}$  = ur,  $\mathbb{R}$  = ru.

## LIGATURES OF THREE LETTERS

$\mathbb{A}$  $\mathbb{R}$  = aur,  $\mathbb{E}$  $\mathbb{N}$  = ent,  $\mathbb{E}$  $\mathbb{R}$  = eri,  $\mathbb{T}$  $\mathbb{E}$  = ite,  $\mathbb{M}$  $\mathbb{E}$  = mae,  $\mathbb{M}$  $\mathbb{A}$  = mat,  $\mathbb{N}$  $\mathbb{H}$  = nth,

In some cases a number of letters are combined, thus:

$\mathbb{A}$  $\mathbb{R}$  = atur,  $\mathbb{M}$  $\mathbb{A}$  $\mathbb{R}$  = matri,  $\mathbb{M}$  $\mathbb{M}$  $\mathbb{M}$  = maxim,  $\mathbb{O}$  = o(ssa) h(ic) s(ita), *Inscr. Rhen.* 1983.  
 $\mathbb{T}$  $\mathbb{E}$  $\mathbb{R}$  = o(pto) t(erra) s(it) l(evis) t(ibi), *C.I.L.* III. 5577.

## SICILICUS. APEX. MARKS OF PUNCTUATION

## SICILICUS 3

This has already been referred to in the treatment of double consonants.

The testimony of the Grammarians, that the *sicilicus* was used to denote that the consonant should be regarded as a double letter, is supported by a few instances of its use found in the inscriptions of the time of Augustus. *C. I. L. V.* 1361; *C. I. L. X.* 3743.

## APEX

From the period just after Sulla up to the second half of the third century vowels long by nature were denoted by a sign termed the *apex*. They appear most frequently in inscriptions of the first century A.D., and of the first half of the second.

The earliest form of this sign is ʹ ʹ ʹ ʹ, but in the time of the Empire the usual form is the acute accent ʹ.

The apex is found over A, E, O, V, EI = *i*, but very rarely over *l*.<sup>1</sup>

Its occurrence in the *acta* is decidedly less frequent than in the monumental inscriptions.

Other methods of indicating the long vowel were:

- (a) The double vowel introduced by Attius (see page 30).
- (b) The use of EI, the spurious diphthong, to denote long *l*, a custom dating from the Gracchan period, 620/134.
- (c) The tall *l*, from the time of Sulla up to latter half of second century.

In the Augustan age both methods were still in use, as in the Monumentum Ancyranum a number of words (twenty-two at least) are found with tall *l*, and three with EI.

## PUNCTUATION

From earliest times individual words in inscriptions were separated by marks of punctuation, which regularly occupied a position midway between the upper and lower limits of the letters. These points,

<sup>1</sup> Christiansen *De Apicibus et I Longis*, p. 13, shows that out of 1119 instances of the use of the apex, 415 were over *á*, 350 over *ó*, 169 over *é*, 147 over *ú*, 4 over *í*, 32 over *ae*, and 2 over *áu*.

as a rule, were not placed at the end of a line, and did not indicate sentences or parts of sentences.

There are various forms of these punctuation marks. The round form, which may be regarded as the primitive mark, belongs in its general use to inscriptions in raised letters. Very rarely are round marks found in inscriptions, as in stone this shape would be most difficult to make. Stone workers probably made a square with four blows of the chisel, hence we have , ,  in the more ancient inscriptions. In the more elaborate inscriptions triangular shaped points are found, , , , which are made more ornamental by the curving of the sides, .

These triangular points remained in use from the earliest times down to the most recent periods.

The triangular shape finally passed into the form of an ivy leaf, termed in an inscription (*C. I. L. VIII. 6982*) *hederæ distinguentes*, , . This form is very common in the latter part of the first century, but is not found in the time of the Republic (see page 40). Naturally in cursive writing the form of punctuation would be a line. Hence in the "scratched" inscriptions of Pompeii we find examples of this form, and from the close of the second century it is found in the stone inscriptions. It has the following varieties: , , , .

These points of punctuation were regularly placed between the letters, but in some cases, for lack of space, they are found above, or in case of the round forms C, D, G, O, Q, inside of the letter.

Punctuation was not confined to the separation of words, but may be found between syllables, and in some cases between letters. In sepulchral inscriptions of the lower class unusual punctuation of this kind had a place, but it is rare in great public and private inscriptions.

In some instances the component parts of compounds were indicated by punctuation, as *sub · legi, in · perato, ad · versus*.

Rarely are points found at the beginning of lines, but more frequently at the end.

In *carmina* the metric lines are marked,<sup>5</sup> and when half-verses are written this also is indicated by punctuation.

At times a long space takes the place of the punctuation mark. In one of the Scipio "Elogia" the ends of the metric lines are indicated by the spacing, while in another the punctuation mark is used, in this case a horizontal line.<sup>1</sup>

Like the ivy leaves referred to above, branches of palm are found as early as the first century marking the more important divisions.

Under the Republic, punctuation marks were rarely omitted. The *leges* of the seventh century of the City are an exception in this respect, either because of Greek influence or the carelessness of the engraver.

Still more rarely are points omitted in inscriptions of the best period, from Augustus to Hadrian. In sepulchral inscriptions of the lower class, however, they are quite often neglected.

#### DIVISION OF WORDS

In the more ancient inscriptions words were not, as a rule, divided at the ends of lines, but were written entire. This is particularly true of the older *leges* of the Republic, with some rare exceptions, such as the Lex Rubria.<sup>2</sup> In the *acta* of the imperial period words are frequently divided, the division following the usual law of syllables which generally holds in the inscriptions.

closed - s long of alphabet.

## CHAPTER III

### NUMERALS

THE characters which served as Latin numerals are as old as the letters of the alphabet, and in some cases perhaps older. The original numerals were the vertical I denoting the large unit, the horizontal — or • denoting the small unit, while V denoted 5, and X denoted 10. The earlier system was probably decimal, the small unit being  $\frac{1}{10}$  of the large; and, although in the later change to the duodecimal system the small unit became equal to  $\frac{1}{12}$  of the large, the original signs —, • were still used.<sup>1</sup>

Upon the introduction of the alphabet two letters were adopted as numerals, ↓ (later ↓, ⊥, L), the Chalcidian *ch*, = 50, and ϕ, *ph* (later CIO) = 1000, since they were not needed in the Latin alphabet. A sign for 100 must have been adopted in like manner, and its later representative, C, seems to indicate as its origin Θ (*th*), the remaining aspirate. This appears from a comparison with Etruscan numerals, which closely resemble the Latin, as I = 1, Λ = 5, X = 10, ↑ = 50. As the Etruscan alphabet retained the aspirates, we would naturally expect some mark of differentiation, if such letters were used as numerals. Hence ↓ inverted, *i.e.* ↑ = 50, ϕ becoming ⋈ = 1000, and O or □, the Etruscan *th*, becoming ⊗ = 100. The similarity existing between the Etruscan and Latin systems thus supports the theory that Θ originally expressed 100.<sup>1</sup>

The remaining Roman numerals were formed by indicating multiplication by the doubling of the signs, as ⊕ = 1000, ⊕⊕ = 10000, ⊕⊕⊕ = 100000, while the halves of these: D = 500, D̄ = 5000, and D̄̄ = 50000. In the more ancient times the Roman numerals did not go beyond 100000, so that it was necessary to repeat the sign

<sup>1</sup> Mommsen, *Hermes*, XXII. pp. 598, 599.

for 100000 to indicate higher amounts. In the inscription on the Columna Rostrata  $\text{Ⓞ}$  is repeated some thirty times.

At a later period a sign  $\text{Ⓞ}$ , indicating *quingenta milia*, is found as a substitute for the repetition of signs denoting 100000.

In the latter part of the Republic a custom became prevalent to write simple numbers and indicate multiplication by lines above for thousands, and with others on the sides of the signs for hundred thousands, so *e.g.*  $\bar{\text{V}}$  took the place of  $\text{I} \text{C} \text{C} = 5000$ ,  $\bar{\text{D}}$  took the place of  $\text{C} \text{C} = 500000$ , and  $\overline{\text{X}}$  = 1000000. The earliest use of these lines is found in the Lex Rubria<sup>1</sup> of Caesar's time. In the early Empire the two systems are both in use. Thus in the Pompeian auction tablets of the time of Nero the earlier system is found, while in another of the same period the latter. In the later period the latter form prevailed.<sup>2</sup>

There appears to have been a tendency at first to assimilate numerals to letters. The original numerals I, V, X were identical with three of the letters, and when  $\Phi$  was divided the resulting form became a D, C took the place of the  $\Theta$ , and  $\downarrow$  became L.

M for *mille* or *milia* appeared from the second century A.D., but in the combination M · P = *milia passuum* the use of M was much older. The M was an abbreviation for the word *mille* or *milia*, and was never used by the Romans as a numeral.<sup>3</sup>

The adoption of the C as 100 must have taken place after the date of our earliest inscriptions, subsequent to the time when *fhefhaked* and *pakari* were written, for *centum* at that time would have been *kentum*.

Difficulty naturally arose from the employment of the same signs as letters and numerals. In consequence of this we find a mark of differentiation used, namely, a line crossing the numeral. This is seen in  $\text{D}$ , which dates from the seventh century of the City; cf. also  $\text{X}$  denoting the *denarius*.

<sup>2</sup> M. G. de Petra, *Le Tavole Cerate di Pompei*, Roma, 1876; No. 15, HS  $\bar{\text{V}}\text{CCCLII}$ ; No. 16,  $\bar{\text{V}}$  XXXIX; No. 39,  $\text{I} \text{C} \text{C} \infty$  XXXVIIII.

<sup>3</sup> Mommsen, *Hermes*, XXII. p. 601,  $\bar{\text{XV}}$  M · N (133 A.D., Henzen 6086); HS · L M · N (153 A.D., Orelli, 2417).

In the Augustan period the line was placed over the numeral, perhaps coincident with the use of numerals of iteration in titles. In the time of the Republic the number of iteration with official titles was given in letters, but from the time of the battle of Actium numerals were used.<sup>1</sup>

To express amounts intervening between these numerals, the signs were placed side by side until the next denomination was reached.

Two methods might be used: 1) the addition method, when the higher number preceded, 2) the subtraction method, when the lower denomination preceded.

The former of these two methods is the older and more usual. 1st method, XVIII = 18; 2d method, XIX = 18; so IIII is more regular than IV, and VIIII than IX.

For the subtraction method Mommsen (*Hermes*, XXII. 603) gives the following rules:

1) Not merely one number, but many in order, could be subtracted, so that IIX is just as correct or incorrect as IX.

2) Only the numerals I, X,<sup>2</sup> C,<sup>3</sup> were, as a rule, used in subtraction, seldom the sign for 1000, and never V, L, D.

3) The number I is subtracted, as a rule, only before V and X, and only by exception before L and the higher numbers.

4) The subtractive method has the object of saving space. It is therefore inadmissible unless room is gained, so, not IIIX but VII, not XXXC but LXX. It predominates in cases where an essential simplification is obtained, and, therefore, particularly in the numbers 80 and 90, and occurs more in the carelessly made private inscriptions than in the precise monumental writing.

5) The numeral or numerals to be subtracted were placed before the last numeral of an addition series, so that XIIIX = 18 was written, not IIXX; and CCCXXC = 380, not XXCCCC.

There are certain numerals which deserve special consideration.

<sup>1</sup> In *C. I. L.* VI. 873, dating 725/29, *cos. quinct., cos. design. sext., imp. sept.*, and *C. I. L.* XII. 3148, dating 729/25; but in *C. I. L.* X. 3826, dating 723/31, *imp. VI. cos. III* and *C. I. L.* VI. 701, dating 744/10, *imp. XII cos. XI trib. potest. XIV.*

<sup>2</sup> *C. I. L.* I. 1166. CCCX↓; 1143. CX↓ VIIIS; 536, dating 567/157. CCXXC.

<sup>3</sup> *C. I. L.* I. 198, dating 631/123, CD↓; *C. I. L.* VI. 1243 e, f, C∞↓, C∞LX.

2. II. This numeral, with the earlier position of line of differentiation, is regularly seen in  $\text{†S}$  denoting *sestertius*.  $\overline{\text{II}}$  occurs very frequently, particularly when indicating successive consulships and denoting *duumvir* ( $\overline{\text{II}}$  VIR). At the beginning of lines  $\overline{\text{II}}$  is also found.

4. Either IV or IIII. The former, the subtractive form, belongs to writing of the lower class, appearing first on the vessels of San Cesareo, which date in the seventh century of the City.

IIII is the more usual form, varying as follows:  $\text{HH}$ ,  $\text{†III}$ ,  $\overline{\text{IIII}}$ , frequently denoting *quattuorviri*,  $\overline{\text{IIII}}$ ,  $\overline{\text{IIII}}$  VIR.

5. V. In Pompeian tablets it is found on its side.  $\text{IIII}$  appears in African inscriptions.

6. VI, also  $\overline{\text{IIII}}$ .

8. VIII. The subtractive form IIX is a rare occurrence.

9. VIII! is the more common form. IX is rare.

10. X. The transverse cuts the middle of the letter when the *denarius* is denoted,  $\text{X}$ .

14. XIIII is more common than XIV.

18. XVIII, but XIIIX in *C. I. L. III. 582*.

19. XVIIIII.

28. XXVIII, but XXIIIX, *C. I. L. VI. 9934*.

45. XLV.

In some inscriptions  $\text{XX} = 20$ ,  $\text{XXI} = 25$ ,  $\text{XXII} = 30$ ,  $\text{XXIII} = 35$ ,  $\text{XXIV} = 40$ .

50.  $\downarrow$  is the original form,  $\downarrow$  appears down to the Augustan period,  $\perp$  is seen in the "Lex Repetundarum" (123 B.C.), and during the first and second centuries A.D.

60-100. To represent numbers between 50 and 100, L with X repeated is the regular form. In some African inscriptions XXXXXX (*C. I. L. VIII. 3914*) is found.  $\overline{\text{LXXX}}$  and  $\overline{\text{LXXV}}$  are worthy of notice.

500. D, originally half of  $\text{D}$ , was subsequently marked by transverse  $\text{D}$ , as in the "Lex Repetundarum," and in many inscriptions of the Empire.

1000.  $\text{D}$  is the oldest form. This was not maintained, but appeared in the more common form  $\infty$ , which was also modified to  $\infty$  or  $\text{D}$ .

Combinations of the preceding signs were used to denote higher numbers.  $\infty \infty \infty \infty \text{C} = 4100$ .  $\infty \infty \infty \text{CCXX} = 3220$ .  $\overline{\text{XXI}} \text{DCLXI} = 21661$ .

By exception, the additional thousands were denoted by the subtractive form, thus  $\infty \text{L} = 4000$  (*C. I. L. X. 1273*).

10000 =  $\text{C}$ , or  $\text{C}$ ,  $\text{C}$ ,  $\text{C}$ ,  $\text{C}$ ,  $\text{C}$ .

5000 =  $\text{D}$ , or  $\text{D}$ ,  $\text{D}$ ,  $\text{D}$ .

100000 =  $\text{C}$ , or  $\text{C}$ .

50000 =  $\text{D}$ , or  $\text{D}$ .

The use of a horizontal and verticals has already been referred to.  $\text{X} = 10000$ .  $\text{X} = 1,000,000$ .

In the time of Hadrian the  $\text{M}$ , regularly denoting 100000, was strangely used to indicate 1000.

Naturally the variety of the uses for which these horizontal and vertical lines were employed caused much confusion (*Suetonius, Galba. 5*).

### FRACTIONS

The Roman system of fractions is based upon a division of the unit, *as*, into twelfths, *unciae*, the former being denoted by  $\text{I}$ , the latter by  $\text{—}$  or  $\text{.}$ . The use of the nobler metals led to a division of the *uncia*, thus  $\frac{1}{2}$ ,  $\frac{1}{3}$ ,  $\frac{1}{4}$ ,  $\frac{1}{6}$ ,  $\frac{1}{8}$ ,  $\frac{1}{12}$ ,  $\frac{1}{24}$ , and finally  $\frac{1}{48}$  of the *uncia*.

All these fractions have special names, and can be arranged in the following table, showing the duodecimal system.

TABLE A

	<i>As.</i>	<i>Unciae.</i>

	<i>As.</i>	<i>Unciae.</i>
Semuncia . . . . .	$\frac{1}{24}$	$\frac{1}{2}$ Ⓛ or Σ or ϵ
Binae sextulae or duella . . . . .	$\frac{1}{16}$	$\frac{1}{3}$ U

Sextula . . . . .	$\frac{1}{72}$	$\frac{1}{6}$ S
Dimidia sextula . . . . .	$\frac{1}{144}$	$\frac{1}{12}$ T
Scriptulum . . . . .	$\frac{1}{288}$	$\frac{1}{24}$ Θ
Siliqua . . . . .	$\frac{1}{1728}$	$\frac{1}{144}$

The signs for the various fractions are derived from the initial letters of particular words; thus, S for *semis*; Σ, and later Ⓛ, for *semuncia* and *sembella*; S for *sextula*; T for *teruncius*, which corresponds to the *sicilicus*. The C of the *sicilicus* and the Θ of the *scriptulum* are from the round forms of the Greek sigma.<sup>1</sup> U is due to the repetition of the S, the sign of the *sextula*.

With the introduction of the silver *nummus* (νοῦμμος), *sestertius*, a new system of fractions appears.

The *sestertius* became the major unit corresponding to the old *as*; the *libella* became the minor unit corresponding to the *uncia*, but, as the system was decimal, the *libella* =  $\frac{1}{10}$  of the *sestertius*.

The following table shows this fractional system with the signs, which are adopted from the duodecimal system:

TABLE B

Sestertius	= 1		
Semis	= $\frac{1}{2}$ of sestertius, S		
Libella	= $\frac{1}{10}$ " "	—, as corresponding to the uncia.	
(Singula) Sembella	= $\frac{1}{20}$ " "	Σ, like semuncia.	
(Sicilicus) Teruncius	= $\frac{1}{10}$ " "	C or T	

With the *sestertius* equal to  $2\frac{1}{2}$  *asses*, the copper denominations may be arranged in a decimal system with the *sestertius* as major unit, and with signs adopted from the duodecimal system:

Dupondius . . . . .	$\frac{2}{3}$ or $\frac{8}{10}$ of sestertius, so S	—, i.e. $\frac{1}{2} + \frac{1}{10}$ .
As . . . . .	$\frac{2}{5}$ " $\frac{4}{10}$ " "	" = =
Semis . . . . .	$\frac{1}{5}$ " $\frac{2}{10}$ " "	" — —
Quadrans . . . . .	$\frac{1}{10}$	" —

<sup>1</sup> The Greek C = s appears on Tarentine coins struck before the time of Pyrrhus, and in Greece after the time of Alexander. Mommsen, *Hermes*, XXII. p. 605.

In like manner if the *denarius* be taken as a major unit, with value of 10 *asses*, the system stands:

Denarius . . . . .	1		⌘
Quinarius . . . . .	$\frac{1}{2}$	denarius, so	S
Sestertius . . . . .	$\frac{1}{4}$	"	" = $\Sigma$ , i.e. $\frac{2}{10} + \frac{1}{10}$
Dupondius . . . . .	$\frac{1}{2}$	"	" = $\frac{2}{10}$
As . . . . .	$\frac{1}{10}$	"	" —
Semis . . . . .	$\frac{1}{20}$	"	" $\Sigma$
Quadrans . . . . .	$\frac{1}{40}$	"	" T or $\circ$

The duodecimal fractional system, with the *as* serving as any unit, was applied very generally, e.g. to land measure, to computation of interest, to weight, time, and money. The decimal system was applied to money, to the *denarius* and *as*, then to the fractions of the *sestertius*.

The final depreciation of the *as* brought it down to the value of  $\frac{1}{16}$  of a *denarius*, and, as the *sestertius* =  $\frac{1}{4}$  of a *denarius*, the *as* =  $\frac{1}{4}$  of a *sestertius*.

The duodecimal fractional system of the *denarius*, when equal to 16 *asses*, is set forth in the following table:<sup>1</sup>

In money, the duodecimal system as indicated above was followed before the *as* was reduced, that is, as long as the *as* was considered the *aes grave* or libral *as*.

<sup>1</sup> This sign merely denotes denomination.

The coins were :

As	= 12 unciae,	marked	I
Semis	= 6 "	"	S
Triens	= 4 "	"	OOOO
Quadrans	= 3 "	"	OOO
Sextans	= 2 "	"	OO
Uncia	= 1 uncia	"	O

In addition to these were :

Dupondius	= 2 asses,	marked	II
Tressis or Tripondius	= 3 "	"	III
Decussis	= 10 "	"	X

When silver coinage was introduced, 485/269, the copper *as* became a subordinate denomination of the superior metal, and subsequently depreciated in value so as to be entirely distinct from the old libral *as*, i.e. the unit of the duodecimal system.

The silver system may be shown by the following table :

Silver	{ Denarius = 10 asses, later 16 asses	X
	{ Quinarius = 5 " "	V
	{ Sestertius = 2½ " "	HS
Copper	{ Dupondius = 2 "	H
	{ As = 1	I

We might expect that in money calculations of ordinary life the subordinate denominations would be expressed in terms of copper coins, but it was customary to follow the silver fractional system as far as possible.

Thus, in an African inscription of the days of Hadrian, *Ephem. Ep.*, VII. 426, we find :

[fecit sta]tuam argenteam ex HS □ CCCXXXV tribus libel(lis) sing(ula) terr(uncio) et aeris quad(rante) cum rei p(ublicae) HS ᷑ prom(ississet), i.e. 51335 sestertii, 1 as, 1 semis, 1 quadrans, since  $\frac{3}{10}$  (*tribus libellis*) +  $\frac{1}{20}$  (*singula*) +  $\frac{1}{40}$  (*terruncio*) =  $\frac{1}{2}$  +  $\frac{1}{4}$ , but  $\frac{1}{4}$  of a *sestertius* = 1 as, and  $\frac{1}{2}$  = *semis*. The word *aeris* shows that *quadrans* is from the copper system.

In denoting money the various indications are : for copper money, *aeris gravis*, or *aeris*, or A(sses); for silver, N = *nummi*, or HS · N = *sestertii nummi*, rarely in the order N · HS, but later

regularly HS . . . N, with the number placed between. With the sums denoting *denarii*,  $\text{X}$  alone was used.

The duodecimal system served for measures of weight, also for linear and surface measures when the foot was divided into twelve parts; e.g. *summa ped(um)* CXXVIII S  $\equiv$   $\text{L}$  = 129 $\frac{3}{4}$  feet;<sup>1</sup> in *agr. p* XXV S  $\equiv$   $\text{L}$  = 25 $\frac{1}{2}$  feet.<sup>2</sup>

In weight, PI denoted a pound, P being the abbreviation for P(ondo), which was the indication of weight, and hence was regularly used with the subordinate denominations, e.g. P · IS<sup>3</sup> = 1 $\frac{1}{2}$  pounds; P  $\equiv$   $\text{I}$  III = 3 *unciae*, 3 *scriptulae*;<sup>3</sup> P  $\equiv$   $\text{I}$   $\frac{\text{V}}{\text{III}}$  = 5 *unciae*, 8 *scriptulae*;<sup>3</sup> P  $\cup \cup \cup$   $\text{L}$  = 5 $\frac{1}{2}$  *unciae*.<sup>4</sup>

In expressing linear or surface measure, P(*edes*) or PED(*es*) is used where the measure exceeds the foot. PED · LXIII S  $\equiv$   $\text{L}$  = *pedes sexaginta tres deunx semuncia*, or 63 and  $\frac{1}{2}$  +  $\frac{1}{4}$  (Wilmanns, 2875). In the building contract of Puteoli, *C. I. L. I.* 577, l. 14: *latum p.* I'·, *altum p.* S'·; and l. 15: *crassos S'*, *altos p.* l. It is exceptional to find the exponent with the simple fraction.

### CHAPTER IV

#### THE ROMAN NAME

THE Roman name enters very largely into the composition of inscriptions of all classes, and forms, therefore, the most important element in their subject matter, often making up the inscription itself. A knowledge, accordingly, of its history and chronological development, its formal arrangement and abbreviations, is essential to a proper interpretation of the inscriptions, which, moreover, are themselves the great source of information as to this subject, since here the Roman name has its fullest use and most complete form.

It must be understood, first of all, that the name among the Romans was not of fixed or absolute form, but that it varied with the history of the people, passing through a process of development and reaching its complete form in the most prosperous period; then suffering modification and losing its regularity in the declining days of the later Empire.

In the earliest times the individual, strictly speaking, was designated by one name, but as a member of society, and in relation to the state, his name consisted of the personal element, with the addition of certain determinatives.<sup>1</sup> The first determinative was the genitive case of the name of the one in whose possession or

<sup>1</sup> In a fragment of uncertain authorship, entitled *de Prænominiibus*, placed as the tenth book of Valerius Maximus by Julius Paris of the fourth century A.D., the statement *Varro simplicia in Italia nomina fuisse ait* is supported by a reference to the names *Romulus* and *Remus*, but controverted by a reference to *Rhea Silvia*, *Silvius Numitor*, *Amulius Silvius*.

under whose authority the person belonged, as of the father in the case of a son or daughter, of the husband in the case of a wife, or of the owner in the case of a slave. Thus *Marcus Marci, Caecilia Crassi*. Later this genitive was followed by *f(ilius)* or *f(ilia)*, *uxor* or *s(ervus)*. The second early determinative was the name indicating the family (*gens*). This at an early period was marked by the suffix *-ius*. The early Roman name thus consisted of, a) the personal name, b) the family name, c) the name of the one in authority, the father or husband, and at times the names of the grandfather and great-grandfather.<sup>1</sup>

Q. Fabius Q(uinti) f(ilius).

In the course of time an additional element, the *cognomen*, brought the Roman name to its full development, so that free-born men possessed a triple name, *praenomen* = individual name, *nomen* = name of *gens*, *cognomen* = name of family (*stirps*).

L. Cornelius Scipio.

Official usage required that with these three names there should also be given the names of the father and of the tribe. These were both placed before the *cognomen*.<sup>2</sup> With the name of the father there might also be given those of the grandfather and great-grandfather.

The inscriptions show that the regular order was *praenomen, nomen, cognomen*. It was observed by the writers of the best prose as Cicero and Caesar.<sup>3</sup> Any variation is due to the necessities of the metre, as in the Scipio Epitaph, where the *nomen* precedes the *praenomen*. or to Greek influence, or to the irregularity of rustic

<sup>1</sup> The original order was I, individual name; II, father's name; III, family name; so Mommsen, who refers to the order among the Greeks, Umbrians and Volscians. The Romans and Samnites transposed the last two.

<sup>2</sup> Lex Julia Municipalis (709/45). *C. I. L.* I. 206, p. 122.

<sup>3</sup> In prose of the good period the usage was *M. Claudius*, not *Claudius Marcus*, even in Livy; *M. Claudius Marcellus*, not *M. Marcellus Claudius*. Without the *praenomen*, according to older method (so Cicero), *Marcellus Claudius*; according to later method (so Caesar), *Claudius Marcellus*. G. Lahmeyer in *Philol.* XXII. 1865.

usages, as *Alfenos Louci(os)* on a cinerary jar from the *sepulcretum* near the church of San Cesareo (*C. I. L. VI. 8220*).

#### PRAENOMEN

The *praenomen*, the strictly personal name, was conferred by parents upon children on the *dies lustricus*, which was the ninth day after birth in the case of boys, and the eighth in the case of girls.

This is the opinion of ancient writers in general,<sup>1</sup> but Q. Scaevola<sup>2</sup> is authority for the statement that the name was not conferred upon a boy before he assumed the *toga virilis*, nor upon a girl before her marriage.

It is probable that the informal conferring of the name in the family took place on the *dies lustricus*, but the official recognition of the same occurred at the time of the assumption of the *toga virilis*. This opposition between theory and practice is set forth in the inscriptions, where we find names of persons dying in childhood both with and without *praenomina*. Frequently the word *Pupus* (abbreviated PUP) took the place of the *praenomen*, thus indicating an early death.

*Pup(o) Pontio, T. (Pontii) f(ilio), Vo[l](tinia tribu), Proculo, an(norum) tredecim.* (Of the first century A.D.) *C. I. L. IX. 2789.*

The number of inscriptions giving the *praenomina* exceeds that of those without, particularly after the second century A.D.

The *praenomen* was regularly abbreviated when joined with the *nomen* and *cognomen*. This was not a matter of choice, but an established custom, indicating Roman citizenship. In consequence we do not find the *praenomen* written in full, unless standing alone or in inscriptions in which Greek influence has been felt, or in those of the lower class dating mainly after the second century A.D.

<sup>2</sup> *De Praenomine*, § 3, *pueris non priusquam togam virilem sumerent, puellis non antequam nubarent, praenomina imponi moris fuisse Q. Scaevola auctor est.*

The following are the *praenomina* in general use, with their abbreviations. *Kaeso*, *Manius*, *Servius*, *Spurius*, are the most uncommon.

A Aulus.	D Decimus.	Μ (M') Manius.	Q Quintus.	S Spurius.
C Gaius.	K <i>Kaeso</i> .	M Marcus.	SER Servius.	TI Tiberius.
CN Gnaeus.	L Lucius.	P Publius.	SEX Sextus.	T Titus.

**Aulus.** Abbreviations: A, AV, or AVL (rare), O (very rare). Additional form, Olus. Cf. the slave name *Olipor*.

**Decimus.** D, DEC (rare and late). Additional form, *Decumus*. This praenomen is regularly found with the names of the *Claudii* (patrician), and of the *Iunii* and *Laelii* (plebeian).

**Gaius.** C with the primitive value, that of the Chalcidian Γ.<sup>1</sup>

**Gnaeus.** CN, GN (very rare). Additional forms: *Gnavos* (early), *Naevus*, *Naeus*, *Gneus* (rare).

**Kaeso.** K. This praenomen is not common. It is found with names of the *Acilii*, *Duillii*, *Fabii*, as shown in the *Fasti Consulares*, and the earlier inscriptions, such as those found at *Praeneste*.

**Lucius.** L, LV (rare). Early form, *Loucius*.

**Manius.** Μ or ΜJ. The familiar form with an apostrophe M' is not found in the inscriptions. This praenomen is common with names of the *Aemilii* and *Sergii*.

**Marcus.** M. This is probably the most common praenomen.

**Publius.** P, PVP = *Puplius* (rare), PO appears in one instance for *Poblio*, *C. I. L. IX. 5699*.

**Quintus.** Q. Additional form, *Quinctus*.

**Servius.** SER. This praenomen is found with names of the *Cornelii* and *Sulpicii*; elsewhere it is rare, and, for the most part, archaic.

**Sergius** is the family name, having the same origin as *Servius*.<sup>2</sup> It is first found as a praenomen in an inscription of *Salona*, *Eph. Epigr.* II. n. 522, referring to the Emperor *Sergius Galba*. S is a rare abbreviation for *Sergius*, *C. I. L. XIV. 2636*.

**Sextus.** SEX, SX for reasons of space on a denarius of the City, of the sixth century, SEXT (once, *C. I. L. II. 1495*), S appears in lists of Praetorian soldiers and on tombstones of the second and third centuries A.D., and in Africa.

<sup>1</sup> Quintilian, *Inst. Orat.* I. 7, 28, Terentianus Maurus, *De Metr.*, V. 890 ff., Priscian, I. 7, 28, are authorities for the statement that C and CN were abbreviations for *Gaius* and *Gnaeus*, with values G and GN.

<sup>2</sup> "Sergius and Servius are related as *ni(n)gere* and *nives, vixi* and *vivere* (*Corssen, Ausp.* I. 44). They are merged in an older *Sergivius*, as *nig-* and *niv-* in *ni(n)guis*." (Mommsen, *Römische Forschungen*, p. 8.)

**Spurius.** S (archaic), SP after middle of the first century A.D.

**Tiberius.** TI, later TIB.

**Titus.** T.

The three following, belonging to certain special patrician families, should also be added :

**Appius.** AP, APP (rare). This praenomen is the same as the Sabine Atta, and was probably brought to Rome by the Claudii.

**Mamercus.** MAM, used exclusively with the names of the Aemilii as seen in the Fasti Consulares of the third, fourth, and seventh centuries.

**Numerius.** N. Gk. *Νεμερίος*. This is Samnite in its origin. — Festus, p. 170, and the author of *de Praenom.* § 6 inform us that through the marriage of Q. Fabius Vibulanus with the daughter of Numerius Otacilius of Maleventum this name was brought into the Fabian family. Cf. Numasioi on the Fibula Praenestina.

Of these eighteen *praenomina* certain only were selected by the individual patrician families.

Mommsen has arranged these in a table (*Röm. Forsch.*, p. 15).

Aemilii: C, CN, L, MAM, *Λ* (M'), M, Q, TI.

Claudii: AP, C, D, L (*disregarded later*), P, TI, Q. (*Ephem. Ep.* IV., p. 218).

Cornelii: A, CN, L, M, P, SER, TI.

Fabii: C, K, M, N, Q.

Furii: Agrippa, C, L, M, P, SEX, SP.

Iulii: C, L, SEX, Vopiscus.

Manlii: A, CN, L, M (*disregarded in 370 B.C.*), P, T.

Still further restriction in the selection of names is shown in the exclusive use of *Tiberius* and *Decimus* by the Claudii Neronēs, and *Gnaeus*, *Lucius*, *Publius*, by the Cornelii Scipiones.

After a certain time the Claudii did not use *Lucius*, nor the Manlii, Marcus, because, as Cicero and Suetonius inform us,<sup>1</sup> certain men bearing these names committed crime. Likewise, Marcus was not used by the *gens Antonia* after the downfall of the Triumvir.<sup>2</sup>

In addition to the *praenomina* just discussed, which form the body of those in general use, there are others worthy of mention, either

<sup>1</sup> Cic. *Phil.* I. 13, 32. Suetonius, *Tiberius*, c. 1.

<sup>2</sup> Plutarch, *Cic.* c. 49; Dio, LI. 19; Tacitus, *Ann.* III. 17.

those which fell into disuse in early days, and are known from the Fasti, or from statements of authors,<sup>1</sup> or those which are of foreign origin and of rare occurrence.

**Agrippa.** AGRIPP is found in the Fasti Cons. with names of the Furii and Menenii.

**Faustus,** with names of the Cornelii Sullae. (Consuls 31 and 52 A.D.)

**Hostus,** with names of the Lucretii.

**Lar,** with names of the Herminii. This is an Etruscan praenomen.

**Opiter.** OPI or OPET, with names of the Verginii.

**Paullus,** with names of the Aemilii, Lepidi, and Regilli; afterwards with those of the Fabii and Postumii.

**Postumus.** POST, with the names of the Aebutii, Cominii, and Veturii, also Umbrian.

**Proculus.** PR, with the names of the Geganii and Verginii.

**Vibius.** V (archaic), VI and VIB (rare), with the names of the Sestii. The old form was Veibius. This is common in inscriptions from the district of the Oscan dialect.

**Volero.** VOLER, with the names of the Publilii.

**Volusus.** VO, with the names of the Valerii.

**Vopiscus,** with the names of the Iulii.

The following *praenomina* are, as a rule, of foreign origin, and occur only in individual instances:

*Annius* . . . . . AN

*Aruns* . . . . . AR . . . . . Etruscan.

*Atta* or *Attus* . . . . . AT (so Attus Clausus is Sabine for Appius Claudius).

The *praenomina*, when first used, evidently had a significance suited to the circumstances of their original application.<sup>1</sup> This primitive meaning lost its force, so that words originally conveying some reproach might be given to those of high birth.

Although the common *praenomina* were employed in naming the first four sons, nevertheless the following were used, finally with loss of original meaning:

<i>Primus</i> . . . . .	PR or PRI	<i>Secundus</i> .
<i>Tertius</i> (abbreviated in one instance),	TERT	<i>Quartus</i> , QVAR or QVART
<i>Quintus</i> .		<i>Sextus</i> .

### *Irregularities.*

#### a) Cognomina as Praenomina.

In certain countries, notably Gallia Cisalpina, *cognomina* were at times used as *praenomina*.

So, *Maximus C. I. L.* V. 5902, *Rufus C. I. L.* V. 7064, *Firmus C. I. L.* V. 7339.

In the Augustan period this transfer in use, so that *cognomina* served as *praenomina*, is found in the names of members of the imperial family, and those of the nobility.

<sup>1</sup> So, *Manius* (mane), born in the morning; *Tiberius*, Tiberis, the god of the river; *Titus*, tata, used by children as papa; *Appius*, atta, applied by children to old men.

<i>Cossus</i>	. . .	Cossus Cornelius Lentulus.	Consul, 753/1.
<i>Drusus</i>	. . .	Drusus Iulius Ti. f(iilius) Aug. n(epos) divi pron(epos) Caesar	
		= Drusus, son of Tiberius.	
	. . .	Drusus Iulius Germanici f. Ti. n. Aug. pron. Caesar	
		= Drusus, son of Germanicus.	
<i>Sisenna</i>	. . .	Sisenna Statilius Taurus.	Consul 16 A.D.
<i>Taurus</i>	. . .	Taurus Statilius Corvinus.	Consul 45 A.D.

The designation of honor, "imperator," which in republican days followed a triumph, in the time of Julius Caesar became an actual title, and finally in the days of Augustus took the place of the *praenomen*. See page 115.

b) Nomina as Praenomina.

From the middle of the second century A.D. the *nomina* Aelius, Aurelius, Flavius, Ulpius were frequently used as *praenomina*, and were abbreviated.<sup>1</sup>

*Praenomina of Women.*

In the names of women as found in the inscriptions the *praenomen* is of uncommon occurrence and little importance, compared with the regular appearance and significance of the same element in the names of men. The *praenomen* was all-important to a man in his relation to the state and to society, while in a woman's name its presence was by no means essential, and its abbreviation did not imply what a similar abbreviation implied in the *praenomina* of men.

Nevertheless, from the earliest times, women had *praenomina*, and during the republican period this custom was maintained. This is shown by the legendary names Acca Larentia, Gaia Caecilia, Quinta Claudia, Quarta Hostilia,<sup>2</sup> also from the testimony of the inscriptions, such as those of the grove of Pisaurum (*Cesula Atilia*, C. I. L. I. 168), which regularly give *praenomina* of women, also those from

<sup>1</sup> In an inscription from Apulia, dating second or third century A.D., Aemilia is referred to as a *praenomen*. C. I. L. III. 1228.

<sup>2</sup> de Praenomina. § 7 "Antiquarum mulierum frequenti in usu praenomina fuerunt Rutilia, Caesellia, Rodacilla, Murrula, Burra a colore ducta. Illa praenomina a viris tracta sunt Gaia, Lucia, Publia, Numeria, ceterum Gaia usu super omnes celebrata est."

the tombs of Praeneste, e.g. *Gaia H(e)r(enia) ?* (C. I. L. XIV. 3149), and with abbreviation, *C. Comenaii*, *C. Usor(i) ?* (C. I. L. XIV. 3102).

In the case of two sisters the elder was known as *Maio(r)*, the younger *Mino(r)* — *Maio Fabricia*, *Mino Cumia* (C. I. L. XIV. 3111, 3133), *Mino Ania C. f.* (C. I. L. XIV. 3058). In some instances, at a later period, the oldest sister had the *praenomen Maxima*.

Other *praenomina* of importance are *Pola* (oldest form) for *Paul(l)a*, *Polla* (in country districts), *Pusilla*, *Pupa*, also the numeral adjectives which were in use in all periods, *Prima*, *Secunda*, *Tertia*.

In the imperial period *praenomina* of women are of little account, and occur entirely as exceptions. \*

#### NOMEN

The second determinative in the early Roman name was the name which belonged to all members of the same family, and which was at first identified with a certain locality. Afterwards the *nomen* denoted members of the same *gens*, men, women, clients, freedmen, while the *cognomen* indicated the family of the *gens*.

The *nomina* of the ancient Roman families, both the patrician and, for the most part, the plebeian, ended in *-ius*, and the closely related terminations *-aius*, *-eius*, *-eus*, *-aeus*.

*Ex.* — *Aemilius*, *Cornelius*, *Furius*, *Manlius*, *Vibidaius*, *Arcaeus*, *Terraesus*, *Cocceius*, *Pompeius*.

In early inscriptions, such as those on the earthen vessels from San Cesareo, *nomina* are found ending in *-is*, in place of *-ios*, so *Anavis*, *Clodis*, *Caecilis*, and the Oscan *Heirinnis*.

In addition to these there are many with different endings, which were once restricted to certain localities of Italy.

The terminations *-arna*, *-erna*, *-enna*, *-ina*, *-inna*, show Etruscan derivation.

*Mastarna*, *Perperna*, *Caecina*.

*-as*, *-anas*, *-enas*, *-inas*, show Umbrian derivation.

*Maecenas*, *Sentinas*.

-*acus*, -*avus*, show Gallic derivation.

Avidiacus, Amnavus.

-*enus* shows Sabine and Oscan derivation.

Alfenus, Varenus.

-*icus* marks *nomina* from Illyria, Lusitania and Africa.

Abalicus, Boicus, Veronicus, Caturicus.

To these there should be added Latin, Sabine and Umbrian *nomina* in -*anus*, mainly derived from names of places.

Acerranus (Acerræ), Aequanus (Aequum), Calpetanus, Norbanus (Norba).

Also *nomina* in -*inus*, partly of Latin origin.

Pomptinus, Crastinus.

On the analogy of early names in -*ius* are formed the Greek names of similar ending, as *Eumachius*, *Aristius*, *Nymphidius*; and *Propertius* of Umbrian origin, also like formations from other languages.

After the second century A.D., in the provinces, there appear many new *nomina* made from *cognomina* and other *nomina*.

Faustinius, Secundinius.

The *nomen* Verres,<sup>1</sup> of Roman origin, stands by itself.

*Nomina* appear in the inscriptions, as a rule, in their complete form.

### *Exceptions.*

1) Nouns in *ios* or *is* drop the final *s* in early inscriptions:

Cornelio(s), *C. I. L. I. 31*, about 250 B.C.; Corneli(s), *C. I. L. I. 35*, about 160 B.C.; Claudi(s), *C. I. L. I. 196*, of 196 B.C.; L. Anici(s) V. f., *C. I. L. I. 75*.

<sup>1</sup> *Rhein. Mus.*, XV. 1860, p. 172 and 207. Ritschl, *Opusc.* IV. p. 469. *Phil.*, XIX. 1868, p. 110

- 2) Abbreviations of *nomina* are found at times where the name may be readily supplied, as in tomb inscriptions, where many of the same *nomen* are mentioned.<sup>1</sup> So AEL for Aelius, CL or CLAVD for Claudius, IVL or I for Iulius.

#### COGNOMEN

The *cognomen*, although the last addition to the actual Roman name, is identical in its origin with the *praenomen*, for it was first applied as a strictly personal name, and had a meaning as a surname or nickname appropriate to the individual. It differed, however, from the *praenomen* in its early use in several respects, for it was not an essential part of the name, neither was it given to children, but to adults; it was generally an adjective referring to some peculiarity of body<sup>2</sup> or mind,<sup>3</sup> or derived from the name of the place of birth.

As to the time of the introduction of the *cognomen*, at least of the recognition of its use, we can form an idea from the position it holds in the name, in that it follows the word indicating the tribe. The tribal division of the Roman people belongs to the days of Servius Tullius, hence the inference that the use of the *cognomen* does not date back further than the Servian Constitution. It appears in the oldest Scipio inscriptions of the fifth century of the City, also on Roman coins from the time of the second Punic war, while in the laws of the seventh century of the City of a less formal character (*Lex Repetundarum*, 631/123) its use is demanded. In important decrees, however, where conservative influences are likely to prevail, it does not appear before the time of Sulla. It can be said, then, that the custom of writing *cognomina* dates back to the fifth century of the City, while its regular use may be assigned to the latter part of the seventh century.

The *cognomen*, at first a strictly personal name, was soon recog-

nized as a family possession, and became an heirloom for succeeding generations. Two principles appear to have controlled its use: first, it was regarded as the indication of the family (*stirps*) of the *gens*, so of the *gens* Cornelii there were the Cethegi, Lentuli, Scipiones, and, with a subdivision, the Cornelii Scipiones Nasicae; again, it was considered an indication of nobility, though not absolute, for, though the patricians and most of the plebeians had *cognomina*, certain families of the plebeians, the Antonii, Duilii, Flamini, Marii, Memmii, Mummii, Sertorii, were without them. The specially selected *praenomina* had once indicated nobility, but later the *cognomen* served this purpose, so that the number of these names that were not the property of the nobility in early republican times is very small. In the later republican period, and in imperial times, the *cognomen* was given to all freeborn citizens, and frequently to freedmen. This change dates from about the middle of the seventh century of the City.

The *cognomen* differed from the *praenomen* in another respect, namely, in that more than one could be attached to the same name. In the days of the Republic a second and third *cognomen*<sup>1</sup> might be used. Such were

a) the *cognomina ex virtute*, as Caudinus, Fidenas, Achaicus.

Cn. Cornelius Scipio *Hispanus*.

P. Cornelius Scipio *Africanus*.

b) Names indicating the parentage of the adopted, formed from *nomina gentilicia* by the use of suffix *-anus*.

P. Cornelius Scipio *Aemilianus* (son of L. Aemilius Paullus).

c) Special designations, as nicknames, in many instances retaining their meaning.

Q. Caecilius Metellus *Celer*.

P. Cornelius Scipio Nasica *Corculum*.

<sup>1</sup> Among later grammarians, beginning with those of the fourth century A.D., the second *cognomen* was erroneously regarded as an additional element, and termed *agnomen*.

*Names of Women.*

The early names of women probably consisted of an individual name, *praenomen*, followed by the *nomen* of the father and genitive case of his *praenomen*, or by the *nomen* of the husband and the genitive case of his *praenomen*. Later the genitive case was followed by the word *f(ilia)* in case of a daughter's name, and *uxor* in case of the wife's. Cf. Maio(r) Anicia C. f., *C. I. L.* XIV. 3057. The changes in this form consisted in the disappearance of the *praenomen* and the use of the *nomen gentile* of father or of husband,<sup>1</sup> either alone or accompanied, when more formal, by the genitive of the *praenomen* of father or husband.<sup>2</sup> Other inscriptions show the *nomen* of the husband in the gen. case added to the *nomen* of the wife,<sup>3</sup> accompanied in the imperial period by a *cognomen*.

Old inscriptions, such as those of Praeneste and San Cesareo, show isolated instances of *cognomina* in the names of women. At the close of the Republic, however, the evidences<sup>4</sup> of the introduction of this custom are more numerous, and from the middle of the first century A.D. women's names frequently contained *cognomina*. Entirely exceptional are the instances of triple names of women.<sup>5</sup>

*Reduplication of Names.*<sup>6</sup>

The custom of using more than one *cognomen*, beginning in the period of the republic, became common in the early days of the empire, and in the second and third centuries A.D. the number had

increased in some cases to a wonderful degree. This reduplication of names was not confined to *cognomina*; for from the time of Sulla several *nomina* might, for various reasons,<sup>1</sup> be adopted by the same person. At the close of the first century A.D. instances occur of the use of several *praenomina*. These, however, take the position of *cognomina*, and are regarded as such, being regularly written in full. This multiplicity of names raises the question as to the manner of addressing a person so encumbered. In social intercourse children, clients, and slaves addressed the master of the house by using his *praenomen*, while strangers used the *cognomen*. In more formal address the *nomen* and *cognomen* were used.

The consul of 71 A.D. had as full name *C. Calpetanus Rantius Quirinalis Valerius P. f. Pomp. Festus*, but Tacitus speaks of him as *C. Valerius Festus* or *Valerius Festus*.

### *Signa.*

In consequence of the similarity of names, and their number as well, certain persons were designated by nicknames (sobriquets), termed *signa* (*vocabulum*, Tac. *Ann.* I. 41). These *signa* are found in the inscriptions, and are, in general, preceded by the words *idem*, *idemque*, *sive*, *qui et* = *qui et vocatur*, or *vocatus*, or *dictus est*, also *signo* or *signum*; cf. Gk. ὁ καί or φῶσει δὲ.

*L. Cornelius Cato qui et Caligatus*, C. I. L. VIII. 2848; *Aemilius Epicetetus sive Hedonius* (Wil. 2483).

### *Additional Elements.*

It has already been stated that the complete Roman name did not consist alone of the *tria nomina*, but included certain other elements.

I. The first of these in importance is the indication of descent, which was placed after the *nomen* and before the *cognomen*. This showed the freedom of the person designated, hence is regularly found in the inscriptions. It consisted, as a rule, of the *praenomen* of the father followed by the word *f(ilius)*, but extended, in case of nobility, to names of ancestors in order, since in this way aristocracy of birth could be declared. The common abbreviations are: for

Sometimes the *cognomen* of the father is used in place of the *praenomen*.

• Q. Coelius Laeti f(iilius). C. I. L. VIII. 972.

At times the name of the mother either takes the place of that of the father or stands with it.

M. Porcius Aegriliae f(iilius). C. I. L. VIII. 3998.

II. Another element was the name indicating the *tribus* to which a person belonged.

The *tribus*, a territorial classification of the citizens of Rome for the purpose of the census, dates from the time of the Servian reformation. The number was at first four, but increased until 513/241, when it reached the limit, thirty-five, which was never passed. Towards the close of the Republic it lost its early territorial value, and became merely a personal and hereditary affair, while under the Empire it lost its administrative and political importance, and became, in the provinces, an evidence of Roman citizenship, while in the city it was of advantage as a means by which certain privileges, such as the distribution of corn, could be enjoyed by the citizens.

The word denoting the tribe regularly preceded the *cognomen*, sometimes taking its place. In the inscriptions the names of the tribes are, as a rule, abbreviated. When they are written in full, they are regularly in the ablative case, rarely in the genitive.

The following are the names of the thirty-five tribes, with their customary abbreviations<sup>1</sup>: AEMilia, ANIcensis, ARNIensis, CAMilia, CLAUDia, CLVstumina, COLLina, CORnelia, ESQuilina, FABia, FALerna, GALeria, HORatia, LEMONia, MAECia, MENenia, OVFentina (or VF), PALatina, PAPIria, POPlilia (or POB), POLLia

<sup>1</sup> See Cagnat *Cours.*, p. 61, for other abbreviations, also Indices of C. I. L., vols. II., III., V., VII., VIII., IX., X., XII., XIV.

(Momm. *Ephem. Ep.* V., p. 14), POMptina, PVPinia, QVIRina, ROMilia, SABbatina, SCAptia, SERgia, STELLatina, SVCusana, TERetina, TROmentina, VELina, VOLtinia, VOTuria (or VET).<sup>1</sup>

III. In inscriptions of certain classes, particularly of soldiers, there occur names which have words indicating the country, province, city, or town to which the person designated belonged. The position of such words is regularly after the *cognomen*, although at times they are placed between the tribe and *cognomen*.

- L. Cassius L. f. Trom(entina) (tribu) Martialis Aq(uae) Sta(tellae).  
C. I. L. III. 2833.
- C. Cornelius C. f. Pom(ptina) (tribu) Dert(ona) Verus. C. I. L. III. 4057.

These words assume various forms, and in some instances are made more definite by the addition of *civis*, *natione*, *genere*, *domo*, or *natus in*.

The name of the city is in the ablative case, or, if it is singular of the first or second declensions, in the genitive. Ethnic adjectives are also found either standing alone or accompanied by the word *civis* or *natione*. In combination with the word *natione* the adjective either agrees with the name of the person or stands in the nominative case.

If the word *domo* occurs, it is either followed by a noun in the ablative, or, if singular of first or second declension, in the genitive, or is used with an adjective agreeing with the name of the person. See Wil., vol. II., p. 409.

#### *Names of Illegitimate Children.*

Illegitimacy of birth is indicated in the inscriptions by the abbreviations SP · F, standing for *S(purii) f(ilius)*.<sup>2</sup> In some inscriptions<sup>3</sup>

<sup>1</sup> Hübner, in *Handbuch der Klassischen Altertumswissenschaft*, vol. I<sup>2</sup>., p. 680.

<sup>2</sup> C. Asinius, *Spuri f(ilius)*, *spurius*, C. I. L. IX. 2696; V. 3804.

<sup>3</sup> C. I. L. X. 3790, V. 2009, 4145.

the SP stands for the *praenomen* Spurius, which belonged to a few old patrician families, but in various ways the inscriptions prove that SP · F was regularly the indication of illegitimacy. In some inscriptions the father's *praenomen* is given, and thus shown to be different.<sup>1</sup>

D. Avianus Sp. f. Rufus, D. Aviano Salvio patri. *C. I. L. X. 2185.*

Again, SP · F is defined by the expression *filio naturali*,

C. Mamercio Sp. f. . . . filio naturali. *C. I. L. X. 1138.*

or *spurius* is used as a designation.

T. Aretio Proculo spurio Modestae libertae filio. *C. I. L. V. 2523.*

### *Names of Adopted Persons.*

The usage as regards the names assumed by adopted persons varied with different periods. According to the early system, the one adopted received the name of the adoptive father, and added thereto his own *nomen*, changed to a *cognomen*, with termination in *-anus*. The son of L. Aemilius Paullus, adopted by P. Cornelius Scipio, became P. Cornelius Scipio Aemilianus. After Sulla's time one of the original names could be used unchanged. The natural son of L. Licinius Lucullus became M. Terentius M. f. Varro Lucullus, Cos. 681/73. So a famous *cognomen* of the old family could be joined with the entire name of the new, thus:

Q. Caecilius Metellus Pius Scipio. Cos. 702/52.

From the time of Augustus two *nomina* are found in one name, as the result of the use of the *nomen* of the natural father, so,

P. Sulpicius Quirinius. Cos. 742/12,

and

Sex. Papinius C. f. Allenius. Cos. 36 A.D.,

and finally at the close of the first century the entire name of the natural father might be added to that of the adoptive father,<sup>2</sup>

<sup>2</sup> See examples under Reduplication of Names, page 94.

Later on there appears to have been a choice made in the selection of the *praenomen* either of the natural or the adoptive father, also in the retention of any other part of the original name.

Antoninus Pius had originally the name T. Aurelius Fulvus Boionius Arrius Antoninus, but after his adoption by P. Aelius Hadrianus he received the name T. Aelius Hadrianus Aurelius Antoninus.<sup>1</sup>

### *Names of Slaves.*

The slave did not originally have more than one name, which consisted of the name of his master in combination with the word *puer*, so Marcipor = *Marci puer*, Olipor = *Auli puer*, Lucipor, Publipor. In the republican period the slave was known by an individual name, often of foreign origin, derived from the circumstances of capture or purchase, followed by the *nomen*, and afterwards the *praenomen* of his master as well, both in the genitive case. This was followed by the word *servus*, abbreviated S or SER in case of male slaves, and *s(erva)* or *ancilla* in case of female, so,

Helenus Hosti Q. s. Date 656/98.	<i>C. I. L. X. 3799.</i>
Felix Popil(ii) L(ucii) s(ervus).	<i>C. I. L. X. 3790.</i>

In the time of the Empire the name of the owner is given in full in the genitive case, so

Martialis C. Oli(i) Primi (servus).	<i>C. I. L. X. 826.</i>
-------------------------------------	-------------------------

When a slave came under a new master, either by purchase or inheritance, it was customary to give to him an additional name, formed from the *cognomen* of his former owner with the termination *-anus*, so,

Epitynchanus Caes(aris) n(ostri) ser(vus) Candidian(us).	<i>C. I. L. X. 6977.</i>
--	--------------------------

This is clearly set forth in the following, from a Spanish inscription:

[Tr]ophimus, C(olonorum) C(oloniae) P(atriciae) ser(vus), [e]mptu Germanianus.	<i>C. I. L. II. 2229.</i>
--	---------------------------

<sup>1</sup> See Mommsen, *Hermes*, III., p. 70.

*Names of Freedmen.*

The status of the freedman in early days was similar to that of the slave, hence his name differs at first but little from the name of the latter. In the early period the freedman received the *nomen* of his patron, but selected his *praenomen*, which might be his early servile name,

Cratea Caecilius M. l(ibertus).

*C. I. L. I. 840.*

His former state was indicated by the word *servus* following the genitive case of his patron's *praenomen*:

C. Sextio(s) V(ibi) s(ervos).

*Ann. dell' Ist. LII. 1880.*

Servio(s) Gabinio(s) T(iti) s(ervos).

*C. I. L. X. 8054. 7.*

In the seventh century of the City (150–50 B.C.), however, a freedman received his patron's *nomen*, a Roman *praenomen* regularly that of his master, and used his former slave-name as a *cognomen*, while he indicated his former status by the word *libertus*, abbreviated L or LIB.

Thus the form, in many examples, is P. Helvidius P. l. Hermes, (*C. I. L. VI. 975*).

In inscriptions of the earlier part of the seventh century the *cognomina* are not always found (Wil. II., p. 404). The *cognomen* of the patron, in some instances, took the place of the *nomen*.

When freedmen were liberated by the emperor, the expression *Aug(usti) l(ibertus)* or *Caes(aris) n(ostrī) l(ibertus)* took the place of the *praenomen* of the patron.

In special instances a patron, when naming a freedman, might, out of regard for a friend, name him after that friend, so Cicero named Dionysius, his son's tutor, M. Pomponius Dionysius. Slaves freed by women took the *nomen* of their patroness and the *praenomen* of her father.

M. Livius Aug(ustae) l(ibertus) Menophilus.

*C. I. L. VI. 3939.*

Livius is from the name Livia; M(arcus) is from name of Livia's father, M. Livius Drusus.

A. Postumius Postumiae l(ibertus) Heraclida.

*C. I. L. VI. 9861.*

The fact that a slave has received his freedom from a woman is indicated in the inscriptions regularly by an inverted C, thus  $\text{C}$ . L. stands for G(aiae) l(ibertus) or l(iberta), i.e. *mulieris libertus* or *liberta*. Other methods of indicating this are the word *mulieris* written in full or abbreviated MVL,<sup>1</sup> also M inverted W,<sup>2</sup> or placed on its side  $\approx$ ,<sup>3</sup> or  $\forall\lambda = MV$  inverted.<sup>4</sup>

Q. Atisius  $\text{C}$  l(ibertus) Incundus.

C. I. L. V. 3500.

The names of those who have been freed by more than one person testify to the fact as follows:

a) When the *nomen* is the same, but the *praenomina* are different, the freedman receives the common *nomen* and the one or the other of the *praenomina*.

L. Cocceius C. L. M. l(ibertus) Papa.

C. I. L. X. 3803.

b) When the *nomina* are different, and the *praenomina* as well, the freedman takes the *praenomen* and *nomen* of one, or the *praenomen* of one and the *nomen* of the other.

M. Varenus  $\text{C}$  et M. Laitidi libertus.

C. I. L. X. 1333.

Q. Caecilius Cn. A. Q. Flamini l.

C. I. L. XIV. 2090.

Freedmen of a *colonia* or a *municipium* formed a *nomen* either out of the word *publicus*, since they had been *servi publici*, or from the name of the *colonia* or *municipium*.

Sextus Publicius Bathyllus.

C. I. L. X. 1889.

M. Publicius coloniae l(ibertus) Philodamus.

C. I. L. X. 4984.

Sex Venafranius coloniae l(ibertus) Primogenius.

C. I. L. X. 5012.

Cf. also Pollentius from Pola, C. I. L. V. 83, Veronius from Verona, C. I. L. V. 3470.

The additional names, which belong to certain towns, supplied names to the *liberti* in some instances.

Claudia Suavis colonor(um) lib(erta).

Henzen III. 6399.

Claudius was a *cognomen* of Lugdunum, where the inscription was found.

Ti. Claudius Municipii Celeian(i) lib(ertus) Favor.

C. I. L. III. 5227.

This inscription was found at the Municipium Claudium Celeia, Noricum.

<sup>1</sup> C. I. L. V. 7017.

<sup>2</sup> II. 558, 1449. XII. 4364.

<sup>3</sup> V. 7107.

<sup>4</sup> V. 358.

The freedmen of a *collegium* obtained names from the profession of the members of the *collegium* as the *Fabricii Centonii* in Brixia, named from the *fabri centonarii*, C. I. L. V. 4422.

If the slave possessed two *cognomina*, these were retained after he had become a freedman; cf. the names in *-anus* referred to above.

Ti. Iulius Aug. l(ibertus) Fuscus Cornificianus.

WIL. 390.

### *Naturalized Citizens.*

Foreigners who were naturalized, on a similar principle to that observed in the naming of freedmen, received their names from the one who obtained for them the right of citizenship, or the one through whose interposition the favor was granted.<sup>1</sup> This will account for the *Cornelii* in Sicily, the *Iulii* in Gaul, the *Pompeii* in Spain, and the *Claudii* and *Flavii* in the provinces in general. Hence, under the Empire, the names of the Emperors were used thus, not only for persons so favored, but for towns which were raised to the rank of cities.

Foreign kings, allies of the Roman Empire, frequently adopted names of the emperors, so as to show them respect.

Ti. Claudius Cogidubnus. King of Britain.

C. I. L. VII. 11.

## CHAPTER V

### NAMES AND TITLES OF THE EMPERORS

THE names of the emperors, as they occur in the inscriptions, deserve special and individual mention, for although in general plan they are similar to the ordinary Roman name, yet they differ in certain marked respects, mainly in the use of titles as additional elements, and in the adoption of some of these titles as fixed parts of the imperial name.

The following names of emperors taken from inscriptions will illustrate the various forms which they assume :

*Augustus.* C. I. L. III. 6070. 749/5.

IMPerator · CAESAR · DIVI · Filius · AVGustus · COOnSul · XII · TRIBunicia · POTestate · XVIII · PONTIFEX · MAXIMVS ·

*Hadrian.* C. I. L. III. 5733, A.D. 132.

IMP · CAESAR · DIVI · | TRAIANI · PARTHICI · F · |  
 DIVI · NERVAE · NEPOS · | TRAIANVS · HADRIANVS |  
 AVG · PONΤIF · MAX · TRIB · | POT · XVI · COS · III · P · P · PROCOS ·

We will now consider each of the elements found in these names.

I. *Imperator.* IMP (αὐτοκράτωρ).

A distinction must carefully be made between the use of this word as a *praenomen* and as a title of honor. It regularly appears in both uses in the same inscription.

The original title *imperator* of republican days was conferred by acclamation upon a victorious general. This the Dictator Caesar assumed continually during the latter part of his life, and it became virtually a *cognomen* of his name.<sup>1</sup> In 714/40 Octavianus rejected his former *praenomen* Gaius and substituted IMPERATOR. Nevertheless the use of the word as an honorary title was still continued, and hence it appears again in the latter part of the name. Tiberius, Gaius, and Claudius did not use the word as a *praenomen*, but Nero renewed the custom, employing it at times, while his successors used it regularly. In some instances, especially among later emperors, the word *imperator* (IMP) occurs in company with the ordinary *praenomen*.

Imp. T. Caesar Vespasianus Augustus.

In the names of Vitellius the word *imperator* frequently occurs among the *cognomina*.

II. *Nomen.*

It will be noticed that in the names of the early emperors, with the exception of Claudius, Nero, and Vitellius, the *nomen* is omitted. This custom continues in use until after the time of Hadrian, when the ordinary form is resumed.

Imp. T. Aelius Caesar Hadrianus Antoninus Augustus Pius.

C. I. L. III. 8007.

<sup>1</sup> Mommsen, *Staatsr.* II. 767, note 1.

### III. *Caesar*, C, CAES (Καῖσαρ).

This word was the inherited *cognomen* of the Julian family, and indicated its patrician origin. It belonged, by inheritance, to all the *agnati* of Caesar, but, at the death of Gaius Caligula, was transferred<sup>1</sup> to the Claudian family, and became the distinguishing mark of the reigning house, being used, not only by the emperor, but by the sons and grandsons. From the time of Hadrian the name was restricted to the emperor and his designated successor. It was placed immediately after the *praenomen* or *nomen*, if the latter were given, a position, however, which was not steadily maintained, as at a later period *Caesar* is found even at the end of the name.<sup>2</sup>

IV. The next element is that which indicates descent. If the father were a deified emperor, his name was marked by the addition of the adjective *divus*. The name of Augustus contains the formula *divi filius*) inasmuch as Caesar was the first to receive apotheosis.

### V. *Cognomina*.

The names of the Flavian emperors, as well as of those succeeding them, show the insertion after the designation of ancestry, or after the word Caesar, if the former is omitted, of certain personal names, *cognomina*, such as *Vespasianus*, *Domitianus*, *Nerva*, *Traianus*, *Verus*, *Severus*, *Pertinax*.

### VI. *Augustus*, A, AV, AVG (Σεβαστός).

The last word in the name of the emperor, strictly speaking, is the honorary title Augustus. It was conferred upon Octavianus by the Senate, Jan. 16, 727/27.

Being really honorary, and implying that a person was sacred and deserving of reverence, it was not legally an heirloom.<sup>3</sup> Nevertheless it was adopted by the successors<sup>4</sup> of Augustus after it had been

<sup>1</sup> The last descendant of Augustus on the throne was Nero, but he belonged to the *cognati*, not to Augustus' own family. Momm. *Staatsr.* II. 770.

<sup>2</sup> Index C. I. L., vol. III.

<sup>3</sup> Mommsen, *Staatsr.* II. p. 773, note 3.

<sup>4</sup> Vitellius at first refused the title. Tac. *Hist.* II. 90.

decreed by the Senate, and became a name associated strictly with the principate, for it was held by no one but the reigning emperor until the middle of the second century, when it appears as a *cognomen* with the united names of Marcus Aurelius and L. Verus, indicating that both had a share in the imperial power. After this time the title was conferred upon other members of the imperial family, and a participation in the powers of the emperor was thus implied. The abbreviation AVGG indicated two Augusti, AVGGG, three.

From the latter part of the second century the word *Augustus* is preceded by additional honorary surnames, such as *Pius Felix*,<sup>1</sup> *Pius Felix Invictus*,<sup>2</sup> while, from the beginning of the fourth century, it is strengthened by the use of *perpetuus*, *semper*, *victor ac triumphator semper*. Thus, also, the title *optimus* was conferred upon Trajan.<sup>3</sup>

The word *Augustus* really completed the name of the emperor, nevertheless there were added in certain instances *cognomina*, such as *cognomina ex virtute*, either inherited, as in the case of Gaius, Claudius, and Nero, who obtained the title *Germanicus* from Drusus, or received, because of some victory, as in the use of the same word *Germanicus* in the names of Vitellius, Nerva, and Trajan. Other *cognomina* of this kind are: *Dacicus*, *Parthicus* as belonging to Trajan, *Armeniacus*, *Medicus*, *Sarmaticus* as belonging to Marcus Aurelius. These surnames are of great importance in determining the date of an inscription.<sup>4</sup>

#### TITLES OF EMPERORS

These are given in the order in which they are generally found.

I. *Pontifex Maximus*. P · M or PONT · MAX (ἀρχιερεὺς μέγιστος).

This title indicated that the emperor, as the president of the *collegium* of pontiffs, was supreme in all matters of religion. It was assumed by Augustus after the death of Lepidus, and was thereafter held by the emperor, who was always chief pontiff. It regularly occupied the first place.

<sup>1</sup> From the time of Commodus.

<sup>2</sup> From time of Septimius Severus on coins, from Caracalla in inscriptions.

<sup>3</sup> C. I. L. II. 2054.

<sup>4</sup> See page 123.

II. *Tribunicia Potestate*, or *Tribuniciae Potestatis*, TRIB · P, POT, PT (numeral) (*δημαρχικῆς ἐξουσίας*).

This formula, derived from the early *tribunus*, represented the supreme civil control, and formed the distinctive title of the principate. Augustus, in 731/23, laid aside the consulate and added its character as an annual office to the tribunician power which had already been conferred upon him for life. *Tribunicia Potestate*, followed by the numeral of iteration, indicated both a perpetual and an annual magistracy, for it was conferred, without limit, and yet served to indicate the length of the emperor's reign by measuring it off in tribunician years.<sup>1</sup>

The form is regularly the ablative case followed by a numeral used adverbially, indicating years of tenure. At times the genitive case is found, perhaps from Greek influence.

The position of this title, in time of Augustus, is, with few exceptions, after the consulate, and generally after the title *imperator*. From Tiberius the *tribunicia potestate* assumes the position after the PON · MAX.

III. *Imperator*, IM, IMP, IMPER (numeral) (*ἀτροκράτωρ*).

This is the *acclamatio imperatoria*, and must be distinguished from the *praenomen imperator* referred to above.

Under the Empire this title was conferred upon the *princeps*, either because of a victory won by himself or under his auspices. The number of the imperial salutation was increased by one on the occasion of each victory.

Upon the first victory the title was *imperator* II., not *imperator primum*, for the first salutation was given at the time of the assumption of power. The position,<sup>2</sup> in the time of Augustus and Tiberius, is generally after the consulate, so COS · IMP · TR · P, and where the *tribunicia potestate* stands directly after the consulate, *imperator* follows that also, so COS · TR · P · IMP. In the inscrip-

<sup>1</sup> This difficult subject of the tribunician year is treated by Mommsen, *Staatsr.* II<sup>3</sup>. p. 796, and Stobbe, *Philologus*, XXXII. (1873), p. 1-91. See also, pp. 123 ff.

<sup>2</sup> Mommsen, *Staatsr.* II., p. 784.

tions of the City relating to Augustus, however, it stands, as a rule, at the head of the titular list, so IMP · COS · TR · P. From the time of Claudius, *imperator* comes after *tribunicia potestate* and before the consulate. Caracalla is the last emperor whose monuments regularly give the imperial salutations. They appear after this time only in the inscriptions of certain emperors, as Gordian, Gallien, Diocletian.

#### IV. *Consul*, COS (numeral) (ὑπατος).

As a result of the treatment of the consulship by Caesar and Augustus, it became a matter entirely within the control of the emperor whether he himself should be consul or permit the office to go to some other of senatorial rank. Thus an emperor could be repeatedly elected to the consulship, and this is indicated by the numeral of iteration placed after the title. The office was held by the emperor at pleasure, and so might be laid aside, after a month or two, in favor of *consules suffecti*. The election of the emperor to the consulship took place at various times in the year preceding the year of office. The emperor, as consul elect, was designated by the title COS · DESIGN (ὑπατος ἀποδεδειγμένος) followed by a numeral one greater than that of his last consulship. The position of this title, *consul* or *consul designatus*, was at first before the *tribunicia potestate*, where it vied with *imperator* for first place. In time of Tiberius it gave way to the *tribunicia potestate*, and from the time of Claudius it gave way to *imperator*, and took generally the fourth place.

#### V. *Censor*, CEN, CENS, CES (τυμητής, ἀποτιμητής).

This title was held only by Claudius, Vespasian, Titus, and Domitian. The last named received the title *censor perpetuus*.<sup>1</sup> Its position varied, since it stood at times before, and again after the consulate.

#### VI. *Pater Patriae*, P · P (πατήρ πατρίδος).

This title had been conferred by acclamation upon Cicero and Julius Caesar, and was accepted by Augustus at the request of all the senate, knights, and people (*Mon. Ancyr.* VI. 35).

<sup>1</sup> *C. I. L.* II. 4721.

A similar honor was conferred upon other emperors some time after their assumption of power, but was in several instances declined,<sup>1</sup> as in the case of Tiberius,<sup>2</sup> Nero, Vespasian, and Hadrian.

It must be remembered that this is simply an honorary title, indicating no official power. Pertinax was the first emperor to receive it upon entrance to office.

Its position in the time of Augustus is either at the beginning or at the end of the list of titles. From Augustus to Titus it stood, as a rule, before the consulate, but from Domitian it followed the consulate, and might conclude the list.

#### VII. *Proconsul*, PROCOS or PROC (*ἀνθύπατος*).

Although the *proconsulare imperium* was as important as the *tribunicia potestas*, yet it was not represented by its own title until the close of the first century. In all probability the word *imperator*, which had become a part of the name, supplied its place, and hence an additional title was not given in the official list. In the time of Trajan, *proconsul* is assumed as a title when the emperor is out of Italy, and it appears with this restriction until the third century.

In the diploma of Trajan (A.D. 116), where it first appears, it is placed before the consulate. In the time of Hadrian it ends the titular list, and regularly occupies this position from that time on.

#### TITLES OF MEMBERS OF THE IMPERIAL FAMILY

Among the titles that were borne by members of the imperial family, the following are of most importance:

##### *Caesar*.

After the adoption of M. Annii Verus (Marcus Aurelius) by the Emperor Hadrian, this title, which had been borne by members of the families of Julius Caesar and Augustus, and afterwards by the reigning emperors and their sons and grandsons, came to designate

<sup>1</sup> Mommsen, *Staatsr.* II., p. 779, notes.

<sup>2</sup> Tacitus, *Ann.* I. 72; II. 87.

the heir to the throne, and so was conferred upon the monarch and his successor as well.

From the time of the Emperor Geta (209–212 A.D.) the word Caesar was accompanied by *nobilissimus*, and later, as in the name of Galerius Maximianus, by *perpetuus nobilissimus*, and, as in the name of Constantius, by *nobilissimus ac florentissimus* or *beatissimus ac felix*.

*Princeps Iuventutis*, PR · IV, IUVEN (πρόκριτος τῆς νεότητος).

At the instance of Augustus, this title was conferred by the knights<sup>1</sup> upon his grandsons Gaius Caesar and Lucius Caesar, whom he had adopted. It indicated the entrance of the young men to the equestrian order.

Although it was afterward conferred upon other princes of the reigning house who did not sit in the senate, it belonged, naturally and originally, to the heir to the throne.

*Augusta*.

This title was first conferred upon Livia by the will of Augustus, and probably implied a share in the governing power, though any purpose of this kind was thwarted by Tiberius. It was next offered as an honorary title to Antonia, the grandmother of Gaius, but was refused. Agrippina, the last wife of Claudius, accepted it, probably with the purpose of sharing in political power.<sup>2</sup> After the political meaning was lost, it became merely the most exalted title for females of the imperial household. After Domitian it became customary to confer this name upon the wife of the reigning prince.

Nevertheless, it was conferred as a title of honor upon other relatives of the emperor, as upon the mother, Julia Soaemias, and grandmother, Julia Maesa, of Elagabalus, and upon Claudia, the

<sup>1</sup> *Mon. Ancy.* III. 5, *equites Romani universi principem iuventutis utrumque eorum (Gaius and Lucius) parmīs et hastis argenteis donatum appellaverunt.* Cf. Tacitus, *Ann.* I. 3, 2.

<sup>2</sup> Tacitus, *Ann.* XII. 26.

daughter of Nero, and upon Marciana, the sister of Trajan. It was at first conferred by the senate at the suggestion of the emperor, but afterwards the senate took the initiative.

Tacitus (*Ann.* I. 14) tells us that an attempt was made to confer upon Livia the title *parens* or *mater patriae*, but the proposition came to naught through the opposition of Tiberius. Nevertheless, coins of African and Spanish colonies are in existence, giving to Augusta the title *mater patriae* and *genetrix orbis*.<sup>1</sup>

In like manner the wife of Marcus Aurelius, the younger Faustina, is called *mater castrorum*. From this time similar titles were not rarely given to women, so the wife of Severus, the mother of Caracalla, Julia Domna, was given the title *mater castrorum et senatus et patriae*, so Julia Mamaea is styled *mater castrorum et senatus et patriae et universi generis humani*, *C. I. L.* II. 3413.

#### *Erasures and Substitutions.*

In many inscriptions it is evident that names of certain persons have been erased, while in others the names of other persons, or substitutions of a varied character, have taken the place of what has been obliterated. The erasures are due to a decree of the senate abolishing the memory of the emperor or member of the imperial family. The names of Caligula, Nero, Domitian, Commodus, Albinus, Geta, Macrinus, Elagabalus, Severus Alexander, Maximus, etc., are thus erased; also of Valeria Messalina wife of Claudius, Julia Agrippina mother of Nero, Fulvia Plautilla wife of Caracalla, P. Fulvius Plautianus father of Fulvia Plautilla, Julia Soaemias mother of Elagabalus, and others.<sup>2</sup>

CHRONOLOGICAL LIST OF THE ROMAN EMPERORS

THE DATING OF IMPERIAL INSCRIPTIONS

While the official method of recording dates in Rome was always by the names of the eponymous consuls of the year, another method grew up under the changes brought about by the assumption of imperial power by Augustus and his successors. Its basis was the *tribunicia potestas*. In inscriptions in which the name and titles of the emperor occur the indication by a numeral of the annual renewal of the tribunician power affords a means of determining the date, and, with the aid of certain other elements of the name, it is often possible to decide, not only upon the year, but upon the month, or part of the month, as well.

The principal elements by which the date may be determined are: (a) the tribunician 'renewal,' (b) the imperial salutations, (c) the number of the consulate, and (d) the assumption of such titles, or *cognomina*, as P(ater) P(atriciae), P(ontifex) M(aximus), CENS(or), PERTINAX, OPTIMVS, GERMANICVS, SARMATICVS, etc. The method to be employed, in connection with the table below, may be illustrated by examples:

(1)

C. I. L. II. 4721.

IMPERATOR · CAESAR · | DIVI · VESPASIANI F · | DOMITIANVS · AVG |  
 GERMANICVS · PONTIFEX | MAXSVMS · TRIBVNICIAE | POTESTATIS  
 VIII · IMP · XXI | COS · XV CENSOR | PERPETVVS | P · P, etc.

(a) TRIBVNICIAE POTESTATIS VIII. By reference to the table, p. 130, this is found to be September 13, 89.

(b) IMP. XXI, received, as the table shows, during 89.

(c) COS. XV, January 1, 90-91.

(d) GERMANICVS in 84; CENSOR PERPETVVS in 85.

By the examination of these dates, we find that the inscription was set up between January 1 (COS. XV) and September 13 (TR. P. VIII), in the year A.D. 90.

Hence the inscription dates A.D. 166.

## AUGUSTUS (B.C. 23—A.D. 14)

C. Octavius; after his adoption, C. Iulius Caesar Octavianus. He is designated on the monuments, IMP · CAESAR · DIVI · F · AVG.

Augur, in 717/37 at the latest.

XV Vir Sacris Faciundis, between 717/37 and 720/34.

Augustus, on January 16, 727/27.

VII Vir Epulonum, before 738/16.

Augustus received the Tribunician Power on June 27, 731/23, and renewed it each year in the same month and day. Therefore his Tribunician dates extend from TRIB. POT., commencing June 27, 731/23, to TRIB. POT. XXXVII, commencing June 27, A.D. 14.

He was invested with the consulship ten times, and was saluted *imperator* eight times, before his accession. The subsequent consular and imperial dates are as follows:

731/23	January 1.	COS · $\bar{X}I$	
734/20	.....	IMP · $\bar{V}III$	
739/15	.....	IMP · $\bar{X}$

### TIBERIUS (14-37)

Ti. Claudius Nero ; after his adoption : Ti. Iulius Caesar ; designated in inscriptions : TI · CAESAR · AVG.

He received the Tribunician Power on June 27, 748/6, during the reign of Augustus, and renewed it always on that month and day ; but whereas his TRIB · POT ·  $\bar{V}$  fell on June 27, 752/2, he did not receive his TRIB · POT ·  $\bar{VI}$  until June 27, A.D. 4. In reckoning his Tribunician dates, therefore, one must remember that TRIB · POT ·  $\bar{V}$  covers the years from June 27, 752/2, to June 27, A.D. 4 ; and for any higher number, deduct *two* from the Tribunician date, which will give the date Anno Domini. Thus, TRIB · POT ·  $\bar{XXX}$  = A.D. 28-29.

## CLAUDIUS I. (41-54)

Ti. Claudius Nero Drusus Germanicus; designated on the monuments: TI · CLAVDIVS · CAESAR · AVG · GERMANICVS

Claudius received the TRIB · POT on January 25, 41, and renewed it regularly on that date; so that at his death, October 13, 54, he was in the course of his TRIB · POT · XIII

He took the name *Britannicus* after his victories in Britain, but the title seldom appears on the monuments.

### NERO (54-68)

L. Domitius Ahenobarhus; after his adoption: Ti. Claudius Drusus Germanicus Caesar; designated on the monuments, at first: NERO · CLAUDIVS · CAESAR AVGVSTVS · GERMANICVS, and afterwards (65): IMP · NERO · CLAUDIVS CAESAR · AVG · GERMANICVS

The tribunician dates of Nero are very difficult to determine, for the inscriptions show seeming contradictions. The whole matter may best be simplified as follows<sup>2</sup>: Nero ascended the throne October 13, 54, and his TR · P was renewed on that date each year *until* 59, when he appears to have adopted a new system. It is supposed that he shortened his TR · P · VI, and thereafter counted the years of his tribunician power from December 10 (the old date under the Republic), or December 4 (on which the *comitia tribuniciae potestatis* were held). It is impossible to decide which, for the inscriptions suit both. His TR · P · VI began, under the old system, on October 13, 59, coinciding with COS · III, DES · IIII, IMP · VI; but on December 10 (or 4) of the same year 59, he took TR · P · VII, and renewed the tribunician dates regularly on that day; so that at his death, June 9, 68, he was in the course of his TR · P · XV

<sup>1</sup> Cf. *C. I. L.* IX. 5959: TR · P · VII, CENSOR · DESIGNAT, and *C. I. L.* V. 8002: TR · P · VI · CENSOR

<sup>2</sup> This is the theory of Mommsen (*Staatsr.* II., p. 798, note). The difficulty is that it conflicts with certain coins (Eckhel VI. 264, Cohen No. 29, 30, Argelati p. 93), which have TR · P · VI, COS · IIII, and that it makes necessary the assumption of a TR · P · XV, of which there is apparently no evidence. Stobbe's theory (*Philologus*, XXXII., 1873, pp. 23 sq.), that the tribunician dates of Nero begin always on Dec. 4, similarly conflicts with *C. I. L.* III., p. 845, and VI. 2042, which have TR · P · VII, IMP · VII, COS · IIII

## VESPASIAN (69-79)

T. Flavius Vespasianus; designated on the monuments: IMP · CAESAR · VESPASIANVS · AVG, or IMP · VESPASIANVS · CAESAR · AVG

Although not legally emperor until December 20, 69, Vespasian counted the years of his reign from July 1, 69, when he was proclaimed emperor by the soldiers. His TR · P was renewed each year on this day. On July 1, 71, Titus was made his associate in the empire, and their tribunician dates run parallel, Titus being always two years behind his father. Vespasian, at his death, was in the course of his TR · P · X̄, and Titus in the course of his TR · P · VIĪ

## DOMITIAN (81-96)

T. Flavius Domitianus; designated on the monuments: IMP · CAESAR · DOMITIANVS · AVG; more rarely IMP · DOMITIANVS · CAESAR · AVG

The tribunician dates of Domitian are regular, from the day of his accession, September 13, 81 (TR · P), to his death on September 18, 96.

NERVA (96-98)

M. Cocceius Nerva ; designated on the monuments : IMP · NERVA · CAESAR · AVG, or IMP · CAESAR · NERVA · AVG

The dates of the monuments of Nerva's short reign are not always in accord. His TR · P extends from September 18, 96, to September 18, 97, when he received TR · P ·  $\bar{\text{II}}$ . From a few inscriptions it seems that a TR · P ·  $\bar{\text{III}}$  was reckoned from December 10 of the same year, 97. The majority of inscriptions fail to compute this TR · P ·  $\bar{\text{III}}$ , and carry his TR · P ·  $\bar{\text{II}}$  down to his death, joining it with COS ·  $\bar{\text{IIII}}$  (98). Those in which TR · P ·  $\bar{\text{III}}$  figures unite it with COS ·  $\bar{\text{III}}$  (97), or COS ·  $\bar{\text{IIII}}$  (98). For convenience the tribunician dates are here included in the table.

TRAJAN (98-117)

M. Ulpius Traianus ; designated on the monuments : IMP · CAESAR · NERVA · TRIANVS · AVGVSTVS

With Trajan the custom of computing the tribunician years from December 10 becomes general. Invested with the tribunician power by Nerva on October 27, 97, he counted his TR · P ·  $\bar{\text{II}}$  from December 10, 97, or September 18, 98<sup>1</sup>; and his TR · P ·  $\bar{\text{III}}$  on December 10, 98, after which the tribunician year began regularly on this day.

#### HADRIAN (117-138)

P. Aelius Hadrianus; designated on the monuments: IMP · CAESAR · TRAIANVS HADRIANVS · AVG

Hadrian received the TR · P at the death of Trajan. He counted his TR · P · IĪ from December 10, 117, and the renewal occurred each year on that day.

In 136 he adopted L. Ceionius Commodus Verus as his successor, under the name L. AELIVS · VERVS · CAESAR; but Aelius died in 138.

T. Aurelius Fulvus Boionius Arrius Antoninus; after his adoption: T. Aelius Hadrianus Antoninus Pius; designated on the monuments: IMP · CAESAR T · AELIVS · HADRIANVS · ANTONINVS · AVG · PIVS

He received the TR · P on February 25, 138, renewed it (TR · P · II) on December 10 of the same year, and thereafter regularly on that day. He died in the course of his TR · P · XXIII.

On February 25, 147, he adopted as his successor M. Annius Verus Catilius Severus, under the name M · AELIVS · AVRELIIVS · VERVS. M. Aurelius received the TR · P, which he renewed regularly on December 10, so that, at the death of Pius, Aurelius was in the course of his TR · P · XV.

For the names of M. Aurelius before his accession, and for his tribunician dates, see under Antoninus Pius. He is styled on the monuments: IMP · CAESAR M · AVRELIIVS · ANTONINVS · AVG

Marcus Aurelius and Lucius Verus reigned jointly. The latter was L. Ceionius Commodus, son of L. Aelius Caesar (see p. 132), known after 136, when his father was adopted by Hadrian, as L. Ceionius Aelius Aurelius Commodus, and

<sup>1</sup> According to the coins.

<sup>2</sup> According to inscriptions.

after 147, when he was adopted by Antoninus Pius, as L. Aelius Aurelius Commodus. After he was given a share in the *imperium* by his brother Marcus Aurelius, he received the *cognomen* Verus. He is styled on the monuments: IMP · CAESAR · L · AVRELIVS · VERVS. He received the TR · P on March 7, 161; his TR · P · II began December 10, 161, his TR · P · III a year from that day, and so on regularly.

## MAXIMINUS (235-238)

Styled on the monuments: IMP · CAES · C · IVLIVS · VERVS · MAXIMINVS · P · F (INVICTVS) · AVG

The tribunician dates of Maximinus are for convenience included in the table. His son, as *Cæsar*, appears on the monuments as C · IVLIVS · VERVS · MAXIMVS NOBILISSIMVS · CAESAR

Maximinus being declared an outlaw by the senate in 238, the following emperors ruled, and fell in rapid succession:

{ Gordianus I:	IMP · CAES · M · ANTONIVS · GORDIANVS · AFRICANVS · AVG
{ Gordianus II:	IMP · CAES · M · ANTONIVS · GORDIANVS · AFRICANVS · AVG

## PHILIPPUS (244-249)

The elder Philippus appears on the monuments as IMP · CAES · M · IVLIVS PHILIPPVS · P · F · (INVICTVS) AVG. His son is called IMP · CAES · M · IVLIVS (SEVERVS) · PHILIPPVS · P · F · AVG (FILIVS). The elder Philippus received the TR · P in March, 244, and renewed it early in January (?) each year. For his son there are two methods of counting the TR · P: (1) as coinciding with that of his father, (2) as commencing in 247, when he became joint emperor. Both methods are employed in the inscriptions.

C · VALENS · HOSTILIANVS · MESSIVS · QVINTVS · NOBILISSIMVS · CAES

There are two methods of counting the tribunician dates of Decius: (1) from 248, when he was saluted emperor by the troops, (2) from the death of Philippus, September or October, 249. Both methods are found in inscriptions. The sons received the TR · P in 250. The date of renewal for this reign was January 1.

## TREBONIANVS GALLVS (251–253)

Styled on the monuments: IMP · CAES · C · VIBIVS · TREBONIANVS · GALLVS · P · F · AVG

His son is styled: IMP · CAES · C · VIBIVS · AFINIVS · GALLVS · VELDVMNIANVS VOLVSIANVS · P · F · AVG

The tribunician dates of Gallus and Volusianus are uncertain. TR · P is probably November–December, 251; TR · P · II is 252; and TR · P · III (instead of TR · P · III) is 253.

IMP · CAES · P · LICINIUS · VALERIANVS · P · F · (INVICTVS) · AVG

His son Gallienus, who shared the empire, is styled IMP · CAES · P · LICINIUS (EGNATIVS) · GALLIENVS · P · F · (INVICTVS) · AVG

The tribunician dates are the same for both; TR · P, September to December 10 (?), 253; TR · P · II, December 10 (?), 253-254; TR · P · III, December 10 (?), 254-255, etc.

## GALLIENUS (253-268). — POSTUMUS, Emperor in Gaul (258-267)

For the name and tribunician dates of Gallienus, who died in the middle of March, 268, see under Valerianus. Postumus was never recognized as emperor at Rome, but reigned in Gaul, where he formed a senate and government of his own, and assumed the consulship at pleasure. He is styled on the monuments: IMP · CAES · M · CASSIANIVS · LATINIVS · POSTVMVS · P · F · (INVICTVS) · AVG We know nothing of the tribunician dates of Postumus, which can be assigned only to years as follows: TR · P = 258, TR · P · II = 259, TR · P · III = 260; and so on until TR · P · X = 267.

Victorinus, who reigned with Postumus in Gaul (265-267), is called IMP · CAES · M · PIAVONIVS · VICTORINVS · P · F · (INVICTVS) · AVG

CLAUDIUS II (268–270).—TETRICUS, Emperor in Gaul (268–273)

Gallienus at Rome was succeeded by Claudius, who is styled on the monuments: IMP · CAES · M · AVRELIVS · CLAVDIVS · P · F · (INVICTVS) · AVG

In Gaul, Tetricus and his son succeeded Postumus; both appear on the monuments as IMP · CAES · C · PIVS · ESUVIVS · TETRICVS · P · F · INVICTVS · AVG

The tribunician dates can be classified only by years; for Claudius, TR · P = 268, TR · P · II = 269, TR · P · III = 270. (He died before Aug. 20, 270.) For Tetricus, TR · P = 268, TR · P · II = 269, etc., until TR · P · VI = 273.

 AURELIAN (270–275)

IMP · CAES · L · DOMITIVS · AVRELIANVS · P · F · (INVICTVS) · AVG

The chronology of this reign is most uncertain; inscriptions and coins alike show the greatest irregularities, especially in the consulates, and are not reliable. Each inscription must be dated approximately on its own merits, and a table of dates is useless. It is supposed that Aurelian became emperor in August, 270. The tribunician dates are usually roughly assigned as follows: TR · P, 270; TR · P · II, 271, etc., to TR · P · VI, 275; but this is complicated by the appearance of a TR · P · VII, which is absolutely inexplicable. According to the *Fasti*, Aurelian was COS in 271, COS · II in 274, COS · III in 275. The inscriptions show the following titles:

GERMANICVS · MAXIMVS (270 or 271).

GOTHICVS · MAXIMVS (272 ?).

PARTHICVS · MAXIMVS (271 or 272).

ARABICVS · MAXIMVS (271 or 272).

CARPICVS · MAXIMVS (271 or 272).

PALMYRENICVS · MAXIMVS (272 or 273).

Aurelian died in 275, perhaps in March.

Diocletian received the TR · P on September 17, 284, and renewed it regularly each year (March 1 ? ?); at his abdication, May 1, 305, he was in the course of his TR · P · XXII. Maximian counted his TR · P from 285, so that the renewal number was always *one* less than that of Diocletian.<sup>1</sup> The tribunician dates of the two Caesars are in doubt.

XII given in table, page 125. <sup>2</sup> *Tribunicia potestate* was first counted, as some (Eckhel) believe, June 27, according to Hirschfeld, June 25, 731/23, according to Mommsen, on the *kalends* of July, the day on which he resigned his eleventh consulship, 731/23. The number of the *tribunicia potestate* may have been omitted, although this is rare.
4. imp. Caesar divi f. | Augustus | pontifex maximus, | imp. XII, cos. XI, trib. pot.<sup>1</sup> XIV, | Aegypto in potestatem | populi Romani redacta, | Soli donum dedit.

*C. I. L. V.* 6416 ; VI. p. XV. These inscriptions of Augustus and his family were placed beneath their statues, which adorned the triumphal arch at Ticinum (Pavia). They exist in the MS. of the tenth century, known as Anonymus Einsiedlensis of the Abbey of Einsiedeln, and are from a copy made between 750–850 A.D., by the compiler of the original of the MS. There appear here inscriptions of Augustus (5), his wife (6), his grandsons, recently adopted, C. and L. Caesar (7 and 8), of Tiberius (4), adopted son of Augustus, together with the former's sons (3 and 2) and grandsons (1 and 9). Claudius, the brother of Germanicus, is also named (10). Julia and Agrippa Postumus do not appear, since at the time when the arch was completed they were in banishment. <sup>1</sup>760–I (7–8 A.D.). <sup>2</sup>Ti. Nero was adopted by Augustus, June 26, 757 (4 A.D.), and was called Ti. Caesar, and was made the associate of his adoptive father in the *tribunicia potestate* at the same time, a title which he had held, however, for five years. His *tribunicia potestate* should therefore be numbered VIII, and his title of consul should also be numbered *iterum*, not *ter*. <sup>3</sup>The *que* may be due to error in copying for *qu[indecemviro s. f.]*. <sup>4</sup>C. Caesar was styled *imperator* 756 (3 A.D.) at capture of Artagiri. He probably laid aside his equestrian title *princeps inventutis* when he became consul. <sup>5</sup>L. Caesar died 755 (2 A.D.) as *consul designatus*. <sup>6</sup>Germanicus had not held any office save the quaestorship. He was adopted by Tiberius 4 A.D. <sup>7</sup>Drusus had not held any office when the inscription was set up. The date of the completion of the arch is determined from the *tribunicia potestate XXX* of Augustus, 7–8 A.D., June 27. Tiberius is here shown by the *imperium* and *tribunicia potestate* to be the successor of Augustus, and the other inscriptions, save that of Claudius, are of those connected with him regularly or by adoption.

*C. I. L. X.* 7501. Found in Insula Gaulus (Gozzo), now at Malta, where it may still be seen. <sup>1</sup>These words, *imp(eratoris) perpet(ui)*, have been

inserted in place of others erased. <sup>2</sup> *cum quinque liberis* or *cum v[iro et] liberis*. Livia is called Ceres, according to Greek custom.

*C. I. L. IX. 2443.* Found in fragments at Saepinum (Altilia, near Sepino), in Samnium, where it still exists. In 4 A.D. Tiberius was adopted by Augustus, and ceased to be called Claudius Nero. Determine the date from table, page 125.

11. pleps urbana quinque et | triginta tribuum | Druso Caesari Ti. Aug. f. | divi Augusti n. | divi Iulii pronepoti | pontifici, auguri, sodal. Augustal.,<sup>1</sup> | cos. iterum, tribunic. potest. iter.,<sup>2</sup> | aere conlato.

*C. I. L. VI. 910.* One of two marble tablets of same size found at Rome, near the Tiber, still in existence. <sup>1</sup> Cf. Tac. *Ann. I. 54.* <sup>2</sup> Drusus was *consul iterum* 21 A.D., received *tribunicia potestate* in 22 (Tac. *Ann. III. 56*). This inscription was set up in 23 A.D., just before or just after the death of Drusus.

12. ossa | Agrippinae M. Agrippae [*f.*] divi Aug. neptis, uxoris | Germanici Caesaris, | matris C. Caesaris Aug. | Germanici principis.

*C. I. L. VI. 886.* On a large marble urn now in the Palazzo dei Conservatori at Rome. When Caligula, son of Agrippina, became emperor, 37 A.D., he brought the ashes of his mother from the island of Pandateria, and placed them in the mausoleum of Augustus (Suet. *Cal. 15*).

13. Neroni Caesari | Germanici Caesaris f. | Ti. Caesaris Augusti n. | divi Augusti pron. | flámini Augustáli, | sodáli Augustáli, | sodáli Titio, frátri Árváli, fétíáli, quaestori, | ex s. c.

*C. I. L. VI. 913.* Engraved in large letters on a marble tablet found at Rome, near the Flavian amphitheatre, now in Capitoline Museum. The date of the inscription lies between his quaestorship, 27 A.D. (Tac. *Ann. III. 29*), and the decree of banishment, 29 A.D. (Tac. *Ann. V. 3*). Although Tac. (*Ann. III. 29*) says that he was made *pontifex maximus* in 20 A.D., there is no evidence of this in the inscriptions.

*C. I. L.* II. 4716. On a milestone found at Cordova (Corduba), Spain, still in existence. <sup>1</sup>*pat. patr.* is in somewhat larger letters, and was probably a later addition (Hübner). According to Eckhel, *Doct. Num.* VI. 223, Caligula seems to have taken this title in the early months of 38 A.D. Dio LIX. 12 relates that he assumed all the *honores* of former emperors except this one, which he received somewhat later. <sup>2</sup>Determine these dates from page 126.

*C. I. L.* VI. 918. Inscribed on a marble tablet found at Rome. <sup>1</sup>See page 126. <sup>2</sup>Probably the words *et Valeriae Messalinae Aug.* and *eorum* have been erased. According to Tacitus (*Ann.* XI. 38) the name of Messalina was erased from public and private monuments.

The name of the emperor is in the nom. case, subject of *fecit*, to be supplied. *Imperator* after the *cognomina* is extraordinary, and probably an error.

20. Sergio | Sulpicio | Galbae | imp. Caesar.

*Ephem. Ep.* II. 522. From a portion of a *cippus* found at Spalato, near Salonae, in Dalmatia, where it exists in the museum, dating 68-69 A. D. The *diplomata* given to veterans of the *legio prima Adiutrix* show that the emperor preferred the form *Ser. Galba imp. Caesar Augustus*. Note *Sergius* for *Servius*, probably the earliest instance of this spelling.

## 21. A. Vitellius L. f. | imperator, | cos. perp.

*C. I. L. VI. 929.* The only known inscription relating to Vitellius from the city of Rome, now existing in a copy. It was originally engraved on a pedestal which was afterwards hollowed out so as to serve as a sepulchral urn. Cf. Suet. *Vitellius*, 11, (*Vitellius*) *comitia in decem annos ordinavit seque perpetuum consullem.*

*C. I. L. III. Suppl. 6993.* Found at Prusa (Brussa), Bithynia. <sup>1</sup> See page 129. <sup>2</sup> A coin with the head of Vespasian gives the name of the same procurator (Eckhel, II., p. 404). <sup>3</sup> Note the *praenomen imp(erator)* possessed by Titus before having the name *Augustus* (Mommsen, *Wiener Numism. Zeitschr.* III, p. 458 ff., 1871. *T. imp. Caes. Aug. f.* appears in another inscription (*Arch. Ep. Mitth.* V., p. 216) and on some coins. <sup>4</sup> The date of the sixth consulship of Domitian is uncertain. The coincidence of three *coess. designati* is remarkable.

*C. I. L.* X. 1422. Found at Herculaneum in the theatre, now in museum at Naples. Domitia was the daughter of Cn. Domitius Corbulo, and married Domitian in 70 A.D. The inscription dates between 70 A.D. and the time of the destruction of the city, 79 A.D.

*C. I. L. XIV. 98.* Inscribed on a marble tablet found at Ostia, now in the Vatican Museum. <sup>1</sup> Mommsen assigns this inscription to 139 A.D., since there is no room for *imp. II*, which belongs to Antoninus Pius from 143 A.D., nor *p. p.*, the use of which dates from the middle of 139 A.D. <sup>2</sup> *Sestertium vicies (centena milia).* Cf. *C. I. L. II. 1169.* Found at Sevilla (Hispalis), Spain, preserved only in copy. It was probably set up in company with a similar inscription of Antoninus Pius, II. 1168, and dates with that in *tribunicia potestate* VIII, 146 A.D.

34. L. Aelio Aurelio | Commodo | imperatoris Caesa|ris T. Aeli Hadri|ani Antonini | Aug. Pii p. p. f., | d. d. p. p.

*C. I. L.* VIII. 50. Inscribed on a marble pedestal found at El Djem (Thysdrus), in Africa. This is the form of the name of Lucius Verus, afterwards emperor, after his adoption by Antoninus Pius, and before his brother Marcus Aurelius had conferred upon him the cognomen Verus and a share in the imperial power.

*C. I. L.* VI. 1016 *a*. Found at Rome, where it exists to-day in Villa Albani. A similar inscription, somewhat imperfect, was found near the walls of the city, back of the Lateran Basilica (*Ephem. Ep.* IV. 787). Two others are given in the Einsiedlensis MS., which are there assigned, the one to the *via Salaria*, the other to the *via Flaminia*, so that it is probable that other stones were placed on other roads about the city. These stones were set up between 177 A.D. in the year in which Commodus was

called Augustus, and the year in which Marcus Aurelius died, 180 A.D. <sup>1</sup> *foriculari* for *foricularii*; nothing is known as to the character of this tax, but the *ansarium* is mentioned in another inscription, VI. 8594, thus: *quidquid usuarium* (i.e. intended for the use of the purchaser) *invehitur, ansarium non debet.* (Dessau.)

C. I. L. III. 3202. Found at Trigl in Dalmatia, now in the museum at Spalato. <sup>1</sup> This word has been partially erased, but is still legible. <sup>2</sup> Commodus seems to have been called Britannicus in 184 A.D. (Eckhel VII. 112.)

C. I. L. VI. 1033. Inscribed on both sides of the famous arch of Severus in the Forum Romanum, in large letters, which were originally filled with bronze. When Caracalla had murdered his brother Geta, he ordered his name to be erased from all inscriptions, hence the words in angular brackets have been cut over the erased name *P. Septimio L. fil. Getae nobiliss. Caesari.* For date see page 136. It is curious that in a public inscription the *praenomen* is written in full; also that Marcus Aurelius is not termed *divus*, and that *Parthici maximi* does not appear with name of Severus. (Dessau.)

## CHAPTER VI

### OFFICIAL TITLES

#### CURSUS HONORUM

CORRESPONDING to the titles given with the names of the emperors, there appear also in the inscriptions, after the names of those who have taken part in public life, the designations of official positions which have been held, arranged regularly in an order determined by their importance and grade. This collection of titles sets forth what is known as the *cursus honorum*, which may be defined as the succession of official stations through which a person must pass in order to obtain the position of the highest rank.

In the early Roman Republic the principle of official promotion, whereby eligibility for the various magistracies depended upon the previous tenure of those of lower grade, and the intervention of a certain period of time, was held in an informal way until B.C. 180, when a *certus ordo magistratum* was definitely established by the Lex Villia Annalis. This consisted of the quaestorship, curule aedileship, praetorship, consulship, with a preliminary military service of ten years, and an interval of at least two years between the various magistracies. The time of Sulla and the later days of the Republic witnessed various modifications in the regulations governing this *cursus honorum*. Under the Empire, however, it found its fullest development and most important application.

Roman society, at the close of the Republic, may be classified in three divisions: the senatorial order, the equestrian order, the plebs. This classification and partition of citizens on the basis of rank already determined under the Republic was employed by Augustus and his successors in establishing and developing the imperial government.

To those of senatorial rank were assigned the old republican magistracies, while to the members of a select body of the knights were given the important *præfecturæ*, such as that of Egypt, and by degrees other offices of administration which were closely related to the princeps.

Subordinate officers, both civil and military, also officials of the various *collegia*, were selected from the plebs. Thus in the imperial period there were in existence three careers of official service (*cursus honorum*), open respectively to those of senatorial and equestrian rank and to the commonalty.

The *cursus honorum* appears in the inscriptions arranged on the generally applied principle of an ascending or descending series. In the ascending series, the direct order, the lowest position is mentioned first, and the highest last, while in the descending series, the inverse order, the highest is mentioned first and the lowest last.<sup>1</sup>

This principle is found applied in various ways, as, for example, when in the same inscription *honores ordinarii* are given in descending order, while others, *extra ordinem*, appear in ascending order.<sup>2</sup>

#### SENATORIAL CURSUS HONORUM

This career was open to senators and all of senatorial rank, namely, those who possessed the requisite property of one million sesterces, and were either the sons of senators or had been raised to the senatorial rank by the emperor.

Before a candidate was qualified to stand for the quaestorship, which was the key to the senatorial *cursus*, two preliminary forms of service were demanded :

1st. The holding of one of a group of minor offices of annual tenure, known as

#### *Vigintiviri. XX VIRI*

- a) *Triumvir capitalis*, III V · CAP, KAPIT. Function, — Execution of capital sentences.

<sup>1</sup> Borghesi, *Œuvres*, IV., p. 103. As to the consulship and the *sacerdotium*, see page 168.

<sup>2</sup> See inscriptions, p. 170.

- b) *Triumvir monetalis*, III V · MON, — *auro argento aere flando feriundo* — III V · A · A · A · F · F. Function, — Coinage of copper money struck by the senate.
- c) *Quattuorvir viarum curandarum*, IIII V · V, VIAR · CVR, CVRANDAR. Function, — Supervision of city streets and roads.
- d) *Decemvir stlitibus iudicandis*, XV · STL, STLIT · IVD, IVDIC. Function, — Member of court having cognizance in civil cases.

The vigintivirate disappeared during the third century.

2d. The serving at least a year as

*Tribunus* (χιλιάρχος) *militum laticlavus*,<sup>1</sup> TR, TRIB · M, MIL · L, LAT, LATIC, LATICL.

This office could be held either before or after the vigintivirate. After the Flavian emperors, however, it regularly followed the preliminary magistracies. In the time of the Empire the tribunate of the soldiers had importance mainly as a *tirocinium* for young nobles, and as introductory to the quaestorship. The appointment to this position came from the emperor. Only in rare instances was this service disregarded, but after the early part of the third century it was no longer required.

The magistracies which followed were the quaestorship, tribunate of the plebs or aedileship, praetorship, consulship. The age required for the quaestorship was twenty-five years; for the praetorship, thirty years. A period of at least a year must intervene between the first three of these, and of two years between the last two.

As a patrician was ineligible to the tribunate of the plebs or the plebeian aedileship, he could pass directly from the quaestorship to the praetorship. Both the tribunate of the plebs and the aedileship disappeared during the third century.

The four magistracies were nominally of annual tenure, although the consulship was no longer, as a rule, held through the year. Consuls were either *ordinarii*, entering upon their duties on the first

<sup>1</sup> Augustus at times made prospective senators *praefecti alae*, as well as *tribuni militum*, although later on the former position was held almost exclusively by those of the equestrian order. Suetonius, *Aug.* 38. Vell. Pat. XI. 104. *C. I. L.* XIV. 2105.

of January, and giving their names to the year,<sup>1</sup> or *suffecti*, from whose number were selected the groups of two who should hold office for portions of the year.

*Adlectio.*

This was an act of the emperor by which elevation to a certain rank might be granted through assignment to the performance of the functions of one of the senatorial magistracies. The forms commonly found are *adlectus inter tribunicios* and *inter praetorios*, rarely *inter quaestorios*. After the third century *adlectus inter consulares* appears.

<sup>1</sup> Although for a long time before the close of the second century the names of *consules ordinarii* had been commonly substituted for those of the *suffecti*, yet in the *acta publica populi Romani* the custom prevailed of naming the consuls actually holding office. After Caracalla the names of the *consules ordinarii* are given. Mommsen, *Ephem. Ep.* I., p. 136. *Ordinarius* appears first in an inscription of the year 155 (*C. I. L.* VI. 2120), and again in one dating 214.

*Priesthoods of the Senatorial Order.*

Certain religious offices which were held by those of senatorial rank are given in inscriptions in connection with the *cursus honorum*. The ordinary position of these titles is either at the very beginning or at the close of the indications of office.

The consulship is regularly placed immediately after the name, so that if the *sacerdotium* and consulship are both given, the general order is: name, consulship, *sacerdotium*; rarely name, *sacerdotium*, consulship.

*Titles of Honor.*

Towards the close of the first<sup>3</sup> century, titles of honor were given to those of senatorial rank. These are found in the inscriptions in

In addition to the four magistracies which form the senatorial *cursus honorum* the inscriptions also show the official functions which were performed by those of senatorial rank. These functions, varying in importance, were arranged in grades corresponding to the several magistracies, and hence were exercised, according to their relative value, by those who had been either quaestors, *quaestoricii*, praetors, *praetorii*, or consuls, *consulares*.

The following table contains the principal senatorial functions, and the rank of the different officials by whom they were generally performed.

The *cursus honorum* is in the descending order. The consulship was held between the tenure of the praefecture *aerarii Saturni* and the provincial administration, but is placed first in the list of *honores*.

When the word indicating the nature of two successive functions is the same for both, it is usual to find it repeated, but here the title *legato p(ro) p(raetore)* serves for both, being omitted with the second. The word *item* is used, as a rule, to denote a succession of functions, while *et* commonly indicates the tenure of two functions at the same time. This rule is violated here, since Dasumius governed these provinces separately.

### EQUESTRIAN CURSUS HONORUM

In the reorganization of the *equites* in the imperial period, the most important feature, from an administrative point of view, was the restoration and elevation of the old body of eighteen centuries, known as the *equites equo publico* (EQ · P, PVBL).<sup>1</sup> Admission to this corps not only depended upon the original qualifications of free-birth, and the possession of the requisite property of 400,000 sesterces, but also upon the presentation by the emperor of the knight's horse, which was in reality the investiture of a suitably qualified person with membership in the equestrian troop. It was to this body that Augustus and his successors looked for officials who were to serve as superintendents (*praefecti*) and agents (*procuratores*) possessing authority only as representatives of the emperor.

Consistently with the early theories of the Romans, and in imitation of the senatorial career, the equestrian civil service was preceded by a military apprenticeship. After the initial military service the candidate for the equestrian *honores* was eligible for one of the procuratorships, which in themselves varied in dignity and importance; then followed the praefectures, which were the highest offices attainable.

The equestrian *cursus honorum* may be considered under three divisions.

- I. Preliminary service,
  - a) military, b) civil.
- II. Procuratores.
- III. Praefecti.

<sup>1</sup> *Eques Romanus* = ἵππεδς ῥωμαῖοδ, ἵππω δημοσίω τιμηθελδ.

## I. a) Preliminary military service.

Under Augustus no set form of military service appears to have been assigned to the knights, and it was not until the time of Claudius that the *militiae equestres* were in any way clearly defined.

According to Suetonius,<sup>1</sup> Claudius determined upon three forms of service: 1st, *praefectura cohortis*; 2d, *praefectura alae*; 3d, *tribunatus legionis*. The inscriptions, however, testify that these *tres militiae equestres* did not become the usual course of preliminary training till the beginning of the second century, but that omissions, such as of the *praefectura alae* and substitutions of one or more tribunes into the army, or of the three tribunes<sup>2</sup> in the city, were common.<sup>3</sup> In inscriptions dating from the time of Septimius Severus the old order of promotion from *praefectura cohortis* to *praefectura alae* rarely appears, and other military positions form part of the preliminary career. This now in reality loses its preliminary or introductory nature, and becomes the main service for which the procuratorship the far-distant reward. The centurionate<sup>4</sup> is now the first equestrian military office,<sup>5</sup> and the primipilate and the *praefectura legionis*, the old *praefectura castrorum*, are stepping stones to the procurator-

<sup>1</sup> Claudius, 25 "equestres militias ita ordinavit ut post cohortem alam, postquam tribunatum legionis daret." The order given is shown by the inscriptions to be either incorrect or of short duration, for in the inscriptions the *praefectura alae* regularly has the highest rank. Hirschfeld, *Römischen Verwaltungsgeschichte*, pp. 247 ff.

<sup>2</sup> *tribunus cohortis vigilum, tribunus cohortis urbanae, tribunus cohortis aetoriae*.

<sup>3</sup> See Hirschfeld's *Verwaltungsgeschichte*, p. 248, note 2.

<sup>4</sup> The expression "*militiae equestres*" used above is first referred to by Pliny the Younger, and afterward appears in inscriptions of the third century. So *tribunus equestribus militiis perfunctus, functus, or exornatus, or militiis equestribus perfunctus*; again, *militia prima, secunda, quarta*; more commonly, *a militiis tribus, or tribus militiis perfunctus, a quattuor militiis, or quattuor militiarum*. The expression *a militiis* has aroused much discussion. Mommsen, *Staatsr.* III. 549, n. 2, believes there is an ellipsis of *tribus* or *quattuor*. Hirschfeld (p. 250) explains it as merely an honorary title, given to those who have not actually performed military service.

<sup>5</sup> Hirschfeld, *Verwaltungsgeschichte*, p. 249.

ship, while the higher positions filled by *procuratores* fall to those who have held the three city tribunates.<sup>1</sup>

b) Preliminary civil service.

Notwithstanding the gradually increasing importance of military affairs and of service in the army from the beginning of the second century, there was, nevertheless, established at that time a civil career parallel to the military service as preliminary to the position of *procurator*. This was accomplished by the reforms of Hadrian, who recognized and emphasized legal education and training in state affairs as equivalent to service in the army. Thus those who had served as *advocati fisci*, or *sexagenarii a consiliis sacris*,<sup>2</sup> or *consiliarii Augustorum*,<sup>3</sup> or *ab commentariis praefecti praetorio*,<sup>4</sup> also in the lower offices of administration, such as of alimentation, of the roads, of taxation, were eligible for the procuratorship and praefectures without military service.

II. Procuratores (Ἐπίτροποι).

This title, *procurator*, was applied to the imperial agents who performed the lesser administrative duties throughout the Empire. It was originally used in connection with the employees of the emperor's household, who were generally freedmen, but spread afterwards to the offices of government closely related to the emperor, which, becoming of great importance, were finally filled entirely from members of the equestrian order. Thus the office of *procurator* became the patent of equestrian nobility, and hence was not conferred upon men of senatorial rank.

Any satisfactory classification of the various offices of the equestrian career is difficult, as it was not established upon such strict lines as the senatorial *cursus*, and its restrictions were often violated because of the nearness to the emperor, and his readiness to grant

special favors in promoting from low positions to those of high degree. From the time of Hadrian, however, it is possible to determine the rank of the various procuratorships by means of the salary attached to each.

Thus there are four classes :

<i>Trecenarii</i> ,	$\overline{\text{CCC}}$ or AD · HS $\overline{\text{CCC}}$ ,	300000	sesterces.
<i>Ducenarii</i> ,	$\overline{\text{CC}}$ or AD · HS $\overline{\text{CC}}$ ,	200000	“
<i>Centenarii</i> ,	$\overline{\text{C}}$ or AD · HS $\overline{\text{C}}$ ,	100000	“
<i>Sexagenarii</i> ,	AD · HS $\overline{\text{LX}}$ ,	60000	“

The following may be classed as

#### TRECENARII.<sup>1</sup>

*Procurator a rationibus* or *rationalis*, P, PRO, PROC · A · RATIONIB, RAT, or  
*Procurator rationis privatae*, — RAT · PRIV  
*Procurator a censibus*, — A · CENS, — *a cognitionibus*, — *ab epistulis latinis*, — AB · EPISTVL · LATIN, — *a libellis*, — *a memoria*, — *a studiis*; *magister summarum rationum*, M, MAGIST · SVM · RAT

All but the first are *ducenarii* until the third century, at which period the title *magister* takes the place of *procurator*.

#### DUCENARII.

*Praeses* or *procurator provinciae* (of certain provinces), *procurator vice praesidis*, *procurator stationis hereditatum*, — *summarum rationum*, — *ab epistulis Graecis*, — *idiologus ad Aegyptum*; and in the later period, *procurator XX hereditatum*.

#### CENTENARII.

Among those of the third class may be mentioned the *procuratores alimentorum*, — *aquarum*, — *bibliothecarum* (in the earlier period), — *hereditatum patrimonii privati*, — *ludi magni*, — *monetae*, — *operum publicorum*, — *patrimonii*, — *portus*, — *summi choragii* (later *logista thymelae*); the *subpraefecti annonae* and *vigilum*, *praefectus vehiculorum*, *consiliarius*, *magister XX*, *procurator ferrariorum*, — *aurariorum*, *procurator rationis privatae* (*regionis privatae*); *procuratores Aegypti* as — *iuridicus Alexandriae*, *procurator Pelusii*, — *Neaspoleos et Mausolaei*; also the *praefectus classis* (in Italy) in the first two centuries.

<sup>1</sup> Obtained mainly from Hirschfeld's *Verwaltungsgeschichte*, pp. 259-265.

## SEXAGENARII.

Among those in the last class may be mentioned the *advocatus fisci*, *subpraefectus classis* (in Italy), *subprocuratores* (in the provinces), *praefectus vehiculorum* (in the provinces), *procurator ad Miniciam*, *adiutor praefecti annonae*, *procurator ad annonam Ostiis*, *adiutores studiorum*, also the lower offices of the *ratio privata*, such as *procurator ad bona damnatorum*, and of the *XX hereditatium*, the *promagister hereditatium* at Rome, and in the second century the *procurator bibliothecarum*.

## III. Praefecti (\*Ἐπαρχοί).

The history of this title is similar to that of *procurator* in that it originated in the imperial household, and then extended to the important officials of state who discharged certain functions by the delegation of the emperor. The important praefectures were the highest official positions of the equestrian career.

These in ascending order are :

*Praefectus vigilum*, P, PF etc. VIG, VIGIL

*Praefectus annonae*, P, PF etc. ANN

*Praefectus Aegypti*, P, PF etc. AEG

*Titles of Honor.*

From the beginning of the third century the title *vir egregius* (ἀνὴρ κρᾶτιστος), V · E, which had earlier been in general use, became the official designation<sup>1</sup> of honor of the *procurator*. It differed from the senatorial *clarissimus* in that it was given only in exceptional

instances to women and children. Note also *egregiae memoriae vir*, E · M · V. The title *vir perfectissimus* (ἀνὴρ διασημώτατος), V · P, was also officially recognized about the same time, as the title of the *procuratores* of the highest grade, also of the *praefecti*, from the *praefectus classis* to the *praefectus annonae*. *Vir eminentissimus* (ἀνὴρ ἑξοχώτατος), V · EM, was limited to the *praefectus praetorio*. The title *splendidus eques Romanus* which appears in some inscriptions of Italy seems to have been given to those *equites* who, not being magistrates, could not receive the titles mentioned above.<sup>1</sup>

*Elevation of Equites to the Senatorial Rank.*

By an act of the emperor (*adlectio*, see page 167) *procuratores* of a certain grade were raised to the senatorial rank, and filled vacancies in the senate. This change was not made, as a rule, after the important praefectures had been reached, for these were as high in rank as the curule magistracies; also *adlectio inter praetorios* is more common in the inscriptions than *adlectio inter tribunicios*.<sup>1</sup> There is no evidence of any change to the lower order on the part of those who had held curule offices. The title *equites illustres* was applied to those who, although of senatorial census, preferred to remain within the equestrian order.

## CURSUS HONORUM AFTER CONSTANTINE

The elaborate systems described above were not maintained after the beginning of the fourth century. Evidences of disintegration show themselves in the course of the third century in the abandonment, after Caracalla, of the required military service preliminary to the quaestorship, in the disappearance of the vigintivirate, and from the time of Gallien in the final exclusion of members of the senatorial order from the army. After Constantine the equestrian career disappeared entirely, and many of the former restrictions of the senatorial *cursus* were disregarded.

The *cursus honorum*, as it existed after the early part of the fourth century, was confined to members of the senatorial order known as the *clarissimi*. To these were allotted the official positions and functions which, arranged in grades according to their importance, were assigned on the basis of a threefold classification of those eligible for office. These three classes, representing grades of promotion, were:

1. Clarissimi, C, λαμπρότατοι.
2. Clarissimi et spectabiles, C · ET · S, SP, περιβλεπτοι.
3. Clarissimi et inlustres, C · ET · I, IN, INL, ξνδοξοι.

The general class of the *clarissimi* consisted of those who were sons of senators, and so held their rank by birth, and again those who were admitted to the senate through the operation of *adlectio*.

The former were expected to begin their senatorial career by serving as quaestors and then praetors, but, as the quaestorship was often disregarded, the praetorship became in reality the initial position admitting to the senate.

The latter, those honored by *adlectio*, were made senators by the conferring of the honorary consulship by the emperor sometimes upon the vote of the senate. This was known as *adlectio in consulares*, a phrase which, when strictly used, referred to the honorary consulship, but was applied at this period to elevation to the rank either of *clarissimi consulares*, *clarissimi et spectabiles*, or *clarissimi et inlustres*. The word *consularis* no longer has the signification of ex-consul, but merely means an active member of the senate, and

one so entitled might be very far from the attainment of the consulship, indeed might never reach this goal of the senatorial career.

Examples of the two forms of the *cursus honorum* are here given.

#### OFFICIAL POSITIONS OF THE THIRD CLASS

The inscriptions show us that the official positions open to men of the third class of society were of great number and variety. The enumeration of these various functions follows in general the same principle of an ascending or descending series which regulates the order of designations of the senatorial and equestrian *cursus*. It is impossible, however, to obtain a knowledge of the exact grade of the individual offices or to lay down the line of promotion, since, as may be seen in the military *cursus*, there must have been different starting points and different paths of advancement where apparently subordinate and intermediate positions are disregarded. These omissions may be due to unusual promotion on account of peculiar fitness

or through special favor, influences which would have more power in a *cursus* of the lowest grade. These inferior positions are classified in the Indices of the *Corpus Inscriptionum* as follows:

- I. Apparitores et Officiales Magistratum et Imperatoris et Vectigalium.
- II. Officia Militaria et Classiaria.
- III. Honorati et Principales Coloniarum et Municipiorum.
- IV. Principales Collegiorum.

I. The first class includes the *apparitores* and other aides of magistrates and public officials; also, subordinate officers of the imperial administration in Rome and in the provinces.

The most common in the inscriptions are:

The *scribae* were held in the highest honor, the *lictore*s were next, then the *viatores*, and finally the *praefrones*. Mommsen, *De Apparitoribus Magistratum Romanorum*, Rh. Mus. III. The magistrates of the *coloniae* and the *municipia* form a third class of subordinate officials.

The internal administration of the *coloniae* and *municipia* was similar to that of the superior government at Rome.

We may arrange the *municipes* or Roman citizens of the *municipia* in three classes or orders: 1) *ordo decurionum*, 2) *ordo Augustalium*, 3) *plebs* (*populus, municipes*).

The *ordo decurionum*<sup>1</sup> was the municipal senate composed of life members, generally one hundred in number,<sup>2</sup> who were either ex-magistrates or persons selected from the people through the exercise of *adlectio* by magistrates similar to the censor at Rome, termed *II viri* or *IIII viri quinquennales*. The persons selected were at least twenty-five years of age, and possessed a certain amount of property, generally 100000 sesterces. There were four grades of senators which were indicated in the list of *decuriones* (*album decurionum*): 1) the *quinquennalicii*, 2) the *II virales* or *II viralicii*, 3) the *aedilicii*, 4) the *quaestoricii*.

The magistrates generally found in the municipalities were the *II viri* or *IIII viri iure dicundo*, the *aediles*, and the *quaestores*. Their tenure was annual, and they were elected by the *comitia*. As in Rome, these magistracies formed a *cursus honorum*, which was open to those of the senatorial order. The *II viri* or *IIII viri quinquennales* elected every five years with special censorial powers were considered of the highest rank. In certain places in Italy the highest magistrates were termed *dictator*, *praetor*, *magister*, or *praefectus i(ure) d(icundo)*.

The titles *duovir* or *quattuorvir*, found respectively in the *coloniae* and *municipia*, implied either that the two magistrates known as *aediles* and the two *iure dicundo* formed separate organizations, or, on the other hand, were united in one body of four members. The form *IIII viri iure dicundo* is generally found in the Italian *municipia*, while *II viri iure dicundo* is seen in inscriptions of the *coloniae* and of the provinces.

<sup>1</sup> Also entitled *senatus*, *ordo*, *decuriones* D, DEC, DECC., *curia*, *patres et conscripti*, *conscripti*, *ordo splendidissimus* or *sanctissimus* or *honestissimus*.

<sup>2</sup> Cf. the *centumviri* of Veii and Perusia.

The *ordo Augustalium*, like the equestrian order at Rome, held a position midway between the *decuriones* and the *plebs*. It dates from the reign of Augustus, and prevailed especially in the western provinces of the Empire. The *Augustales* seem to have had a semi-official standing, and to have performed certain functions different from those assigned to other magistrates. The municipal senate named annually a college of six members, *seviri Augustales*, to whom was entrusted the giving of public games and festivals.

INSCRIPTIONS OF THE SENATORIAL ORDER

1. L. Caecilio L. f. Rufo q., tr. pl., pr. pro cos.<sup>1</sup>  
*(On another side)* dis manibus sacrum L. Caecili Rufi.  
*C. I. L. I.* 639, XIV. 2464. Found at Marino in ancient Latium, existing to-day in a copy. L. Caecilius Rufus seems to have been the brother of P. Sulla *tribunus plebis*, 691/63, *praetor*, 697/57, frequently mentioned by Cicero. <sup>1</sup> See note in following inscription.
  
2. M. Coelio M. f. Viniciano | pr. pro cos.,<sup>1</sup> tr. pl., q., | Opsilia uxor fecit.  
*C. I. L. I.* 641, XIV. 2602. An inscription on a tomb at Tusculum in Latium. Coelius was *tribunus plebis* 701/53, and in 707/47 he was placed by Caesar in charge of Pontus with two legions (*Cic. Ad. Fam.* 8, 4, 3). <sup>1</sup> It is Mommsen's theory that not two separate *honores*, the *praetura* and the *proconsulatus*, are referred to here, but merely the *honor praetoris provincialis*, with added appellation of *proconsul*.
  
3. L. Munatius L. f. L. n. L. pron. | Plancus cos., cens.,<sup>1</sup> imp. iter., VII vir | epulon., triumph. ex Raetis,<sup>2</sup> aedem Saturni | fecit de manibus,<sup>3</sup> agros divisit in Italia | Beneventi, in Gallia colonias deduxit | Lugdunum et Rauricam.<sup>4</sup>  
*C. I. L. X.* 6087. On a mausoleum near Formia (Formiae), Italy. <sup>1</sup> He was *consul* 712/42 and *censor* 732/22. <sup>2</sup> Dec. 29, 711/43. Beneventum was among the towns assigned to the soldiers in 712/42 by the *triumviri rei publicae constituendae*. <sup>3</sup> i.e. *manubiis*, cf. *C. I. L.* VI. 1316. <sup>4</sup> In 710/44 or 711/43, when as *proconsul* he was governing Transalpine Gaul. On the founding of Lugdunum, see Dio. XLVI. 50.
  
4. L. Memmius C. f. Gal.<sup>1</sup> q., tr. p[L], | frumenti curator ex s. c.,<sup>2</sup> | praefectus leg. XXVI et VII | Lucae ad agros dividundos,<sup>3</sup> | *inf* pontifex Albanus. | Memmia filia testamento suo fieri iussit.  
*C. I. L. VI.* 1460, XIV. 2264. Inscribed on a marble tablet found at Alba, now in Rome. <sup>1</sup> The name of a man of senatorial order without *cognomen*, but with the *tribus*, — *Galeria tribu*; so on coins *L. Memmi Gal.* and *L. C. Memies L. f. Gal.* (*Momm. Röm. Münz.*, pp. 575, 597). <sup>2</sup> This office was held before the year 732/22, for at that time Augustus took into his own hands the *cura annonae*. <sup>3</sup> After the battle of Philippi or Actium.

5. Cn. Baebio Cn. [f.] | Tampilo Válae | Numoniano | q., pr. pro cos., | III vir. a. a. f. f., | viro.

*C. I. L.* VI. 1360. Inscribed on a marble pedestal found between the Via Appia and Via Latina, near Rome, now on the Via Appia. The function of the vigintiviráté is here held after the praetorship.

6. Cives Romani qui | Mytileneis negotiantur | M. Titio<sup>1</sup> L. f. pro cos., | praef. classis, | cos. desig., patrono, | honoris causa.

*C. I. L.* III. 455; *Suppl.* 7160. Inscribed on a marble pedestal found at Mytilene, preserved only in copy. <sup>1</sup> *consul suffectus*, 723/31.

7. P. Paquius, Scaevae et Flaviae filius, Consi et Didiae nepos, Barbi et Dirutiae pronepos, | Scaeva, quaestor, decemvir stlitibus iudicandis ex s. c. post quaesturam, quattuorvir | capitalis ex s. c.<sup>1</sup> post quaesturam et decemviratum stlitium iudicandarum, tribunus plebis, | aedilis curulis, | iudex quaestionis,<sup>2</sup> | praetor aerarii,<sup>3</sup> pro consule provinciam Cyprum optinuit, | viar. cur. extra u. R. ex s. c. in quinq.,<sup>4</sup> pro cos. iterum extra sortem auctoritate Aug. Caesaris | et s. c. misso<sup>5</sup> ad componendum statum in reliquum provinciae Cypri, fetialis, | consobrinus idemque vir Flaviae Consi filiae, | Scapulae neptis, | Barbi proneptis, simul cum eá conditus.

Flavia, Consi et Sinniae filia, | Scapulae et Sinniae neptis, | Barbi et Dirutiae | proneptis, consobrina eademque uxor P. Paquii Scaevae, filii Scaevae, Consi | nepotis, Barbi pronepotis, | simul cum eó condita.

*C. I. L.* IX. 2845-6. Found at Il Vasto d'Aimone (Histonium) on a large double sarcophagus. <sup>1</sup> *ex s. c.* gives the authority for the irregularity in the holding this office *post quaesturam*. <sup>2</sup> *iudex quaestionis* is somewhat inferior in grade to the *praetor*, and hence in the *cursus honorum* stands regularly between the aedileship and praetorship. <sup>3</sup> Not before 731/23, when Augustus placed the *aerarium Saturni* in the care of two praetors. <sup>4</sup> *viar(um) cur(ator) extra u(rbem) R(omam) ex s(enatus) c(onsulto) in quinq(uentium)*. Momm. *Staatsr.* II.,<sup>3</sup> p. 669. <sup>5</sup> *missus*.

8. Q. Vário Q. f. | Gemino | leg. divi Aug. III,<sup>1</sup> | pro cos., pr., tr. pl., | q., quaesit. iudic.,<sup>2</sup> | praef. frúm. dand., | X vir. stl. iúdic., | curator aedium sacr. | monumentor. que public. | tuendorum.<sup>3</sup> |

Is primus omnium Paelign. senator | factus est et eos honores  
gessit. | Superaequani publice, patrono.

C. I. L. IX. 3306. Found at Castelvechio Subrego (Superaequum), where it is still preserved. Varius Geminus, mentioned frequently by Seneca, is probably the same person. <sup>1</sup>The names of the two provinces of which Geminus was *legatus* are not given. <sup>2</sup>*Quaesitori iudici* is denoted in other inscriptions by *quaesitor* and *iudex quaestionis*. See preceding inscription and Momm. *Staatsr.* II.,<sup>3</sup> p. 586. Geminus probably held this office between the tribunate and the praetorship. <sup>3</sup>It is noticeable that the *honores ordinarii* are given in a descending order, and the *honores extraordinarii* follow in ascending order. *Quaestores iudices* were *aedilicii* or *quaestorii*. *Praefecti frumenti dandi* were *praetorii* or *aedilicii*, while the *curatores operum publicorum* were *praetorii* or *consulares*. *Decemviratus litibus iudicandis* was undertaken generally before the quaestorship; nevertheless, in the time of Augustus, it was sometimes given to those of senatorial order *extra ordinem*.

9. P. Cornelio Dolabellae cos.<sup>1</sup> | VII viro epuloni, | sodali Titiensi, |  
leg. pro. pr. divi Augusti <sup>2</sup> | et Ti. Caesaris Augusti | civitates  
superioris | provinciae Hillyrici.<sup>3</sup>

C. I. L. III. 1741. Found at Ragusa, in Dalmatia, where a fragment still remains. <sup>1</sup>*consul ord.*, 10 A.D. <sup>2</sup>14 A.D. and subsequent years. The *consulatus* and the priestly functions may thus assume the first place, out of their chronological position, and in the order *consul, sacerdotium*, rather than in the reverse. The remaining *honores* may, however, immediately follow the *consulatus*, and the *sacerdotium* be placed at the end. If the *honores ordinarii* are given together, and in like manner the *extraordinarii*, or if the important state magistracies appear by themselves, and then those of a municipality, the priestly offices of the state may be inserted between the two series of *honores*. This is true also of municipal priestly offices. <sup>3</sup>This is the province which was afterwards called Dalmatia, termed *maritima pars Illyrici*, by Velleius II. 125.

10. Q. Caerellius Q. f. | Qui., III vir cap., quae. | pro pr., tr. pl.,  
legato <sup>1</sup> | pro pr. ter, pr., praef. | frum. ex s. c. s.,<sup>2</sup> | leg. Ti.  
Caesaris Aug., | procos., | ex testamento.

Q. Caerellio M. f. | Qui. patri, tr. milit., | quae., tr. pl., praetori, |  
leg. M. Antoni, procos.

- C. I. L.* VI. 1364. Inscribed on a marble tablet found in a cemetery on the *Via Ardeatina*, Rome. <sup>1</sup> *legatus*. <sup>2</sup> This letter is unnecessary. The name of M. Antonius, although erased from the *Fasti Capitolini* and elsewhere, nevertheless was afterwards restored in the same. It was given in the *fasti* of 20 A. D., according to Tacitus, *Annales*, III. 18.
11. P. Plautius | Pulcher | triumphalis <sup>1</sup> filius | augur, III vir a. a. a. f. f., q. | Ti. Caesaris Aug. V consulis, <sup>2</sup> | tr. pl., pr. ad aerar., comes Drusi fili | Germanici, avonculus Drusi | Ti. Claudii Caesaris Augusti fili | et ab eo censore inter patricios | lectus, curator viarum sternendar. | a vicinis lectus ex auctoritate | Ti. Claudii Caesaris Augusti Germanici, | procos. provinciae Siciliae. | Vibia Marsi f., | Laelia <sup>3</sup> nata, | Pulchri.
- C. I. L.* XIV. 3607. Inscribed on a marble tablet found near Tihur, existing only in a copy. It refers to the son of M. Plautius Silvanus consul 752/2. <sup>1</sup> Silvanus, the father of Pulcher, is termed *triumphalis* because of his receiving *triumphalia ornamenta*. <sup>2</sup> 31 A. D. <sup>3</sup> *Laelia*; the ablative case of the name of the mother is given in addition to that of the father, according to the Etruscan custom (Bormann).
12. C. Ummidio C. f. Ter. Durmio | Quadrato cos., XV vir. s. f., | leg. Ti. Caesaris Aug. prov. Lusit., <sup>1</sup> | leg. divi Claudii in Illyrico, eiusd. et | Neronis Caesaris Aug. in Syria, <sup>2</sup> procos. | provinc. Cypri, q. divi Aug. <sup>3</sup> et Ti. Caesaris | Aug., aed. cur., pr. aer., <sup>4</sup> X vir. stlit. iud., curat. | tabular. publicar., praef. frum. dandi ex s. c.
- C. I. L.* X. 5182. Found at S. Germano (Casinum, a Sabine town), where it exists to-day. <sup>1</sup> 37 A. D. <sup>2</sup> 51 A. D. and the years following (Tac. *Ann.* XII. 45; XIV. 26). <sup>3</sup> 14 A. D. <sup>4</sup> 18 A. D. (*C. I. L.* VI. 1496). Here the consulship and *sacerdotium* are given first by themselves, then follow the *legationes provinciarum imperatoriarum* and the proconsulship, next the *honores urbani ordinarii*, and then the *honores urbani extraordinarii*, the various series being in ascending order.
13. a. Cn. Domitio Sex. f. C. I. L. XI. 5210, 5211. Found at Fulginia, in Umbria. These inscriptions refer to two brothers, known from the Letters of Pliny, VIII. 18, 5, Martial V. 28, 3, and from *lateres* of the gens *Domitia* (C. I. L. XV., p. 266). <sup>1</sup>They were *consules suffecti* in the last years of Vespasian or Titus, or in early part of reign of Domitian, proconsuls of Africa under Domitian, before 94 A.D. <sup>2</sup>Lucanus was probably *legatus provinciae Africae* in the proconsulship of his brother Tullus in the year following his own proconsulship. <sup>3</sup>The *legatio exercitus Africani* was commonly given to *praetorii*, but Tullus received it as *praetor designatus*. <sup>4</sup>They were the *praefecti* of the *auxilarii* of the army in Germany, not, however, before 73 A.D., after they had been placed among the *patricii* by Vespasian, in 73 or 74 A.D. (Mom. *Staatsr.* II,<sup>3</sup> 1101, note 4). <sup>5</sup>They were presented with the *dona militaria* after the German campaign. Hence *praefecto auxiliorum*, etc., and *donato*, etc., must be read together, for all the other *honores* are given in the descending order, save this portion. <sup>6</sup>*Aureis* appears in both inscriptions where we would expect *aurea*. The *dona militaria* for soldiers, under-officers, and officers to and including the grade of centurion, were *armillae*, *torques*, and *phalerae*, and for the higher officers, *coronae*, *hastae purae*, and *vexilla*. Centurions of a higher grade had a right to one *corona* and one *hasta pura*, the tribunes and praefects to one *corona*, one *hasta pura*, one *vexillum*, or to two insignia of the same kind. The *legatus* of the legion of praetorian rank received three of each kind, while the *legatus* of consular rank received four. The mention of the *armillae*, *torques*, and *phalerae* does not occur after Hadrian. We then find only *donis militariibus donatus*. The mention of military *insignia* does not appear at all in the inscriptions after the time of Caracalla.

C. I. L. V. 5262. Inscribed on four fragments of a large stone brought originally from Comum to Mediolanum, where it was found. Only one of these now remains, the portion of the inscription on the others existing only in copies. The inscription refers to the baths established by the will of Pliny at Comum, where he was born. Pliny, named P. Caecilius Secundus, became C. Plinius Caecilius Secundus after adoption through his uncle's will (Mommson, *Herm.* III., p. 60). <sup>1</sup> *consul suffectus*, 100 A.D. (Mommson, *l.c.*, p. 91). <sup>2</sup> According to *Epist.* 3, 8, this was shortly after 103 or 104 A.D. <sup>3</sup> The mission to Bithynia dates 111. <sup>4</sup> 105, and years following (Mommson, *l.c.*, p. 47). <sup>5</sup> In *Epist. ad Traian.* 3, Pliny refers to the *praefectura aerarii*, which he held in 98-101. He held the *praefectura aerarii militaris* 94 or 95. <sup>6</sup> Pliny appears to have been praetor in 93, *tribunus plebis* 92. <sup>7</sup> In *Epist.* 7, 16, 2, Pliny says that he has been *quaestor imperatoris*. He was *quaestor Domitiani*, as it appears, in 89-90. <sup>8</sup> Pliny says in *Epist.* 1, 10, 3; 3, 11, 5, that he had been *tribunus militum in Syria*. <sup>9</sup> *t(estamento) f(ieri) i(ussit)*. <sup>10</sup> *decies octies centena et sexaginta sex milia cum sexcentis sexaginta sex* (the number 1866666); Mommson, *Herm.* III., p. 102, suggests that the sign of *bessis* (2/3) has disappeared. <sup>11</sup> This numeral is supplied from *Epist.* 7, 18, 2. <sup>12</sup> Pliny had dedicated a library for his fellow-townsmen in 97, or a little earlier (*Epist.* 1, 8, 2). For the life of Pliny, see Mommson, *Hermes*, III., p. 59.

C. *I. L. X.* 6006. Inscribed on a pedestal found in the ruins of Minturnae, now at Naples. It is this inscription which formed the basis of Borghesi's work on the *cursus honorum*, *Oeuv.* IV., p. 104-178. <sup>1</sup> Before 138, in which year as *consularis* he was in charge of Cappadocia, probably about 130, or the years immediately following. <sup>2</sup> *nutr(ix)*. <sup>3</sup> *sua p(ecunia) p(osuit), l(oco) d(ato) d(ecreto) d(ecurionum)*.

C. *I. L. VIII.* 2747. Inscribed on a pedestal found at Lambaesis, in Africa. <sup>1</sup> It is known that this *legatus* governed Numidia in 147 and 148 (*C. I. L. VIII.* 2542, 2652). <sup>2</sup> *leg. III* has been engraved over an erasure. <sup>3</sup> 124 A.D. <sup>4</sup> 125 A.D. Since *militēs veterani* commonly received *dimissio* after twenty-five years of service, Wilmanns places the date of the inscription as 150 A.D. The *cursus honorum* is given in inverse or descending order. The functions between *cos. design.* and *praetori* were assigned to Crispinus as being of praetorian rank.

C. I. L. XIV. 3609. Inscribed on a marble pedestal found at Tivoli (Tibur).

<sup>1</sup> *Uryntiano* is the reading of Borghesi, but the Pamphylian inscription in *Bull. de Corr. Hellén.* 14 (1890), p. 643, gives authority for *Amyntiano*. The name in other inscriptions appears as *Q. Pompeius Q. f. Senecio Sosius Priscus*, or *Q. Sosius Priscus*. The portion of his name, *Q. Pompeius Roscius . . .* to . . . *Vibullius Pius* he received from his father; *Senecio* and *Sosius* from his maternal grandfather; *Sex. Iulius Frontinus* from his great-grandfather; *Augustanus Alpinus Bellicius Sollers* from *Bellicus Sollers*, consul in time of Trajan. <sup>2</sup> *consul ordinarius*, 169 A. D. <sup>3</sup> *H(erculis) V(ictoris)*. <sup>4</sup> *senatus populusque Tiburs*. The arrangement of the *cursus honorum* is as follows: first, the priestly functions, then *quaestor candidatus*, followed by *legatus pro praetore*, a quaestorian function, then *praetor*, *consul*, *proconsul Asiae*, a consular function, hence in ascending series. The functions performed in Italy follow in inverse order, and finally the municipal *honores* and the municipal priesthoods are given.

I. L. II. 1970*), Hirschfeld, *Verwaltungsgeschichte*, p. 263, n. 8. <sup>3</sup> 247 or 248 A.D. <sup>4</sup> *curant(ibus) nun(dinas) Hermogen[e] Au[g.] n. l., Paulino Coz[mo]* is suggested by Mommsen, but the names have probably been wrongly copied. The first word, *Aegippi*, i.e. of Aegippius, is separated from the rest, and forms one line of the inscription.

20. M. Aurelio Basileo | viro ducenario, proc. | rationis castrensis, |

C. I. L. XI. 19. Inscribed on a large marble *cippus* found at Ravenna, where it still exists in part, in the Museum Classense. <sup>1</sup> It is curious that the function *praefectura legionis* should be placed among those of the centurionate. <sup>2</sup> Tiro was at first among the praetorian soldiers, then afterwards became *evocatus*. <sup>3</sup> For these various functions performed by Tiro as *evocatus* see Mommsen, *Ephem. Ep.* V. 148. <sup>4</sup> *Raven(natium)*.

### CLASSIFICATION AND DESCRIPTION OF INSCRIPTIONS

In the preceding portion of this work we considered Roman names and official titles, elements which are found in inscriptions of all kinds. To study the additional elements which are found in individual inscriptions, it will be useful to arrange epigraphic material in various classes, and then to examine the special form peculiar to each class.

By "Latin Inscriptions," if we use the term in a general sense, we mean the remains of the Latin language of a non-literary character preserved for us in the more enduring substances.

There are two great classes:

I. Inscriptions proper (*ἐπιγραφαί, ἐπιγράμματα, tituli, Aufschriften*). These have no existence apart from the objects upon which they are found, but form a necessary part of these objects, denoting their particular purpose.

II. Inscriptions which are strictly documents (*acta, instrumenta, tabulae, Urkunden*). These were written with some particular individual purpose, and hence have an existence mainly or entirely separate from the objects upon which they appear. Each of these classes may be subdivided as follows:

## I. TITULI

1. Dedicatory and Votive Inscriptions (*Tituli Sacri*).
2. Sepulchral Inscriptions (*Tituli Sepulcrales*).
3. Honorary Inscriptions (*Tituli Honorarii*).
4. Inscriptions on Public Works (*Tituli Operum Publicorum*).
5. Inscriptions on Movable Objects (*Instrumentum*).

## II. INSTRUMENTA

1. Laws (*Leges et Plebi Scita*).
2. Decrees of the Senate (*Senatus Consulta*).
3. Imperial Documents (*Instrumenta Imperatorum*).
4. Decrees of Magistrates (*Decreta Magistratum*).
5. Sacred and Public Documents (*Acta Sacra et Publica*).
6. Private Documents (*Acta Privata*).
7. Wall Inscriptions (*Inscriptiones Parietariae*).
8. Consular Diptychs (*Diptycha Consularia*).

## CHAPTER VII

### TITULI

#### DEDICATORY INSCRIPTIONS

DEDICATORY inscriptions (*tituli sacri*) appear on the various objects consecrated to the gods, such as vases, altars, thin metal plates (*laminae*) attached to altars and on votive tablets.

Dedicatory bowl of Etruscan origin, now in a museum at Paris. Date 350-250 B.C.

*C. I. L. I.* 44. *P. L. M. E.* XI. c.

The earliest known are painted in white upon earthen cups or bowls of a dark color, and give the name of a divinity in the genitive case as indicating the owner of the vessel.

Inscribed on a *patera* found at Volci, Etruria, now in Gregorian Museum, Rome.  
Date 350-250 B.C.

Inscribed on a *patera* found at Horta, Etruria, now in Gregorian Museum, Rome.  
Date 350-250 B.C.

The natural form of dedication, the dative case of the name of the divinity, is found on the votive altars of the grove of Pisaurum. (See page 54.)

The bronze *lamina* shown below is also an illustration of this form of dedicatory inscription.

*Iunonei Loucina(e).*

C. I. L. X. 6484. P. L. M. E. II. D.

With these names of divinities there appears in some instances the name of the dedicator together with a simple verbal phrase, e.g. *donu(m) dat, dede(t), dono(m) ded(e)ro(n)t, donum portat*. Even in the early period we find also the word *sacrum* (S, SA, SAC) with the dative case, or, more rarely, with the genitive; likewise the words *libens* and *merito*, indicating the spirit of the dedicator and the worthiness of the one honored. In inscriptions on offerings taken from spoils of war, the name of the dedicator may appear without the name of the divinity.

*M. Fulvius M(arci) f(ilius) | Ser(vii) n(epos) co(n)s(ul) Aetoliā cepit.*

In general, however, *tituli sacri* of all periods contain the name of the divinity, the name of the dedicator, and a verbal phrase. These may be termed major elements. Subordinate expressions varying with the individual inscriptions may be termed minor elements.

### I. Name of divinity.

This appears regularly in the dative case, rarely in the genitive, and is accompanied at times by *deo, deae, or deabus*, or is modified by some adjective or appositional phrase, such as epithets and titles belonging to the names of divinities, as, for example:

<i>Iuppiter Optimus Maximus</i>   · O · M	<i>Fortuna Primigenia</i> F · P
<i>Iuppiter Optimus Maximus Fulminator</i>	<i>Genius huius loci</i> G · H · L
<i>Fulginator</i>   · O · M · FVLM · FVL	<i>Genius Populi Romani</i> G · P · R
<i>Iuno Regina</i>   · R, RE, REG	<i>Genius Domini Nostri</i> G · D · N
<i>Iuno Seispita Mater Regina</i>   · S · M · R	<i>Numen Augusti</i> N · AVG
<i>Hercules Victor</i> HERC · VIC	<i>Sol Invictus Mithras</i> S · I · M

II: The name of the dedicator, in simple form, i.e. the *tria nomina*, or with possible additions described in Chap. IV. Indications of rank, official station, profession, or calling may accompany the name. After this major element, minor elements may be found indicating:

#### 1. Participation in the act of dedication, e.g.:

*cum coniuge et filiis, cum suis omnibus, cum liberis suis.*

2. The object dedicated, *e.g.* :

*aram, signum, statuam, templum.*

3. The motive or incentive to which the offering is due, *e.g.* :

*ex imperio, ex iussu* EX · IV, *ex visu* or *viso*, *ex senatus consulto* EX · S · C, *de senatus sententia* D · S · S, *decreto decurionum* D · D, *ex testamento* EX · T, TEST, *pro salute* (illius) PRO · S, *pro se et suis, pro salute sua* P · S · S, *in honorem* (illius), *in memoriam, in honorem domus divinae* IN · H · D · D, *ob honorem* OB · H, HON, *ob merces recte conservatas, sublato hoste perniciosissimo p(opuli) R(omani).*

4. The cost of the offering or the means of providing for the same, *e.g.* :

*de pecunia sua* D · S · P, *de suo* D · S, *de praeda, ex sestertium* (tot) *milibus nummum* EX · HS · N, *ex auri pondo* — P, *aere publico.*

5. The location of the monument, *e.g.* :

*in foro novo, in suo.*

6. The permission or the assistance of others, *e.g.* :

*per* (illum), *per patrem, permissu* (illius).

## III. Verb or verbal phrase.

The verb appears in the perfect or present tense, singular or plural, first or third person, *e.g.* :

*dedit, dederunt* D, DED, *dedit dedicavit* D · D, *dono dedit dedicavit* D · D · D, *donum* or *dono dedit* D · D, *dono dedit libens merito* D · D · L · M, *fecit* F, FEC, *faciendum curavit* F, FAC · C, CVR, *sacrum dat* S · D, *posuit* P, *sacravit* SAC, *ex voto posuit* EX · V · P, *votum bene merenti posuit* V · B · M · P, *donum dedit votum laetus libens merito* D · D · V · L · L · M, *votum solvit libens merito* V · S · L · M, *votum solvit libens animo* V · S · L · A.

Certain minor elements may follow the verbal phrase:

1. Date of dedication.

This is ordinarily indicated by the names of the consuls of the year, with the addition in some instances of the months and days, or by the name of the emperor with the number of his *tribunica potestate* and that of his imperial salutation, or, as in some provinces, with the year of his reign, e.g. *anno I imp. Domitiani Aug. (C. I. L. III. 35)*. The names of other magistrates or officials, combined with the titles of their position, in the provinces, *municipia*, or *collegia*, also serve to indicate the date. Certain prominent events are used as dating points, e.g. *ab urbe condita* A · V · C, *anno provinciae, post Interamnam conditam*.

2. Certain formulae indicating location, e.g.:

*locus datus decreto decurionum* L · D · D · D

*loco dato publice decurionum decreto* L · D · PVB · D · D

3. Ablative absolute indicating the person assisting, e.g.:

*curante (illo), curam agente (illo)* C · A

The general arrangement of dedicatory inscriptions may be indicated thus<sup>1</sup>:

## SEPULCHRAL INSCRIPTIONS

The customs of the Romans relating to the disposition of their dead have been the means of preserving for us a very large number of inscriptions. Their early rock-hewn tombs, their *sarcophagi* and stately *mausolea*, their catacombs with *columbaria*, or recesses for cinerary urns, and their burial grounds, are marked by inscriptions which appear either on the walls of buildings, on the receptacles themselves, on separate slabs of stone, or on the *cippi* indicating the place of burial. These inscriptions vary in form and matter according to their period, or according to the caprice of the builder of the tomb, or even in accordance with legal restrictions.

The earliest sepulchral inscriptions represented by the epitaphs from Praeneste given below, contain only the name of the deceased, regularly in the nominative case, though somewhat later the genitive is likewise found.

*M. Fabrici(s) · K(aesonis) J(ilios)*

*Maio(r) · Fabricia*

*M. Calti(s) · M(arci) filios*

*L. Anici(s) · V(ibi) · f(ilius)*

Epitaphs from Praeneste dating between 250-150 B.C.

*C. I. L. XIV. 3131, 3133, 3077, 3052.*

If the tomb was intended for more than one person, the names of all were often given. In this case the living were denoted by V or VIV = *vivus* or *viva, vivit, vivunt*, placed alongside of the name. The names of the dead were marked by  $\ominus$ ,<sup>1</sup>  $\omin�$ ,  $\bar{\ominus}$  or  $\odot$  standing for *obit* or *obitus*, or by  $\omin�$   $\odot$  = *quondam*, placed generally at the beginning of the inscription or before the name, or, by exception, after the name or before the statement of age or after it.<sup>2</sup>

*C. I. L. XIV. 3188.*

*L. Oppi(s) L. f(ilius) Flacus filius*

In the progress of time additions were made to this simple form, which were in general the indications of calling or profession, the

<sup>1</sup>This is the *theta nigrum* of the poets (Persius, 4. 13; Martial, VII. 37), standing for *θανός*. It is found in the earlier inscriptions of the city and Italy, but is rare after the Augustan period. It is not to be confounded with  $\omin�$ .

date of death, the age of the person, and set formulae, such as *ossa hic sita sunt, heic cubat*, usually written in full until after the republican period, also brief references to the dead as *bonus, pudica*, and finally the measures of the sepulchre and formulae referring to the protection of the same.

At about the close of the fifth century A.U.C. (250 B.C.), contemporaneous with the introduction of the custom of building tombs with some architectural design, and adding ornamentation, poetical *elogia* were inscribed after the usual *titulus*, mainly upon the tombs of distinguished families. contain poetic epigrams in saturnian verse, and one<sup>1</sup> of a later date is accompanied by an epigram in hexameters and pentameters. This custom grew in favor, especially with the middle classes, where Greek influence was felt.

Towards the close of the Republic reference is made occasionally to the *cultus* of the *dei manes*, and the tomb is regarded as the (*locus*) *deum manium* (*C. I. L. I. 1410*), or the *dei manes* are represented as having received the dead, while in the Augustan age the *tituli sepulcrales* assume the form of *tituli sacri*, becoming, in reality, dedi-

Inscriptions dating from the Augustan age regularly begin with these words, at first written in full, then later on abbreviated D · M. Other forms are *dis manibus sacrum* D · M · S or *d. m. sacrum*, *d. m. et memoriae* or *et genio, et quieti aeternae, somno aeternali*, etc. In rare instance D · M is found at the close of the inscription (*C. I. L. X. 684*). Sometimes a dedication to some other divinity, e.g. Venus, Juno, or Luna, is substituted for that to the *dei manes*. This occurs particularly in inscriptions from Spain.

## II. Name of the dead.

After the dedication to the *dei manes* there followed the name of the dead, with or without official titles or statements as to profession or calling. The name appears either in the nominative case as the subject of some verbal phrase, as *hic adquiescit* or *iacet, situs est*, in the genitive, depending upon *dis manibus*, or in the dative when the inscription is really honorary in character.

### Minor elements associated with the name of the dead.

1. The age of the person is expressed by a variety of formulae: *annorum* AN, ANN, *vixit annis* (tot) V · A, AN, ANN. The accusative *annos* is also found, but is not as common as the ablative. At times the months (*mensibus* or *menses* M, MENS) are also given, and in the early period, particularly in case of infants, the days (*diebus*, *dies* D, DI, DIEB), and even the hours (*horis* H, HOR, O).

A relative clause often expresses the age, *qui* or *quae vixit annis* (tot) Q · V · A, also *vixit annis plus minus* VIX · ANN · P · M, which is rare before the middle of the third century A. D., but common in the later period.

Other formulae are *annos agens* (tot), *defunctus annorum* (tot) D, DE, DF, Ð, DEF · AN, ANN, *obitus annorum* (tot) O, ⊕ · AN, ANN.

In inscriptions relating to married persons the length of married life is expressed in various ways, *qui* or *quae vixit annis* (tot), or *facere, ferre, laborare cum* (illo) in place of *vivere cum* (illo). In epitaphs of soldiers the years of service are usually given, so *annorum* (tot), *stipendiorum* (tot) ST, STIP, *aerum* (tot) AER or *militavit annis* (tot) M, MIL · AN, ANN. These indications of years in *tituli sepulcrales* are found particularly in inscriptions of men of lower rank who have held no official position and upon whose tomb no honorary titles can be recorded.

2. In the tomb inscription of a gladiator together with his years of service there is also given the peculiar class to which he belonged, as *essedarius* ESSE, *murmillio* M, MVR, *contra retiarius* 7R, also the number of victories, denoted by the symbol ∩ (according to some = *coronae*). In the case of *aurigae* the epitaph contains the *factio*, e.g. *factio veneta*; the country, e.g. *natione Maurus*; the age, number of victories, e.g. *primum vicit*, date of victory, horses with which the contest was won, character of contest, e.g. *inter singularum vicit* (toties), *inter binarum* (toties), *secundas tulit* (toties), and finally the money earned.<sup>1</sup>

## 3. Circumstances of death.

*a latronibus occisus, peregre defunctus, mors per culpam curantium, tegula prolapsa peremptus, a tauro deceptus.*<sup>1</sup>

## 4. Formulae referring to the repose of the dead.

*hic situs H · S, hic situs est H · S · E, hic sepultus est H · S · E, hic iacet H · I, hic adquiescit H · ADQ, ossa hic sita sunt O · H · S · S, ossa hic sunt O · H · S.*

5. Salutations addressed to the dead by passers-by, placed either at the beginning or close of the inscription.

*Ave* or *have, salve*, with the name of the dead in the vocative case, as *have Vitalis, Lolli ave. Sit tibi terra levis S · T · T · L, ossa tua bene quiescant O · T · B · Q, sit vobis terra levis S · V · T · L, ossa volo bene quiescant O · V · B · Q, hic ossa volo bene quiescant H · O · V · B · Q, opto sit tibi terra levis O · S · T · T · L.*

6. Salutations represented as addressed by the dead to the living, either at the beginning or close of the inscription.

*Ave, salve, vale viator, tu qui legis vale et cum voles venito, bene valeat is qui hoc titulum perlegit meum.*

## III. The place of burial.

## 1. Circumstances bearing upon the selection of a place.

*locus datus decurionum decreto L · D · D · D, loco dato senatus consulto L · D · S · C, empto loco, locus adsignatus a patrono, locus emptus est X . . . argenti, locum precario petierunt ab (illo).*

## 2. Measures of the tomb.

*in fronte* or *in frontem pedes* (tot) I, IN · F, FR, FRONT · P, PED, *in via, in agro* or *in agrum pedes* (tot) I, IN · A, AG, AGR, *retro* RET or *in retro pedes* (tot) IN · R. These are sometimes rendered more explicit by the addition of *longus* L, LONG, and *latus* L, LAT, e.g. *in fronte longum pedes* (tot), *latum pedes* (tot); also *locus* L or *locus monumenti* L · M, e.g. L · M *in fronte pedes* (tot), *area quae ante sepulcrum est huic monumento cedit in fronte pedes* (tot).

## 3. Protection of tomb from desecration and alienation.

*huic monumento dolus malus abesto H · M · D · M · A, ni violato, hoc monumentum heredem non sequetur* or *sequitur H · M · H · N · S, hoc monumentum heredem exterum non sequetur H · M · H · E · N · S, hoc monumentum sive sepulcrum est heredem non sequetur H · M · S · S · E · H · N · S, hoc monumentum sine dolo malo H · M · S · D · M, dolus malus abesto et ius civile D · M · A · ET · I · C, hoc monumentum ad heredem non pertinet H · M · A · H · N · P, rogo te viator monumento huic nil male feceris.*

<sup>1</sup> See Index C. I. L. under Mortes Singulares.

## IV. The dedication of the monument.

This portion of the inscription partakes of the nature of *tituli honorarii* which appear on public monuments and buildings. It may consist simply of the designation of the person dedicating the tomb, and an indication of the one remembered, or it may form an elaborate *elogium* containing references to the deeds of the dead, and setting forth details as to the tomb and the occasion of its dedication.

This dedicatory form often takes the place of the ordinary *titulus sepulchralis*.

## Minor Elements:

## 1. The persons who dedicate the tomb or monument.

These are designated either by their names or by terms which, frequently modified by adjectives, make clear the relationship or bond of union existing between the dedicator and the one remembered: *amicus, heres, libertus, pater infelicissimus, coniux carissima, heres ex iussu eius solus, patronus, parentes non hoc merentes a vobis, nutrix filiarum eius, collegium, sodales*.

## 2. Terms denoting the object dedicated.

*domus aeterna, locus sepulturae, monumentum, sepulcrum, sarcophagus, tumulus, titulus, aedes*.

## 3. Verbal phrase.

*adornavit, aedificavit, constituit, donavit, ponendum curavit P · C, sub ascia dedicavit S · A, ASC · D, DED (Gaul), posuit*.

## 4. Phrases explaining the circumstances or the reasons for building the monument.

*ex auctoritate (illius), ex beneficio, secundum decretum ipsorum (collegii), nomine meo et uxoris, ex praecepto matris, ex testamento*.

*arbitratu (illius), curam agente (illo), (illo) curante, (illis) curantibus*.

*honoris causa, memoriae causa, ob merita eius, ob memoriam custodiendam adque propagandam, pro meritis eorum*.

5. The person for whom, or in remembrance of whom, the tomb has been built is denoted either by his name or by a term indicating the relationship or the basis of the union existing between him and the one providing the tomb.

*amico bene merenti A · B · M, coniugi (C), carissimae (o) filiae (o), fratri bene merenti B · M, libertae carissimae et bene merenti, libertabus, patrono indulgentissimo, marito amantissimo, mihi et uxori utrisque nobis vivis*

Epitaph of Publius Cornelius Scipio.  
See page 295.

*posteritatieque nostrae, sibi et suis S · ET · S, sibi et suis libertis libertabus posterisque S · ET · S · L · L · P · Q, municipibus suis incolisque, nutrici et mammulae bene merenti, servo fidelissimo.*

Words denoting relationship are at times modified by such phrases as (marito) *cum quo vixit annis* (tot) *sine ulla animi laesione*, (uxori) *cum qua concorditer egit per annos* (tot).

There are also in existence sepulchral inscriptions which are, in reality, documents<sup>1</sup> (*instrumenta*). Of this character are the funeral orations, e.g. *Laudatio Murdiae*<sup>2</sup> of the first century A.D., which, having formed a part of the obsequies, have been inscribed upon the tomb; also legal documents, such as the will of *Dasumius*<sup>3</sup> (108 A.D.) and the *donatio*<sup>4</sup> of *Flavius Syntrophus*.

### *Columbaria*

One form of tomb used in Rome was that known as *columbarium*.<sup>5</sup> These were burial-rooms, built partly above ground, in the walls of which were arranged small recesses or niches having the appearance of pigeon-holes (*columbarium* = dove-cot). These niches were used to hold vases (*ollae*) containing the ashes of the dead. *Columbaria* frequently served as the tombs of men of the lower classes, as of freedmen and slaves, and were, for the most part, built by *collegia* or *societates*, whose members thus secured by coöperation a final resting-place for themselves and family. Upon the completion of such a building the *ollae* were portioned out to the various members of the *collegium*.<sup>6</sup> A difference in number of the *ollae* assigned implied a difference in the amount contributed.<sup>7</sup> Each member indicated his own place by inscribing his name upon a marble tablet which was fastened above or below the recess, or by writing his name with a *graphium* on the wall of the building. The tablets,

termed *tessellae*, were either removed when the *titulus sepulchralis* was inscribed, or took the place of the same.<sup>1</sup>

The general arrangement of sepulchral inscriptions may be shown thus<sup>2</sup>:

## HONORARY INSCRIPTIONS

## TITULI HONORARI

The custom of raising statues in honor of distinguished men and adding thereto honorary inscriptions appeared in Rome towards the close of the third century B.C. This custom was of Greek origin, and some inscriptions are found in the Greek form, *i.e.* with the name (in the accusative case) of the person honored and with the verb omitted.

The Romans at first merely transferred the inscriptions of their *imagines maiorum* to their tombs, adding these to the simple and customary *tituli sepulcrales*. The *elogia* of the Scipio inscriptions referred to above are of this character, although they are poetical in form. Memorial and honorary inscriptions (*elogia*), consisting of the name (in the nominative case) of the person honored, followed by official titles of curule offices and brief historical statements, may be regarded as the primitive form of *tituli honorarii*. What was thus done by private persons was soon imitated publicly in the setting up, with, however, no sepulchral connection, either during the lifetime of the individual honored or after his death, of honorary inscriptions such as the Columna Rostrata in honor of C. Duilius, and the *elogia* of the triumphal arch of Fabius.

Of a similar character are the brief inscriptions found on the pedestals of statues and those of a memorial and honorary nature which appear on marble tablets and beneath busts.

We learn from ancient writers that Augustus adorned his forum with statues of famous men, particularly of distinguished generals, and added inscriptions denoting their achievements. Only a few fragments of these *elogia* have been preserved, but as copies were set up also at Arretium which still exist, we can learn from them the character of the originals. It is possible that similar *elogia* found at other places, *e.g.* at Pompeii, referring to Aeneas and Romulus, may have been copied from the city inscriptions placed by Augustus.<sup>1</sup>

<sup>1</sup> In *C. I. L.* *elogia* appear in vol. I.<sup>2</sup> pp. 185-202, classed by themselves as somewhat of a literary character, taken from public and private records, and therefore not strictly *tituli sepulcrales* or *tituli honorarii*. They have the names of those honored in the nom. case and refer to men of the days of the Republic.

*Columna Rostrata.*

Inscribed on a fragment of Parian marble found in the Forum where the Rostra stood, now preserved on the Capitol in the Palazzo dei Conservatori.

Though this inscription refers to C. Duilius, consul 494/260, who won the battle of Mylae, it was probably inscribed with imitation of archaic forms in the imperial period, perhaps in the time of Claudius (Ritschl, *Opusc.* IV., p. 204). Wölfflin believes it to have been taken from a more ancient inscription in the time of Augustus.<sup>1</sup>

From the period of Sulla honorary inscriptions regularly assume the dedicatory form having the name of the person honored in the dative case. Such inscriptions form the *tituli honorarii* of the later Republic and of the imperial period.

Inscriptions on statues erected in honor of those still living were at first of simple form, consisting of the name of the person honored followed by the title of the office held at the time of dedication.

From the time of Augustus, however, inscriptions more elaborate and resembling in their contents *elogia*, but of a dedicatory form, were set up in honor of celebrated men, particularly *triumphatores*, both at Rome, as in the new *fora* of Augustus and Trajan, and also in the provincial cities. This custom spread throughout the Roman world and continued until the fourth or fifth century.

<sup>1</sup> *Bavar. Class. Phil. Hist.* 1890, p. 295. Quintilian, *Inst.* I. 7, 12, and Pliny, *N. H.* XXXIV. 20, both refer to this inscription. For the facts of history see Polyb. I. 23, 7; I. 24, 2; Zonar. VIII. 11; Eutrop. II. 20; Oros. IV. 7, 10.

*Tituli honorarii* of the form just described regularly consist of the following principal elements :

I. The names (in the dative case) of the person honored.

The names of emperors are regularly accompanied by the usual titles, while that of others may appear in simple form or, on the other hand, be accompanied by the *cursus honorum* and the designations of the various functions arranged as described above. In some cases the name is in the genitive preceded by *honori* or *in honorem*.

II. The name of the person, or, as in many instances, of the community or *collegium* raising the statue and setting up the inscription. This element regularly follows the first, although it may be separated from it by certain idiomatic phrases.

III. Various phrases or formulae accounting for the conferring of the honor, or bearing upon the circumstances of the raising of the statue or monument.

1. Adjective or appositional phrases indicating the worth or dignity of the person honored : *amantissimo patriae, abstinentissimo iustissimo disertissimo* (praesidi prov.), *praestantissimo* (patrono), *optimo ac dignissimo* (patrono).

2. Phrases indicating the reasons for conferring the honor : *ob amorem et instantiam erga patriam civesque, ob merita eius, ob eximiam benignamque erga omnes cives suos adfectionem, pro singularibus erga civitatem nostram meritis, propter eximiam pietatem et affectionem fraternam, ad aeternitatem meritorum eius, ad perennem ipsius gloriam, ad referendam gratiam, ad perenne testimonium, ob honorem eius, honoris causa*<sup>1</sup> H · C.

3. Phrases describing the dedicator : *dicatissimus numini maiestatique eorum* (imperatorum), *devotus numini maiestatique eius* (eorum), *memor liberalitatis et honorificentiae eius*.

4. Phrases bearing upon the circumstances of the raising of the statue, regularly placed at the end of the inscription : *petitu populi Romani, publice P, publice decurionum decreto P · D · D, ex senatus consulto EX · S · C, decreto decurionum D · D, DEC · DEC, accedente auctoritate proconsulum, permissu proconsulis P · P.*

*aere conlato A, AER · C, COLL, pecunia publica P, PEC · P, PVB, pecunia sua P · S, de pecunia sua D · S · P, de suo D · S.*

*locus datus decurionum decreto L · D · D · D or LOC · DAT · D · D.*

<sup>1</sup> This formula occurs at the close of earlier inscriptions.

★  
*locus datus senatus consulto* L · D · S · C.

*decurionum decreto pecunia publica* D · D · P · P.

*cura agente* (illo) C · A, CVR · AG, *curante ac perficiente* (illo).

If the person honored has himself met the expenses of the raising of the statue, the fact is indicated at the close of the inscription: *honore usus sumptus remisit loco dato decreto decurionum* H · V · S · R · L · D · D · D, *honore accepto impensam remisit* H · A · I · R, *honore contentus sua pecunia posuit* H · C · S · P · P, *honore usus impensam remisit* H · V · I · R.

IV. The fourth element is a verbal phrase, expressed or understood. Such are —

*statuam censuit ponendam, collocavit, erigi collocarique iusserunt, statuendum curavi, statuam collocandam decrevit, ponendam or poni censuit, posuit idemque dedicavit, fecit* FEC, *faciundum curavit* F · C.

The order of the elements may be indicated thus<sup>1</sup>:

<i>illi</i>	<i>illi</i>	<i>illi</i>	<i>illi</i>
<i>ille</i>	<i>ob merita</i>	<i>ille</i>	<i>ille</i>
<i>ob merita</i>	<i>ille</i>	<i>ob merita</i>	<i>ob merita</i>
	<i>statuam posuit</i>	<i>statuam posuit</i>	<i>locus datus decreto decurionum</i>

The first shows the omission of the verb, the second and third the position of the verbal phrase, and the fourth the general position of the formulae of honor.

## INSCRIPTIONS ON PUBLIC BUILDINGS AND STRUCTURES

### TITULI OPERUM PUBLICORUM

In the last century of the republic it became customary in Rome to place inscriptions upon public buildings and temples, also upon other structures, such as bridges, arches, and aqueducts. These were primarily intended to simply indicate the person or the community under whose direction the work had been accomplished.

The early and simple form, belonging particularly to buildings erected by private persons, consisted of the name of the one erecting the building and a verb, *e.g. fecit*, or verbal phrase. Of this character is the inscription on the Pantheon.

M · AGRIPPA · L · F · COS · TERTIVM · FECIT      C. I. L. VI. 896.

<sup>1</sup> Cagnat, *Cours d'Épigraphie Latine*, p. 229.

As the custom grew in prevalence, the inscriptions were made much more extensive, and under the Empire they were given with great fulness, containing many particulars connected with the raising of the structure so adorned, so that they virtually fulfilled the purpose of records and served as inscriptions in honor of those named, becoming in character, and finally in form, *tituli honorarii*.

Inscription of Temple of Bona Dea, at Lavernae, now Prezza, near Corfinium, Italy.

*C. I. L. I. 1279 = IX. 8188. P. L. M. E.*

The various elements which enter into these inscriptions may be classified as follows:

I. The names and titles, in the nominative case, of the person or community building the structure or restoring the same.

II. The designation of the structure, or description of the work accomplished, in the accusative case:

*portas, balneas, templum, Aquam Marciam, arçum, aquaeductum, horologium, porticum ad balineum cum piscina et signo Cupidinis, thermas cum porticibus duplicibus, aquam per publicum ducendam, tabularium faciundum, etc.*

If the inscription indicates the restoration or rebuilding of the structure, phrases describing its former condition are found:

*thermas Herculis vi terrae motus eversas, porticus publicas vetustate corruptas, basilicam equestrem exercitatoriam iampridem a solo coeptam.*

III. A verb or verbal phrase expressing the idea of constructing or of rebuilding and restoring, or again of dedication or of supervision:

*aedificare, perficere, dare, de suo dare D · S · D, facere faciundum curare et probare, adornare or ornare, a solo facere A · S · F, sternere, ponere, reficere, restituere, reparare, reficiundum coerare, ad pristinam faciē reducere.*

IV. Various phrases expressing: place,

*loco privato, accepto loco a re publica, loco dato publice decreto decurionum L · D · PVB · D · D;*

time, see page 229; measure, (murum) *pedes C C*; expense or means of providing for the same,

*de pecunia sua factum dedit D · P · S · F · D, pecunia publica P · P, sumptu proprio, parvo sumptu, amplius ex sestertium (tot) m(ilibus) n(umnum) de sua pecunia;*

reasons for building the structure,

*ob honorem aedilitatis, ob honorem flaminis, quod eos e lege in ludis aut in monumentis consumere oportuit, ex pagi decreto, de decurionum sententia D · D · S, de senatus sententia D · S · S, de vici sententia faciundum curarunt idemque probarunt D · V · S · F · C · I · Q · P, senatus consulto S · C;*

supervision of those in authority,

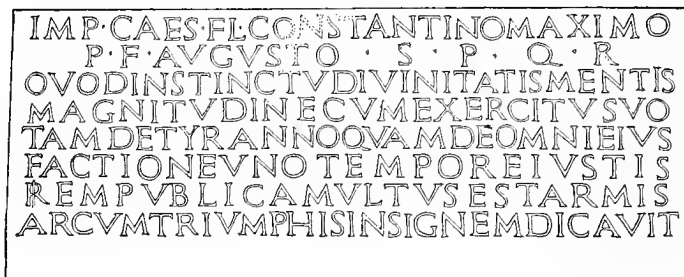

*curantibus aedilibus, curante ordine splendidissimo, curante et dedicante (illo), sub cura, per (illum).*

The architect's name is given in rare instances.

When the structure is dedicated to some divinity, as with temples, the inscription is strictly dedicatory, and is introduced by the name of the divinity in the dative case. See *tituli sacri*.

These *tituli operum publicorum* also serve the purpose of honorary inscriptions, and assume the form of such, being introduced by the name of the person honored in the dative case, or by phrases

expressing the idea of honorary dedication, thus explaining the motive for the construction of the building, e.g. *in honorem domus divinae* IN · H · D · D, *pro salute imperatoris Caesaris* PRO · SAL · IMP · CAES, *pro magnificentia saeculi dominorum nostrorum Augustorum duorum* — DD · NN · AVGG, *aureo saeculo dominorum nostrorum trium* — DDD · NNN.

Inscription on the Arch of Constantine, Rome. Date, 315 A.D.

Hübner's *Exempla*, No. 702. See page 163.

The various forms of *tituli operum publicorum* may be represented thus:

<i>ille</i>	<i>in honorem illius</i> <sup>1</sup>	<i>pro salute Imp. Caes.</i> <sup>1</sup>
<i>curiam faciendam</i>	<i>ille</i>	<i>aedificium illud</i>
<i>de sua pecunia</i>	<i>aedificium vetustate corruptum</i>	<i>ille</i>
<i>coeravit</i>	<i>refecit</i>	<i>ob honorem illum</i>
	<i>dedicante illo</i>	<i>sua pecunia fecit</i>
	<i>aedificium illud</i> <sup>1</sup>	<i>idemque dedicavit</i>
	<i>refectum (est)</i>	
	<i>per illum</i>	
	<i>cura illius</i>	

When the passive form is used the verb *sum* is understood, and agency is denoted by *per* with the accusative.

## MILESTONES AND BOUNDARY STONES

*Miliaria et Cippi Terminales*

Of the inscriptions appearing on public works, those found on the cylindrical or cubical milestones (*miliaria*) of the Roman *viae*, and on the boundary stones (*cippi terminales*) of the *agrimensores* deserve special mention, inasmuch as they contain names of places, records of distances, measurements, and boundary lines, which are valuable in the study of the geography and topography of both Rome and of her provinces, in addition to the ordinary information of other *tituli operum publicorum*.

*Miliaria*

*Miliaria* of republican days, which are rare, compared with the great number belonging to the imperial period, regularly contain inscriptions which are of simple form, consisting of the name of the founder of the road and a number indicating distance.

*Columna Miliaria* of P. Popilius Laenas, found near Hadria, on the Po. Date, 622/182.

P. Popilius C. f. | cos. | LXXXI

C. I. L. I. 550 = V. 8007. This is a stone column four feet high and two feet broad, narrowing toward the base for insertion in the ground. Mommsen considers it the oldest form of stone *miliaria*. The numerals indicate the *milia passuum* from Ariminum.

The other and more famous *miliarium Popilianum* erected by the same man, P. Popilius Laenas, consul 622/132, is more than a mere milestone, and serves the purpose of an *elogium*.

C. I. L. I. 551 = X. 6950. Found near Polla, in Lucania, where Forum Popilii was situated.

Inscriptions on milestones vary greatly in form, but admit of the following classification:

I. The first class is marked by the nominative case of names and titles: in time of the Republic, of magistrates, and in the imperial period, of the emperors.

a. These, like ordinary *tituli operum publicorum*, may be followed by a verb indicating the making or restoring of the road (*fecit, poni iussit, muniendam curavit, miliaria restituit*), accompanied at times by an object (*viam* or *iter*), modified by some phrase referring to the previous condition of the road or the obstacles met in building.

Numerals denoting distances follow with or without M · P (*milia passuum*).

b. The names and titles in the nominative case may be followed simply by the numeral, with or without M · P, or also by the name of a *legatus* in the nominative case and a verb (*e.g. fecit*).

II. The second class is marked by the dative case of the name of the emperor or magistrate, and resembles honorary inscriptions.

This may be followed simply by the numeral, or also by the designation, in the nominative case, of the official or official body making the road or supervising the same, together with a verb; or the nominative case and the verb may be replaced by *per* and the accusative of the name, or by the ablative absolute.

III. The third class shows the name of the emperor in the ablative case, serving thus to indicate the date. Such inscriptions are common in Africa but rare elsewhere. The name in the ablative case may be followed simply by the numeral, with or without M · P, or again by the name, in the nominative case, of the official making the road or supervising the same, with a verb, or this may be replaced by the name of the official in the ablative case.

The numerals that accompany any of the above-mentioned classes appear as a rule at the close of the inscription with or without M · P. Inscriptions of certain roads of Italy and Sardinia show numbers at the beginning, while in others of Italy the numerals occur both at beginning and end, the former indicating the distance from a neighboring city, the latter denoting the distance from Rome. There may also appear a phrase indicating the starting

point, *i.e.* the preposition *a* with the ablative of the name of the place, and to this may be added the designation of the limit of distance in the accusative case preceded by *ad*.

*Miliarium* found between Haute-Valette and Gréolières, near Andon, Maritime Alps.  
Date 213-217.

C. I. L. XII. 5432. This inscription is restored from another *miliarium* of the same road, No. 5430.

### Boundary Stones

Boundary stones inscribed on the same general plan as the *miliaria* were used by the Romans to establish the dividing line between the *ager publicus* and *ager privatus*, to define the boundary between different communities, and to mark the course of the Tiber and the line of the Pomerium. Very old specimens of these *cippi terminales*

<sup>1</sup> For an account of Roman roads, see Bergier, *Histoire des Grands Chemins de l'Empire Romain*, II., p. 757; F. Berger, *Über die Heerstrassen des Röm. Reiches; II Die Meilensteine*, Berlin, 1883.

remain to-day, the earliest of which, dating before the second Punic war, give the names of certain officials (*quaesitores*) and a portion of a decree setting apart certain lands as sacred. Others, indicating the portioning out of the public lands (*ager publicus*) by Gaius Gracchus, contain the names of the *tresviri* in the nominative case followed by such expressions as *terminos restituendos ex s(enatus) c(onsulto)*, *terminos finisque ex s(enatus) c(onsulto) statui iussit inter (illos) et (illos)*. In the imperial period the names of the emperors appear in the genitive case with *iussu* or *ex auctoritate*, followed by the names of the officials in the nominative case, and some phrase, as *inter illos et illos terminavit*. The passive form also occurs, *fines positi inter (illos) et (illos) iussu*, etc.

Although inscriptions relating to aqueducts appear regularly on the structures themselves, others are found on the boundary stones which separated the public land assigned for the aqueduct from private property.<sup>1</sup> Such *cippi*, separated from each other by intervals of 240 feet, were set up, where the space to be left unoccupied was set off from private property, by Augustus, Tiberius, and Claudius.

*Cippi* of a similar kind also defined the *pratium* of a legion as distinguished from the domain of municipalities. *Terminus Augustalis dividit pratium leg. IIII et agrum Iuliobrig(ensem)*.

#### *Termini inter Privatum et Publicum*

These *cippi* indicate the transfer of private land to the public domain, and mark the boundary for the same. They contain the names of consuls, emperors, or *curatores locorum publicorum*, and the phrases *redemptum a privato publicavit* or *ex privato in publicum restituerunt*.

<sup>1</sup> The decree of the senate 743/11 is given by Frontinus, *Aquaed.* c. 127. *Circa fontes et fornices et muros utraque ex parte vacuos quinos denos pedes patere; et circa rivos qui sub terra essent et specus intra urbem et extra urbi contentientia aedificia utraque ex parte quinos pedes vacuos relinqui; ita ut neque monumentum in his locis neque aedificium post hoc tempus ponere neque conserere arbores liceret.*

*Termini Pomerii*<sup>1</sup>

The ideal boundary of the city, known as the Pomerium, was enlarged by the emperors Claudius and Vespasian. Inscriptions on the *cippi* that indicated this imaginary line gave the name of the emperor and his titles in the nominative case, followed by *auctis populi Romani finibus pomerium ampliavit terminavitque*. Under Hadrian the Pomerium was marked anew, and its limits were determined by the college of augurs. The inscription on one of these *cippi* shows *collegium augurum — auctore imperatore Caesare — Hadriano terminos pomerii restituendos curavit*.

*Termini Riparum Tiberis*<sup>2</sup>

These *cippi* determine the breadth and the direction of the banks of the river. Inscriptions of the republican period contain the names of consuls or censors in the nominative case, followed by *ex s(enatus) c(onsulto) terminaverunt*. In the imperial period the name of the emperor, accompanied by titles, becomes the subject of the verb. These inscriptions are accompanied by phrases expressing the distance to the next stone: *r(ecto) r(igore) prox(imus) cipp(us) p(edes) XX*, or *r(ecto) r(igore) ex proximo cipp(o) ped(es) XLS*.

At times the name of the emperor depends upon *ex auctoritate*, a phrase which first appears under Claudius, and is followed by the name of the *curator alvei et riparum Tiberis* in the nominative case, subject of the verb *terminavit* or *restituit*.

## INSCRIPTIONS ON MOVABLE OBJECTS OF GENERAL USE

## INSTRUMENTUM

great variety and shape, belonging alike to public and private life. The most important of these may be classified as follows: I. Articles made of Metal — 1) Weights and Measures, 2) Tesserae, 3) Armor and Missiles, 4) Lead Water Pipes, 5) Vessels and Articles of Bronze, Silver, and Gold, 6) Stamps. II. Products of Mines and Quarries. III. Tiles and Bricks. IV. Vessels of Clay.

## WEIGHTS AND MEASURES

*Pondera et Mensurae.*

By far the largest number of weights and measures are simply marked with numbers and letters indicating their size and equivalents. Others are supplied with brief inscriptions, which refer to the authority giving them validity, e.g. *ex auctoritate Iunii Rustici praefecti urbi*. Others contain the date, standard of value, and the name of the place where the weights were tested. Thus the temple of Castor is shown by inscriptions to have been an office for the verification of weights and measures; cf. *exactum ad Castoris*. Weights were made of stone, lead, or bronze, and the inscriptions are either in relief, or cut into the surface, or inserted in the material with letters of gold or silver.<sup>1</sup>

## TESSERAE

The term *tesserae*, confined, when strictly used, to cubes of ivory or bone, is generally applicable to all such small articles of whatever shape or material which served among the Romans as tokens or vouchers. Among the various kinds of *tesserae* the following are of the greatest importance and interest.

*Tesserae Frumentariae.*

These were tokens distributed among the poorer people of Rome, by the surrender or exhibition of which they obtained corn. Very few of these remain, unless we may class with them the *tesserae nummariae* coins or counters of lead, of which fifty are in existence,

<sup>1</sup> *Iscrizioni Ponderarie*, in *Annali dell' Ist.*, 1881, p. 185 ff., and *Bull. Com.*, 1884, p. 61 ff.

according to Benndorf.<sup>1</sup> The types of the latter represent some attribute of Annona, e.g. the *modius*, or ears of corn. On some of these *tesserae* there are found inscriptions indicating the time and place of distribution.

*Tesserae Theatrales or Lusoriae.*

Circular *tesserae* of ivory, bone, or lead, used as tickets of admission to the theatres, amphitheatres, or circus, have been preserved for us in considerable numbers. They contain inscriptions consisting of Greek names of divinities or poets, and two numbers, seldom exceeding XV, one in Latin and one in Greek, corresponding to each other, indicating the seat assigned in the *cavea*. There are also seen on these *tesserae* heads of divinities, representations of buildings, or other devices applicable to the character of the spectacle, e.g. the head of Apollo for *ludi musici*, of Castor for *ludi equestres*.<sup>2</sup> Other *tesserae theatrales*, made of metal and similar to coin, contain on one face representations of the emperor, or some prominent member of the imperial family, and on the other a number rarely exceeding XVI. Sections of the *cavea* were named after members of the emperor's family, and ornamented with their busts or statues. The number on the *tessera* evidently indicated a seat in one of these sections.<sup>3</sup>

These *tesserae*, which are shown in great numbers by Blanchet, are regarded by Hülsen as *tesserae lusoriae*, i.e. they were used in games of chance as played on the *tabulae lusoriae*, diagrams for games found on the floor and steps of the Basilica Iulia (*Bullett. dell' Ist.*, 1896, p. 227).

*Tesserae Hospitalae.*

Among the Romans, as among the Greeks, much importance was attached to the tie which hospitality established between an entertainer and his guest. This relationship was emphasized and formally recognized by the interchange of tokens which certified to the existence of such a tie. We find references in Plautus to such *tesserae*<sup>1</sup> of *hospitium privatum*, and two or three specimens are in existence to-day. A similar relationship, however, was often established between two communities, *hospitium publicum*, or between a community and a private person, as when a distinguished man became the patron of a city. Such compacts were recorded on tablets of bronze (*tabulae patronatus*<sup>2</sup>) arranged so as to be placed in public or in the *atrium* of a house. These, when in small form, were equivalent to *tesserae hospitalae*, e.g. the *tessera Fundana*<sup>3</sup> in the shape of a fish could be carried from place to place.

*Tesserae Gladiatoriae.*

The most interesting of the *tesserae* which have remained to us are those known as *tesserae gladiatoriae* (termed *tesserae consulares*, C. I. L. I., p. 195). These are oblong blocks of ivory or bone, pro-

vided with a handle or hole for suspension or carrying, and inscribed upon the four long faces. The brief inscription found thereon gives, first, the name of a person, generally of a slave or a freedman, in the nominative case; second, the name of his patron or trainer in the genitive case; third, the abbreviation SP or SPE, or the word SPECTAVIT, and the date in days of the month; fourth, the names of the consuls of the year.

The uncertainty as to the exact use of these *tesserae* has made a satisfactory explanation of the abbreviation SP or SPE very difficult. It has generally been regarded as standing for *spectatus*, *i.e.* tested in public and approved because of victory, an explanation consistent with the inscription on the Tessera of Arles,

ANCHIAL · SIRT I · L · S

*C. I. L.* XII. 5695.

as well as with the well-known line of Horace, *Epistulae*, I. 1. 2, *spectatum satis et donatum rude*. Other *tesserae*, however, have been discovered which contain the word *spectavit*, with which the ordinary explanation of SP or SPE = *spectatus* is inconsistent.<sup>1</sup>

Mommsen<sup>2</sup> has interpreted SPECTAT · NVM of the Tessera of Arles as *spectat(or) num(erator)*, claiming that the gladiator, having graduated from the arena to the *cavea*, has the privilege of viewing contests as an authorized critic, even though he himself must still participate in them.

Again, SP has been explained as *sp(ectavit) (populus)*, and the date as denoting when the people first beheld the gladiator who is now no longer a *tiro*.<sup>3</sup> Some have regarded *spectavit* as equivalent to *spectatus est*;<sup>4</sup> he has made his *spectatio*, and hence is *spectatus*,

*i.e.* an approved gladiator. It has also been said that from *spectavit gladiatorem* in the first sense and with emphasis on the second word arose the expression *gladiator spectavit* with the second meaning.

#### *Tesserae Conviviales.*

A few counters have been found which probably served as tickets of admission to important dinners and banquets. They are virtually tickets to meals such as were given by the emperor to the people, or by a *collegium* to its members, who were thus identified. They contain numbers which probably indicated the place reserved for the holder. We learn from the inscriptions<sup>1</sup> that at banquets *tesserae* were scrambled for, which served as vouchers for gifts of money and clothing. These were probably the same as *sortes conviviales* or *sparsiones*.

#### ARMOR AND MISSILES

Scattered and rare specimens of Roman arms contain inscriptions which indicate the owner, and the legion and cohort to which he belonged. It is possible that from the time of Augustus it was required that the pieces of armor should thus be marked. Hübner, in support of this theory, cites the shield buckle found at the mouth of the Tyne, England,<sup>2</sup> which is ornamented with various designs and inscribed in *litterae punctatae* thus;

LEG · VIII · AVG and O · IVL · MAGNI · IVNI · DVBITATI

*Leg(ionis) VIII Aug(ustae); c(enturiae) Iul(ii) Magni; Iunii Dubitati*

also the sword of Tiberius found at Mainz, now in the British Museum.<sup>3</sup>

Perhaps there should also be classed with these inscriptions those found on some leaden *bullae*, the purpose of which it is difficult to determine. They may have been a kind of *tesserae* carried upon the person after enrollment, and serving as a countersign. They have been found in considerable numbers in Great Britain.<sup>4</sup>

*Lead Bullets (Glandes Plumbeae).*

These lead sling-shots used by slingers (*funditores*) in the Roman army are oval in form with points at both ends. They have been found in large numbers, many of which are, however, undoubtedly spurious, inasmuch as it is known that they were extensively manufactured in more recent times for the purpose of deceiving scholars.<sup>1</sup> The Romans, imitating the Greeks in their use, imitated them also in placing upon them brief inscriptions.

*Itali.* — *T. Laf(renius) pr(aetor).* C. I. L. IX. 6086. 1.

The inscriptions of the greatest number of these *glandes* are in raised letters, evidently made in the clay mould which was marked when wet by a *graphium* or other sharp instrument.

Zangemeister, who has treated of these missiles very completely in *Ephem. Ep.*, vol. VI., classifies the inscriptions found upon them as follows:

Names indicating the people or state making war, e.g. *Itali*.

- “ “ the official ordering their manufacture, e.g. *L. Piso L. f. cos.*
- “ “ the legion, e.g. *Leg. XI.*
- “ “ the *funditores*, e.g. *Firmani*.

*Lead Water Pipes*<sup>1</sup> (*Fistulae Plumbeae Aquariae*).

Information obtained from inscriptions found on lead water pipes has been most useful in determining the location and ownership of buildings, and in bringing to light many details bearing upon the water service in Rome. The method of making these inscriptions was to cut raised letters on wooden stamps and to press these into the sand or clay of the mould, which in this case was a flat surface upon which the lead plates out of which the pipes were made were cast. The inscription thus produced would be in raised letters. These inscriptions range in date from the time of Augustus to the close of the third century. The earliest show merely the names of the emperors, while those of the second century regularly contain the name of the emperor, the name of a *procurator*, or of other officials such as *tribuni aquarum*, the name of the *officinator* (either in the nominative or in the genitive with *ex officina*), under whose general direction the pipe was made, or the name of the slave, who has made the pipe, in the nominative case followed by *fecit*. Water pipes of the municipal towns give the name of the municipality and the name of the public slave (*plumbarius* or *fistulator*) who had looked after the manufacture of the pipe. In particular cases the names of the owners of the houses to which the water was conducted are given, and in others the capacity of the pipe is indicated.

*Vessels and Articles of Bronze, Silver, and Gold.*

This class includes inscriptions on bronze vases of different sizes and kinds, on cups and bowls, on mirrors, on strigils, on articles of jewelry such as *fibulae* and rings. The inscriptions which have been either engraved, scratched, or stamped upon the surface vary somewhat with the character of the article, but the elements most commonly found are the names of the owner or maker, sentences of dedication to a divinity, or of presentation to some individual, or, again, exclamatory phrases expressing a wish.

Inscriptions on metal utensils of ordinary use are very well illustrated by that on the bronze *patera* shown on page 57. Of other articles containing inscriptions the following are of special interest:

1. The toilet cases and mirrors of Praeneste, which are ornamented with drawings illustrative of Greek myths, to which are attached the names of divinities or heroes. Only two or three of these contain the name of the maker or owner. The most famous is the Cista Ficoroniana, which contains the well-known inscription:

DINDIA · MACONIA · FIVEAI · DEDIT  
NOVIOS · PLAVTIOS · MED · ROMAI · FECID

C. I. L. XIV. 4112.

2. The four silver goblets<sup>1</sup> found at the Aquae Apollinares, the warm springs of Vicarello. These contain an itinerary from Gades to Rome, and were probably used by travelers visiting the springs. Of a similar character, but more brief, is the *itinerarium* inscribed on a bronze vase<sup>2</sup> which was found in England, where it is still preserved in Alnwick Castle.

*Jewelry.*

Some of the articles of jewelry which have been preserved contain brief inscriptions giving either the name of the owner, the weight, or phrases addressed to the owner. Cagnat refers to a bracelet of gold containing the inscription *Corelia Ny(m)p(h)e*; *auru(m)*,

<sup>1</sup> C. I. L. XI., p. 496 sq.

<sup>2</sup> C. I. L. VII. 1291; Hübner's *Exempla*, No. 911.

*p(ondo) XX.*<sup>1</sup>, also to a *fibula* of silver with the words *utere felix*,<sup>2</sup> and to a *fibula* of gold with the words *Costanti vivas*.

The gold *fibula* from Praeneste contains probably the oldest Latin inscription extant, written in retrograde order.

*Fibula Praenestina.*

*Manios med fhefhaked Numasioi. C. I. L. XIV. 4123.*

The retrograde order, the *fh* for *f*, the form *fhefhaked* for *fecit*, and the dative *Numasioi* for *Numerio* indicate that this is a very early inscription.<sup>3</sup>

Rings, as well as the gems which they held, were often inscribed with names in the genitive or nominative case, or with initials of the owner's name, or, in very rare instances, the name of the maker. Some contain exclamatory phrases of a benevolent or erotic nature.

Thus in a ring found at Este (Ateste), the inscription on the stone, existing now in a copy, was

*Stamps (Signacula).*

Seals or stamps with which stamped inscriptions were produced were made chiefly of bronze. They appear in various shapes, as of a fish, a heart, a circle, or a square, and contain letters in relief arranged in retrograde order. The inscription consists of the name, in the genitive or nominative case, of the owner of the article stamped, followed in some cases by the name of the slave engaged in the work, in the genitive or nominative case. It is difficult to determine the exact use of these *signacula*, for none have been found that match the impressions on the stamped articles. Without doubt, they were employed for a variety of purposes. Mommsen,<sup>1</sup> quoting Pliny, *N. H.* XXXIII. 1, 26, *nunc cibi quoque ac potus anulo vindicantur a rapina*, has agreed, from the evidence of the stamped bread and its corresponding stamp found at Pompeii, that certain of these *signacula* were used to mark articles of consumption. The following was found at Pompeii:

*Oculists' Stamps.*

A very curious and interesting class of *signacula* are those made of stone, which were employed by oculists for stamping the medicaments, salve, etc., for treatment of the eyes. They are small rectangular tablets containing inscriptions on the four sides cut into the material, usually in two lines, rarely in one, giving the name, in the genitive case, of the physician who made or sold the preparation, the name of the remedy itself, the designation of the disease, in the accusative case preceded by the preposition *ad*, and, finally, the method of applying the remedy.<sup>1</sup>

## PRODUCTS OF QUARRIES AND MINES

1. *Inscriptiones Marmorum Massis Incisae.*

Inscriptions of considerable value have been found on blocks of marble which have been discovered in the quarries,<sup>1</sup> and at the Emporium in Rome, where they have been landed, but not used. Such inscriptions were made for business purposes, so that no mistake or fraud might take place in the transportation or setting up of the stone.<sup>2</sup> These inscriptions contain the following elements:

1. Numerals indicating the number of the block taken from the quarry, *e.g. loco CXLVI*, or the number shipped to Rome, *e.g. N · LXV*, reckoned from the beginning of the year.

2. The name of the quarry or the section of the quarry from which the stone was taken, *off(icina) Pa(piri) n. LXXXVI*; *locus n. II*.

3. The names of the consuls indicating the year in which the stone was quarried.

4. The names of officials, *e.g. procuratores montium*, acting as superintendents, and others; also names of slaves having the charge of quarries.

5. The names, in the genitive case, of the emperors, placed either at the beginning or end of the inscription, indicating the imperial ownership of the quarries.

2. *Massae Argenti, Aeris, Plumbi.*

Of a similar character to those just mentioned are the inscriptions stamped or cast upon pigs of silver, bronze, and lead. Some contain the name of the emperor in the genitive or ablative case, also the place from which they were obtained, *e.g. Britan(nicis metallis)*; *Britannicum*, and more exactly the name of the people, *e.g. de Ceangi(s)*; *met(allorum) Lut(udensium?)*.

#### BRICKS AND TILES<sup>5</sup> (*Lateres et Tegulae*)

An abundant source of historical, geographical, and archeological knowledge has been found in the stamps (*sigilla*) which appear on bricks and tiles discovered in Rome, Italy, and the provinces, which were the product of the brick-kilns and potteries (*figlinae*) belonging to the emperor or members of his family, or to municipalities, or, finally, to private persons.

I. Stamped bricks, which can safely be assigned to the republican period, have not been found in Rome, but they have been discovered in Italy, at Veleia, dating before the middle of the first century B.C. These are given in *C. I. L.* I. 777 ff. They are dated, *i.e.* they contain the names of consuls, and show as well the name of the potter (*figulus*).

II. *Lateres* of the imperial period, found at Rome, are of great number and importance. They are fully described by H. Dressel in *C. I. L.* XV.

Stamps on bricks of the first three centuries of the Empire appear in several forms, being either rectangular, semicircular, round, or crescent shape, but with the greatest frequency in a form between the full circle and the crescent, made by cutting a very small circle out of a larger one.

Of these the rectangular stamps, with inscription in one line, and in large letters, may belong to the last century of the Republic, or,

at least, to the first century A.D. Those of two lines belong to the middle or latter part of the first century, while those of several lines may be assigned to the age of Trajan and Hadrian.

Semicircular or crescent shape stamps date, speaking in general terms, between the age of Claudius and the close of the first century.

Perfectly round stamps of one line belong to the same period as the crescent shaped, while those of two lines date in the latter part of the second and third centuries. The form midway between the circle and crescent appears to have come into use a little after the middle of the first century, and prevailed through the second and third. The modification in this form may be assigned to certain periods:

Stamps of this prevailing form have inscriptions frequently in two verses, arranged in concentric circles.

If the little circle is large enough, it determines the beginning and end of the outer and inner verses; but if it is small, the inner verse

is in a continuous circle, and the first letter of the second verse is above the last of the first. The words proceed regularly from left to right with few exceptions. In bricks of a later period no particular order is observed, and we may find both verses retrograde, or one retrograde and the other direct (*βουτροφηδόν*).

The letters are generally raised (*prominentes*), though those pressed into the surface (*cavae*) sometimes occur. The shape of the letters is such as would be made by a marking stamp with rectangular shaped furrow, and not wedge shaped as in cut inscriptions.

The marking stamps, *signacula*, in the opinion of Dressel were made of hard wood. To establish this theory he refers to the marks on the bricks, evidently made by the cracks in the wooden stamp.<sup>1</sup>

ornamental. At times the names of the owners of the estates or kilns were thus portrayed, as, for example, a wolf is represented on the bricks from the kiln of M. Rutilius Lupus, a *corona* on those of C. Julius Stephanus.

The inscriptions of the first century were brief, consisting frequently of only the name of the owner of the estate or pottery, or the name of the superintendent or potter, and rarely the name of the kiln or pottery (*figlina*). After the beginning of the second century such formulae as *opus doliare* (illius) and names of the estates or of the *figlinae*, also names of the consuls, are more commonly given.

One or more of the following elements may appear in these inscriptions:

1. The name of the owner of the estate whence the clay was obtained, or where the pottery was situated, or of the pottery itself.

*Asini Pollionis* (first century); *Ex praedis L. Mummi Rufi* (after first century).

2. The name of the superintendent (*offinator*).

*C. Cosconi* (first century); *Opus doliare L. Bruttidi Augustalis* or *L. Bruttidius Augustalis fecit*.

The name of the owner and that of the *offinator* or *figulus* (*servus domini*) may appear together thus: *Felicis Domiti Afri(servi)* or *Tegula C. Cosconi fig(uli) Asini Pollionis* (first century).

*Ex praedis Q. Servili Pudentis, sub cura Hedy(nis) servi, 133 A.D.*

*Opus doliare Aristi Thalli, ex praedis Plaetori Nepotis, 123 A.D.*

*Opus doliare Statae Primillae, ex figlinis Domitiae Lucillae.*

3. The name of the pottery, or brick kiln, or estate, as in the following:

*Amoeni duorum Domitiorum Lucani et Tulli, ex figlinis Caninianis* (first century).

*Ex figlinis Caepionianis Plotiae Isauricae, fornace Peculiaris servi* (after first century).

4. The names of the consuls, an element which does not appear on bricks from the City or Latium before 110 A.D., nor after 164 A.D.

5. Exclamatory expressions such as *valeat qui fecit*, particularly on bricks from the potteries of the *gens Domitia*.

Inscriptions of the first three centuries A.D. differ, in general, very slightly, although the name of the *figlinae* rarely appears in those of earlier date, and mention of the *negotiator* is not given until the close of the second century.

The following abbreviations are common in these inscriptions:

*Opus doliare* = O, OP · D, DO, DOL, DOLI, DOLIAR.

*Opus figlinum* (rare) = O · FG, FGL.

*Ex* or *de Praedis* = EX or DE · P, PR, PRAE or PRE, PRO, PRAED.

*Ex* or *de figlinis* = EX or DE · F, FI, FIG, FIGVL, FGL, FIGL, FIGLIN, FIGLINI.

*Ex officina* = EX · OF, OFIC.

III. There should also be mentioned here the bricks marked by legionary soldiers made to be used in building their quarters. These contain the name of the cohort, legion, or army.

#### *Vessels of Clay*<sup>1</sup> (*Dolia, Amphorae, Lucernae*).

A large portion of the section in *C. I. L.* entitled *Instrumentum* is assigned to inscriptions which appear on vessels made of clay, the product of Roman potteries. These vary from the large, sometimes huge, *dolia* and medium sized *amphorae* to the small *patellae* and *pelves* of household use. With these are to be classed also the lamps (*lucernae*), which are made of like material and by similar methods. The inscriptions which appear on these vessels consist mainly of names denoting the maker, merchant, or owner, in the nominative or genitive case. In some cases the verb *fecit*, FEC, FE, F, is found. The words *manu*, MAN, MA, M, *officina*, OF, OFF, or *figlina*, FIGVL, FIG, may precede or follow the name in the genitive case of the maker or merchant. These trademarks were made by pressing a stamp upon the clay of the vessel or upon that of the mould, producing letters below the surface (*cavae*) or in relief (*prominentes*). The location of the inscription on the vessel was either the neck or handle, sometimes the bowl or inner flanges of wide-open vases, but most frequently, and regularly so in the *lucernae*, upon the base.

<sup>1</sup> Schuermans, *Sigles Figulins*, Brussels, 1867; Froehner, *Inscriptiones Terrae Coctae Vasorum intra Alpes*, Tissam, *Tamesin repertae*, Göttingen, 1858.

The inscriptions which appear in relief involved with ornamentation were most commonly made in the mould. They show a variety of statements appropriate to the device of the ornamentation, sometimes of a dedicatory character, or, again, giving expression to good wishes.

Other methods of marking these clay vessels were employed, particularly in inscribing the *dolia* and *amphorae* of Pompeii and Herculaneum. Letters were cut in the clay before or after baking by means of a *graphium*, or painted in black, red, or white color, or marked by crayon. These inscriptions give the name of the maker or merchant in the nominative or genitive case, also the contents and measure of the *amphorae*. On the wine jars there were found the name of the wine, the names of the consuls of the year in which the wine was made, also the name of the maker or merchant.<sup>1</sup> Exclamatory expressions are also found; *vivas, valeas, semper gaude, reple me, bibe vivas multis annis.*

Archaic inscription made with a *stilus* on a black colored vase found at Ardea.

*Ego* (= *Ego*) *K(aeso)* *Anaios* (= *Annaeus*). · C. I. L. X. 8336.

Compare with this the inscription found on the Esquiline, *Eco C. Antonios*, Ann. dell' Ist., 1880, p. 301.

9. Hercolei | sacrom; | M. Minuci C. f. | dictator vovit.

*C. I. L.* I. 1503 = VI. 284. Inscribed on an altar found near Rome, now in the Capitoline Museum. On the right side of the stone there is inscribed

l. l. XXVI, which Ritschl interprets *legiones l et XXVI*. Wilmanns thinks it indicates the number of the gift in the temple as recorded in the register. Minucius was dictator 537/217 (*Livy XXII. 25*).

10. a) M. Claudius M. f. consol | Hinnad<sup>1</sup> cepit.

15. sei deo sei deivae sac. | C. Sextius C. f. Calvinus pr., | de senati sententia | restituit.

*C. I. L. I. 632.* Inscribed on an altar found on the Palatine hill. This may be C. Sextius Calvinus, opponent of Glauucia, praetor 654/100, but with more probability his son, of the time of Sulla. The altar may have belonged to the temple at the foot of the Palatine, near the temple of Vesta, built in honor of the voice of the god heard by Aius Locutius, who announced the coming of the Gauls (Livy, V. 50).

*C. I. L.* XII. 2012. Found at Vienne, existing in a copy. <sup>1</sup> *sub ascia dedicavit* (S · A · D) is generally understood to indicate a new tomb still in charge of the workmen. The object of the phrase or representation of the *ascia* was to indicate that the right of reopening the tomb without recourse to authority was retained. This is the opinion of Faccioliati. - C. I. L. VI. 10230. Inscribed in letters of the best period on a large marble slab found at Rome, where it still exists in the Palace of the Rondinini. Mommsen places this inscription in the Augustan age, not later, because of the orthography of *quom*, *meriteis*, *arduom*, not earlier, because of the use of *apices*, which not only mark the long vowels, but, placed between the letters, serve as punctuation marks. <sup>1</sup> Mommsen's comment is "*Haec quo pertineant, parum perspicitur, nisi quod, cum tempore praesenti scriptor utatur, agi videtur non de matris, sed de suo facto aliquo; puta libertis maternis quiddam eum erogasse, quod ipsorum contributionibus ut augetur desideret.*" <sup>2</sup> Rather *eaque — adhibita et fide — facta*. Mommsen understands thus, *cum in consilium adhibuisset memoriam patris et fidem suam*. <sup>3</sup> Supply *intellegitur*. <sup>4</sup> Mommsen suggests *virtutis laboris sapientiae periculorum* (id est *periculorum, quibus virtutem laborem sapientiam comprobavit*) *praecipuam aut certe nulli secundam memoriam sibi parans*.

- ☞ I. L. I. 29, 30 = VI. 1284-5. See page 232. Inscribed on a sarcophagus of peperino found at Rome in 1780, outside of the Porta Capena, on the Via Appia, now in the Vatican Museum. The name of the dead (a) is

*Antonia Cornelia Scipionis, ex ...*

painted in red coloring (*minium*) on the lid, while the *carmen* (*b*) is cut on the main part of the sarcophagus. L. Cornelius Cn. f. Scipio was consul 456/298, censor 464/290. Ritschl, *Opusc.* IV, p. 222, has shown that the *carmen* (*b*) is more recent than (*a*), and the inscription of the son, No. 60. The date is not later than 234 B.C. Another inscription which preceded this *carmen* has been almost entirely erased, only *C*[eso[r] remaining. The metre is Saturnian, with verses marked by transverse lines cut in the stone. <sup>1</sup> *Samnio*, ablative, according to Lachmann, Mommsen and Wilmanns, but see other ablative in *d*; or accusative, according to Ritschl, but note other endings in *us*. *Loucanam*, sc. *terram*. See Cic. *Tusc.* I. 7, 13; *Pro Arch.* 9, 22; *De Legg.* II. 2, 27. Liv. XXXVIII. 56; XL. 38. Pliny, *N. H.* XXXIII. 7, 122.

*C. I. L. I.* 32 = VI. 1287. See page 236. Inscribed on a slab of peperino, broken on the right side, found at Rome in 1614, now in the Barberini Palace. L. Cornelius L. Barbati f. consul 495/259, censor 496/258, took Corsica, destroyed Aleria, and triumphed over the Sardinians, Corsicans, Phoenicians (Zonar. VIII. 11; Flor. I. 18, 16). <sup>1</sup> *Romae* (Sirmond), *Romai* (Ritschl); *Romani* (Grotefend), *Romane* (Mommsen). <sup>2</sup> Ritschl. *metri gratia*, supplies *viro*(*n*) after *viro*. <sup>3</sup> Wölflin reads *filio*m for *filios*. <sup>4</sup> Ritschl adds *pugnandod*. Wölflin (*Revue de Philol.* 1890) considers no addition necessary. <sup>5</sup> Grotefend adds *lubenter*, Ritschl reads *meretod votam*, Wölflin objects to any addition. Ovid, *Fasti*, VI. 193, relates that a temple of the *Tempestates* was dedicated by a Scipio.

*C. I. L. I. 33 = VI. 1288.* See page 240. Inscribed on the front of a sarcophagus of peperino found in 1780, now in the Vatican Museum. P. Cornelius P. f. Scipio, *flamen Dialis*, who died when a young man, has not been identified with certainty. He is believed by some to have been the son of Africanus Maior, adoptive father of Africanus Minor, who is referred to in Cic. *Cato Maior*, 2, 53; *De Off.* I. 33, 121; *Brut.* 19, 77. Vell. I. 10. <sup>1</sup> *insigne* is neuter. <sup>2</sup> *Join tua omnia.* <sup>3</sup> Cf. the Greek γαῖα κἀλλίπρος ἐδέξατο, Cic. *De Legg.* II. 63. Mommsen places the close of his life between 550/204 and 590/154. The double consonants in *essent* and *terra*, point to the latter part of sixth century A.U.C., although note *gesistet*, *superases*, *licuiset*.

*C. I. L. I. 38 = VI. 1295.* Inscribed on three tablets of peperino found at Rome in 1782. The first of these is now lost; the others are in the Vatican Museum. Cn. Cornelius Scipio Hispanus, son of Cn. Cornelius Scipio Hispallus, cos. 578/176, was sent in 605/139 to receive the arms from the Carthaginians (Appian. *Lib.* 80), became praetor in 615/139 (Val. Max. I. 3. 3, where he is styled Hispallus). <sup>1</sup> On the stone after *progeniem* there is a line which Mommsen joined with the preceding letter and read *progenie mi = progeniem mihi*. Ritschl gives the above reading, *Opusc.* IV., p. 539.

64. L. Cornelius Cn. f. Cn. n. Scipio

C. I. L. I. 34, VI. 1289. See page 235. Inscribed on a tablet of peperino from a sarcophagus found at Rome, now in the Vatican Museum. Visconti, Mommsen, and Ritschl have conjectured that this Scipio was the grandson of Calvus, consul, 532/222 (Livy, XXI. 32), son of Hispanus, who died in the consulship 578/176 (Livy, XLI. 20), and the younger brother of Cn. Cornelius Scipio Hispanus (No. 63). <sup>1</sup> *honore*, accusative according to Lachmann, Ritschl, Buecheler; dative according to others. <sup>2</sup> Mommsen reads *loceis = sepulcro*, Ritschl, *Diteist*, Lachmann *leto est*. <sup>3</sup> Visconti interprets *honorem quem non acceperit*; Ritschl, *cur minus honore sit mandatus*. Lachmann (*Lucr.*, p. 245) expresses it thus, *honore quei minus sit mactus*, on the ground that the stone cutter has repeated *mandatus* instead of inscribing *mactus*.

### Iambic Senarii

C. I. L. I. 1007 = VI. 15346. Found at Rome, existing in copy. This *carmen* belongs probably to the Gracchan period. <sup>1</sup> The writer has avoided *altrum*. Buecheler's (*Anthologia Latina, Car. Ep.* 52) comment is *par huic exemplum haud facile inveneris apud antiquos, nam differunt talia — ex alio terram status excipit alter* (Lucret. V. 832, IV. 686).

 Dole meator, quisquis hoc legis carmen,  
<sup>2</sup>Et ut meretur anima, lacrimam accomoda.

*C. I. L. X. 1275.* Found at Nola, preserved in copy. Above the verse is the inscription, *M. St . . . o M. f. Pal(atina) P . . . co Ffio Sereno Rutilio Caesiano II viro auguri, vixit ann. XXXI mensib. XI diebus XVIII* — written below, *ipsius pater miserrimus*. The inscription dates no earlier than the time of Hadrian. <sup>1</sup>Others read *iuvenis* and *interis-sent*. <sup>2</sup>The last line is iambic trimeter. Buecheler suggests that *lacrimam adsperge* would make a choliambus.

*C. I. L.* I<sup>2</sup> xxiv., xxv., xxvi.; *d.*, vol. VI. 1303. Inscribed on blocks of travertine found in the Forum Romanum in 1546, but destroyed in the latter part of the sixteenth century, hence existing only in a copy. These inscriptions adorned the Arch of Fabius built by Q. Fabius Maximus Allobrogicus, consul 633/121, and restored by Q. Fabius Maximus, curule aedile about 698/56. This restitution is referred to by Cicero in *Oratio in Vatinius* 11. 28: *Nihil Maximus fecit alienum aut sua virtute aut illis clarissimis Paullis, Maximis, Africanis, quorum gloriam huius virtute renovatum non modo speramus, verum etiam iam videmus.* Paullus, cos. 572/182 and 586/168, was the father of Q. Fabius Maximus Aemilianus, cos. 609/145, and ancestor of Maximus, who restored the arch. From his being saluted *imperator* three times, three triumphs are wrongly assigned to him instead of two, as here and in Velleius I. 9. Scipio Africanus Minor, cos. 607/147 and 620/134, was the son of Paullus, and brother of Fabius Maximus Aemilianus.

*C. I. L. I.*<sup>3</sup> XL. Inscribed on travertine, found behind the Basilica of Constantine, now in the Palazzo dei Conservatori. It refers to M. Valerius Messalla, *consul* 693/61, *quinquevir agris dandis adsignandis iudicandis* 695/59 (Cic. *De Prov. Cons.* 17, 41; *Ad. Att.* 2, 7, 4); *interrex* 699/55, 701/53, 702/52; *censor* 699/55-700/54. On the same stone appears . . . . . M. n. | . . . inus, referring probably to his son, M. Valerius Messalla Corvinus, *consul* 723/31.

5. C. Octavius C. f. C. n. C. pr[*on.*] | pater Augusti, | tr. mil. bis., q., aed. pl. cum | C. Toranio, | iudex quaestionum, | pr., pro eos, imperator appellatus | ex provincia Macedonia.

*C. I. L. I.*<sup>2</sup> XXIX. Inscribed on a marble tablet found at Rome, existing in a copy. The following remnant of another inscription given with the above may perhaps be assigned to C. Julius Caesar, father of the Dictator, . . . . . Caesar | . . . . . i | . . . . . ic. q. pr. | . . . . . cos. in Asia. C. Octavius, father of Augustus, was praetor in 693/61; then obtained Macedonia as his province. On his return from his province he died (Suet. *Aug.* 4). This and the two following inscriptions Momm- sen believes to have belonged to a *sacrarium* of the *domus Augustae*, where the *imagines* of the imperial and allied families were exhibited.

6. C. Iulius L. f. Caesar | Strabo, | aed. cur., tr. mil. bis, X vir agr. dand. adtr. iud., pontif.

*C. I. L. I.<sup>2</sup> XXVII.* Found at Rome, where it is said by writers of the fifteenth and sixteenth centuries to have been inscribed on a wall near the Forum Augusti, existing in copy. Strabo was curule aedile in 664/90. He is often mentioned by Cicero. Cf. Teuffel-Schwabe-Warr, *Hist. of Roman Literature*, 153, 3.

7. M. Livius M. f. C. n. Drusus pontifex, tr. mil., X vir stlit. iudic., tr. pl., X vir a. d. a. lege sua et eodem anno V vir a. d. a. lege Saufe[i]a, in magistratu occisus est.

*C. I. L. I.<sup>2</sup> XXX.* Found at Rome, existing in a copy of the sixteenth century. This refers to the famous tribune of the plebs of 663/91, in regard to whose laws see Liv. *Ep.* 71; Appian, *B. C. I.* 35; *De Viris Illustribus*, c. 66.

*C. I. L. I.<sup>2</sup> X = XI. 1827.* Inscribed on a small marble base found at Arezzo (Arretium), now in the museum at Florence. Fragments containing a few letters of the original of the above inscription were found in the Forum Augusti at Rome in 1889. They are —a oppi, —m et Tus—, —ri cu—, —t aq—, —ae fe—. Cf. Lanciani, *Bull. Comun.* 1889, p. 77. Appius Claudius was censor in 442/312 and consul 447/307 and 458/296. Cf. Livy, X. 22; Cic. *Brut.* 14, 55.

C. I. L. I.,<sup>2</sup> p. 195, and XI. 1831. This inscription, found at Arezzo (Arretium), exists in a copy made in the fourteenth century. Part of the original inscription which once stood in the *forum Augusti* at Rome exists on small fragments of marble, one of which was found in the fifteenth century and is now at Naples (VI. 1315), the others were discovered in 1876 in the Villa Aldobrandini (*Ephem. Ep.* IV. 1817). The portions of the inscription which appear on the fragments found at Rome are indicated by the lines. The readings of the copy from Arretium differ from those given above, as follows: <sup>1</sup> *aug.*, <sup>2</sup> *tr. militum.*, <sup>3</sup> *Iugurta*, <sup>4</sup> *Numidiae*, <sup>5</sup> *cos.*, <sup>6</sup> *absens*, <sup>7</sup> *fudit*, <sup>8</sup> *iis*, <sup>9</sup> *pub.*, <sup>10</sup> *qui*. C. Marius was consul seven times, 647/107; 650/104-654/100; 668/86, praetor 639/115 (Cic. *De Off.* 3, 20, 19), *tribunus plebis* 635/119 (Plutarch, *Mar.* 4), *tribunus militum a populo* (Sall. *Jug.* 63), *augur* (Cic. *Ad Brut.* 1, 5, 3). For the *vestis triumphalis* cf. Liv. *Ep.* 67, *Marius triumphali veste in senatum venit, quod nemo ante eum fecerat*; Plut. *Mar.* 12.

C. I. L. I.,<sup>2</sup> p. 202. Inscribed in letters of the first century on a little column of peperino found on the Palatine, now in the Baths of Diocletian. This is an inscription of the imperial period affecting archaic forms. <sup>1</sup> Mommsen believes that *Fertor Resius* was intended. He is mentioned as the inventor of the *ius fetiale* in *De Viris Illustribus* 5, and in *De Praenominibus*, § 1.

15. M. Cicero, an, LXVIII.  
*C. I. L. I.*,<sup>2</sup> p. 202 = VI. 1325. Inscribed under a marble bust which is preserved at Madrid, Spain. See Bernoulli, *Röm. Ikonographie*, I., p. 135: This inscription dates about the time of Cicero, who was born Jan. 3, 648/106, and died Dec. 7, 711/43.

C. I. L. VI. 1377. Found at Rome in the Forum of Trajan, existing only in copy. Claudius Fronto, according to Lucian, was mentioned in some history of the Parthian war of L. Verus. Another inscription found in Dacia, referring to him, is given in C. I. L. III. 1457. <sup>1</sup> He was *consul suffectus* in 166, or somewhat earlier. <sup>2</sup> There appears to be some confusion and discrepancy here. Mommsen has suggested as the reading on the stone, *leg. Aug. pr. pr. provinciarum Daciarum trium, prov. Daciae Maluensis, prov. Daciae Porolissensis, prov. Daciae Apulesis*. For this triple division of the province of Dacia see Marquardt, *Staatsv.* I.,<sup>2</sup> p. 309. <sup>3</sup> He appears to have been *legatus* of Dacia and Moesia Superior in 169 and 170. <sup>4</sup> The number of the *dona militaria* indicates that Fronto was *consularis* when he received them. <sup>5</sup> See Momm. *Staatsr.* II.,<sup>3</sup> p. 850, note 3. <sup>6</sup> This *legatio* was assigned *extra ordinem*. See Momm. *Staatsr.* II.,<sup>3</sup> p. 853. <sup>7</sup> Anthemusia is a district of Mesopotamia. <sup>8</sup> Borghesi declares that Fronto did not die before 170, but was killed in battle while he was in charge of the provinces of Dacia and Moesia.

*C. I. L.* VI. 1710. Inscribed on a marble tablet found at Rome, now in the museum of Naples. <sup>1</sup> *v(iri) c(larissimi)*. <sup>2</sup> 395-408. In *elogia* and honorary inscriptions of the later period there frequently appears above the inscriptions, or in some prominent position on the pedestal, the name of the person to whom the inscription refers. This may be simply a *cognomen*, or more rarely the fuller form of the name as here, and may be in the genitive or dative case, so here the first words are separate from the remainder of the inscription. The *cognomen*, if thus placed aside, is repeated in some cases or omitted in the repetition of the name which follows.

## TITULI HONORARI

## 18. Italicei | L. Cornelium Sc[ip]i[one]m | honoris caussa.

*C. I. L.* X. 7459. Found near Castel Tusa in the ruins of old Halaesa, existing in a copy. Mommsen believes this is L. Cornelius Scipio, afterwards termed Asiagenus, who was praetor in Sicily in 561/193. Livy, XXXIV. 54, 55; Cic. *De Orat.* II. 69, 280. This is then the oldest honorary inscription attached to a statue. It is in the Greek form. See page 243.

19. L. Manlius L. f. | Acidinus<sup>1</sup> triu. vir<sup>2</sup> | Aquileiae coloniae | deducundae.

*C. I. L.* I. 538 = V. 873. Inscribed on a pedestal found at Padua, whither it had been carried from Aquileia, existing in two parts, of which the upper is now in the museum at Cattajo, near Padua, the lower at Vicenza. <sup>1</sup> The name appears in the *Fasti*, L. Manlius L. f. Acidinus Fulvianus (cos. 575/179). <sup>2</sup> In the year 573/181, together with P. Cornelius Scipio Nasica, and C. Flaminius (Livy, XL. 34, cf. XXXIX. 55). The inscription probably dates not long after the founding of the colony, judging from the form of the name and the nom. case of the name of the one honored.

## 20. C. Iulius Caesar pontif.

*C. I. L.* V. 4305. Inscribed on the epistylum of a column found at Brescia (Brixia), where it still exists, though broken into five pieces. As there is no trace of the abbreviation *Max.*, Mommsen believes that Augustus is here referred to, and that the inscription, dating 710/44, was made immediately after his adoption by the dictator, for he was appointed *pontifex* in 706/48, after the battle of Pharsalia.

21. L. Cornelio L. f. | Sullae Felici | dictatori, | vicus laci Fund.<sup>1</sup>  
*C. I. L. I. 584 = VI. 1297.* Inscribed on a pedestal of travertine found at Rome on the Quirinal Hill, now in the museum at Naples. Coins and various writers inform us that an equestrian statue was erected in front of the rostra to Sulla the dictator in 674/80 or 675/79. Appian, *B. C. I. 97*; Cic. *Phil. IX. 6. 13*; Vell. *II. 61*; Suet. *Caes. 75.* <sup>q. uorne felix</sup> *vicus laci Fund(anii).* Another inscription (Henzen, 7272) refers to this lacus, *M. Claudius Priscus redemptor a laco Fundani.*
22. Cn. Pompeio Cn. f. | Magno | imper. iter.  
*C. I. L. XI. 2104.* Inscribed on a pedestal of travertine found at Chiusi (Clusium), where it exists to-day in the museum.
23. M. Acilio M. f. Canino | q. urb. | negotiatores ex area | Saturni.  
*C. I. L. XIV. 153.* Inscribed on a marble pedestal found at Ostia, now in the Vatican Museum. Mommsen has set the date as earlier than 726/28, in which year the *cura aerarii Saturni* was taken away from the quaestors. <sup>See O. Palmieri</sup>
24. P. Silio leg. pro | pr. patrono, | colonei.  
*C. I. L. II. 3414.* Found at Carthægena, Spain, where it is still preserved in the public buildings. The reference is to P. Silius Nerva, consul 734/20. Cf. Velleius, *II. 90.* The brevity of the inscription, *leg. pro pr.*, standing for *leg. Aug. pro pr.*, the form of the letters, and the mention of the *coloni*, point to a date near that of his consulship.
25. L. Poplilio C. f. | Flacco | poplice statuta.  
*C. I. L. X. 5845.* Found at Ferentino (Ferentinum), where it still exists.
26. C. Annio L. f. | Quir. Flavo, | Iuliobrigens. | ex gente Canta|brorum |  
 provincia Hispa|nia Citerior. | ob causas utilita|tesque publicas  
 fideliter et con|stanter defensas.  
*C. I. L. II. 4192.* Found at Tarragona (Tarraco), Spain, existing only in copy.
27. Aurelio Sym|phoro Aug. lib., | oficiali veteri a memo|ria et a  
 diplomatibus, | exornato ornament. | decurionalibus, | ordo  
 splendidissim. | civi | ob amorem et | instantiam erga | patriam |  
 civesque.  
*C. I. L. X. 1727.* Found at Pozzuoli (Puteoli), where it is preserved in the public museum.

28. L. Gaboni<sup>1</sup> Arunculeio | Pacilio<sup>2</sup> Fab. Severo c. v. | iurid. reg. Transpad., | pro eos. desig. prov. | Cypri, | avunculo karissimo, | suffragiis eius ad fisci | advocaciones promotus | L. Valerius | Marcellinus | l. d., nepos, d. d.

*influenza*  
C. I. L. V. 4332. Found at Brescia (Brixia), existing now in copy. Cf. also V. 4333, an inscription of the father of Arunculeius. <sup>1</sup> The nom. case is *Gabo*. Wilmanns reads *P. Acilio*.

29. C. Vallio | Maximiano | proc. provinciar. | Macedoniae Lusi|taniae Mauretan. | Tingitanae, fortis|simo duci, | res p. Ianuar.

*longius*  
C. I. L. II. 1120. Inscribed on a marble pedestal found at Sevilla (Hispalis), Spain, where it is preserved in the museum. Hübner believes Maximianus to have been *procurator* of Marcus and Verus, and refers to the words of Capitolinus in *Vita Marci*, c. 21, *cum Mauri Hispanias prope omnes vastarent res per legatos bene gestae sunt*. Wilmanns, because of the form *kal*, which dates from the time of Commodus, also because of *e. v.*, which occurs in another inscription of the same man (II. 2015), and dates after the time of the Antonines, places the inscription in the reign of Severus and Caracalla.

30. honori<sup>1</sup> | M. Gavi M. f. | Pob. Squilliani eq. pub., IIII vir. i. d., | IIII vir. a. p., v. b.,<sup>2</sup> curatoris.<sup>3</sup> Vicetinar., | apparitores et limocincti | tribunalis eius.

C. I. L. V. 3401. Inscribed on a large bronze tablet found at Verona, where it still exists in the museum. <sup>1</sup> This form belongs to the third century. <sup>2</sup> *quattuorvir a(edilicia) p(otestate), v(iri) b(oni)*. <sup>3</sup> *curatoris*.

- C. I. L. VI. 1768.* Inscribed on a marble pedestal found at Rome, where it still exists. <sup>1</sup> For this form of inscription, which dates from the third century, and is common after time of Diocletian, see page 305, note. <sup>2</sup> *praefectus urbi* in 339 A.D. <sup>3</sup> The year 346 is referred to.
32. *singularis integritatis | et bonitatis exsimiae*<sup>1</sup> | *M. Aur. Consio Quarto | Iuniori c. v. correctori | Flaminie et Piceni*,<sup>2</sup> | *pontifici maiori, | promagistro iterum*,<sup>3</sup> | *duodecim viro; | Anconitani et Fanestres clientes | patrono.*
- C. I. L. VI. 1700.* Inscribed on a pedestal found at Rome, now in the Capitoline Museum. <sup>1</sup> From the latter part of the third century laudatory words were often placed before the name of the one honored. <sup>2</sup> *Correctores Flaminiae et Piceni* as *viri clarissimi* are found from 313 to about 350; afterwards they are termed *consulares*. The inscription, therefore, belongs to the former period. <sup>3</sup> *promagister pontificum*; from the time of Aurelian they are termed *pontifices maiores* or *Vestae*.

## INSCRIPTIONS ON PUBLIC WORKS

2. *Q. Lutatius Q. f. Q.[n]. Catulus cos. | substructionem et tabularium | de s. s. faciundum coeravit [ei]demque | pro[[bavit].*
- C. I. L. VI. 1314.* Found in the fifteenth century, in the building known as the Tabularium, on the Capitoline Hill. It is now lost. Lanciani (*Bull. Arch. Mun.* III, p. 165) suggests that the *substructio* was the great platform of the Temple of Jupiter Capitolinus, which temple Lutatius Catulus, cos. 676/78, dedicated. Tac. *Hist.* III. 72. See Jordan, *Annali dell' Ist.* LIII. 1881, p. 60 ff., and Middleton's *Remains of Ancient Rome*, Vol. I, pp. 366 and 372.

*C. I. L. X. 5807.* Found at Alatri (Alertrium), Italy, where it exists to-day. The inscription dates before the passage of the *Lex Julia de Civitate* of 664/90, since, if citizenship had been received, the local senate could not have granted immunity from military service to their fellow-citizen. The doubling of the vowels gives another date, see p. 30. <sup>1</sup> Ritschl suggests *ad que* (= *et ad arduum — in arcem*) for this word which is not understood. <sup>2</sup> This word is due to his having held the censorship twice.

*C. I. L. X. 787.* Inscribed on a block of tufa found at Pompeii, now in the museum at Naples. <sup>1</sup> Before 751/3. <sup>2</sup> Schoen has shown in *Bull. Com.* 1866, p. 11, that these *lumina* were the spaces between ten pillars by which the *porticus* of the temple of Apollo was separated from the forum. These spaces are now filled in, so that a continuous wall thus takes the place of the row of pillars. <sup>3</sup> *col(oniae) Ven(eriae) Cor(neliae)*.

Volceius. <sup>1</sup> For this Lex Visellia see Mommsen, *Staatsr.* II.<sup>3</sup> 669. <sup>2</sup> *de conl(egit) (tribunorum plebis) sent(entia)*. The *curator viarum* was chosen from a *collegium* of the tribunes of the plebs. The inscription dates 683/71, since three of the names here given appear in the index of the *Lex Antonia de Termessibus* of that year.

**C. I. L. VI. 1305. P. L. M. E. LXXXVII.** These inscriptions are engraved on the old Pons Fabricius, known in middle ages as Pons Iudaeus, and to-day as Ponte dei Quattro Capi, which crosses from the Island to the left bank of the Tiber. It was built by L. Fabricius in 692/62 B.C. and consists of two semicircular arches with a smaller archway over the central pier for high water. It is built of peperino and tufa with facings of large blocks of travertine.

Inscription *a* appears across two arches on each side. Inscription *b* is engraved over the middle arch on both sides. Inscription *c* is illegible now, but was engraved under *a* on one of the arches on each side. It is given in a copy by Ligorio. <sup>1</sup> The bridge was rebuilt in 733/21.

For *curatores viarum* see Mommsen, *Staatsr.* II.,<sup>3</sup> p. 669. For Pons Fabricius see Middleton's *Remains of Ancient Rome*, II., p. 367.

 c) M. Aemi[lius M. f. M. n.] | Lepid. [cos.] | CC . . . .

C. I. L. I. 535-536. Three milestones of the Via Aemilia were found near Bologna (Bononia), where they are still preserved in the museum of the University. These *cippi* (a and b) once stood on the Via Aemilia separated from each other by a distance of 18 miles. The numerals cut on the sides at a later period indicate distances on another road where these stones were afterwards set up. <sup>1</sup> 567/187. Mommsen doubts whether these *miliaria* are of the age indicated, since the letter P is closed; *Aemilius* is for the earlier *Aemilio*, *cos* is for *consol*, and finally a *cognomen* is added; the form of the *cippi* does not conform to that of other *miliaria* of the sixth century of the City. See *Miliarium Popilianum*, p. 251. <sup>2</sup> The number of miles from Rome; later the miles were counted from Ariminum.

C. I. L. I. 540 = V. 8045. Inscribed on a milestone of the Via Postumia, now at Verona. Borghesi has shown that this refers to the consul of 606/148. Postumius made a road from Genua to Cremona M · P · CXXII and from thence, *i.e.* from Cremona M · P · XXVII to the place where the *cippus* once stood.

31. T. Quinctius T. f. | Flamininus | cos.<sup>1</sup> | Pisas XXXII.<sup>2</sup>

C. I. L. I. 559. Inscribed on a milestone found at Pietrafitta near Florence. <sup>1</sup> 631/123. <sup>2</sup> The number is not legible and is known only from a copy. The miles are counted to the end of the road, not, as is customary, from the beginning, as in Italy from Rome.

32. L. Caecili Q. f. | Metel. cos.<sup>1</sup> | CXIX | Roma.

C. I. L. IX. 5953. Inscribed on a milestone of the Via Salaria found at S. Omèro, near Asculum, where it still exists. The stone appears to be out of its original position, or the road running to the shore of the Adriatic once ended at Castrum Novum or Hadria and not at Castrum Truentinum. <sup>1</sup> 637/117.

C. I. L. III. 7183. Inscribed on a milestone on the road leading from  
Ephesus to Pergamos, found not far from Pergamos. Similar stones  
have been found on other roads in Asia. (C. I. L. III. 479, 6177, 7184,  
7205.) <sup>1</sup> The number of miles from Ephesus to the location of the stone.  
Strabo XIV., p. 646, states that M'. Aquilius, the consul 625/129, ruled  
Asia after it was brought under the Romans by the will of Attalus.
39. M'. Sergi M'. [f] | procos. | XXI.  
C. I. L. II. 4956. Inscribed on a *miliarium* found near Barcelona (Barcino),  
Spain, existing in copy. It is not known when Sergius was proconsul in  
Spain, but the form *Sergi* for *Sergius* points to an early date. The road  
to which this milestone belonged is unknown, as well as the place from  
which the distance is reckoned.

## BOUNDARY STONES

45. C. S[e]mpronius Ti. f. Grac. | Ap. Claudius C. f. Polc., | P. Licinius P. f. Cras. | III vir. a. i. a.<sup>1</sup>

*C. I. L.* I. 552, X. 3861. A *cippus* found at Formia (Formiae), above Capua, now in Museum of Naples. This boundary stone was set up after the death of Ti. Gracchus, 621/133, who had appointed himself, his brother C. Gracchus, and Ap. Claudius, his father-in-law, as *triumviri agris dividendis*. P. Licinius Crassus takes the place of T. Gracchus. <sup>1</sup> *tres vir(i) a(gris) i(udicandis) a(dsignandis) or adtribuendis*. On the top there appear the lines and angles of the *kardo* and *decumanus*, i.e.

*kardo undecimus, decumanus primus*

The date is 622/132-623/131.

46. M. Fulvius M. f. [Fl]ac. | C. Sempronius Ti. f. Grac. | C. Paperius C. f. Carb. | III vire a. i. a.

*C. I. L.* I. 554; IX. 1024. A small round column found in the country of the Hirpini, between Aeclanum and Compsa, near Rocca San Felice. M. Fulvius Flaccus, consul 629/125, and C. Paperius Carbo, consul 634/110, were substitutes in place of P. Licinius Crassus and Ap. Claudius at their death, in 624/130, to which year this inscription may belong. It is possible to assign it to the year 625/129, when jurisdiction as regards the land was taken away from these *triumviri*, and they ceased to be termed *ab agris iudicandis*. An inscription found on the top has not as yet been explained.

*C. I. L. I.* 583. Found between Pesaro (Pisaurum) and Fano (Fanum), Umbria. Borghesi VII., p. 350-51, places this inscription between the praetorship of M. Terentius Varro Lucullus in the year 678/76 and his consulship in the year 681/73, when he was in Gallia Cisalpina as *propraetore*. Mommsen assigns it to the year 672/82 or 673/81, when, as an adherent of Sulla, Varro was in charge of the army in Gallia Cisalpina. <sup>1</sup> *a(gris) d(andis) a(dsignandis) i(udicandis)*.

*C. I. L. I.* 547, a, b, V. 2491. Found on Mt. Venda, one of the Euganean hills, in the Atestinian district, dating 613/141? or 638/116?

*C. I. L. I.* 548, a, b; V. 2492. Inscribed on two columns found on the Euganean hills, near Padua, now in the museum at Padua. The larger had been hollowed out to receive the smaller. <sup>1</sup> Perhaps L. Caecilius Metellus, who was consul 612/142 (Mommsen).

*C. I. L.* II. 2916. Inscribed on several *cippi* found near Retortillo, in the northern part of Spain. <sup>1</sup> *ter(minus) August(alis)*. <sup>2</sup> *prat(um)*. According to Hübner this is *legio quarta Macedonica*, known from the coins of the colony Caesaraugustana, which was quartered in Spain from the time of Augustus until the time of Claudius, who withdrew it to Germany. This gives some knowledge of the date.

C. I. L. II. a) 4962, 1; b) 4962, 4.

a) A weight of black marble, with bronze handle, weighing 16253 grammes; therefore the *libra* = 325.06 gr., since the mark denotes *quinquaginta librae*. Another weight, entirely of bronze, found at the same place, is marked X and weighs 3254 gr., hence the *libra* = 325.4. These results do not differ much from the normal estimate of the *libra* = 325.8 gr.

b) Bronze *s(em)u(nc)ia* with inserted letters, found at Cordova. The weight is 12.88 gr., so that the *libra* is 309.12 gr., hence very light.

C. I. L. IX. 6086. a) VI, b) IX, c) XII, d) XXVIII, e) XXI. Inscriptions on lead bullets found near Ascoli (Asculum) and Corropoli, or in the Castellano river near Ascoli. In the year 664/90 the Romans fought against the people of Picenum who had instigated a revolt among the Italians. The Roman leader, Cn. Pompeius Strabo, meeting at first with defeat, finally besieged and after a desperate battle captured the city of Asculum. The above inscriptions are from some of the lead sling shots which were used in this, the Social war, and which have been obtained from the neighborhood of the battle. <sup>1</sup> Many *glandes* with this inscription have been found. It is variously explained as *Fir(mo missa)* or *Firmani (funditores)*. <sup>2</sup> The reference is to Pompeius Strabo the besieger of the town. <sup>3</sup> The term *fugitivi* was probably applied by the Romans to the rebels. It has been suggested that the term was applied by the *socii* to the *libertini* who for the first time took part in war.

In March 714/40 he surrendered. Appian, V. 36, informs us that *glandes plumbeae* were used in this war, and his testimony is supported by the finding of the above missiles. <sup>1</sup> (*egio*) XII. *Scaeva, Pr(imus) pil(us)*, perhaps M. *C. I. L.* IV. 2551. Painted in white coloring on the fragment of an *amphora* found at Pompeii, where it is still preserved. It is unknown to what year the consuls should be assigned. An Anicius Cerialis was consul in 65 A.D., and his colleague is not known, hence some assign the *amphora* to this date. The third line seems to indicate that the wine, already two years old, was placed in the *amphora* on the Ides of August. Cf. *Hor. Car.* III. 8, 9. BISF is inexplicable. *C. I. L.* IV. 2555. Painted on the neck of an *amphora* found at Pompeii, existing in copy. Since Vespasian was consul III in 71, with Cocceius Nerva as colleague, and Domitianus and Pedius Cascus were the *suffecti* of the same year, Mommsen suggests that II should stand in place of III. But in Pliny, *N. H.* II. 57, we find *imperatoribus Vespasianis patre tertium filio II* or *iterum* (Paris Ms. eius) *consulibus*. Henzen has

suggested that Pliny and the writer of the inscription carelessly named as colleagues those who, though consuls of the same year, did not hold office at the same time. In the quotation from Pliny, *II* or *iterum* must be rejected.

An earthen vase found in 1880 at Rome on the Quirinal, now at Rome in the possession of H. Dressel. The purpose of the bowl and its inscription has been variously explained by scholars, but without satisfactory and conclusive results. See page 16.

*qoi med mitat* = *qui me mittat* Dressel, Buecheler, Osthoff, Jordan.  
*mittat* = optative, Dressel; future, Buecheler; potential = *quisquis mittat*, Jordan.

*Iove Sat. deivos* = *Iovi Sat(urno) deis*, Dressel, Buecheler ; = *Iovei*, Jordan ; = *Iove(m) Sat(urnom) deos*, Osthoff ; *Iovets at deivos* = *Iuppiter aut deus!* Bréal.

Conway, in the *American Journal of Philology*, X. 1889, p. 445, regards the inscription as an *exsecratio*, and interprets thus :

*Io. Vei. Sat. deivos qoi med mitat nei ted endo cosmis virco sied. Asted noisi Ope Toitesiai pacari vois. Duenos med feced en Manom, einom Duenoi ne med malo statod.*

May the gods Jove, Vejove, Saturn (grant) that Proserpine, to whom they suffer this vase to be dispatched, show thee no favour. Unless thou, indeed, art willing to make thy peace with Ops Toitesia. Duenos made me (as a curse) against Manus, and let not evil fall to Duenos from me.

## CHAPTER VIII

### DOCUMENTS

#### INSTRUMENTA

EPIGRAPHIC material may be divided, as has been shown above, into two great classes. The first class, *tituli*, has been treated in what has just preceded. It now remains to consider the second class, *instrumenta*.

These are documents which have been placed for publication and preservation on stone and metal, and which have an importance in themselves and in the information which they convey, apart from the objects upon which they appear. They are, however, of such a character, as to place them in the field of Roman literature and law, rather than in the domain of epigraphy.

Since, however, such documents have been preserved for us in inscriptions, as well as in the works of ancient writers, it belongs to the student of epigraphy to consider what documents have thus come down to us, their formal presentation as well as the principles which appear to have controlled their individual form and arrangement.

#### LAWS AND PLEBISCITES

#### (*Leges et Plebi Scita*)

The word *lex*, originally a special term denoting the enactments of the *comitia centuriata*, after the equalization of the legislative authority of the *comitia tributa* with that of the patrician *comitia*, and the recognition of *plebi scita* as *leges* through the passage of the *Lex Hortensia*, 467/287, became a generic term applicable alike to the enactments of both bodies. Hence we find in the *Lex Latina Tabulae Bantinae*, 7 (dating between 621/133–636/118), and the *Lex Agraria*, 2 (643/111), the phrase *ex hac lege plebeive scito*.

*Leges* and *plebi scita* are arranged in three divisions. I. *Index* or *Praescriptio*; II. *Rogatio*, the body of the law; III. *Sanctio*, the conclusion.

I. The *index* or *praescriptio* sets forth in stereotyped form the name of the proposer (*rogator*) of the law, the office of the same, the place, the day of the month, and, finally, the name of the body (*centuria*, *tribus*) entitled to vote first, and the name of the man casting the first vote.

As no complete *praescriptio* has been preserved for us in the inscriptions, we obtain our knowledge of its form from that of the *Lex Quinctia de Aquaeductibus*<sup>1</sup> given by Iulius Frontinus in c. 129.

*T. Quinctius Crispinus consul [d(e) s(enatus) s(ententia)] populum iure rogavit populusque iure scivit in foro pro rostris aedis divi Iulii pr(idie) [k.] Iulias. Tribus Sergia principium fuit, pro tribu Sex. . . . L. f. Virro [primus scivit].*

When the law, a *plebi scitum*, was proposed by a plebeian magistrate, i.e. *tribunus plebis*, the expression in the *praescriptio* was *plebem rogare*.

The first line of the *praescriptio* was written in larger letters than the body of the law.<sup>2</sup>

II. *Rogatio*. The text of the law was divided into sections or chapters which were indicated either by spaces, after which, in some cases, the first word or a part of the first word of the paragraph extended into the margin (*Lex Cornelia de XX Quaestoribus*<sup>3</sup>) or by numbers adjoining the spaces as in *Lex Rubria*.<sup>4</sup> The titles of the sections were in some instances introduced by the letter R = *rubrica*, as in the municipal law known as *Lex Malacitana* (see p. 351).

III. *Sanctio*. This is in reality the conclusion of the law, and contains provisions against its infraction, and states the penalties for those who transgress. The *sanctio* might also contain a declara-

tion making void any future enactment contravening the present statute.<sup>1</sup> The *lex* was then termed *perfecta*, but if such a declaration were lacking it was termed *imperfecta*. Non-interference with previous enactments was denoted by the formula EX · H · L · N · R = *ex h(ac) l(ege) n(ihilum) r(ogatur)*. See *Lex Rubria*,<sup>2</sup> XXI. 24.

The principal laws and plebiscites which have come down to us in inscriptional form are:

*Lex Acilia Repetundarum*, 631/123 or 632/122. This was engraved on a bronze plate and provided for the institution of a court where charges of extortion brought by the *socii* against Roman magistrates might be considered. *C. I. L. I.* 198; *P. L. M. E.* tab. 23-25.

*Lex Agraria*, 643/111. This is engraved on the reverse of the bronze tablet on which the *Lex Acilia* is preserved. It is the last of the three laws passed after the death of C. Gracchus annulling his agrarian laws. *C. I. L. I.* 200; *P. L. M. E.* tab. 26-28.

*Lex Cornelia de XX Quaestoribus*, 673/81. This law, engraved on a bronze tablet, was the eighth of the laws of Sulla and referred to the introduction of additional quaestors. *C. I. L. I.* 202; *P. L. M. E.* tab. 29.

*Lex Antonia de Termessibus*, 683/71. A *plebi scitum* on a bronze tablet by which the autonomy of Termessus was confirmed. *C. I. L. I.* 204; *P. L. M. E.* tab. 31.

*Lex Rubria de Civitate Galliae Cisalpinae*, 705/49. A bronze tablet found among the ruins of Veleia, near Piacenza. By means of this law, jurisdiction of municipal magistrates in Gallia Cisalpina was established. *C. I. L. I.* 205 = XI. 1146; *P. L. M. E.* tab. 32.

*Lex Iulia Municipalis*, 709/45. This law, commonly termed *Tabula Heraclensis* from the place of its discovery, Heraclea, is engraved upon a bronze tablet, on the opposite side of which is a Greek *psephisma*. It treats of the distribution of corn, duties of aediles in Rome, and rules of municipal government. *C. I. L. I.* 206; *P. L. M. E.* tab. 33 and 34.

In the imperial period legislation was in the hands of the senate and emperor, so that the *leges* assumed the form of *senatus consulta* and *constitutiones* of the emperors.

<sup>2</sup> Bruns, *Fontes Iuris Romani*, p. 101.

7. C. A. Hellemo (Chicago)

The *Lex de Imperio Vespasiani* (69 A.D.), a specimen of the *leges de imperio* which conferred the various powers of the principate upon the emperor on his accession to the throne, sets forth the decree of the senate as a *senatus consultum* and yet assumes in some respects the character of a *lex*.<sup>1</sup>

The term *lex* was also applied to the constitutions given by those in authority to *civitates*, based upon traditional principles once applied to the government of *coloniae* and *municipia*. They are similar to the *leges* which were given to the people of Campania when they became Roman citizens, by L. Furius, *praetor* 436/318 (Livy, IX. 20, 5).

The following are of this character :

*Lex Coloniae Genetivae Iuliae sive Ursonensis*, 710/44. A colony of Roman citizens, known as *Colonia Genetiva Iulia*, was established by M. Antonius, under the direction of Julius Caesar, at Urso (now Osuna) in Spain. The *lex* given by Antonius to this colony originally consisted of no less than eight *tabulae*, of which only four remain, and those in a fragmentary state. *C. I. L.* II. 5439; *Ephem. Ep.* II. 105, 221.

*Lex Municipalis Salpensana*, 81-84 A.D. A portion of a *lex municipalis* given by the emperor Domitian to the *municipium* Salpensa, inscribed on a bronze tablet found near Malaga, Spain. *C. I. L.* II. 1963.

*Lex Municipalis Malacitana*, 81-84 A.D. A similar law given by Domitian to the *municipium* Malaca, inscribed also on bronze and found in the same place. *C. I. L.* II. 1964.

*Lex Metallii Vipascensis*. Given by one of the Flavian emperors as a constitution for a mining settlement in Portugal. *Ephem. Ep.* III. 165.

A portion of the *Lex Malacitana*.

## DECREES OF THE SENATE

*(Senatus Consulta)*

These decrees of the senate of the Roman people, written down under the direction of the presiding officer in presence of witnesses, have been preserved for us in literature and in small numbers in a monumental form. They are arranged as follows:

I. Introductory portion, consisting of the name of the *relator* with the phrase *senatum consuluit*, the date, *i.e.* day and month (not later, however, than 707/47), and place of assembly, names of witnesses <sup>secretaries</sup> with phrase *scribundo adfuerunt*.

[Q]. *Marcus L. f., S(p.) Postumius L. f. cos. senatum consuluerunt n(onis) Octob. apud aedem Duclonai. — Sc(ribundo) arf(uerunt) M. Claudi(s) M. f., L. Valeri(s) P. f., Q. Minuci(s), C. f. (Senatus Consultum de Bacchanalibus, 568/186; C. I. L. I. 196).*

II. The statement of the *relatio*, *i.e.* the question proposed, introduced by the formula *quod (ille) consul verba fecit* or *quod verba facta sunt de illa re*. This formula *verba fecit* may be followed by an infinitive clause expressing the purpose of the *relatio*. The formulaic ending of this statement, *quid de ea re fieri placeret*, Q · D · E · R · F · P, occurs first in decrees of the Augustan period.

III. The *sententia* of the senate, introduced by the formula *de ea re ita censuerunt*, D · E · R · I · C. At the close of the *consultum* the word *censuerunt (censuere)* is repeated either in full or represented by the letter C. The same word occurs after each section when the vote was taken upon each article.

The *senatus consulta* which had reference to Greek people were translated into that language,<sup>1</sup> and these are the oldest documents of this kind which have been preserved to our time.

The earliest *senatus consultum* written in Latin which has been preserved is a fragment of the Latin version of the *S. C. de Asclepiade Clazomenio Sociisque*, 676/78, of which the Greek translation has also been preserved. It refers to

<sup>1</sup> For list of these documents see *Bulletin de Correspondance Hellénique*, 1887, p. 225; and for the *formulae*, the vol. of 1885, p. 455. Paul Viereck, *Sermo Graecus quo S. P. Q. R. usque ad Tiberii Caesaris aetatem in scriptis publicis usi sunt examinatur*. Göttingen, 1888.

three Greek captains who, on account of their services to the state, are declared *amici populi Romani*. *C. I. L. I.* 203.

Other *senatus consulta* date from the latter part of the first century B.C.

Two fragments of these documents, referring to the *ludi saeculares*, are preserved on marble tablets. They date May 23, 737/17. *S. C. C. de Ludis Saecularibus*. *Ephem. Ep.* VIII. 225. See also *C. I. L. VI.* 877.

*S. C. C. de Aedificiis non Diruendis*. Two decrees inscribed on the same tablet which refer to the destruction and rebuilding of houses in Rome, the first dating between 44–46 A.D., the second in the year 56. *C. I. L. X.* 1401.

*S. C. de Nundinis Saltus Beguensis*, 138 A.D. Inscribed on two stones found at Henschir Begar, Africa, containing a permit for a market in the district *Saltus Beguensis*. *C. I. L. VIII.* 270, and *Sup.* 11451.

*S. C. de Cyzicenis*, 138–160 A.D. Inscribed on a stone tablet found in the ruins of Cyzicus, now in the British Museum. *C. I. L. III.*, *Sup.* 7060.

*S. C. de Sumptibus Ludorum Gladiatorum Minuendis*, 176–7 A.D. Inscribed on a bronze tablet found in 1888 near Italica, a city of Hispania Baetica. *C. I. L. II.*, *Sup.* 6278; *Momm. Ephem. Ep.* VII. 388.

The two documents, familiarly known as *S. C. de Bacchanalibus* and *S. C. de Tiburtibus* are letters of magistrates written in the form of *senatus consulta*. See page 359.

#### IMPERIAL DOCUMENTS

##### (*Instrumenta Imperatorum*)

Many state documents of imperial authorship, embodying the enactments of the Roman emperors when acting with legislative authority, form most valuable and interesting epigraphic remains.

These documents assume several forms:

*Orationes*. These were addresses before the senate made in person or by messenger, which formed the means whereby the emperor presented a bill or proposition to the senate as the legislative body, so that in the form of a *senatus consultum* it might become a law. Subsequently the *oratio* itself was recognized as a law when the empty formality of reference to the senate was appreciated. A certain form of *oratio* is seen in the speech of the Emperor Claudius in the senate, bearing upon the admission of Gallic citizens to the *honores*. This was engraved upon a bronze tablet,<sup>1</sup> a portion of

<sup>1</sup> Boisseau, *Inscriptions de Lyon*, p. 136; *Bulletin Épigraphique*, vol. 2, 1882; Dessau, p. 52.

which was discovered at Lyons, where it is still preserved. An abstract is given by Tacitus in *Annales*, XI. 23-25.

A small portion of an *oratio* of Vespasian appears in the sepulchral inscription of Ti. Plautius, upon whom the emperor proposes to confer triumphal honors. *C. I. L.* XIV. 3608.

### *Constitutiones.*

1. *Edicta.* These were general directions of legislative force made on the analogy of the republican magisterial edicts. They were introduced by names and titles of the emperors, followed by *dixit*.

*Edictum Augusti de Aquaeductu Venafrano*, giving water privileges to the *colonia* established by Augustus at Venafrum. This is inscribed on a marble tablet found at Venafrum, where it is still preserved. *C. I. L.* X. 4842.

*Edictum Claudii de Civitate Anaunorum*, 46 A.D. Inscribed on a bronze tablet found near Tridentum. *C. I. L.* V. 5050.

— *Edictum Diocletiani et Collegarum de Pretiis Rerum Venalium* (301 A.D.) is written in Latin and Greek, and gives the prices of all kinds of merchandise throughout the Roman Empire. *C. I. L.* III., p. 801; *Ephem. Ep.* V., p. 87 ff; *Hermes* XXV. 1890, p. 17.

2. *Decreta.* Decisions of the emperor in his judicial capacity.

*Decretum* of Commodus relating to the colonists of the *Saltus Burunitanus* in Africa. *C. I. L.* VIII. 10570, *Sup.* 14464; *Ephem. Ep.* V. 470.

*Decretum M. Aurelii et Commodi* (176-180) *propter controversias quae inter mercatores ortae erant*. Copies of this decree were probably placed at each one of the gates of Rome. The one found before the *Porta Salaria* has come down to us entire. *C. I. L.* VI. 1016; *Ephem. Ep.* IV. 787.

3. *Rescripta.* Provisional decisions on consultation with magistrates or private persons. These take the form of *epistulae*, introduced by (ille) *salutem dicit*, and closing with *valete*.

*Epistula Vespasiani ad Vanacinos* (72 A.D.). Inscribed on a bronze plate found in Corsica. It refers to a boundary dispute. *C. I. L.* X. 8038.

*Epistula Vespasiani ad Saborenses* (78 A.D.). Inscribed on a bronze plate found in the town Cañete, between Malaga and Sevilla, Spain. *C. I. L.* II. 1423.

*Epistula Domitiani ad Falerienses* (82 A.D.). Addressed to the inhabitants of Falerii and referring to their difficulties with the Firmani. *C. I. L.* IX. 5420.

*Epistula Severi et Caracallae ad Tyranos* (201 A.D.). A marble tablet found on the bank of the river Dniester, in Bessarabia, containing directions to the officials Heraclitus and Tertullus, and relating to the confirmation of privileges granted to the Tyrani, a people of Illyria. *C. I. L.* III. 781, and p. 1009.

4. Instruments Conferring Rights of Citizenship and Marriage upon Veteran Soldiers (*Privilegia Militum Veteranorum de Civitate et Conubio*).

Among the *constitutiones* of the emperor should also be classed the documents familiarly known as *diplomata militaria*. These were formal documents issued upon completion of the term of service, conferring upon foreign soldiers the privileges of citizenship, and upon Roman citizens legal marriage even with foreign women. These *constitutiones* were engraved upon bronze tablets and set up at first on the Capitol, but after the time of Domitian on the Palatine. The names of the soldiers to whom the *constitutio* applied were written underneath. These bronze tablets<sup>1</sup> have perished, but special certified copies of many of them which were made for the individual soldiers have been preserved; they differed from the original in that they contained only the name of the soldier for whom the copy had been made.

These copies were engraved on two tablets of bronze of oblong shape, about  $4\frac{3}{4}$  inches by 6 inches, bound together into diptychs by bronze rings passing through two holes set in the edge.<sup>2</sup> Two other

<sup>1</sup> Some fragments remain, because those who made the copies of *constitutiones* of the years 243 and 248 used the original tablets of earlier *constitutiones* which, though cut in pieces, still show traces of the earlier writing.

Those diptychs which are extant are given in *C. I. L.* III. p. 844 seq.; *Ephem. Ep.* II. p. 452-466; IV. p. 181-187, 495-515; V. p. 92-100, 610-617, 652, and *C. I. L.* III. *Sup.* See also Arneth, *Zwölf Römische Militärdiplome*, Vienna, 1843, and Leo Renier, *Recueil de Diplomes Militaires*, Paris, 1876.

The fac-simile on p. 358 is from Cagnat's *Cours d'Épigraphie*, p. 269, originally from Renier's work just mentioned.

<sup>2</sup> Paulus, *Sent.* V. 25, 6. *Amplissimus ordo decrevit, eas tabulas, quae publici vel privati contractus scripturam continent, adhibitis testibus ita signari, ut in summa marginis ad mediam partem perforatae triplici lino constringantur, atque impositae supra linum cerae signa imprimantur, ut exteriori scripturae fidem interior servet; aliter tabulae prolatae nihil momenti habent.*

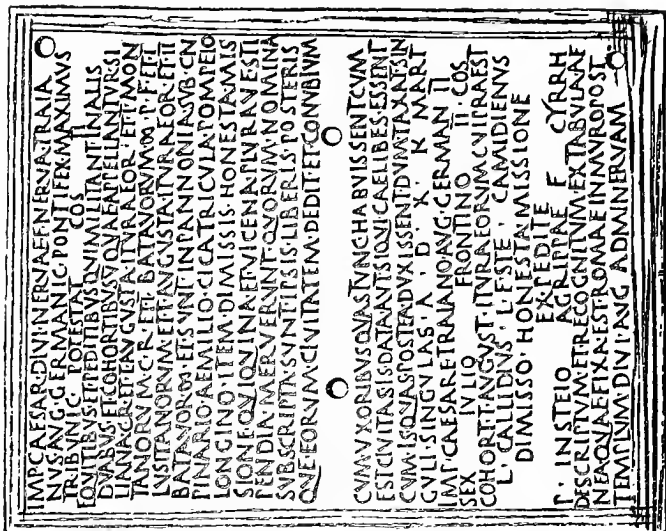

holes were used for fastening and sealing the diptych. Through these holes bronze threads of triple thickness were drawn, and fastened on the outside by the seals of seven Roman citizens whose names were engraved alongside of the seals. While the seals themselves have perished, parts of the thread are still seen in the holes of some diptychs. This was the legal method of fastening these documents.

The text of the *constitutio* was written both on the inside and outside of the diptych. On the outside of the second tablet the lines run in the direction of the shorter side, on the inside of both tablets, in the direction of the longer side. The outside of the first tablet held the names of the witnesses, the groove for the threads and seals dividing each name into two parts. Probably in the earliest diptychs only one copy of the *constitutio* was given, and that on the inside. One of these diptychs (Dessau, *Inscriptiones Latinae*, 1994) is still in existence. The object of the repetition of the *constitutio* outside was the avoidance of the opening of the diptych. This custom seems to have resulted in the gradual neglect of the inner copy which in reality was the important part of the document, for some diptychs are found in which the inside inscription is scarcely legible. The largest number of these documents which remain to us are assigned to veterans from the *alae* and the auxiliary cohorts, a much smaller number belong to the *classarii*, and still fewer relate to Roman citizens discharged from the praetorian and urban cohorts. No *diplomata* of this kind seem to have been given to the legionary soldiers if we except those of the two legions, *Prima Adiutrix* and *Secunda Adiutrix*, who were enrolled from the *classici*.

The formal arrangement of the *constitutio* was as follows:

1. The name and titles of the emperor.
2. The class of soldiers and the special body to whom the *privilegium* was granted, also the department of service and the name of the commander-in-chief, *i.e.* the governor of the province.
3. The number of the years of service.

The phrase *item dimissis honesta missione emeritis stipendiis* occurs in certain *diplomata*, thus extending the *privilegium* so as to include those who have been previously discharged *honesta missione*. After Trajan *honesta missio* is always

Fac-simile of military diploma of the year 98. See p. 355.

given before the bestowal of these *privilegia*, and hence the form becomes — *militibus qui militaverunt quinis et vicenis pluribusve stipendiis emeritis dimissis honesta missione*.

4. The formula *quorum nomina subscripta sunt* followed by the formal extension of these privileges to their descendants, — *ipsis, liberis, posterisque eorum*, a formula appearing before 145 A.D., and then not until 178.<sup>1</sup>

When the *privilegia* were conferred upon soldiers of the praetorian or urban cohorts, the formula following the name of the emperor was *nomina militum qui in praetorio meo militaverunt . . . subieci*.

5. The privileges conferred — *civitas* and *conubium* i.e. a legal Roman marriage upon those already married, or upon those who may marry. *Civitatem dedit et conubium cum uxoribus quas tunc habuissent cum est civitas iis data aut, si qui caelibes essent, cum iis quas postea duxissent, dumtaxat singuli singulas*.

The formula reads somewhat differently in the *constitutiones* of soldiers of the praetorian or urban cohorts. *quibus, fortiter et pie militia functis, ius tribuo conubi dumtaxat cum singulis et primis uxoribus, ut etiam si peregrini iuris feminas matrimonio suo iunxerint proinde liberos tollant ac si ex duobus civibus Romanis natos*. The right of citizenship is not referred to, because the urban soldiers had already obtained *ius civitatis* before entering service. These cohorts were recruited mainly from the inhabitants of Italy.

6. The date — day, month, year.

7. The name, in the dative case, of the soldier, together with the designation of his country. This name may be preceded by that of his cohort and that of his commander, *cohort(is) Lusitanorum cui praeest C. Cisso C. f. Ste. Honoratus*; also by a phrase indicating the rank of the soldier, *ex pedite*, introduced thus by *ex* when the soldier has received *honesta missio*.

8. The formula, *descriptum et recognitum ex tabula aenea quae fixa est — Romae in muro post templum divi Augusti ad Minervam or in Capitolio post aedem Fidei populi Romani in muro*.

#### DECREES OF MAGISTRATES

##### *Decreta Magistratum*

The *instrumenta* of magistrates, like the *constitutiones* of the emperors, assume the form of *edicta*, *decreta*, and *rescripta*.

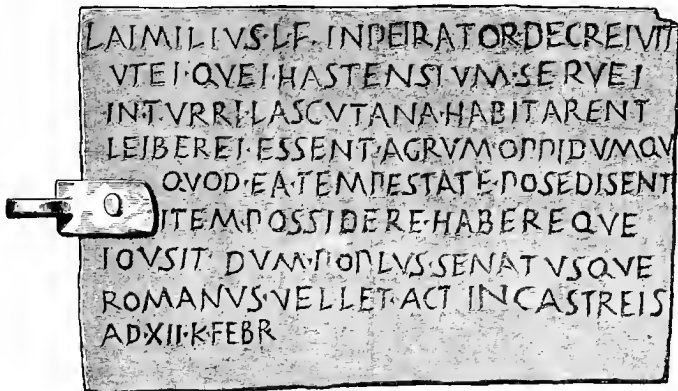

*Edicta* were voluntary statements of the rules which the magistrate intended to follow in the interpretation of the law.

*Rescripta* were replies to special requests.

<sup>1</sup> *Ephem. Ep.* IV., p. 510 ff.

*Decreta* were the decisions of the magistrate in any particular case within his jurisdiction.

The oldest document of this kind known is the *decretum* of L. Aemilius Paulus, the victor at Pydna, as *proconsul* of Hispania Ulterior. It is cut in a bronze plate which was found in Spain, at Alcalá de los Gazules, near Cadiz, in ancient Baetica, and is now

*Decretum* of L. Aemilius Paulus, 565/189.

*Note drawn from*

preserved in the Louvre, Paris. It belongs to the early life of Paulus, when he was *praetor* in Spain. The object of the decree is the setting free of the Lascutani of southern Spain from the control of their neighbors of Hasta.<sup>1</sup>

With these *instrumenta* should also be classed the following:

*Epistula Consulium ad Teuranos de Bacchanalibus*, familiarly known as *Senatus Consultum de Bacchanalibus*, dating 568/186. This letter, engraved on a bronze plate according to directions found on line 26, contains the substance of a *senatus consultum* directed against the *Bacchanales* in Italy. It was sent by the consuls to the Teurani, a people of the Brutii. *C. I. L. I.* 196; X. 104.

The *epistula* of L. Cornelius the praetor, commonly known as the *Senatus Consultum de Tiburtibus*, was engraved upon a bronze tablet found at Tibur, but now lost. It dates 595/159. It was addressed to the people of Tibur, and referred to some suspicion under which they had fallen. *C. I. L. I.* 201, XIV. 3584.

<sup>1</sup> Livy, XXXV. 24; XXXVI. 2; XXXVII. 2, and 46.

A number of these documents belong to the imperial period. *Decretum Proconsulis Sardiniae*, 69 A.D. This was the *sententia* of L. Helvius Agrippa, engraved on a bronze plate referring to a boundary dispute between two people of Sardinia. *C. I. L. X.* 7852. *Epistula Praefectorum Praetorio*, 168 A.D. This *epistula* was addressed to the magistrates of Saepinum and Bovianum by the *praefecti praetorio* Bassaeus Rufus and Macrinus Vindex, for the purpose of preventing the ill treatment of the *conductores gregum oviaricorum* of the emperor. It is inscribed on a stone which is still to be found at Saepinum, near the gate leading to Bovianum, through which runs the sheep-path to-day. *C. I. L. IX.* 2438.

We may add to these, the *sententia* of C. Avidius Nigrinus, the *legatus Augusti propraetore* of Trajan inscribed on a marble tablet, *C. I. L. III.* 567; and the rescript of Claudius Quartinius inscribed on bronze, dating 119 A.D., addressed to the *duoviri* of Pompaelo, Spain, *C. I. L. II.* 2959.

A number of formal letters, such as the above, and official statements of various authorities have been preserved in the inscriptions.

The *libellus* of L. Septimius Adrastus with its accompanying *exemplaria litterarum* of the *rationales* of Severus relating to the erection of a building by Adrastus, inscribed on a marble *cippus*, dating 193 A.D., *C. I. L.* VI. 1585; and the *interlocutiones* of the *praefecti vigilum* bearing upon the refusal of the *collegium* of *fullones* to pay either ground rent or more probably for water rights, inscribed on an altar of Hercules and dating 244 A.D., *C. I. L.* VI. 266.

## PUBLIC AND SACRED DOCUMENTS

### *Acta Publica et Sacra*

It will be convenient and consistent as well to describe under this title all documents associated in a general way with public interests and related also, in however slight degree, to religion and religious worship.

#### FASTI<sup>1</sup>

The most important of these inscriptions are the *fasti*. This word, in its earliest sense restricted to the days upon which legal business could be transacted, was later applied to the lists of these days and finally denoted calendars and chronological records in general. These *fasti* are represented in the inscriptions by two great classes of records.

Annual records and chronicles of events intended for the eyes of people in general, containing the names of the chief magistrates of the year, mainly the eponymous magistrates, and brief statements of the principal occurrences and events, are represented by the *Fasti Consulares* and *Acta Triumphorum*.

The lists of days for legal business which became *kalendaria*, containing an enumeration of the days and months and festivals of the year as well as brief notices of a religious and historical character, are represented to-day by the *Fasti Anni Iuliani*.

<sup>1</sup> This subject is treated fully in *C. I. L.* vol. I. and in the *editio altera* of the same volume published in 1893.

*Fasti Consulares and Acta Triumphorum*

The first of these give the names of consuls, dictators with their *magistri equitum*, the *tribuni militares* with consular power, and the censors with the *lustrum* which they completed. These data are arranged in chronological order accompanied by their dates (according to the Catonian era) at intervals of ten years.

The *Acta Triumphorum* give the names of the *triumphatores* with a statement of the people over whom they have triumphed and the date of triumph, and at times some brief description of the victory.

These *Fasti* and *Acta* are arranged in *C. I. L. I.*<sup>2</sup> in two subdivisions. I) *Fragmenta Quae Dicuntur Capitolina*, II) *Cetera Quae Supersunt Fragmenta*.

I. As early as the latter part of the fifteenth century a few fragments of these *fasti* were known to Italian scholars. In the year 1546, however, many fragments were discovered which were collected and arranged by Delphinus and other scholars under the direction of Cardinal Farnese, who transferred them from his own gardens to the Capitoline and placed them in the Palace of the Conservatori, where they remain to-day. This disposition of the fragments accounts for the name *Fasti Capitolini*, by which they have ever since been known. Other fragments were discovered in 1816-1818 while excavations were being made in the Forum under the direction of Carlo Fea, of the Kircherian Museum. Again, in the extensive and systematic investigations which were carried on between 1872-78 ten fragments were discovered, and finally in 1888 another fragment of the *fasti triumphales* which referred to the years 567-569 was taken from the bed of the Tiber.

These *fasti* of the magistrates and *triumphatores* were engraved on solid blocks of marble over a foot and a half in thickness, which had evidently formed part of the walls of some prominent building, in all probability of the *Regia* of the *pontifex maximus*.

The date of the engraving of these *fasti* is set by Borghesi<sup>1</sup> between 718/36 and 724/30. Hirschfeld<sup>2</sup> believes that they were inscribed in 742/12, when Augustus assumed the office of *pontifex*

<sup>1</sup> *Œuv.* IX. 1. p. 6. See *C. I. L. I.*<sup>2</sup>, p. 10.

<sup>2</sup> *Hermes*, IX., p. 93.

*maximus*. It is probable that the *tabulae* of the *fasti consulares* were engraved in 718/36, when Domitius Calvinus dedicated the new *Regia*, and that separate *supplementa* were added up to about the year 766 = A.D. 13. Although the *fasti* were disregarded in the City after this period, they were still maintained in the municipalities. The *acta triumphalia*, however, were set up in 742/12, when Augustus became *pontifex maximus*.

The following is a portion of the *fasti consulares* running from 524/230-532/222.

II. The second class of the *fasti consulares* and *acta triumphorum* includes the fragments of the *fasti*, which various priestly colleges and Italian municipalities framed for their own use, as a means of recording and dating public events. These are named from their origin or from circumstances associated with their discovery or preservation, e.g. *Fasti Amiternini*.

*Fasti Anni Iuliani*

These calendars, which are essentially religious documents, represent the early lists of days and festivals which were kept at first exclusively by the priests, but were afterward (450/304) published through the efforts of Cn. Flavius, who placed a copy of the calendar in the Forum. From this time the custom prevailed of exposing in a public place the list of days and festivals, which was determined by the priests.

The municipalities and *collegia* adopted a similar custom, and set up in cities, temples, and even private houses, copies of the calendars, the originals of which were made by the *pontifices* at Rome.

There are in existence to-day thirty of these calendars, engraved or painted on stone, and in a more or less fragmentary state, with the exception of the *Kalendarium Maffeianum*, which is almost complete. They are all of about the same age, arranged according to the Julian year, which brings the date later than 709/45. They were all made, however, in the time of the Julian and Claudian emperors, since the oldest belongs to the middle of the reign of Augustus, while the latest dates in 804 A.U.C., 51 A.D.

The Roman calendars as they appear in these *fasti* consist of a series of columns of which the first indicates the eight days of the week by the *litterae nundinales* A B C D E F G H, which are repeated for the successive weeks. Certain days of the Roman year have names which belong to themselves alone, while the remaining days are named from these and specialized by the addition of a numeral. The days thus named recur every month or year. Those recurring every month are the Kalends, (K); Nones, (NON); Ides, (EID).

Hübner's *Exempla*. No. 976.

Inscribed on a marble tablet found at Caere, now in the Palazzo dei Conservatori at Rome. The date is about 34 A.D.

The names of the days which recur yearly are the following:

In addition to the *litterae nundinales* and the names of certain days the calendars contain letters indicating the *ius et natura* of the days.

These are as follows: F = *fastus*, which marked the days on which the *praetor* might say the words *do, dico, addico*, and legal business might be transacted. F · P. This is of uncertain meaning, perhaps equal to *f(astus) p(rincipio)*, i.e. *fastus* in the first part of the day.

Q · R · C · F = *q(uandoc) r(ex) c(omitavit), f(as)*, i.e. the day was *fastus* after the *rex sacrificulus*, had presided in the *comitia calata* called twice a year for the making of wills. These letters are attached to March 24th and May 24th.

Q · S · T · D · F = *q(uandoc) s(tercus) d(elatum) f(as)*, i.e. the day is *fastus* after the rubbish has been carried from the temple of Vesta. These letters are attached to June 15th.

N = *n(efastus)*. The courts are closed, hence no legal business may be transacted.

N<sup>o</sup> in many *fasti*, but N<sup>f</sup> in *Fasti Pighiani*. This also signifies *nefastus*, but these days are *nefasti (hilares)* because of some festival, and not *nefasti (tristes)* as the preceding, connected with religious observances. Mommsen explains N<sup>o</sup> as originating in an N of four strokes made, as  $\mathcal{N}$  for Manios, for the sake of differentiation. Some explain N<sup>f</sup> as equal to *n(efastus) f(eriatus)* or *n(e)f(astus)*.

EN = *endotercisus* or *intercisus*.<sup>1</sup> The day on which the victim for sacrifice was slain in the morning, and the *exta* offered in the evening, the intervening time was *fastus*.

C = *c(omitialis dies)*.<sup>2</sup>

<sup>1</sup> Varro *L.L.* 6, 31. *Intercisi dies sunt, per quos mane et vesperi est nefas, medio tempore inter hostiam caesam et exta porrecta fas, a quo, quod fas tum intercedit aut eo est intercisum nefas, intercisum.*

### *Menologia Rustica*

Another form of calendar is that which is represented to-day by the *Menologium Rusticum Colotianum*<sup>1</sup> and *Menologium Rusticum Vallense*.<sup>1</sup> They were prepared for the guidance of farmers, and therefore state facts of value to that particular class. The former of these was discovered in Rome, and is still preserved in the museum at Naples. The calendar is engraved on the sides of a cubical marble altar in twelve columns, each containing the list of days for the month. At the head of each column is a sign of the zodiac, underneath which is the name of the month, the number of days, the day of the nones, the hours of the day and night, the name of the sign through which the sun, the god of the month, passed, the agricultural labors appropriate to the month, and the principal festivals. ## SACRED DOCUMENTS

The documents relating to the consecration of temples and connected with objects of religious worship, such as altars and consecrated treasures, form another class of *acta*.

I. The first to be mentioned are the *leges templorum*, referring to the consecration of temples and altars, of which the following are examples.

1. The *lex fani* of the temple of Jupiter Liber at Furfo, a Sabine town, dating 696/58. *C. I. L. I. 603 = IX. 3513*. The introductory form is,

These were little tablets of wood or bronze, upon which some proverb or wish was written, regarded as an omen when the tablet was properly drawn. Seventeen of these *lamellae*, made of bronze, oblong in shape, provided with a handle for carrying, were discovered at Padua, not far from *Fons Aponus*, a seat of divination.

#### IV. Monumentum Ancyranum.<sup>1</sup>

This famous inscription, engraved upon the walls of a temple, but not in a religious sense associated with the sacred building, is, with difficulty, classed with any other inscription. Some<sup>2</sup> regard it as an epitaph; but Mommsen<sup>3</sup> likens it to the inscription on the tomb of Antiochus of Commagene on the Nimrud Dagh, in Mesopotamia. The Monumentum Ancyranum, as termed by Suetonius, an *index rerum a se gestarum*, is most valuable in giving information as to the history of the early Empire. It was originally cut on bronze tablets, so as to be placed in front of the mausoleum of Augustus in Rome, *quem incidi vellet* (Augustus) *in aeneis tabulis quae ante Mausoleum statuerentur*,<sup>4</sup> and was reproduced in Latin on the inner wall of the vestibule, and in Greek on the outer wall of the temple of Augustus and Roma at Ancyra in Galatia, Asia Minor. This copy is still in great part in existence, so that the substance of the whole may be, with few exceptions, fully determined. Selections from the *praescriptio* and *capita* I and XIX are given below.

## V. Documents of the Collegia of Priests.

The documents belonging to the various sacerdotal colleges are represented in the inscriptions by fragments which, with one exception, namely, the *acta* of the Arval brotherhood, are of comparatively small account.<sup>1</sup>

### *Acta Collegii Fratrum Arvalium.*

The corporation or brotherhood of the *fratres arvales* is believed to have been an ancient institution dating from the time of the kings, which, becoming obsolete, was revived by Augustus. It was a company of priests, twelve in number, whose original purpose appears to have been to offer sacrifices and prayers for the fertility of the fields. They presided at the festival of Dea Dia in May, for which function alone they were regarded as priests.

<sup>1</sup> See *Fasti, Acta, Tituli Sacerdotum Publicorum Populi Romani, C. I. L. VI, p. 439.*

The members of the brotherhood were chosen by coöptation and held position for life. Their place of worship was *in luco Deae Diae ora Campana apud lapidem V.* (*C. I. L.* VI. p. 575.)

The *acta* of this priestly college have been preserved for us in a large number of inscriptions which have been discovered in the Vigna Ceccarelli, near the fifth milestone from Rome, on the Via Portuensis.

There are in existence to-day *acta* dating from the time of Augustus to the reign of Gordian, 241 A.D. These contain various details, *e.g.* the names of those attending, the date, place, method of procedure, etc., of various ceremonies associated with events in the lives of the reigning emperor and members of his family. They are of great value in the determination of dates.

A number of these inscriptions were published at Rome in 1795 by Gaetano Marini in *Atti e Monumenti de' Fratelli Arvali*. The modern work<sup>1</sup> on this subject is *Acta Fratrum Arvalium Quae Supersunt*, W. Henzen, Berlin, 1874.

In the account of the ceremonies as found in the *acta* of the year 218 A.D. of the reign of Elagabalus, there occurs the famous chant,<sup>2</sup> which has tested the ingenuity of many scholars.

#### VI. Commentarium of the Secular Games.

Among these *instrumenta sacra* there should also be mentioned the recently discovered *acta* of the Secular Games (*commentarium ludorum saecularium*), dating 737/17, and containing the famous reference to the poem of Horace, the *Carmen Saeculare*.<sup>3</sup>

#### DOCUMENTS RELATING TO THE ARMY<sup>4</sup>

The most important documents associated in their origin with the Roman army are the lists of soldiers (*latercula militum*) which

<sup>1</sup> See also *C. I. L.* VI. 2023-2119; *Bullet. Comunale*, 1889, p. 116 ff.; *Ephem. Ep.* II., p. 211 ff.; VIII., p. 316.

appear often as additions to other inscriptions either dedicatory or honorary in their character. The names of the soldiers, accompanied by the name of the *tribus* and native town, and in some cases by indications of rank, are arranged in sections according to centuries, with the name of the centurion in the genitive case, heading each section. Probably with the intention of making a document regular and orderly in appearance, the final letters of the *nomen* and *cognomen*, as well as of the indications of origin, are separated from these words.

At the camp discovered at Lambaesis, in Africa, there have been found a number of interesting inscriptions connected with the army:<sup>1</sup>

1. Register of centurions of the legion III Augusta, dating 162 A.D. *Ephem. Ep.* V. 1276.

2. Address of Hadrian at the time of his visit in June or July, 128 A.D. This is extant in a fragmentary state. *C. I. L.* VIII. 2532.

3. Regulations of the *collegia* of under officers established in the camp of the legion III Augusta, dating in the time of Septimius Severus. *C. I. L.* VIII. 2552-2557.

#### DOCUMENTS OF THE MUNICIPALITIES

##### I. Decrees of the Decuriones.

The decrees of the municipal senate are closely related in their character to the *senatus consulta* of the general government at Rome, and hence are similar in form, giving the date, place of assembly, and the usual formulae, *scribundo adfuere* with names of witnesses, and *q(uid) d(e) e(a) r(e)f(ieri) p(laceret), d(e) e(a) r(e) i(ita) c(ensuere)*.

A number of these documents have been preserved in the inscriptions, of which the following are examples:

1. The most ancient is the *Lex Parieti Faciendo* of Puteoli, dating 649/105, which, however, in its present form, is a restoration of the second century A.D. *C. I. L.* X. 1781. See page 378.

2. *Cenotaphia Pisana* of 3 A.D. inscribed on a marble tablet. These are decrees of the Senate of Pisa relating to the *honores* given to Lucius and Gaius Caesar, the grandsons of Augustus. *C. I. L.* XI. 1420.

3. The decree of the Senate of Gabii on a marble tablet dating 140 A.D. This refers to memorial *honores* given to Domitia, wife of Domitian. *C. I. L.* XIV. 2795.

4. The *Decretum Tergestinum*. This decree refers to L. Fabius Severus, *quaestor urbanus*, who has rendered service to the *decuriones* and people of Tergeste. The date is 138-161. *C. I. L.* V. 532.

## II. Registers of Decuriones.

There are also in existence two examples of the lists of municipal senators.

1. A bronze tablet from Canusium (Canosa), dating 223 A.D. *C. I. L. IX. 338. L. Mario Maximo II, L. Roscio Aeliano cos. . . . . II viri quinquenn(ales) nomina decurionum in aere incidenda curaverunt.*

The names are classified as of *patroni c. c. v. v., patroni e. e. q. q. R.R., quinquennialicii, allecti inter quinq., II viralicii, aedilicii, quaestoricii, pedani, praetextati.*

2. The *album ordinis Thamugadensis*, dating in the last years of Constantine or in the time of Julian. *C. I. L. VIII. 2403.*

The names are classified as of *v. v. c. c., sacerdotales, curator, duo viri, pontifices, augures, ediles, quaestores, duoviralicii.*

## III. Tabulae Patronatus.

Mention has already been made of the customs associated with *hospitium* and the gift of tokens in portable form, *tesserae hospitales*, denoting such relation.

Similar to this custom was that which led communities to present to distinguished persons whom they made their *patroni*, bronze *tabulae patronatus et hospitii*, which could be placed in the *atrium* of the house or in some public position.

These inscriptions assume either the character of decrees or have a form peculiar to themselves.

One class of the less formal of these documents,<sup>1</sup> in which *senatus populusque* or a similar phrase forms the subject of the verb, may be illustrated by the decree of the *Pagus Gurzensium* in Africa, by which L. Domitius Ahenobarbus, grandfather of Nero, is made patron.

*P. Sulpicio Quirinio C. Valgio co(n)s(ulibus). Senatus populusque civitatum stipendiariorum pago Gurzenses hospitium fecerunt quom L. Domitio Cn. f. L. n. In another class<sup>2</sup> the name of the person honored is the subject of the phrase *hospitium fecit*.

<sup>1</sup> Of this character are the *tabulae patronatus* found at Rome, *C. I. L. VI. 1685-1687*; at Brixia, *V. 4919, 4922*; in Sardinia, *X. 7845.*

#### DOCUMENTS OF THE COLLEGIA<sup>1</sup>

The *instrumenta* of the *collegia* recall the documents of the municipalities which they resemble in character and form. The most important of these *acta* are the following:

##### I. Registers of Members.

1. A register (*album*) of the *ordo corporatorum lenuncularior(um) tabulariorum auxiliariorum Ostiensium* is inscribed on marble tablets which date 152–192 A.D. *C. I. L.* XIV. 250, 251. The names are arranged in classes as in the *album* of the *decuriones*, e.g. *patroni, quinquennales, plebs*.
2. A register of a *collegium* of Herculaneum. *C. I. L.* X. 1403.
3. A register of the *dendrophori* dating 251 A.D. *C. I. L.* X. 3699.
4. A roll of a *familia* of gladiators of C. Salvius Capito *lanista*, arranged in categories according to the classes of gladiators, e.g. *equites, Thraeces, murmillones, retiarii, sagittarii*. *C. I. L.* IX. 465–466.

##### II. Decrees.

1. *Lex Collegii Aesculapi et Hygiae*, of the year 153. *C. I. L.* VI. 10234.
2. *Decretum* of the *dendrophori* of Puteoli, of 196 A.D. *C. I. L.* X. 1786.

This is a decree of the *magistri pagi* directing the officers of the *collegium* of *libertini*, named from Juppiter Compagus, the god of brotherhood, to spend money in public improvements rather than on games.

## PRIVATE DOCUMENTS

Epigraphic remains of this character are comparatively rare because of the absence of the necessity of preservation and publication which naturally belonged to documents of a public character. Hence whatever has been preserved to us of any importance has been associated with other inscriptions such as *tituli honorarii* or *tituli sepulcrales*. The *acta ad sepulcrales spectantia* mentioned above and given in *C. I. L.* vol. VI. are examples of such inscriptions.

*Wax Tablets.*

There still remain to us, however, very interesting inscriptions of a private nature on the wax tablets of Dacia and Pompeii.

As early as 1786 and also in more recent years there have been discovered in the mining regions of Dacia, at modern Verespatak, wax tablets which extend in date over a period of forty years, 131-167 A.D. These are preserved to-day in the Museum of Pesth.<sup>1</sup>

Other wax tablets have also been found at Pompeii in the house of L. Caecilius Lucundus, the banker.<sup>2</sup>

These wax tablets, similar in form to the bronze tablets mentioned above, with the exception that most of the former are triptychs, *i.e.* of three tablets, while the latter are diptychs, are made of wood with inner sides covered with black wax and sunk below the surface. The rim or border of each tablet is pierced with holes for binding purposes. Across the middle of the second page of the second tablet, *i.e.* the fourth of the triptych, a groove is cut parallel to the shorter edge. At the ends of the groove holes are pierced, through which triple strings were drawn which were fastened in the groove. The third tablet was not fastened, in order that an abstract of the deed, which in Dacian tablets appeared on the fifth and a part of the fourth page, but in the Pompeian triptychs only on the fifth,

This is a *cautio de puella empta*, dating March 17, 139 A. D., now in the museum at Pesth.

are plain wooden surfaces, so that the names of the witnesses which are written in both cases on the fourth page appear on the wooden surface of the Pompeian triptychs.

These tablets are inscribed in cursive letters and contain business documents of various kinds.

*Devotiones.*

We may also class with these private documents the *devotiones* or *defixiones* which contain phrases of ill wishing directed against

The abstract of the deed in the above is the same as the deed on the first *tabula* except that it is not completed, running only to *ea res*; *et* is inserted in line 9, *eam* takes the place of *iam*, and *a* is omitted in line 10, *noxaeque* appears for *noxisque*, *fugitivam* for *fugitium*, *eam* for *em*.

personal enemies or those guilty of some offence. They consist of formulaic expressions consigning the one disliked to some sinister deity to whom the *defixio* is addressed. Most of these *devotiones*

are written in a rude cursive style on tablets of lead or bronze which were placed in sanctuaries or tombs.

A few of them are in monumental form, as e.g. one<sup>1</sup> found in Spain addressed to *Dea Ataecina, Dea Ataecina Turibrig(ensis), Proserpina, per tuam matetatem te rogo oro obsecro, uti vindices quot mihi furti factum est.*

#### WALL INSCRIPTIONS

##### *Inscriptiones Parietariae*

It is difficult to classify either as *tituli* or *instrumenta* the inscriptions which appear upon walls of buildings such as those of Pompeii and, in less number, those of Rome; for in reality they partake of the nature of both, so diverse is their character and purpose.

The inscriptions which are painted or scratched with a *graphium* upon the clay walls of the houses of Pompeii are edited by C. Zangemeister in *C. I. L.* vol. IV. and *Ephem. Ep.* I. 49, 177 ff.

<sup>1</sup> *C. I. L.* II. 462.

The earliest of these Pompeian inscriptions belonging to the pre Augustan period are those painted in red on the tufa walls of the houses, and consist mainly of recommendations for election of candidates for municipal offices.

Some of these are advertisements of various kinds, e.g. for a vase that has been stolen (No. 64), and again others give lists of officers, as the *magistri vic et compiti* (No. 60, 707/47).

The painted inscriptions of a later date (Nos. 84–1176) contain information of a similar character to those just mentioned.

A large number of these wall inscriptions are announcements of gladiatoria games (Nos. 1176–1204). They are introduced at times by some formula as *pr salute domus Augustae*, giving the alleged cause for the holding of the contests. This statement is followed by the name of the man to whom the *familia gladiatoria* belongs, the number of pairs matched, the place, time, other events, and additional attractions, as *sparsiones, vela*, etc.

The inscriptions scratched with a graphium on the walls of the houses are mainly of a private character.

#### CONSULAR DIPTYCHS<sup>1</sup>

#### (*Diptycha Consularia*)

In the later empire it became the custom for consuls when entering upon their official duties to present to senators and other prominent persons, carved ivory tablets. These contained representations of the spectacles which marked their entrance to office, together with the names and portraits of the consuls. They were in all probability a sort of invitation to the initiatory festivals. The oldest of these diptychs dates 406 A.D. and the latest 541.

## CHAPTER IX

### RESTORATION AND DATING OF INSCRIPTIONS

#### ABBREVIATIONS.

##### *Restoration of Defective Inscriptions.*

An account of the science of Latin Epigraphy would be incomplete if no attention were paid to the renewal of inscriptions which remain to us in imperfect form, for it is a fact readily understood that epigraphic material consists, in a very large degree, of fragments which would be of little service and value were it not possible for scholars to make restorations more or less satisfactory, and which in many cases have been shown, by subsequent discoveries, to be correct.

It would be manifestly impossible to suggest a method of treatment which would be useful in every case, since this depends almost absolutely upon the character of the individual inscription itself. Nevertheless, certain general principles may be stated which will be of assistance in this most important and most interesting side of epigraphic study. It is a cardinal principle that nothing associated in any way with a fragmentary inscription is so insignificant as to be unworthy of consideration in the task of supplying portions that are lost. It is, therefore, imperative that the most exact copy attainable should be within reach of the student.<sup>1</sup> This has resulted in the use of the so-called "paper squeezes," which are made by moistening sheets of stout white paper and pressing them into the indentations of an inscription by means of a brush with short stiff bristles. Reproductions of inscriptions of this form have been found very satisfactory in their exactness. In the case of small articles, wax impressions are more convenient.

<sup>1</sup> See *Über Mechanische Copieen von Inschriften*. E. Hübner. Berlin, 1880.

The study of an inscription must involve both an internal and external consideration of all that is associated with the same. It must include an examination of the method of engraving, the forms of the letters and words, and of the character of the subject matter, but it must also be turned to the circumstances of the discovery, the location, and the association with other inscriptions.

The form of an incomplete letter, supplemented by a knowledge of what the normal letter in its complete shape would be, often determines the word which has disappeared. A knowledge of the numerous ligatures is very useful, particularly in the inscriptions found in Africa. In supplementing defective words, much attention should be given to the subject of abbreviations, for it must be remembered that certain words are regularly given in abbreviated form, but others very rarely.

The most common injuries exhibited by stones are such as destroy the beginning or end of the lines. It is, therefore, necessary to determine the original length of the line, so as to calculate the number of letters required to make it complete. This knowledge may be obtained from the general outline of the inscription, and from a comparison of the lengths of the remaining lines. We may say, in a general way, that a number of the lines in an inscription are of the same length. The first and last lines are regularly shorter than the others, because of the character of their subject matter, but they are proportionate in length to the other lines, and their middle points correspond with the middle points of the others. By knowledge thus obtained, the determination of the number of letters to be supplied may be accomplished with a fair degree of exactness.

The next important step is the consideration of the class of inscriptions to which the one in question belongs. This is necessary in order that a knowledge of the formulæ likely to occur may be obtained, and comparison with other inscriptions made possible.

Other important data are, the natural succession of *honores* in the various *cursus honorum*, the imperial names and titles, and the customary order of the same, the history of the legions, their enrollment, location, and length of service.

The following example, originally given by Renier,<sup>1</sup> illustrates the scientific restoration of a defective inscription and is used in like manner by Cagnat.<sup>2</sup>

R · EQVIT · ROM	IVT · XVIR
LITIB · IVDIC · QVAES	R · PROVINCIAE
RETAE · ET · CYRENAR	MP · VESPASIANI
AESARIS · AVG · LEG · X̄ · FRETEN	DONIS · MILI
B · IMP · VESPASIANO · CAESAR	T · CAESARE · AVG · F
ELLO · IVDAICO · CORONA · MVRALI · VALLARI · AVREA · HASTIS · PVRS	
EXILLIS · DVOBVS · TR · PL · PR · LEG · PROVINC · PONTI · ET · BITHYNIAE	
AECINIA · A · F · LARGA · VXOR · ET	
RCIA · A · F · PRISCILLA · FILIA · FECERVNT	

It is evident that the inscription is honorary in character and that it has been set up perhaps at his tomb by the wife and daughter of the person whose name has disappeared. The *honores* are given in the ascending order.

Before the quaestorship which appears in the second line we would look for the military service and the vigintivirate. The latter may be readily supplied thus, XVIR *st*LITIB · IVDIC; the former is shown by IVT which is part of the name *Ad IVT rix*. There were two legions thus named, *Prima Adiutrix* and *Secunda Adiutrix*. Although it is uncertain which legion is here indicated, Renier has shown from the inscription itself that the person referred to was made a quaestor under Vespasian and since he was *tribunus militum* about two years before this time, and the legion *II Adiutrix* was formed under Vespasian, it is probable that the first legion is the one named. Following the usual form we may supply then, *trib. mil. leg. I Ad*IVT. The honorary title which was often given to those who had not yet attained the quaestorship readily suggests itself for the first part of this line, so that we read: *sevir* · EQVIT · ROM. The quaestorship was either of the city, which would give simply QVAEST., or provincial, which would give QVAEST. *pr. pr.* = *quaestori pro praetore*. In the former case the following function would naturally be *leg(ato) pr. pr(aetore)*, but for this there is evidently no room; hence the line may be completed thus: QVAEST *pr. pr.* After the quaestorship a person might become *legatus* of a proconsul in a senatorial province of the praetorian grade, or hold the next

<sup>1</sup> *Explication et Restitution d'une Inscription Découverte à Nettuno*. L. Renier in *Mém. de l'Acad. des Inscr.*, 1867, p. 269. <sup>2</sup> *Cours d'Épigraphie Latine*, p. 337.

magistracy, the tribunate of the *plebs* or the aedileship. In this case, however, the function following the quaestorship is evidently that of *legatus* of a legion, so that we may supply *legatus* IMP · VESPASIANI CAESARIS · AVG · LEG X · FRETENSIS. The words *donis militaribus* would naturally be preceded by *donato*, hence read *donato DONIS MILITARIBUS*. The next line refers to the two emperors who conducted the Jewish war, and we may read AB · IMP · VESPASIANO CAESARE Aug et T · CAESARE · AVG · F BELLO · IVDaICO.

At the beginning of the seventh line the number of the *vexilla* has disappeared, but according to the rules<sup>1</sup> controlling military decorations two *vexilla* would be assigned to a man of quaestorian grade. Inasmuch as the *legati* of praetorian grade alone have the right to three *vexilla*, three *hastae purae*, and three *coronae*, it is evident that *duab(us)* is needed here. The *cursum honorum* is now complete with the remaining functions *tribunus plebis*, *praetor*, *legatus provinciae Ponti et Bithyniae*.

The first word of the next line is the *nomen* of the wife who has thus honored her husband. The remnant *aeinia* would suggest CAECINIA, but GRAECINIA is possible. The *nomen* Graecinia, taken from Graecinus, is hardly admissible for the wife of a senator in the time of Vespasian. Still further, the father, a Graecinius or Caecina, is named A(ulus), as A · filia shows, but we do not know of a *Graecinius* with the *praenomen* A(ulus), and it must be remembered that in a family of rank the range of *praenomina* and *cognomina* was limited to a certain number. We do not know of a *cognomen* *Largus* with a *Graecinius*, hence we naturally select CAECINIA. We know also of two consuls, A. Caecina (13 A. D.) and A. Caecina Largus (42 A. D.), which fact confirms the selection.

The *nomen* of the daughter may be either PORCIA, MARCIA, or LARCIA. Aulus, however, is not found with *Porcius*, and is rare with *Marcus*, but is common with *Larcus*. We find still further in this family, if not a *Priscillus*, at least a *Priscus*, so that the name of the daughter is LARCIA PRISCILLA, and of her father, A. *Larcus*.

Renier has pointed out that the *legatus* of the legion X *Fretensis* at the time of the capture of Jerusalem is spoken of in Josephus (*Bel. Iud.*, VI. 4) as A. *Larcus Lepidus*. From this we can conclude that the inscription is in honor of this man, and the first line must contain his name. Between the *nomen* and *cognomen* we would expect the indication of descent and the *tribus*. The first of these is uncertain, since we do not know the *praenomen* of the father, although we may conjecture that it is the same as that of the son. The inscription was found at Nettuno, hence we would expect *Quirina*, a *tribus* which actually appears in an inscription<sup>2</sup> of an A. *Larcus Priscus*, *legatus* of Numidia, found recently at the same place and referring probably to the father of the person honored in the inscription before us.

<sup>1</sup> See page 193 note.

1. *C. I. L.* XIV. 2100. Inscribed on a marble tablet found at Civita Lavinia (Lanuvium), existing now in copy. The date may be obtained from the table, p. 133. The inscription began thus: *imp. Caesari*.
2. *C. I. L.* XIV. 3602. Inscribed on a marble tablet found at Tivoli (Tibur), existing in a copy. Torquatus was tribune of the *vexillarii* of four legions. In line nine read *in cuius honoris*. Borghesi assigns this inscription to Novellius Torquatus of about the time of Tiberius, and refers to Pliny *Nat. Hist.* XIV. 22, 144, who testifies to his being *praetor* and *proconsul*.

1. *C. I. L.* XIV. 1509 a. Found at Ostia. In line 6 IIA is all that remains of the *nomen* of Prima.
2. *C. I. L.* XIV. 101. Found at Civitavecchia, now existing in a copy. *C. I. L.* gives in the first line *M. Aelio Aurelio*, in the second *Caesari*, in third the beginning of the name of his father. The *corpus pistorum Ostiensium et Portuensium* is referred to.

3. *C. I. L.* XI. 596. Found at Forlì (Forum Livi), where it still exists. The second line begins probably with *pro salute* or *ob reditum*. The third line may have contained formerly the name of Geta. Supply *visu* before *iussus*. Mommsen thinks it probable that Caracalla and Geta returning to Italy after the death of their father visited the camp of the twenty-second legion at Moguntiacum.

*Dating of Inscriptions.*

The determination of the date or period of inscriptions demands in many cases the consideration and study of inscriptions from every point of view.

Constant reference has therefore been made in what precedes to the various indications of date which the occurrence of certain usages belonging to well-defined periods provides.

The various suggestions leading to the determination of date may be classified as obtained either from an external or formal consideration of an inscription or from an internal or material view of the same.

The first of these implies: 1) A study of the object upon which the inscription appears, its size, ornamentation, circumstances of discovery, such as the depth beneath the surface and proximity to other inscriptions. Such data may be useful in identifying in its

date the inscription in question with others which admit of assignment to certain periods; 2) a consideration of the inscription itself, the nature of the engraving, the morphology of the letters, the orthography and the grammatical formation and interrelation of the words.

The second class of suggestions leading to the determination of date is concerned with the subject matter of the inscriptions.

We have already seen on page 123 how inscriptions of the imperial period may be dated from the titles and salutations of the emperor. If an inscription contains the names of consuls, it is possible in most cases to assign a date by reference to the *Fasti Consulares*. It is necessary to be cautious in thus depending on consular names, since those who acted as substitutes, *consules suffecti*, as well as those who received the *consularia ornamenta*, are frequently named as consuls. It must be remembered also that the title *cos.*, followed by a numeral of iteration, accompanied the name of the emperor even when he was not actually holding office. Tiberius was consul for the second time in 748/6, and was continually designated thus until 18 A.D., when he became consul for the third time. Any inscription containing simply the name of Tiberius with *cos. II* may be assigned to any year between 748/6 and 18 A.D.

Names of distinguished personages and officials are often of much importance in this respect. Such are the names of the high officers at Rome and in the provinces, also of associates and friends of the emperor. The date of the official career of prominent men may often be learned from historical sources, and the period of inscriptions may thus be determined.

A very important source of chronological information is found in the history of the various legions, which may be compiled from historical writings and from a comparison with dated inscriptions, and particularly from the military diplomas which contain certain exact dates.

The following tables will be of use in determining the date of inscriptions.

TABLE OF ARCHAISMS

**ai AND ae**; *ae* is found replacing *ai* in some words in *S. C. de Bacchanalibus* (186 B.C.), alongside of the earlier spelling. It is the established form for the *Lex Bantina* (133-118), the *Lex Repetundarum* of 123-122 B.C. The transition form, *aei*, appears about the close of the second century n.c. The archaic spelling was restored in the reign of Claudius.

**oi FOR oe AND ū**; about 200 B.C. *ū* begins to replace *oi* and *oe*. *ū* is found in the Scipio epitaph of the beginning of the second century n.c. and in the Mummius inscription of 146 B.C. *oi* and *oe* continue to be used, especially in official inscriptions, even to the Ciceronian period.

**ou AND ū**; *ū* replaces *ou* about 100 B.C. It appears for *ou* in *Lucius* in the Scipio epitaph, dating not later than 200 B.C. Both are seen in *Lex Bantina* (133-118 B.C.), *Lex Repetundarum* (123-122 B.C.), but *ou* is disregarded entirely in *Lex Cornelia* (81 B.C.).

**ei AND ī**; *ei* represents in the inscriptions either original *ei*, as in *deico*, or stands for the long *i*. The first is found in the early inscriptions, and appears in the *S. C. de Bacch.* (186 B.C.). The spurious diphthong *ei* is found in *audeire* in *Lex Repetundarum* of 123-122 B.C., and in *ameicitiam* of *Lex Agraria* of 111 B.C.

ASPIRATION OF CONSONANTS; see page 29.

FINAL *s* AND *m*; the letters *s* and *m* are frequently omitted in early inscriptions, but this omission ceases about 130 B.C.

FINAL *d*; this final letter of the ablative case is written in the *S. C. de Bacch.* (186 B.C.), but is not found in the decree of Aemilius Paulus of 189 B.C. It may be said to have disappeared from use a little after 200 B.C.

**xs FOR SIMPLE x**; this spelling does not occur before its appearance in the *S. C. de Bacch.* (186 B.C.). It then is found particularly in inscriptions of 130-120 B.C., and again in the Augustan period, and later.

DOUBLE CONSONANTS; see page 29.

DOUBLE VOWELS; see page 30.

**-os AND -om**; these forms were reduced to *-us* and *-um* except after *u* and *v* in the nominative and accusative cases of *o*-stems about 234 B.C.

**-ēs, -eis, -is**; these endings mark the nominative case plural of *o*-stems of the close of the second century B.C., and of the beginning of the first.

**-us, GENITIVE**; the *-us* ending of consonant stems is found in early inscriptions, as in the *S. C. de Bacch.* (186 B.C.), also in the *Lex Agraria* (111 B.C.) and the *Epistula ad Tiburtes* (100 B.C.), but ceases about 100 B.C.

- VI. *Victrix Pia Felix*. In Spain after the reign of Augustus, on the Rhine (70 A.D.), in Germania Inferior up to time of Hadrian, in Britain (120). Trajan gave the name *Pia Felix*.
- VII. *Claudia Pia Fidelis*. Quartered in Macedonia, about 10 A.D. sent to Dalmatia, to Pannonia by Nero, recalled to Italy (68), sent to Moesia by Galba, to Germany under Mucianus, in Moesia (71). Claudius gave the name *Claudia Pia Fidelis*.
- VIII. *Augusta*. Formed by Augustus. Quartered in Pannonia, in Moesia in time of Claudius (47), called to Italy (68), in Moesia in time of Galba, in Germany under Mucianus.
- IX. *Hispana*. On the Danube in time of Augustus, sent to Africa (20 A.D.), to Spain (24), to Britain (43), destroyed by the Britons (120).

- X. *Gemina P(ia) F(idelis)*. Formed by Augustus in 27 B.C. under name *X Augusta*. Quartered in Spain, lost its name in 19 B.C., named *Gemina* after 5 A.D., sent to Germany in 58, to Spain in time of Galba, in Germany in time of Vespasian until reign of Trajan, in Dacia with Trajan, in Pannonia.
- XI. *Claudia P(ia) F(idelis)*. In Pannonia in time of Augustus, then in Dalmatia, called to Italy (68), in Germania Superior (70), in Moesia in time of Trajan.
- XII. *Fulminata*. Formed by Augustus. Quartered in Egypt, sent to Syria (18 A.D.), with Corbulo (62), in Armenia, surrendered to Vologeses, in Syria, in Cappadocia.
- XIII. *Gemina P(ia) F(idelis)*. Formed by Augustus in 27 B.C. Service in Pannonia, with Germanicus in Germany, in Pannonia, called to Italy (68 A.D.), at Bedriacum and Cremona, sent to Pannonia by Vespasian, in Dacia. Nero probably gave the name *Pia Fidelis*.
- XIV. *Gemina Martia Victrix*. Formed by Augustus in 27 B.C. Service in Germany with Tiberius and with Germanicus, in Britain (43 A.D.), summoned by Nero (68), opposed Vitellius, after Bedriacum returned to Britain (69), sent to Pannonia (92). Nero gave the name *Martia Victrix*.
- XV. *Apollinaris*. Formed by Augustus. Service in Pannonia (6-9 A.D.), with Corbulo in the East (63), in Judea with Vespasian and Titus, in Egypt and Pannonia, with Trajan in the East.
- XVI. *Gallica*. Sent to the Danube by Augustus, in Germany after disaster of Varus, disbanded by Vespasian.
- XVII. *Gallica*. Destroyed with Varus at Teutoburg Forest (9 A.D.).
- XVIII. *Gallica*. The same as the above.
- XIX. *Gallica*. The same as the above.
- XX. *Valeria Victrix*. Formed in 27 B.C. by Augustus, quelled insurrection in Pannonia (6 A.D.), and received name *Valeria Victrix*, with Germanicus, in Britain (43), fought under Agricola.
- VI. *Ferrata*. Formed by Augustus in Syria (5 A.D.). Service with Corbulo in Armenia (58 and 62), in Syria in time of Vespasian, with Trajan against the Parthians, after Hadrian in Judea.
- X. *Fretensis*. Formed by Augustus in Syria (5 A.D.), with Corbulo in Armenia (62), in Egypt in time of Nero (65), in Judea with Vespasian and Hadrian.
- I. *Germanica*. Formed hastily in 9 A.D. after destruction of Varus, sent into Germany, disbanded by Vespasian (71).
- XXI. *Rapax*. Formed in 9 A.D. Service in Germany, fought for Vitellius at Bedriacum, in Illyria, in Germany against Civilis, in Moesia in 101.
- XXII. *Deiotariana*. Formed 9 A.D. Quartered in Egypt, supported Ves-

- pasian (69), in Judaea with Titus, annihilated in an ambushade by the Parthians (162).
- XXII. *Primigenia P(ia) F(idelis)*. Formed in 43 A.D., sent to Moguntiacum, in Italy (69), favored Vitellius against Galba, sent to Illyria, to Pannonia, returned to Germany (91). Hadrian gave the name *Pia Fidelis*.
- I. *Italica*. Formed by Nero in Italy, sent into Gaul, after Cremona sent to Illyria, then to Moesia.
- XV. *Primigenia*. Formed probably in time of Claudius. Service in Pannonia, called to Italy by Nero (68), sent to Pannonia by Galba, disbanded by Vespasian because of revolting to Civilis.
- I. *Adiutrix*. Formed by Nero for the fleet (68), enrolled as legion by Galba, sides with Otho, after Bedriacum sent to Spain by Vitellius, in Germany, in Moesia, 86-91, and in time of Trajan, in Pannonia.
- VII. *Gemina F(elix)*. Formed by Galba in Spain under name *Galbiana* or *Hispana* (68 A.D.), in Pannonia. Vespasian gave the name *Gemina F(elix)*, in Spain.
- II. *Adiutrix P(ia) F(idelis)*. Enrolled under Vespasian from the fleet at Ravenna, on the Rhine with Mucianus, on the Danube (85), in Pannonia after 107. Vespasian gave the name *Pia Fidelis*.
- IV. *Flavia F(elix)*. Formed by Vespasian (71 A.D.), sent to Dalmatia, to Pannonia, in Moesia, in Dacia under Domitian and Trajan. Hadrian gave the name *Felix*.
- XVI. *Flavia P(ia) F(idelis)*. Formed by Vespasian (71 A.D.). Service in Cappadocia, against the Parthians. Trajan gave the name *Pia Fidelis*.
- I. *Minervia P(ia) F(idelis)*. Formed by Domitian (85 A.D.). Service in Lower Germany (91), in Moesia, in Germany (107), Trajan gave the name *Pia Fidelis*.
- XXK. *Ulpia Victrix*. Formed in 101 by Trajan. Service in Germany, in Mesopotamia, under Constantius II.

*Abbreviations (Notae, later Sigla).*

It has already been seen from what has preceded that initial letters and various other abbreviations of words enter very largely into the language of the inscriptions, and that consequently a familiarity with the most common of these forms is essential to facility in reading. The student is referred to the very complete table given on p. 417 ff., which has been obtained from the *Cours d'Épigraphie Latine* of Professor René Cagnat.

Certain general principles<sup>1</sup> will be found of advantage in the interpretation of abbreviations.

1. Words written in abbreviated form consist either of the initial letter (*si(n)g(u)la*) or of a continuous group of letters more or less restricted in number. In the latter case the final letter of the abbreviation is the first consonant of a syllable, but this is not an exact rule. T = *Titus*; TIB = *Tiberius*; CLAVD, CLAV, CLA = *Claudia*; QVIR, QVI, Q = *Quirina*.

2. If a word is composed of several members, the above rule applies either to the word treated as a whole or to each of the component parts regarded as individual words. Thus *signifer* may be abbreviated synthetically SIG or SIGN, or analytically SIGF for *signum* and *fer*, so BENEFIC, BENEF, B, or again B · F = *beneficiarius*, DVMTAX or D · T = *dum taxat*, Q · Q · V = *quoquoversus*, P · Q = *populusque*.

This in theory is the system of abbreviations up to the end of the third century A.D.

When a disregard of these principles first made itself felt in the formation of abbreviations cannot be exactly determined, but it is probable that ignorance or a misunderstanding of the second rule,

<sup>1</sup> R. Mowat, *Sigles et Autres Abréviations* in *Bulletin Épigraphique*, IV., p. 127.

combined with a lack of knowledge of the component parts of words as determining the abbreviated forms, led to the violation of the principle of continuity of the letters, so that we find PD = *pedes*, MN = *minus*, PBL = *publicus*, LG = *legio*, VT = *vixit*, MM = *memoriae*, DPS = *depositus*, etc.

3. Again, we find in the inscriptions a peculiar form of abbreviation<sup>1</sup> occasioned by the repetition of the terminating consonant. This probably arose from the collocation of several *praenomina*, as in the designations of the patrons of *liberti*. This system appeared in Rome about the beginning of the Christian era, and was limited in the first century to the initial letters of *praenomina*. COSS for *consules* appears for the first time in two Christian inscriptions of the year 107 and 111.

a) This form indicates two, three or four individuals, the exact number being defined by the number of repeated letters. AVGG = *duo Augusti*, CCC = *Gaii tres*, DDDD · NNNN = *domini nostri quatuor*, VI · VIR · AVGG = *seviri Augustales duo*, FLL · P · P = *flamines perpetuo duo*.

b) The doubling of the last letter, however, may denote simply the plural number. PROCC = *procuratores*, PONTIFF = *pontifices*, CAESS = *Caesares*, HERR = *heredes*.

In some instances other letters have been doubled, and the following forms are the result:

NNOBB = *nobilissimi duo*, AAVVRR = *Aurelii*, EEQQR = *equites Romani*.

It is necessary to mention here also certain special signs which are used to mark abbreviations and to distinguish them from other letters in the inscriptions.<sup>2</sup>

1) A line of differentiation is placed over the letter or group of letters<sup>3</sup>; e.g.  $\overline{AVG}$  = *Augustus*,  $\overline{D} \cdot \overline{N}$  = *dominus noster*,  $\overline{N}$  = *natione*,  $\overline{QQ}$  = *quinquennalis*,  $\overline{V} \cdot \overline{C}$  = *vir clarissimus*,  $\overline{COS}$  = *consul*.

Sometimes the line crosses the letter; e.g.  $\mathfrak{B}$  = *beneficiarius*,  $\mathfrak{D}$  = *dicit*, or *dies*, or *domo*,  $\mathfrak{M}$  = *menses*,  $\mathfrak{O}$  = *obit* or *obitus*,  $\mathfrak{N}$  = *nummum*.

<sup>1</sup> C. Jullian, *Des Lettres Redoublées* in *Bulletin Épigraphique*, IV., p. 170.

<sup>2</sup> E. Hübner, *Exempla Scripturae Epigraphicae*, p. lxxii.

<sup>3</sup> This custom becomes prevalent from the beginning of the second century.

2) The bar may be replaced by an apex or circumflex, a custom common from the third century on; e.g.  $\acute{D} \cdot \acute{M}$  = *diis manibus*,  $\acute{F}\acute{F}$  = *felix fidelis*,  $\bar{I} \cdot \bar{O} \cdot \bar{M}$  = *Iovi Optimo Maximo*,  $\text{A}\acute{E}\bar{D}$  = *aedilis*,  $\text{CO}\acute{H} \cdot \text{PR}\acute{I}$  = *cohors praetoria*.

3) Some letters serving as abbreviations are reversed; e.g.  $\text{O}$  = *Gaia*, standing for *mulier*,  $\text{P}$  = *puella*,  $\text{C}$  = *caput*(?), or *conductor*, or *contra*, or *corona*(?).

## SUPPLEMENT

THIS supplement has been prepared with the twofold purpose of making the book more complete by adding material which is the fruit of recent study and investigation, and of correcting errors without extensive alteration of the plates. It is hoped that these pages, necessarily few in number, may be of some added service to those entering upon the study of Roman Epigraphy.

J. C. E.

Add to pages 1-6 :

The works of Orelli-Henzen and Wilmanns are now out of date, but are still useful as books of reference.

The most convenient collection of inscriptions for class-room use is the *Inscriptiones Selectae* of Hermann Dessau, vol. I. 1892; vol. II. part I. Berlin, 1902.

The *Cours d'Épigraphie Latine* of René Cagnat is by far the best introductory work on this subject. It is now published in a third edition, Paris, 1898. A useful supplement appeared in 1904.

Consult also the same author's article *Inscriptiones* in *Dictionnaire des Antiquités Grecques et Romaines*, Daremberg et Saglio.

A small introductory work in Italian is well spoken of: *Epigrafia Latina*. S. Ricci. Milan, 1898.

For the study of early Latin the *Handbook of Latin Inscriptions*, illustrating the history of the language, by W. M. Lindsay, Boston, 1897, will be found very serviceable.

### COLLECTIONS OF CHRISTIAN INSCRIPTIONS.

*Inscriptiones Hispaniae Christianae*. E. Hübner. Berlin, 1871.  
(Supplement 1900.)

*Inscriptiones Britanniae Christianae*. E. Hübner. Berlin, 1876.

*Inscriptions Chrétienues de la Gaule*. Le Blant. Paris, 1856-1865.

*Inscriptiones Christianae Urbis Romae*. De Rossi. Vol. I. 1857; vol. II. (part I.) 1888.

*Die Altchristlichen Inschriften der Rheinlande*. F. X. Kraus. 1890.

Supplement to Egbert's *Latin Inscriptions*. Copyright, 1906, by James C. Egbert, Jr.

*Nouveau Recueil des Inscriptions Chrétiennes de la Gaule.* Le Blant. 1892.

*Die Christlichen Inschriften der Schweiz vom IV.–IX. Jahrhundert.* Em. Egli. 1895.

#### The Language of Inscriptions.

*Thesaurus Linguae Latinae Epigraphicae.* I. fasc. 5. G. N. Olcott. Rome, 1904.

This work aims to be a complete epigraphic lexicon, and though a stupendous undertaking, promises to be of great value in Latin lexicography.

*Le Latin d'Espagne d'après les Inscriptions.* A. Carnoy. Louvain, 1903.

*Zur Sprache der Lateinische Grabeninschriften.* J. E. Church, Jr. Munich, 1901.

*La Langue des Inscriptions Latines de la Gaule.* J. Pirson. Brussels, 1901.

*Verzeichnis der auf Aussprache u. Rechtschreibung Bezüglichen Eigentümlichkeiten in den Inschriften aus Gallia Narbon.* Prog. Pola. F. Neumann. Trieste, 1897–1898.

*Die Lat. Sprache auf Afrik. Inschriften.* B. Kübler in *Archiv für Lateinische Lexicographie und Grammatik*, VIII. pp. 161–202. In the same work is found *Etruskisch-Lateinische oder Etruskisierende Wörter und Wortformen der Lateinischen Inschriften.* Lattes.

*De m Finali Epigraphica.* Diehl. Leipzig. 1899.

*Studies in the Word-formation of the Latin Inscriptions.* G. N. Olcott. Leipzig. 1898.

#### Add to page 4:

In 1898 the *Archäologisch-epigraphische Mitteilungen aus Oesterreich-Ungarn* was replaced by the *Jahreshefte des Oesterreichischen Archäologischen Instituts.*

The *Dizionario Epigrafico di Antichità Romane* of de Ruggiero has up to the present time appeared in 82 fasciuculi.

The following changes should be made in the summary of the volumes of the *Corpus Inscriptionum Latinarum*:

## VOLUMEN III.

*Pars Posterior*: Inscriptions of Illyricum, parts VI.–VII.; also Monumentum Ancyranum, Edict of Diocletian de Pretiis Rerum, Diplomata Militaria, Wax Tablets of Dacia. 1873.

SUPPLEMENTI *Fasciculus Prior*: Inscriptions of Egypt, Asia, and of the Greek Provinces of Europe. 1889.

SUPPLEMENTI *Fasciculus Secundus*: Inscriptions of Illyricum, parts I.–III. 1892.

SUPPLEMENTI *Fasciculus Tertius*: Inscriptions of Illyricum, parts IV.–VII. Edict of Diocletian. Constitutions of the Emperors (Diplomata Militaria). 1893.

SUPPLEMENTI *Pars Posterior*: Egypt and Asia, Greek Provinces of Europe, Illyricum. 1902.

## VOLUMEN IV.

SUPPLEMENTUM *Pars Prior*: Tabulae Ceratae. 1898.

## VOLUMEN VI. Inscriptions of the City of Rome.

*Pars Prima* 1876, *Pars Secunda* 1882, *Pars Tertia* 1886, *Pars Quarta* (*Pars Prior* 1894, *Pars Posterior* 1902), *Pars Quinta*, containing inscriptions falsae, 1885, *Pars Sexta*, Indices (in preparation).

## VOLUMEN VIII. Inscriptions of Africa.

*Pars Prior*: Proconsular Africa, Numidia. 1881.

*Pars Posterior*: Mauretania. 1881.

SUPPLEMENTI *Pars Prima*. 1891.

SUPPLEMENTI *Pars Secunda*. 1894.

SUPPLEMENTI *Pars Tertia*. 1904.

## VOLUMEN XI.

*Pars Posterior, Fasciculus Prior*: Umbria. 1901.

## VOLUMEN XIII. Inscriptions of the three provinces of Gaul and of the two of Germany.

*Pars Prima, Fasciculus Prior*: Aquitania and Lugdunensis. 1899.

*Pars Tertia, Fasciculus Prior*: Instrumentum Domesticam. 1901.

## VOLUMEN XV.

*Pars Posterior, Fasciculus Prior*: Amphorae, Vasa Arretina, Lucernae, etc. 1899.

#### CHRONOLOGICAL LIST OF THE ROMAN EMPERORS

Within the past few years much attention has been given to the study of the imperial salutations of certain emperors. The following books and articles should be consulted on this subject:

*Real-Encyclopädie der Classischen Altertumswissenschaft*. Pauly-Wissowa. See articles, *Claudius*, *M. Aurelius*, *L. Verus*, *Commodus*.

In *Revue Archéologique*. 1901, II., p. 167; *Recherches sur la Date des Salutations Impériales de l'Empereur Néron*. Maynial; and 1904, I., p. 263; *La Chronologie des Salutations Impériales de Néron*. H. Stuart Jones.

*De Magistratibus Flaviorum*. Chambalu.

*Essai sur le Règne de Trajan*. C. De la Berge. Paris, 1877.

See also Supplement, *Cours d'Épigraphie Latine*. R. Cagnat. pp. 477-482.

Page 169. *Titles of Honor*. A recent article by O. Hirschfeld on this subject should be consulted. It is entitled *Die Rangtitel der Römischen Kaiserzeit*, in *Sitzungsbericht der Akad. zu Berlin*. 1901, p. 579.

The title *vir clarissimus* is found, not abbreviated, in the first century, abbreviated in the second, and becomes common only in the third century.

Page 176. *Titles of Honor.* The titles *vir eminentissimus, perfectissimus, egregius*, go back as far as the reign of Marcus Aurelius. The abbreviated form dates in the time of Septimius Severus. These titles gradually lose their value and in the latter half of the fourth century the title *perfectissimus* is applied to all grades of officials.

Pages 173–178. The student should consult *Die kaiserlichen Verwaltungsbeamten bis auf Diocletian.* O. Hirschfeld. Berlin, 1905.

Page 230. *Sepulchral Inscriptions.* See M. R. Weynand on *Form and Decoration des Röm. Grabsteine der Rheinlande im I Jahrhundert.* in *Bonner Jahrbücher*, 1902, p. 186 ff.

*Catalogue des Plombs de l'Antiquité.* Rostovtsew and Prou. Paris, 1900.

*Roman Lead Tesserae.* Rostovtsew. St. Petersburg, 1903.

*Tesserarum Urbis Romae et Suburbi Plumbeorum Sylloge.* Rostovtsew. St. Petersburg, 1903.

Page 258. Recent articles by Hülsen and Rostovtsew have gone far to prove that many of the tesserae shown by Blanchet in *Revue Archéologique*, 3d series, XIII., p. 225 ff., are *tesserae lusoriae*, used in games of chance as played on the *tabulae lusoriae*, the diagrams for games found e.g. on the floor of the Basilica Julia and at the entrance of the Ara Pacis. Hülsen, *Bullett. dell' Ist.*, 1896, p. 227, and Rostovtsew, *Bull. de la Commission Arch. de Pétersbourg*, 1904.

Page 336. In 4. Haverfield reads *Deceangicum*, and in 5. MET-LUT may be met(allum) Lut(udense).

Page 347. Hempl in *Transactions of American Philological Association*, 1902, p. 150, reads:

*Io. Vei. Sat. deivos goi med mitat nei ted endo cosmis virco sied. Ast [t]ed noisi opetoi Te[n]siai pakari vois. Duenos med feked en manom, [m]einom duenoi ne med malo[m] statod*; and interprets as follows:

May the gods Iove, Veiove and Saturn (grant to him) who is going to send me, that the maid (Proserpine) be not gracious to you; unless indeed you are willing to become reconciled to the excellent Tensia. A good man made me against the spirit of a dead man, the less may any evil persist through me to the disadvantage of the good man.

This inscription is on the cippus of tufa found under the pavement of black marble in the Roman Forum in May, 1899. The cippus is a pyramidal-shaped block of four sides, the apex of which

THE FORUM INSCRIPTION.  
(Vasari, Rome.).

is broken off, seriously mutilating the inscription, which is engraved on lines vertical to the base, although the letters are horizontal. The inscription, therefore, is not *κιωνηδόν*, i.e. with both lines and letters vertical to the base. The order of the letters is boustrophedon, the first line being written from below upward, the second from above downward. There are three lines on the first face and four in the remaining three, with one line on the edge between the first and fourth faces. The first two lines of the fourth face show the letters inverted in comparison with the other letters of the inscription. The letters face in accord with the direction of the line, with the exception of  $\leq$  and  $\cong$  in line 6. The letters are archaic, C for G, E for H, P for R, Q for Q,  $\leq$  for S, Y for V.

The inscription may possibly be the oldest Latin inscription in existence, and can be compared only with the Fibula Praenestina (p. 265) and the Duenos bowl (pp. 16 and 346). It certainly is the oldest known Latin inscription on stone. As so much has disappeared, it is impossible to make any satisfactory explanation of the entire inscription, although a number of words may be recognized. Thus, QVOI = *quoi*; HOI may be *honce*; SACROSESED = *sacer sit* (Festus, p. 318); RECEI = *regi*; EVAM may be [d]evam for *deivam*, though Comparetti prefers reading in the other direction, *mave[led]*. For KALATORES see Hülsen, *Röm. Mitth.* 1899, p. 262. IOVX-MENTA may be *iumenta* (Otto, *Archiv f. lat. Lexikographie*, XI, 1900, p. 435). Comparetti reads O DIOV ESTOD = *diu* (i.e. *interdiu*) *estod*. Gamurrini prefers OD IOVESTOD, i.e. *iusto*.

Attention should be called to the three-point and two-point form of word separation. See Fibula Praenestina for this use.

There is a great mass of literature on this inscription. This is summarized in *Rivista di Storia Antica*, IV. (1899), pp. 469-509; V. (1900), pp. 101-136, 351-359; VI. (1901), pp. 157-184. See also *Notizie degli Scavi*, 1899, pp. 158, 166; Comparetti, *Iscrizione arcaica del foro Romano*, 1900; Hülsen, *Das Forum Romanum*, 1904, p. 92; *Ancient Legends of Roman History*, Ettore Pais, New York, 1905.

The references in ancient literature to the site of this tomb of Romulus are found in Festus, p. 177: *Niger lapis in comitio locum funestum significat ut ali, Romuli morti destinatum, sed non usu obvenit, ut ibi sepeliretur, sed Faustulum nutricium eius ibi sepultum fuisse et Quinctilium avum. . . .*

and in Dionysius, I. 87; III. 1. From the latter writer we learn that Hostus Hostilius, grandfather of King Tullus Hostilius, had died at this place, and had been buried here by Romulus and Tatius; also that a lion marked the same spot where Faustulus was buried.

From Varro, who is quoted in *Schol. Cruq.* to Horace, *Epodes*, XVI. 13, we have *nam et Varro pro rostris sepulcrum Romuli dixit, ubi etiam in huius rei memoriam duos leones erectos fuisse constat, unde factum est ut pro rostris mortui laudarentur.* Cf. Porphyr. on the same passage in Horace. The words of Horace are *quaeque carent ventis et solibus ossa Quirini, nefas videre, dissipabit insolens.* This refers certainly to the general belief that the tomb of Romulus was behind the rostra.

All these passages go back to Varro, dating 116-27 B.C. The work of Festus is based on Verrius Flaccus, a contemporary of Augustus, and Dionysius of Halicarnassus wrote under the same Emperor.

## HARPER'S LATIN DICTIONARY

Founded on the translation of Freund's Latin-German Lexicon. Edited by E. A. ANDREWS, LL.D. Revised, Enlarged, and in great part Rewritten by CHARLTON T. LEWIS, Ph.D., and CHARLES SHORT, LL.D.

Royal Octavo, 2030 pages. Sheep, \$6.50; Full Russia, \$10.00

¶¶ The translation of Dr. Freund's great Latin-German Lexicon, edited by the late Dr. E. A. Andrews, and published in 1850, has been from that time in extensive and satisfactory use throughout England and America. Meanwhile great advances have been made in the science on which lexicography depends. The present work embodies the latest advances in philological study and research, and is in every respect the most complete and satisfactory Latin Dictionary published.

# LIVY AND HORACE

SELECTIONS FROM LIVY . . . . . \$1.50

Edited by HARRY E. BURTON, Ph.D., Professor of  
Latin, Dartmouth College. Text Edition, \$0.35

THESE selections are intended to give a more comprehensive idea of Livy's genius and versatility than can be had from the reading of any one or two books, and also to provide material dealing with the more significant and interesting periods of the early history of Rome. The passages are varied in nature, and are not confined to military history; they are not so short as to appear fragmentary. Each subject is presented in a series of continuous chapters, the notes supplying introductory and explanatory material for a proper understanding of the period. There is a comprehensive introduction, and a complete system of cross-reference.

HORACE. ODES, EPODES, AND CARMEN

SAECULARE . . . . . \$1.50

Edited by CLIFFORD H. MOORE, Ph.D., Professor  
of Latin, Harvard University. Text Edition, \$0.40

WHILE elementary matters have not been neglected in this edition, particular attention has been devoted to the literary side of Horace's work, and to his literary relations. The introduction, besides dealing with the poet's life and writings, discusses his lyric metres and peculiarities of syntax. The commentary is not limited to the baldest aids, but is intended to give such assistance in interpretation as may help students to some appreciation of Horace's art and charm. The relation of the poet to his Greek models, and especially his influence on subsequent Latin literature, are clearly shown.

# C I C E R O

CICERO. CATO MAIOR DE SENECTUTE, \$0.80

Edited by FRANK G. MOORE, Ph.D., Associate Professor of Latin and of Roman Archaeology, Dartmouth College. Text Edition, \$0.30

**A**N edition embodying much new critical material, and abundant grammatical helps. Unusual attention has been paid to those rhetorical features which are most likely to be misunderstood, to the confusion of the argument, while at the same time both grammar and rhetoric have been treated as a means to an end. The text is supplied with very full footnotes. The scholarly introduction sets forth the character of Cato clearly and impressively, and is supplemented by a comparative list of distinguished old men, and by verses by Pope Leo XIII on Frugality and the Green Old Age. There are critical notes, and an index.

CICERO. LAELIUS DE AMICITIA . . . \$0.75

Edited by CLIFTON PRICE, Ph.D., Assistant Professor of Latin, University of California. Text Edition, \$0.30

**T**HIS edition enables the student to understand and interpret the text, and contains enough elementary matter to adapt it to use in the best preparatory schools, and at the same time enough advanced material for the first year in college. The book is complete in itself, the grammatical principles being stated in the notes. The notes at the bottom of the page have been made very comprehensive, and the proper balance has been preserved between the notes on syntax and those on interpretation. The system of cross-reference, and the emphasis laid on the figures of speech and grammar, form strong features of the book.

# A HANDBOOK OF GREEK ARCHAEOLOGY

By HAROLD NORTH FOWLER, Professor of Greek,  
Western Reserve University, and JAMES RIGNALL  
WHEELER, Professor of Greek Archaeology and Art,  
Columbia University.

\$2.00

**T**HIS handbook is intended primarily as a text-book for students who are beginning the study of Greek archaeology. It will also be of service as a reference book to all students of Greek literature; to the general reader, who desires only a general knowledge of Greek art; and especially to persons interested in Greek art who visit museums in this country or in Europe. It gives a good conspectus of the whole field, with a short but authoritative treatment of each of the individual departments.

¶ The work aims to present briefly the essential facts, avoiding so far as possible things which are uncertain or which are matters of controversy. It traces in outline the progress which has been made in the knowledge of Greek archaeology through several centuries until the present day. In the discussions of prehistoric art, architecture, sculpture, terracottas, bronzes and work in gold and silver, coins, gems, vases, painting and mosaic, the progress of art is sketched with reference to its historical development, beginning in each case with its manifestation in archaic forms and following out the gradual advance of skill and the subsequent decline.

¶ The illustrations, 412 in all, have been carefully selected with the view of showing clearly the historical development. They have been taken from the most authoritative sources, and are in large part reproductions of the actual objects. The latest phases of archaeology are treated. A bibliography of the most helpful works for the study of each department, and an exhaustive index complete the volume.
